State of Alabama

Comprehensive Annual Financial Report

For the Fiscal Year Ended September 30, 2003

Front cover: The oak-leaf hydrangea, Hydrangea quercifolia Bartr, the official state wildflower of Alabama. Large spikes of white blooms in April and May rise above large green oak-shaped leaves. In summer, these blossoms turn a deep rose color and persist into the winter. The leaves turn red in the fall and the peeling bark of the stems and branches add to its attractive appearance. This medium-size (six to eight feet tall) deciduous shrub is found in every section of Alabama.

BOB RILEY Governor

DRAYTON NABERS Director of Finance ROBERT L. CHILDREE State Comptroller

March 31, 2004

To the Honorable Governor, Members of the State Legislature, and the Citizens of Alabama:

I am pleased to submit to you the Comprehensive Annual Financial Report (CAFR) for the State of Alabama for the year ended September 30, 2003. I believe the information as presented is accurate in all material respects and complies with Article IV, Section 72 of the *Constitution of Alabama of 1901* and Section 41-4-3(4) of the *Code of Alabama 1975*, as amended. The completeness and fairness of the presentation, including all disclosures, rests with the State's management. This report complies with Article V, Section 137 of the *Constitution of Alabama of 1901* and Section 36-16-1(6) of the *Code of Alabama 1975*, as amended, as the financial report for the State Auditor, State Treasurer, and State Comptroller.

Introduction to the Report

Report

The Comprehensive Annual Financial Report is divided into three sections:

- **The Introductory Section** contains this letter of transmittal, the Certificate of Achievement for Excellence in Financial Reporting for the September 30, 2002 CAFR, a list of principal officials at September 30, 2003, and the State organization chart.
- The Financial Section includes the Independent Auditor's Report, management's discussion and analysis, basic financial statements including notes, required supplementary information, combining and individual fund financial statements, and supplemental statements and schedules.
- The Statistical Section includes selected financial and demographic information about the State, with an emphasis on multi-year trends.

Internal Controls

The internal controls in the State's accounting system have been designed to comply with Alabama statutes requiring the audit of receipts and receivables; the determination of legality and correctness of each claim and expenditure; and that funds are appropriated, allotted, and on deposit in the State Treasury before any warrant is issued. The internal controls include manual pre-audit and automated system edits. As an additional control, the State Auditor's Office is responsible for a post-audit of the accounts and records of the Department of Finance and the State Treasurer's Office. These internal accounting controls provide reasonable, but not absolute, assurance regarding the safeguarding of assets against loss or unauthorized disposition and the reliability of the financial records from which the financial reports are prepared. The concept of reasonable assurance recognizes that the cost of a control should not exceed the resulting benefits.

Audit

This CAFR has been audited by the Department of Examiners of Public Accounts. The Examiners conducted their audit in accordance with generally accepted auditing standards and *Government Auditing Standards* issued by the Comptroller General of the United States. The Examiners' unqualified opinion appears at the beginning of the financial section of this report. The State will also undergo an audit of federal programs to conform to the requirements of the *Federal Single Audit Act Amendments of 1996* and the *U.S. Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Information relating to the single audit, including the schedule of expenditures of federal awards, and audit findings and recommendations, is issued in a separate report and will be available at a later date from the Examiners of Public Accounts.

Management's Discussion and Analysis

GASB Statement No. 34 requires that management provide a narrative introduction, overview and analysis to accompany the Basic Financial Statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is intended to complement MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditor's Report.

Profile of the Government

Reporting Entity

This report presents financial information on all of State government as a single reporting entity. While State law allows many State organizations to operate largely independent of the daily central control and scrutiny of the State Finance Department, State Auditor, and State Treasurer, this report combines the financial data of all State organizations in order to present a comprehensive picture of State finances. The numerous departments, agencies, elected officials, boards, commissions, authorities, colleges, universities, and other organizational units of the State are included in this report in accordance with standards established by the Governmental Accounting Standards Board. These standards make a distinction between organizations which are considered to be part of the primary government of the State and those which are component units. A component unit is defined as a legally separate corporate entity for which the State is considered to be financially accountable. The criteria used to determine financial accountability include the appointment of a majority of the governing board, the ability of the State to impose its will on the organization, and the potential for the organization to be a financial benefit or financial burden to the State. The State is also considered financially accountable for any organization having an independently appointed board if that organization is fiscally dependent on the State. An organization is fiscally dependent if it is unable to adopt a budget, set rates or charges, or issue bonded debt without the approval of the State. Component units can be reported as if they are a part of the primary government ("blended presentation") if they provide services solely to the government, but most of the State's component units do not and are therefore presented separately ("discrete presentation") in these financial statements. The largest of the blended component units includes the Corrections Institution Finance Authority, the Industrial Access Road and Bridge Authority, and the Building Renovation Finance Authority. The most significant discretely presented component units are the Alabama Water Pollution Control Authority, the Department of Mental Health and Mental Retardation, the Alabama Housing Finance Authority, the four-year colleges and universities, the Alabama Public School and College Authority, and the Twenty-first Century Authority. Note 1 to the financial statements provides a more complete description of the State's reporting entity.

Budgetary Controls

Budgetary control is exercised through the Executive Budget Office of the State Finance Department based on the Appropriation Acts of the State Legislature. Alabama's annual Appropriation Acts include legally adopted budgets for the General Fund, the Education Trust Fund, and other budgeted funds. The Appropriation Acts identify the source of funding and the programmatic (functional) areas for which expenditures are authorized. Both the Alabama Constitution and the statutes require a balanced budget for annual financial operations. In the event that revenue collections do not meet budget projections, the Governor is required to prorate appropriations and restrict allotments to prevent an overdraft in any fiscal year for which appropriations are made. Allotments of appropriations are made quarterly based on plans of operations submitted by the departments and agencies. These appropriations and allotments are enforced by automated edits that prevent allotments in excess of appropriations and expenditures in excess of allotments. Encumbrance accounting is utilized as purchase orders are issued to insure that purchase orders plus expenditures do not exceed allotment balances. Controls are further tightened at fiscal year end by checking that the total of purchase orders plus expenditures plus any obligations (accounts payable) incurred against fiscal year appropriations do not exceed allotments, and remaining allotments do not exceed cash in the Treasury.

Cash Controls

The State's controls on cash are fiscally very conservative. Constitutional Amendment 26 prohibits the State Comptroller from drawing warrants on the State Treasury unless there is money on hand to cover those warrants. This is more restrictive at the end of the fiscal year when obligations (encumbrances and accounts payable) cannot exceed the available cash balance (cash less warrants payable). This control is enforced by automated edits and tends to result in positive fund balances, even when GAAP basis accruals are made in the financial statements. Compliance with Amendment 26 is demonstrated in the following exhibits for the General Fund and the Education Trust Fund.

Summary of Receipts, Disbursements, and Cash Balances General Fund Last Five Fiscal Years - Cash Basis (Treasury Cash Only) (Amounts in Thousands)

	2003	2002	2001	2000	1999
Beginning Cash Balance, October 1	\$ 65,176	\$ 100,229	\$ 126,108	\$ 84,298	\$ 70,712

Unobligated Cash Balance, September 30	\$	7,500	\$	4,194	\$	5,801	\$	13,677	\$ 24,033		

General Fund and Special Revenue Fund Balances

The fund balances for the General Fund and the Education Trust Fund (ETF) for the last five fiscal years are presented in the following table. The fiscally conservative nature of Amendment 26 tends to produce positive fund balances every year. However, during the 1996 fiscal year, an error was made in the distribution of certain taxes which caused the ETF to have a deficit GAAP balance because it owed the General Fund \$29 million to correct the error. The debt between the two funds was cleared in fiscal year 2000. The ETF fund balance increased substantially in 2001 because GASB 33 required the accrual of taxes receivable. The dip in ETF fund balance in 2002 was the result of a dip in tax revenues combined with a delay in payment of corporate tax refunds in that year.

FUND BALANCES - GAAP Basis (Amounts in Millions)

	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
General Fund	\$ 163.0	\$ 152.0	\$ 112.0	\$ 87.9	\$ 90.9
Education Trust Fund	409.2	81.8	326.9	26.4	(13.6)

Economic Condition and Outlook

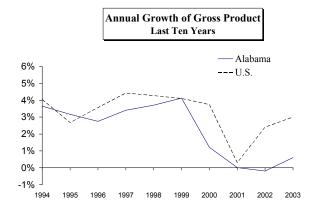

Alabama's economy has followed a path similar to the nation's economy over the past three years; a mild recession in 2001 and recovery since but with three consecutive years of job losses. Employment fell 1.2 percent in both 2001 and 2002 (22,450 and 22,092 jobs, respectively) and 0.7 percent in 2003 (about 13,000 jobs). Most of these job losses were in manufacturing but almost all sectors of Alabama's economy have lost jobs.

Alabama and the nation are not alone with regard to job losses in manufacturing. A recent study notes that manufacturing employment is declining worldwide. Globalization has been blamed for these job losses but other factors are also major contributors. These include productivity enhancements brought about by technological advancement, excess capacity, and fundamental structural change. Alabama has greatly benefited from globalization by being selected for plants of major manufacturers such as Mercedes, Honda, Hyundai, JVC, Toyota, and their suppliers. These plants tend to be very productive, highly efficient, and provide local citizens with very good, high wage jobs. Global competition also presents challenges for some sectors of the economy, particularly labor-intensive industries. For example, Alabama has lost almost 44,000 manufacturing jobs in the last three years, mostly in labor-intensive manufacturing industries such as apparel and textiles.

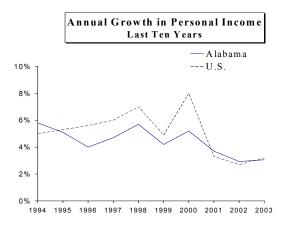

Output in the construction sector grew at 2.3 percent in 2003 but a slowdown in both industrial and commercial construction caused it to lose almost 800 jobs. Residential construction remained strong, particularly in Alabama's metropolitan areas. Some major industrial projects are underway in the State including those associated with the automotive industry. In general, both industrial and commercial construction industries grow slowly.

Despite strong consumer spending in recent years, competitive pressure and excess capacity in retailing and the lack of pricing power have hurt the trade sector. These pressures are expected to continue and make job cuts a serious option for retailers to remain profitable. The trade sector lost almost 3,300 jobs in 2003 in spite of the over 3 percent rise in consumer spending.

Alabama's economy is expected to grow by 3.8 percent in 2004 with real output, the total value of goods and services produced (expressed in 1996 dollars), rising to \$121.6 billion. With the exception of textiles and apparel, real output is forecasted to increase for all industries. Nonagricultural employment should increase by 0.8 percent with the addition of about 15,500 jobs.

Major Initiatives

Governor's Efforts to Reduce the Cost of State Government

During his first ninety days in office, the Governor saved more than \$210 million within the 2003 and 2004 budgets. Some of the costs which have been cut include: (1) \$39 million in pass-through pork blocked, (2) reduced the Governor's office payroll by 20 percent saving \$1.2 million, (3) revised the budgets in state agencies by \$82.5 million, (4) frozen \$29.6 million in annual merit raises, (5) trimmed the state's aviation staff by 60 percent saving \$250 thousand, (6) created a preferred prescription drug program for Medicaid saving \$30 million, (7) reduced the cost of buying and operating state vehicles by \$7 million, (8) trimmed costs through joint-purchasing agreements and other methods saving \$11.7 million, (9) lowered the excessive amount of state employee travel saving \$6.1 million, (10) ordered the state to renegotiate lease agreements for the ABC stores saving \$136 thousand annually, and (11) hired a legal team to end a Department of Transportation lawsuit that costs the state about \$500 thousand in litigation fees monthly, totaling \$200 million so far.

AMBER Alert System

The Governor announced the activation on June 1, 2003 of Alabama's AMBER Alert program, a voluntary partnership among the Governor's Office, law enforcement agencies and broadcasters to protect Alabama's children. Statistics show that in the most serious child abduction cases, 74 percent of the children murdered by non-family members are killed within the first three hours of their abduction. The AMBER plan focuses on those first critical moments immediately after an abduction occurs to disseminate as much useful information as possible to the public to assist in the search for the child.

Alabama and Mississippi Economic Development Partnership

The Governors of Alabama and Mississippi signed a letter of intent on June 10, 2003 to begin an economic development collaboration in the neighboring east and west regions of the two states. The Black Belt's poverty stretches across the state line, and so does the lack of opportunity. Governor Riley said he envisions an industrial park located partially in Alabama and partially in Mississippi, with both states sharing in the expenses of recruiting a major industry, and also sharing the economic impact of jobs and revenue. Combining the efforts and talents of both states' congressional delegations will provide an extra incentive for automobile, aerospace and other companies to choose the location.

Alabama Department of Homeland Security

The Governor signed a bill on June 18, 2003 making Alabama the first state to establish a Department of Homeland Security. The department will coordinate efforts to prevent terrorism, protect citizens and respond to acts of terrorism. It will be similar to the federal department created after the 2001 attacks on the World Trade Center and the Pentagon.

Department of Transportation

On July 22, 2003, the 11th U.S. Circuit Court of Appeals ruled for the State on two points of the Reynolds anti-discrimination lawsuit against the Department of Transportation and, in its written opinions, signaled its readiness for the long continuing litigation to come to an end. Bringing this costly lawsuit to a rapid end is one of this administration's priorities. Many think the strong stand was the result of an unprecedented letter the Governor sent to the court asking for their help in bringing the lawsuit to a resolution.

Plans for Mental Health Consolidation

On August 15, 2003, the Governor announced his approval of the Mental Health Commissioner's plan to consolidate several of the State's facilities for mental health services. Improved services can be provided to more clients while, at the same time, saving taxpayer dollars. The large majority of persons served by the department are served through community contract providers throughout the State. Alabama has served as a national pace setter for the development of community based mental health care, due in part to the Wyatt case and it's emphasis on reduced census in State facilities and the development of quality community services. The Alabama consolidation plan has received broad support from advocacy groups across the State.

New Jobs in Alabama's Future

In February 2003, the Governor announced that Boeing will bring 160 additional high-paying jobs to its Delta launch vehicle manufacturing and assembly plant in Decatur. In April the Governor announced two new Hyundai supplier plants to be located in Lowndes County. Also, in April the Governor announced that Samlip Industrial Company will invest more than \$53 million and hire up to 400 employees in Alexander City. In June 2003, the Governor announced that Brose Corporation will build a \$13 million automobile supplier plant in Tuscaloosa, bringing 80 new jobs to Alabama.

Financial Information

The MD&A provides an overview of the State's financial activities addressing both governmental and business-type activities reported in the government-wide financial statements. In addition, MD&A focuses on the State's major funds such as the General Fund, Education Trust Fund, Alabama Trust Fund, and Unemployment Compensation Trust Fund.

Cash Management

The State Treasurer has the responsibility for the investment of cash balances. Due to statutory requirements, treasury cash is primarily invested in time deposit - open accounts, repurchase agreements with Alabama banks, and agency securities.

The State Treasurer has placed considerable emphasis on cash management. In cooperation with State agencies, the receiving of funds into the State Treasury is expedited, with all available funds being invested. Interest earnings during the 2002-2003 fiscal year were as follows:

Time Deposit - Open Accounts- Regular \$ 10 million
Time Deposit - Open Accounts- Linked Deposits \$ 435 thousand
Repurchase Agreements \$ 7 million
Other Investments \$ 1 million

Interest income is deposited in the State's General Fund to be appropriated by the Legislature for government operations. In addition to the management of the investment of these funds, the State Treasurer has statutory authority to invest for several state agencies, with interest earnings being credited to those agencies.

Debt Administration

Alabama has traditionally received high bond ratings from both Standard and Poor's Corporation and Moody's Investors Service due in large part to the commitment to sound fiscal management. Currently, the exception is the upper medium bond ratings for the Tobacco Settlement Revenue Bonds issued by the Alabama 21st Century Authority, a component unit of the State. Both the Alabama Constitution and the statutes require a balanced budget for annual financial operations. The State Constitution prohibits the issuance of debt. Therefore, the only way to issue general obligation debt is by amending the Constitution through a statewide vote of the people. The State does issue revenue bonds which are limited obligations of public corporations governed by State officials. Those revenue bonds are backed by a pledge of specific revenue sources for which the annual collections are generally predictable. The total outstanding general obligation bond indebtedness as of September 30, 2003, was \$490.1 million and the total outstanding revenue bond indebtedness for the primary government was \$677.4 million. The total outstanding revenue bond indebtedness for component units was \$5.041 billion. The total outstanding bond indebtedness for the reporting entity at September 30, 2003, was \$6.2 billion. The State's general obligation bond debt per capita increased to \$109 during the year. The ratio of general obligation bond debt to assessed property valuation rose to 1.11 percent, and the ratio of general obligation debt to personal income increased to 0.43 percent.

The State of Alabama issued no general obligation bonds in fiscal year 2003. The Alabama Public School and College Authority issued \$27,705,000 in new bonds. The Water Pollution Control Authority issued \$30,985,000 in new bonds. The Housing Finance Authority issued \$75,268,000 in new bonds and called approximately \$167,583,000 of bonds in advance of their scheduled maturities. The University of Alabama in Birmingham issued \$81,385,00 in refunding bonds. The refunding bonds were used to refund all outstanding Series 1993 bonds. The Alabama Water Pollution Control Authority issued \$64,035,000 in refunding bonds. The refunding bonds were used to refund all outstanding Series 1992Aand 1992B bonds. The University of Alabama in Tuscaloosa issued \$54,610,000 in new bonds. The University of Alabama in Huntsville issued \$1,335,000 in new bonds. Auburn University issued \$87,005,000 in refunding bonds. The refunding bonds were used to refund all outstanding Series 1993 bonds. The University of Montevallo issued \$3,385,000 in new bonds. Jacksonville State University issued \$15,000,000 in new bonds. The Tennessee Valley Exhibit Commission issued \$2,610,000 in refunding bonds. The refunding bonds were used to refund all outstanding Series 1992 bonds. The Alabama Corrections Institution Finance Authority issued \$4,000,000 in new bonds and \$17,530,000 in refunding bonds. The refunding bonds were used to refund all outstanding Series 1993B bonds. The State Industrial Development Authority issued \$5,000,000 in new bonds. Alabama State University issued \$25,000,000 in new bonds.

Pension Trust Funds

The State operates three major pension funds, the Teachers' Retirement System (TRS), Employees' Retirement System (ERS), and Judicial Retirement Fund (JRF). Expressing the actuarial value of assets as a percentage of the actuarial accrued liability provides one indication of the respective retirement systems' funding status on a going-concern basis. Analysis of this percentage over time indicates whether the respective system is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the retirement system. Percentages funded as of the latest actuarial valuation date, September 30, 2002, for ERS (State employees and State policemen) and JRF were 97.2 and 84.7 percent, respectively. The percentage funded for TRS as of June 30, 2003, was 93.6 percent.

Risk Management

The State manages risk through risk control and risk financing to minimize the adverse effects of certain types of losses. Risk control is managed by such means as encouraging that automatic sprinkler systems in insured properties are adequate and in full functioning order, carefully investigating and defending claims to minimize loss potential, managing care programs, and promoting healthy employee programs. Risk financing includes self-insurance plus excess insurance and reinsurance through several different funds. The State Insurance Fund, which insures property against fire and casualty losses, has excess insurance and reinsurance to cover any additional damage amounts, plus earthquake and flood damage. The General Liability Trust Fund protects state employees against the risk of loss from employment-related liability claims. Automobile liability is fully reinsured. The State Employee Injury Compensation Trust Fund, which provides benefits to eligible state employees for job-incurred injuries, is self-insured. The State Employees' Insurance Fund, which provides health insurance benefits for current and retired state employees and their dependents, is self-insured. The Public Education Employees' Health Insurance Fund, which provides health benefits for current and retired employees and their dependents of state educational institutions, is also self-insured.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Alabama for its Comprehensive Annual Financial Report for the fiscal year ended September 30, 2002. This was the fifth consecutive year that the government has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current Comprehensive Annual Financial Report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgements

Production of this report would not have been possible without the assistance of all state organizations which supplied financial information vital to the accuracy of this report. As we strive to produce this report in future years and to further enhance its quality, the continued support and cooperation of all agencies remain essential. I also express my appreciation to my entire staff in the Division of Control and Accounts, whose daily efforts to improve the accountability of state government make the quality of this report possible.

Respectfully submitted,

Robert & Children

Robert L. Childree State Comptroller

Certificate of Achievement for Excellence in Financial Reporting

Independent Auditor's Report

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Alabama, as of and for the year ended September 30, 2003, which collectively comprise the State of Alabama's basic financial statements listed in the table of contents. These financial statements are the responsibility of the State of Alabama Department of Finance and management of the State of Alabama. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the Employees' Retirement System, the Teachers' Retirement System, the Public Employees' Individual Retirement Account Fund, the Public Employees' Individual Retirement Fund/Deferred Compensation Plan (RSA-1), the Public Education Employees' Health Insurance Fund, the State Employees' Insurance Board, the Alabama Health Insurance Plan, the Local Government Health Insurance Program, the Alabama Educational Television Foundation Authority, the Alabama Higher Education Loan Corporation, and the Alabama Space Science Exhibit Commission, were not audited in accordance with Government Auditing Standards. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Alabama as of September 30, 2003, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated March 31, 2004, on our consideration of the State's internal control over financial reporting and our tests of the State of Alabama's compliance with certain provisions of laws, regulations, contracts, and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

The Management's Discussion and Analysis and Required Supplementary Information, listed in the accompanying table of contents, are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the Required Supplementary Information. However, we did not audit the information and do not express an opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Alabama's basic financial statements. The introductory section, the combining and individual fund statements and schedules, and the statistical section, listed in the accompanying table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund statements and schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly presented in all material respects in relation to the basic financial statements taken as a whole. The Introductory Section and the Statistical Section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

RONALD L. JONES
Chief Examiner of Public Accounts

March 31, 2004

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following is a narrative overview and analysis of the financial activities of the State of Alabama for the fiscal year ended September 30, 2003. Please consider the information presented here in conjunction with the letter of transmittal, which is located in the Introductory Section of this report, and the State's financial statements, which immediately follow this discussion and analysis.

Financial Highlights

- The State's net assets increased by \$997.4 million during fiscal year 2003. The assets of the State exceeded its liabilities at the close of the fiscal year by \$9.6 billion (*net assets*). Of this amount, \$4.9 billion was invested in capital assets (net of related debt), \$2.2 billion was in the Alabama Trust Fund, and another \$2.0 billion was restricted for various purposes. The remaining \$429 million in net assets was unrestricted.
- The Change in Net Assets in governmental activities was a positive \$1.05 billion. However, \$499.6 million of this can be attributed to the capitalization of infrastructure and construction in progress. An additional \$200 million can be attributed to the State eliminating the previous year's backlog of corporate tax refunds.
- The business-type activities reported net assets at year-end of \$972 million, a decrease of \$49 million for the fiscal year.
- The State's total debt at the end of the fiscal year was \$1.498 billion, a decrease of \$35 million, which represents the net difference between new issuances and payments and refundings of outstanding debt. During the year the State issued \$29 million in new revenue bonds. There were no new general obligation bonds during fiscal year 2003, and the payments on general obligation bonds totaled \$48 million during the year.
- As of the close of the current fiscal year, the State's governmental funds reported combined ending fund balances of \$4.4 billion. Approximately \$1.4 billion of this amount is unreserved fund balance.
- On a budgetary basis, General Fund revenues and other sources exceeded expenditures and other uses by \$83 million. However, on a GAAP (Generally Accepted Accounting Principles) basis, General Fund revenues and other sources exceeded expenditures and other uses by \$11 million. The Budgetary Comparison Schedule in Required Supplementary Information reconciles these amounts and lists the accounting basis differences and timing differences.

Overview of the Financial Statements

This discussion and analysis is an introduction to the State of Alabama's basic financial statements. The State's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains required supplementary information and other supplementary information in addition to the basic financial statements.

Government-wide Financial Statements

The *government-wide financial statements* provide a broad overview of the State's financial position and activities measured in a manner similar to a private-sector business. Assets, liabilities, revenues, expenses, gains, and losses are measured and reported using the economic resources measurement focus and accrual basis of accounting. The government-wide financial statements exclude fiduciary activities.

The *Statement of Net Assets* presents information on all of the State's assets and liabilities at the end of the fiscal year. The difference between the State's assets and its liabilities is its net assets. Increases or decreases in net assets from year to year may serve as a useful indicator of whether the financial position of the State is improving or not.

The *Statement of Activities* presents information showing how the State's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the State that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the State include general government, economic development and regulation, education and cultural resources, natural resources and recreation, health-physical and mental, social services, protection of persons and property, and transportation. Examples of business-type activities of the State are operation of the State's system of community and technical colleges, unemployment compensation services, operation of facilities for the distribution and sale of alcoholic beverages, and services for shippers at the Port of Mobile.

The government-wide financial statements include not only the State of Alabama itself (known as the *primary government*), but also legally separate *component units* for which the State is financially accountable. The major *component units* include the Public School and College Authority, Housing Finance Authority, Water Pollution Control Authority, Department of Mental Health, University of Alabama, Auburn University, and University of South Alabama. Financial information for the *component units* is reported in a separate column from the financial information presented for the primary government. The government-wide financial statements can be found immediately following this discussion and analysis.

Fund Financial Statements

A *fund* is a fiscal and accounting entity with a self-balancing set of accounts that the State uses to keep track of specific sources of funding and spending for a particular purpose. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the State can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds

Most of the State's basic services are reported in *governmental funds*. The governmental fund financial statements focus on near-term inflows and outflows of resources of these funds and the balances of those resources available at year-end. These funds are measured and reported using the current financial resources measurement focus and the modified accrual basis of accounting.

Because the focus of *governmental funds* is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund Balance Sheet and the governmental fund Statement of Revenues, Expenditures, and Changes in Fund Balances are followed by a reconciliation to the government-wide statements.

The types of funds which are categorized as governmental funds are the *General Fund, special revenue funds, capital projects funds, debt service funds, and permanent funds*. Information is presented separately in the governmental fund Balance Sheet and in the governmental fund Statement of Revenues, Expenditures, and Changes in Fund Balances for the General Fund, Alabama Trust Fund, Education Trust Fund, Public Road and Bridge Fund, Public Welfare Trust Fund, and Alabama Medicaid Fund, all of which are considered to be major funds. Data from the other governmental funds are combined into a single aggregated column on the basic financial statements. Individual fund data for each of the nonmajor governmental funds can be found in the combining and individual fund statements and schedules section of this report.

Proprietary funds

Services for which the State charges customers a fee are generally reported in *proprietary funds*. The State maintains two different types of proprietary funds: enterprise funds and internal service funds. Like the government-wide statements, proprietary funds use the accrual basis of accounting.

Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. These funds report activities that provide supplies and services to the general public in a manner similar to private business enterprises. The major enterprise funds are the Unemployment Compensation Trust, State Port Authority, Alabama College System, Public Education Employees' Health Insurance Plan, and the Alcoholic Beverage Control Board. The major enterprise funds are each presented in separate columns, but the nonmajor enterprise funds are aggregated in a single column.

Internal service funds report activities that provide supplies and services to other state agencies on a cost-reimbursement basis. These funds are reported as governmental activities on the government-wide financial statements. These funds provide computer services, information technology, telecommunications, rental of office buildings, janitorial services, building maintenance, printing services, manufacturing activities, health insurance coverage for state employees, and liability protection. The internal service funds are aggregated in a single column on the proprietary fund statements.

Fiduciary funds

The State acts as a trustee or fiduciary for its employee pension plans. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The State's fiduciary activities are reported in separate Statements of Fiduciary Net Assets and Changes in Fiduciary Net Assets. These funds, which include *pension and other employee benefits*, *private-purpose*, *and agency funds* are reported using accrual accounting. The government-wide financial statements exclude fiduciary fund activities and balances because the resources of those funds are not available to support the State's own programs.

Notes to the Financial Statements

The notes to the financial statements are an integral part of the financial statements. They explain amounts shown in the financial statements and provide additional information that is essential to the fair presentation of the government-wide and fund financial statements.

Required Supplementary Information

In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information* which includes (1) budgetary comparison schedules reconciling the budgetary fund balances and generally accepted accounting principles fund balances at fiscal year-end, (2) information about infrastructure assets reported using the modified approach, and (3) a schedule of funding progress for the Employees' Retirement System.

Other Supplementary Information

Other supplementary information includes combining financial statements for nonmajor governmental funds, nonmajor enterprise funds, internal service funds, fiduciary funds, and nonmajor discretely presented component units. These funds are added together by fund type and presented in single columns in the basic financial statements.

Government-wide Financial Analysis

Net assets may serve over time as a useful indicator of a government's financial position. The State's combined assets exceeded liabilities by \$9.58 billion as of September 30, 2003.

The largest component (51.3%) of the State's net assets reflects its investment in capital assets, such as land, buildings, equipment, and infrastructure (e.g., roads, bridges, tunnels), less any related debt used to acquire those assets that is still outstanding. The State uses these capital assets to provide services to its citizens; consequently, these assets are not available for future spending. Although the State's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources since the capital assets themselves cannot be used to liquidate these liabilities.

90.8 percent of the State's net assets that are unrelated to capital assets are restricted and represent resources that are subject to either external restrictions or legislative restrictions on how they may be used. The remaining balance of \$429 million is unrestricted net assets and may be used to meet the State's ongoing obligations that are not funded by resources that are restricted. Internally imposed designations of resources are not presented as restricted net assets.

At the end of fiscal year 2003, the State was able to report positive balances in all three categories of net assets, both for the government as a whole as well as for its separate governmental and business-type activities.

Net Assets as of September 30 (Amounts in Thousands)

	Governmental Activities			tivities	Business-type Activities				Total Primary Government			
	2	2003		2002		2003		2002		2003		2002

Invested in Capital Assets,												
Net of Related Debt	4	,488,200		3,814,155		425,588		433,667		4,913,788		4,247,822
Restricted	3	,869,559		3,145,156		365,594		470,196		4,235,153		3,615,352
Unrestricted		248,839		600,401		180,608		117,372		429,447		717,773
Total Net Assets	\$ 8	3,606,598	\$	7,559,712	\$	971,790	\$	1,021,235	\$	9,578,388	\$	8,580,947

The following table was derived from the government-wide Statement of Activities. As a result of the excess of revenues over expenses, the State's net assets increased by \$997.4 million during fiscal year 2003. \$511.4 million of this increase was the result of increases in the amount of capital assets reported, of which \$499.6 million of the increase came from infrastructure alone. Taxes Receivable rose by \$313 million, partly because of an improved economy but mostly because the State was \$200 million behind in processing corporate tax refunds in the previous year. While the amount owed to corporations in the previous year should have been reported as a payable rather than netted against Taxes Receivable, the overall effect on net assets is the same. Taxes provided \$5.7 billion, or approximately 36 percent, of the State's total revenue. Education and Cultural Resources made up \$4.645 billion, or 31 percent, of the State's expenses, and \$4.217 billion, or 28 percent, was spent on Health-Physical and Mental. Over \$3.58 billion in that category was spent on Medicaid programs.

Governmental Activities

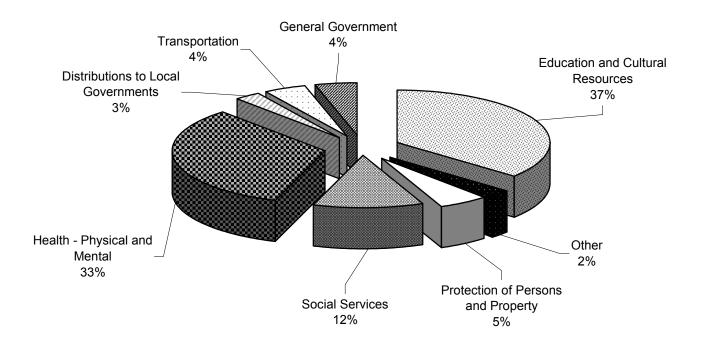

Revenue from all tax types represents 40 percent of total governmental revenues earned during fiscal year 2003. Total revenues for the governmental activities in fiscal year 2003 were \$14.1 billion. General revenues of the governmental activities were \$6.9 billion, of which the largest components are income taxes of \$2.5 billion and sales and use taxes of \$1.7 billion.

Revenues - Governmental Activities Fiscal Year Ended September 30, 2003

The two largest activities (1) Education and Cultural Resources and (2) Health-Physical and Mental together accounted for 70 percent of the governmental activities expenses for fiscal year 2003. Social Services accounted for 12 percent of the governmental activities expenses.

Expenses - Governmental Activities Fiscal Year Ended September 30, 2003

Business-type Activities

Net assets of the business-type activities decreased by \$49 million during fiscal year 2003. Revenues of business-type activities totaled \$1.8 billion. These activities generated program revenues of \$1.735 billion and general revenues of \$41 million. The program revenues consisted of \$1.39 billion of charges for services, \$324 million of operating grants and contributions, and \$21 million of capital grants and contributions. The total expenses for business-type activities were \$2.053 billion. The largest business-type activities involved the Public Education Employees' Health Insurance Plan, Alabama College System and Unemployment Compensation services. The net assets of the Alabama College System increased by \$52.4 million, the net assets of the Unemployment Compensation Trust decreased by \$72.3 million and the Public Education Employees' Health Insurance Plan decreased by \$37.8 million.

Financial Analysis of the Government's Funds

Governmental Funds

The focus of the State's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the State's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

At the end of fiscal year 2003, the governmental funds reported combined ending fund balances of \$4.4 billion. Of this total amount, \$2.53 billion is reserved and is not available for spending because it has already been legally dedicated for various contractual commitments, court settlements, and other purposes. The largest total reserved amount of \$2.27 billion is for the Alabama Trust Fund which is a special revenue fund. The Alabama Trust Fund originally was a permanent fund but is now a special revenue fund because of an amendment to the *Constitution of Alabama* which allows spending of principal equal to the previous year's unrealized gains. A portion of the reserved balance of the Alabama Trust Fund is \$68 million, and it is legally reserved as an Education Rainy Day Account for the Education Trust Fund. \$474 million of the Governmental Funds has been designated for various capital projects and debt service, leaving \$1.4 billion as unreserved and undesignated.

The General Fund is the chief operating fund of the State. At the end of the current fiscal year, unreserved fund balance of the General Fund was \$158 million, and reserved fund balance was \$5 million. Total fund balance increased by \$11 million during the fiscal year. Tax revenue was down by \$42 million. Because of federal grants and reimbursements of \$76 million the total revenue was actually \$23 million more than last year. The federal government approved a one-time funding to help the states. Alabama's share was \$150 million. The funds that were received and not used in fiscal year 2003 will be used in fiscal year 2004. Expenditures increased by \$34 million. Protection of Persons and Property increased \$40 million. \$30 Million of this increase was for the Department of Corrections. Health—Physical and Mental decreased \$12 million mainly because the fiscal year 2003 budget for the Medicaid Agency was \$10 million less than fiscal year 2002.

The Education Trust Fund (ETF) is the largest governmental fund of the State. Revenues credited to the ETF are used for the support, maintenance, and development of public education in Alabama, debt service and capital improvements related to educational facilities, and other functions related to educating the State's citizens. Programs and agencies supported by the ETF include K-12 education, public library services, performing and fine arts, various scholarship programs, the State's education regulatory departments, and two and four-year colleges and universities. Funding from the ETF is also provided to non-state agencies that provide educational services to the people of Alabama, including the arts, disease counseling and education, and youth development. Various tax sources are allocated to the ETF, the largest of which are income tax, sales tax, utility tax, and use tax. Tax revenues for fiscal year 2003 were up approximately \$583 million as compared to fiscal year 2002 but the expenditures increased by \$93 million. The fund balance increased by approximately \$340 million because of an increase in tax revenue, elimination of a \$200 million backlog in corporate income tax refunds, and an improved economy.

The Alabama Trust Fund consists of income from the sale or lease of rights for offshore exploration and drilling for oil and gas off the Alabama coast. Investment income is used to support the General Fund, Forever Wild Land Trust, and a variety of state and local capital projects and debt service. During the 2003 fiscal year, the Alabama Trust Fund's total fund balance increased by \$90 million. Investment income and other revenues increased by \$284 million. The \$121 million increase in the investment income is a result of the growing economy. Other revenues, which consist mainly of natural gas royalties, increased by \$163 million. This increase was primarily due to the fluctuation of the price of natural gas, but compensatory damages from lawsuit settlements and a one percent increase in production from fiscal year 2002 to fiscal year 2003 also contributed to this increase.

STATE OF ALABAMA

Medicaid accounts for the portion of the Medicaid program that is funded by Federal revenues and other non-state revenue sources. Total fund balance for Medicaid increased by \$14 million as compared to a decrease in fiscal year 2002 of \$96 million. Other revenue, which consists primarily of disproportionate public hospital receipts, increased \$73 million. The federal medical assistance percentage also increased from fiscal year 2002 to fiscal year 2003.

The Public Road and Bridge Fund is the general operating fund of the Department of Transportation and receives all state revenues for that department, all federal aid reimbursements, and all miscellaneous receipts. Amendment No. 23 (as amended by Amendment No. 354) to the *Constitution of Alabama* provides that monies derived from any fee, excise or license taxes levied by the State on motor fuels shall be expended for the cost of construction, reconstruction, maintenance and repair of public highways and bridges; the cost of highway rights-of-way; the payment of highway obligations; the cost of traffic regulations; and the expense of enforcing state traffic and motor vehicle laws. Revenues and expenditures decreased in fiscal year 2003 as compared to fiscal year 2002. The expenditures for fiscal year 2003 decreased primarily because of weather conditions. The decrease in federal grants and reimbursements were lower because of a decrease in the expenditures for the construction programs that are federally-funded. The fund balance decreased by \$9 million to a total fund balance of \$480 million. \$97 million of that fund balance is committed in the form of encumbrances for various contracts and purchase orders, \$18 million is in inventory of materials on hand, and \$35 million is reserved by statute for replacement of equipment. The remaining \$330 million is unreserved and will be used for the general purposes of the fund in the future.

The Public Welfare Trust Fund accounts for the administration of a broad range of social and protective service programs that provide financial assistance to individuals. The Public Welfare Trust Fund total fund balance decreased by \$1 million in fiscal year 2003. That amount is less than one percent of the fund revenues and fund expenditures for the year and thus is within the range of normal annual fluctuation for fund balance.

Proprietary Funds

The State's proprietary fund financial statements provide the same type of information found in the government-wide financial statements, but in more detail. Total net assets for all enterprise funds decreased by \$49 million in fiscal year 2003. The net assets of the Unemployment Trust Fund decreased by \$72 million in fiscal year 2003 as compared to a decrease of \$12 million in fiscal year 2002. The fiscal year 2003 other nonoperating revenues as compared to fiscal year 2002 for the Unemployment Compensation Trust decreased by \$100 million primarily because of Federal Reed Act funds received in fiscal year 2002. Also, the weekly maximum unemployment compensation was increased effective July, 1, 2002 from \$190 to \$210. The State Port Authority's increase in net assets for fiscal year 2003 was \$5 million. A significant contributor to this increase in net assets was \$12 million in fiscal year 2003 as compared to \$7 million in fiscal year 2002 revenue recognized related to capital grants and contributions for reimbursement of capital costs. The Alabama College System's net assets increased \$52 million as compared to \$41 million in fiscal year 2002. The Alcoholic Beverage Control Board's net assets remained consistent from the prior year. The Board is required by law to distribute all of its profits and cannot own real property; therefore, net assets generally will always remain at a slight deficit. The Public Education Employees' Health Insurance Plan decreased by \$38 million because of an increase in claims expense as a result of rising healthcare costs.

Budgetary Highlights

General Fund

The budget for the General Fund was increased by approximately \$53 million during fiscal year 2003. \$45 million of this increase was recorded as expenditures and \$8 million as Transfers Out on the Budgetary Comparison Schedule. Supplemental appropriations were approximately \$40 million. Conditional and other appropriations were approximately \$13 million. Conditional appropriations were mentioned in the original General Fund appropriation bill, but none of the agencies included conditional amounts in their original budgets. Some expenditures are required by law to be fully funded, and estimated amounts are approved in the General Fund appropriation bill. Increases to these estimated amounts do not require a new bill and are included as other appropriations. Emergency appropriations cannot exceed two percent of the total amount appropriated. In fiscal year 2003 there were no emergency appropriations. The largest increase in the budget was approximately \$30 million for the Department of Corrections. These funds were appropriated to bring the Department of Corrections into full compliance with the February 14, 2003 court order issued from the Circuit Court of Montgomery. On a budgetary basis, General Fund revenues and other sources exceeded expenditures and other uses by \$83 million. However, on a GAAP (Generally Accepted Accounting Principles) basis, General Fund revenues and other sources exceeded expenditures and other uses by \$11 million. The Budgetary Comparison Schedule in Required Supplementary Information reconciles these amounts and lists the accounting basis differences and timing differences.

Capital Asset and Debt Administration

Capital Assets

At the end of fiscal year 2003, the State had invested \$5.7 billion, net of accumulated depreciation, in a broad range of capital assets (see the table below). Depreciation charges for the fiscal year totaled \$96.4 million.

Capital Assets as of September 30 (Amounts in Thousands)

As allowed by GASB Statement No. 34, the State has adopted the modified approach to reporting roadway and bridge infrastructure assets. Under the modified approach, the State expenses maintenance and preservation costs and does not report depreciation expense. As also allowed by GASB Statement 34, the State has elected to phase in the reporting of infrastructure. The cost of infrastructure reported this year represents only the amount of infrastructure capitalized in the current year. The cost reported as Infrastructure Construction in Progress represents road and bridge construction projects not yet complete. The amount of infrastructure completed and capitalized in years prior to fiscal year 2002 is not expected to be reported until next year.

Extensive project documentation is required to meet various federal and state guidelines concerning the construction of infrastructure. The completeness of this documentation affects the timing of project capitalization. The State capitalizes infrastructure when all costs for a project are incurred and all project documentation is satisfactorily completed, filed and accepted with the appropriate entities. Projects that meet the cost and documentation criteria are closed, and appropriate entries are made to adjust the Infrastructure Construction in Progress and Infrastructure asset accounts annually. Due to the documentation requirements, there can be substantial time lags between the date a project is put into service on the State's roadway network and the date the project is capitalized. A significant portion of Infrastructure Construction in Progress consists of projects that have been put into service and maintenance costs could have been incurred.

Roadway assets accounted for under the modified approach included approximately 10,846 miles of State maintained highways. The State maintains an asset management system to measure and monitor the condition of those highways. The State expects to maintain the roads at a rating within the range of 55-70, which is considered "satisfactory," meaning that only routine patching and sealing maintenance is required. The measured average rating of the roadways in the most recent condition assessment actually exceeded the State's goal, with a weighted average rating of 78.9.

The State maintains 5,583 bridges and culverts. The State expects those bridges and culverts to be maintained at a rating within the range of 5 - 6.99, which is considered "satisfactory," meaning the structural elements are sound but have minor deterioration. The actual weighted average rating for the most recent condition assessment was 6.69, in the upper end of the satisfactory range.

In both fiscal years 2003 and 2002, the State estimated it would need to spend \$205 million to preserve and maintain all roadway and bridge assets at or above the State's established condition levels. In fiscal years 2003 and 2002, the State spent \$124 million and \$186

million, respectively for maintenance and preservation of the roadway and bridge assets. Even though actual spending on maintenance and preservation of infrastructure of infrastructure assets fell below estimated, condition levels are expected to continue to meet or exceed the State's established condition levels, as supported by the most recent condition assessment.

More detailed information about the State's capital assets is presented in Note 3 to the financial statements and in the Required Supplementary Information section.

Long-term Debt

The only method under which general obligation debt can be incurred is by amendment to the *Constitution of Alabama*. The debt prohibition does not apply to debts incurred by separate public corporations functioning as State instrumentalities. The revenue bonds issued by these corporations are limited obligations of the corporation, not general obligations of the State, and the full faith and credit of the State is not pledged for their repayment. Certain revenues, usually earmarked taxes or revenues generated from the project financed, are pledged for the payment of the debt. Some of these corporations are blended with the primary government, and some are reported discretely. The State and its component units issue serial and term bonds and capital appreciation bonds. Alabama has traditionally received high bond ratings from both Standard and Poor's Corporation and Moody's Investors Service. Currently, the exception is the upper medium bond ratings for the Tobacco Settlement Revenue Bonds issued by the Alabama 21st Century Authority, a component unit of the State.

Outstanding Bonded Debt as of September 30 (Amounts in Thousands)

	Government	tal Activities	Busines	s-type Activities	Total Primary Governmen		
	2003	2002	2003	2002	2003	2002	
General Obligation Bonds	\$ 490,085	\$ 535,079			\$ 490,085	\$ 535,079	
Revenue Bonds	369,327	386,890	308,061	299,508	677,388	686,398	
Total	\$ 859,412	\$ 921,969	\$ 308,061	\$ 299,508	\$ 1,167,473	\$ 1,221,477	

The Alabama Corrections Institution Finance Authority and the Alabama College System issued new revenue bonds in the amounts of \$4 million and \$25 million, respectively. More detailed information regarding the State's long-term debt is presented in Note 4 to the financial statements.

Economic Factors and Next Year's Budgets and Rates

The fiscal year 2004 budget has certain appropriation reductions for the General Fund and Education Trust Fund, which amount to approximately \$171 million and \$202 million, respectfully. The non-state agencies, flow-through appropriations, and other nonessential functions are cut by 75 percent. The General Fund appropriations for the State agencies are cut between 10 percent and 18 percent, and unspecified pass-through grants were eliminated. Fiscal year 2005 across-the-board cuts for State agencies could be 7 percent. The Governor has proposed a fiscal year 2005 budget that contains reductions of \$118 million for the Education Trust Fund and \$196 million for the General Fund budget in addition to the cuts made in the budgets for fiscal year 2003 and fiscal year 2004. The growth in healthcare costs has created much of the budget shortfalls. Also, there will be reductions in the fiscal year 2005 budget because of one-time revenues from the federal government used for the 2003 and 2004 budgets. The Governor has created a Commission on Efficiency, Consolidation and Funding and has been concentrating on ethics and accountability reform. The Legislature is currently in session and a special bipartisan group of legislators has proposed more than \$300 million in new taxes and fees. Increases in cigarette taxes, vehicle sales taxes, automobile leasing tax, and mortgage and deed recording taxes have been proposed. These revenue proposals would help the State overcome the General Fund shortfall of \$350 million. Income tax and sales tax receipts are increasing as the economy recovers, and the increases in fiscal year 2005 could solve some of the budget problems in the Education Trust Fund budget. Real gross state product for Alabama is expected to grow by 3.8 percent in 2004 and 3.1 percent in 2005. Personal income is expected to increase by 3.9 percent in 2004 and 4.1 percent in 2005. Motor vehicle manufacturing is expected to remain one of the strongest industries in the State; employment in this industry will jump by 4.5 percent or better in 2004.

Requests for Information

This financial report is designed to provide a general overview of the State of Alabama's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to: Office of the State Comptroller, Financial Reporting Section, RSA Union, Suite 206, Montgomery, AL 36130-2602.

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES - GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

September 30, 2003	
(Amounts in Thousands)	
Net Change in Fund Balances for Governmental Funds	\$472,453
Governmental funds report capital outlay as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period.	es,
Capital Outlay574,39Depreciation Expense(55,43	
In the Statement of Activities, only the gain (loss) on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sale increase financial resources. Thus, the change in net assets differs from the change in fund balance by the cost of the assets sold.	
Some capital additions were financed through capital leases. In the governmental funds, a capital lease arrangement is considered a source of financing, but in the statement of net assets, the lease obligation is reported as a liability.	l (619)
In the Statement of Activities, the change in the balance of inventories is expensed, whereas in the governmental funds, the change in the balance of inventories is adjusted to reserved fund balance.	3,165
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds.	6,910
Internal service funds are used by management to charge the costs of certain activities, such as insurance and information technology, to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.	(3,315)
Long-term debt proceeds provide current financial resources to governmental funds by issuing de which increases long-term debt in the Statement of Net Assets. Repayment of principal is an expenditure in the governmental funds, but the repayment reduces long-term debt in the Statement of Net Assets. This is the amount repayments exceed proceeds.	ebt
Bond proceeds and premiums received (4,30 Repayment of bond principal 73,65 Proceeds from refunding bonds (17,55 Current refunding to bondholders 17,16 Accrued interest (9	5 3) 2 9)
Certain expenditures are reported in the funds. However, they either increase or decrease long-te liabilities reported on the Statement of Net Assets and have been eliminated from the Statement of Activities.	
Capital lease payments 5,55 Compensated absences payments (5,27 Litigation payments 2,00 Other debt payments 90	0) 0
	3,188
Other debt proceeds are considered other financing sources in the governmental funds, but in the statement of net assets they are reported as liabilities. Change in Net Assets of Governmental Activities	(3,634) \$1,046,886

NOTE 1 - <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u>

A. Reporting Entity

As required by generally accepted accounting principles, these financial statements present the State of Alabama (the primary government) and its component units. Component units are legally separate organizations ("public corporations") for which the primary government is financially accountable. Generally, the primary government is financially accountable if it appoints a voting majority of the organization's board and it can either 1) impose its will on the organization, or 2) there is a financial benefit/burden relationship. If the primary government does not control the board, it may be financially accountable if the organization is fiscally dependent on the State. Organizations making up the primary government and its component units are summarized in the following paragraphs.

1. Primary Government

All State departments, agencies, elected officials, boards, commissions, authorities, committees, halls of fame, educational institutions, and other State organizations (hereafter referred to as "agencies") which are not legally separate are, for financial reporting purposes, part of the primary government. All agencies and funds that operate from within the State Treasury, except those listed later as component units, are part of the primary government. The following non-Treasury agencies operate largely independent of the control of the State Comptroller, State Auditor, and State Treasurer, but lack the corporate powers to make them legally separate and are therefore part of the primary government:

- Alabama College System (two-year schools)
- Alabama State Fire College
- Athens State College
- Aviation Hall of Fame
- Cahaba Advisory Committee
- Commercial Mobile Radio Service Board
- Dental Examiners Board
- Dental Scholarships Awards Board
- Gorgas Memorial Board
- Alabama Industrial Development and Training Institute
- Medical Examiners and Licensure Commission
- Medical Scholarships Awards Board
- Motor Sports Hall of Fame
- Optometric Scholarships Awards Board
- Optometry Board
- Pharmacy Board
- Pilotage Commission
- Podiatry Board
- School of Fine Arts
- Skills Centers
- St. Stephens Historical Commission
- State Port Authority
- State Safety Coordinating Committee
- Women's Hall of Fame

2. Blended Component Units

Blended component units are legally separate but they exist solely to provide services (usually financing) exclusively to the State. Because of this close relationship, they are blended with and reported as though they are a part of the primary government. All references in the financial statements or elsewhere in these notes to the term "primary government" will encompass both the primary government and the blended component units.

The following blended component units were created for the purpose of financing capital expenditures for the State. Each issues revenue bonds that are limited obligations of the component unit. Their boards consist of State officials and specific State

For the Fiscal Year Ended September 30, 2003

revenues that are pledged for bond repayment. Those marked with a † are currently inactive and had no financial balances or activity in the past fiscal year.

- Agriculture Markets and Coliseum Authority †
- Corrections Institution Finance Authority
- Federal Aid Highway Finance Authority
- Highway Authority †
- Industrial Access Road and Bridge Authority
- Judicial Building Authority
- Alabama Trade School and Junior College Authority †
- Public Health Care Authority
- Gulf State Park Authority†

The Building Renovation Finance Authority has the same characteristics as those in the previous paragraph, but has the added responsibility of operating, maintaining, and renting buildings in the capitol complex that are occupied by State departments.

The State Parks System Improvement Corporation renovates, improves, maintains, and constructs assets belonging to the State Parks System. The six members of the Corporation are State officials.

The Forensic Science Bond Authority has the power to acquire, construct, and equip laboratories and other facilities for the State Department of Forensic Sciences. The four members of the authority are State officials. The Authority had no financial activity in the past fiscal year.

The Alabama State Parking Deck Authority has the authority to sell bonds, operate, maintain, and rent out space in a parking deck on a block in the capitol complex. The Authority has remained inactive since the enabling legislation was passed.

The Educational Television Foundation Authority exists to receive, invest, and expend donated moneys for the purpose of promoting the growth and development of educational television. The Authority consists of thirteen members who are appointed by the Alabama Public Television Commission. As a non-profit public corporation, the Authority provides financing flexibility that the Commission, as part of the primary government, would not otherwise have.

3. Discretely Presented Component Units

Discretely presented component units are organizations, which are legally separate and do not exist to provide services exclusively to the primary government. Providing services to the citizens of the State is not considered the same as providing services to the primary government institution. Financial information for discretely presented component units is segregated on the financial statements and the notes in the "Component Unit" columns in order to emphasize that they are legally separate.

Most of the discretely presented component units have boards that are controlled by the primary government through the appointment of a majority of the board members. The State has been determined to be financially accountable for each organization because it can impose its will on each organization. Unless otherwise noted, financial accountability for each organization described below exists at least in the ability of the State to modify the component unit's budget. Other manifestations of financial accountability may also exist.

For discretely presented component units whose boards are not controlled by the State, the organization has been determined to be fiscally dependent on the State. Unless otherwise noted, fiscal dependency exists at a minimum in the State's ability to modify the component unit's budget. Other manifestations of fiscal dependency may also exist.

When audited financial statements for a discretely presented component unit exist, the address at which such financial statements can be obtained is included in the following paragraphs describing each component unit. For all other discretely presented component units, complete financial statements may be obtained from the State of Alabama, Office of State Comptroller, RSA Union Building, Suite 206, Montgomery, AL 36130-2602.

The Water Pollution Control Authority operates a revolving loan fund to aid municipalities in financing the construction of

wastewater treatment facilities. A five-member board of directors made up of ex officio members governs the Authority. Audited financial statements of the Authority may be obtained from the Alabama Department of Environmental Management, 1400 Coliseum Boulevard, Montgomery, AL 36130.

The Alabama Drinking Water Finance Authority operates a revolving loan fund to aid local governments in financing the construction of sanitary drinking water facilities. A five-member board of directors made up of ex officio members governs the Authority. Audited financial statements of the Authority may be obtained from the Alabama Department of Environmental Management, 1400 Coliseum Boulevard, Montgomery, AL 36130.

The Department of Mental Health and Mental Retardation provides mental health and mental retardation services for the people of Alabama. The Governor of the State and the commissioner of the Department constitute a public corporation and are advised by a sixteen-member board of trustees. The commissioner and ten of the board members are appointed at the discretion of the Governor. The Mental Health Finance Authority exists to provide financing services to the Department, is therefore a blended component unit of the Department, and is included in all amounts reported for Mental Health.

The Crime Victims Compensation Commission awards compensation for economic losses arising from criminal conduct and works to change laws to benefit crime victims. The Commission consists of three members who are appointed by the Governor.

The Tennessee Valley Exhibit Commission operates a public exhibit based primarily on the history of and ongoing activities of the Tennessee Valley Authority and various other public entities involved in energy research and development. The sixteen-member Commission is appointed by the Governor.

The State Industrial Development Authority issues bonds and uses the proceeds to make grants to local industrial development boards. All members of the Authority are elected or appointed State officials.

The Alabama Education Foundation encourages donations of money for local school systems and invests the money for the benefit of each local system. The Foundation is governed by a twelve-member board that is made up of state officials and other individuals appointed by State authorities.

The Supercomputer Authority operates a supercomputer for the use of educational and governmental research institutions, private businesses, and individuals. The eleven directors of the Authority are appointed by State officials.

The boards of the four-year colleges of the State, except for the University of Alabama, are appointed by the State. Those colleges are: Alabama A&M University, Alabama State University, Auburn University, Jacksonville State University, University of Montevallo, University of West Alabama, University of North Alabama, University of South Alabama, and Troy State University. The University of Alabama board of trustees is not controlled by the State, but the university is subject to budgetary control by the State.

Complete financial statements for those universities which are audited may be obtained at the following addresses: Associate Controller, University of South Alabama, AD 380, Mobile, AL 36688-0002; Office of the Vice President for Business and Finance, Alabama A&M University, P.O. Box 369, Normal, AL 35762; Vice-President for Financial Affairs, University of Alabama at Tuscaloosa, P.O. Box 870136, Tuscaloosa, AL 35487-0136; Director of Accounting and Financial Reporting, University of Alabama in Huntsville, Huntsville, AL 35899; Vice President for Financial Affairs and Administration, University of Alabama at Birmingham, Birmingham, AL 35294; Director, Financial Reporting, Auburn University, Auburn University, AL 36849-5161; Comptroller, Station 6060, University of Montevallo, Montevallo, AL 35115-6000.

The Alabama Institute for the Deaf and Blind is an educational institution governed by a fourteen-member board, twelve of whom are appointed by the Governor.

The Marine Environmental Sciences Consortium provides educational programs in marine sciences for the graduate and undergraduate level and conducts research in marine sciences. The board of directors is composed of the chief executive officers of the member institutions.

The Alabama Public School and College Authority issues bonds and uses the proceeds to fund capital construction projects in the local school systems. The Governor, the finance director, and the state superintendent of education constitute the Authority.

For the Fiscal Year Ended September 30, 2003

The Tombigbee Valley Development Authority consists of six State officials who oversee the development of improvements along the Tombigbee River.

The Higher Education Loan Corporation provides Alabama lending institutions with a secondary market for student loans made under the federal guaranteed student loan program. Audited financial statements may be obtained from the Alabama Commission on Higher Education, P.O. Box 302000, Montgomery, AL 36130-2000.

The U.S.S. Alabama Battleship Commission consists of eighteen members appointed by the Governor. The Commission operates a memorial park centered near the historic battleship.

The fourteen-member board of directors of the Housing Finance Authority is appointed by various State officials. The Authority sells bonds and uses the proceeds to make it possible for lenders to make low interest rate mortgages available to low income home buyers. The primary government does not affect the Authority's budget, but the legislature has historically limited the Authority's ability to issue bonds. Audited financial statements may be obtained from the Authority, P.O. Box 230909, 2000 Interstate Park Drive, Suite 408, Montgomery, AL 36123-0909.

The Alabama Historic Ironworks Commission operates an historic park based on one of the State's early ironworks. Fourteen of the eighteen members on the commission are appointed by the Governor. Part of the Commission's budget is subject to State control. Compilation financial statements may be obtained from the Commission, 12632 Confederate Parkway, McCalla, AL 35111.

The Space Science Exhibit Commission operates the Alabama Space and Rocket Center along with the Space Camp. All eighteen members of the Commission are appointed by the Governor and part of the Commission's budget is subject to State approval. Audited financial statements may be obtained from the Commission at the Alabama Space and Rocket Center, P. O. Box 070015, Huntsville, AL 35807-7015.

The Coosa Valley Development Authority oversees developments and improvements along the Coosa River. Six of the seven members of the Authority are State officials.

The Alabama International Airport Authority was created to develop an international airport in the State. The State controls the appointment of only five of the ten members. All funding for the Authority is through the General Fund, so the Authority is subject to full budgetary control.

The Historical Commission is responsible for the preservation of historic sites, buildings, and objects. The twenty-member Commission is not controlled by the State, but the Commission's budget is subject to State control.

The Choctawhatchee Pea and Yellow Rivers Watershed Management Authority develops and executes plans for water conservation and usage, flood control and prevention, water pollution control, wildlife habitat protection, and erosion control within the boundaries of the Authority. The directors of the Authority are elected by local residents, but the Authority is subject to State budgetary control.

The Agricultural Museum Board exists to preserve and exhibit agricultural artifacts. The Board is not controlled by the State, but it is subject to State budgetary control.

The Music Hall of Fame operates a public exhibit displaying music memorabilia in honor of Alabamians who have made a lasting contribution to music. The Hall has both an independent board and is fiscally independent of the State. The Hall is included in these financial statements because it would be misleading to exclude. The State has some limited budgetary influence and the State funded the construction of the Hall's facilities with a general obligation bond issue.

The Blakeley Historic Authority preserves the historic site of the town of Blakeley and operates a park on the site. The Authority has both an independent board and is fiscally independent of the State. The Authority is included in the reporting entity because the State has some limited budgetary influence and the State provides the majority of the Authority's funding.

The Alabama Incentives Financing Authority was created to fulfill the State's financial commitments made to industries locating and expanding in the State under the terms of legislation granting certain financial incentives. The Authority is made up of three State officials and is authorized to issue bonds to fulfill the State's financial commitments.

The Revolving Loan Fund Authority was created to make grants to twelve regional planning commissions for the purpose of financing local economic development projects. Four of the six members of the Authority are State officials.

The Alabama Twenty-first Century Authority was created to promote economic development and industrial recruitment. The Authority can issue revenue bonds and pledge part of the proceeds of the settlement of the tobacco industry litigation to finance the bonds. The Authority is made up of three State officials.

The Agricultural Development Authority promotes development of agriculture in the State by making low interest loans available to persons engaged in agricultural operations. The seven-member board is made up of three State officials and four other persons appointed by the State.

The Public Historical Sites and Parks Improvement Corporation renovates, improves, maintains, and constructs State owned public historical sites and parks not under the jurisdiction of the Department of Conservation and Natural Resources as well as non-State owned public historical sites and parks. The six members of the Corporation are State officials.

4. Excluded Organizations

Other entities have been examined but failed to meet the criteria for inclusion in the State's reporting entity. The city and county boards of education are legally separate organizations whose boards are not controlled by the State. They are fiscally dependent on both the State and local governments. It is more appropriate that they be included as part of a local government's reporting entity.

The Elk River Development Agency, Bear Creek Development Authority, and Cahaba Trace Commission are legally separate organizations whose boards are neither controlled by the State nor are they fiscally dependent on the State. All three of these organizations are excluded. The many local soil and water conservation districts are legally separate organizations which have independent boards and are fiscally independent. In keeping with their independence, they are excluded from this report.

5. Sources of Information

The majority of State organizations, whether primary government or component unit, conduct their financial operations from the State Treasury through the State's central accounting system under the supervision and review of the State Comptroller, State Treasurer, and State Auditor. The source of information on these agencies is the State's central accounting system. For these agencies, the recording of cash, warrants payable, encumbrances, salaries payable, compensated absences, most investments, most short-term payables, most revenues and most expenditures/expenses are controlled by the State Comptroller and/or the State Treasurer and are therefore subject to extensive scrutiny. Accruals of revenues, a few accruals of expenditures/expenses, and all other accounts, such as depreciation, capital assets, inventories, and capital leases, generally are based on data provided by the individual agencies. The data provided by the agencies are reviewed and recorded once a year and are believed to be materially correct even though they are not generally subject to extensive scrutiny by the State Comptroller, State Treasurer, or State Auditor.

There are some organizations and funds which meet the criteria for inclusion as part of the reporting entity even though they have the authority to conduct their financial operations through bank accounts and accounting systems outside the State Treasury, independent of the direct daily control of the State Comptroller, State Treasurer, and State Auditor. These non-Treasury agencies are included in the financial statements based on information provided to the State Comptroller once a year by the agency or the agency's auditors. Whenever possible, the non-Treasury agencies are reported as they appeared in the information submitted to the State Comptroller. However, corrections or modifications have been made whenever required to comply with generally accepted accounting principles or wherever necessary to ensure consistent statewide report presentation.

The following non-Treasury agencies and funds are included in this report:

a. Primary Government

- Alabama College System
- Alabama Health Insurance Plan

For the Fiscal Year Ended September 30, 2003

- Alabama Industrial Development Training Institute
- Alabama School of Fine Arts
- Alabama Skills Center
- Alabama State Port Authority
- Alabama State Fire College
- Athens State College
- Attorney General Outside Accounts
- Aviation Hall of Fame
- Blind Vendors Fund
- C.C. Smith Trust Fund
- Charlotte Thorn Endowment Fund
- Commercial Mobile Radio Service Board
- Corrections Bank Accounts and Agency Funds
- Corrections Canteen Funds
- Corrections Institute Finance Authority Bank Account
- Court System Local Accounts
- Dental Examiners Board
- Dental Scholarships Awards Board
- Department of Human Resources Local Funds and Child Support Funds
- Educational Television Foundation Authority
- Geological Survey Library Revolving Fund
- Gorgas Memorial Board
- Hicks Memorial Endowment Fund
- High School of Math and Science
- Insurance Department Statutory Deposits
- Mary May Eliot Memorial Fund
- Medicaid Agency Lien Account and Qualifying Individual (2 Funds)
- Medical Scholarships Awards Board
- Medical Examiners and Licensure Commission
- Men's Hall of Fame Outside Account
- Military Department Unit Funds
- Montgomery Downtown Redevelopment Authority
- Motor Sports Hall of Fame
- National Guard Canteen Funds
- Non-Emergency Transportation
- Optometry Board
- Optometric Scholarships Awards Board
- Peace Officers' Annuity and Benefit Investment Account
- Pharmacy Board
- Pilotage Commission
- Podiatry Board
- Public Health Care Authority
- Public Health Local Funds
- Public Safety Narcotics Funds
- Sports Hall of Fame Checking Account
- State Bar Checking Account
- State Bar Client Security
- State Bar Foundation
- State Port Authority Hourly Pension Plan
- State Port Authority Railway Pension Plan

- State Safety Coordinating Committee
- Student Assistance Initiated Loan Servicing Account
- Supreme Court Checking Account
- Transportation Surety Bonds
- Unemployment Compensation Funds
- Victims Services Fund
- W.V. Chambliss Trust Fund
- Women's Hall of Fame
- Youth Service Student Accounts and Local Funds

b. Discretely Presented Component Units

- Alabama A & M University
- Alabama Drinking Water Finance Authority
- Alabama Higher Education Loan Corporation
- Alabama Historic Ironworks Commission
- Alabama Housing Finance Authority
- Alabama Incentives Financing Authority
- Alabama Institute for Deaf and Blind
- Alabama State University
- Auburn University
- Blakeley Historic Authority
- Cahawba Advisory Committee
- Crime Victims' Compensation Fund
- Jacksonville State University
- Marine Environmental Sciences Consortium
- Mental Health Client/Patient Funds
- Mental Health Capital Projects Bank Account
- Music Hall of Fame
- Space Science Exhibit Commission and Space Science Exhibit Finance Authority
- St Stephens Historical Commission
- Troy State University
- U.S.S. Alabama Battleship Commission
- University of Alabama in Birmingham
- University of Alabama in Huntsville
- University of Alabama in Tuscaloosa
- University of Montevallo
- University of North Alabama
- University of South Alabama
- University of West Alabama
- Water Pollution Control Authority

B. Government-Wide and Fund Financial Statements

1. Government-Wide Financial Statements

Government-wide financial statements include two basic financial statements: the Statement of Net Assets and the Statement of Activities. The two statements report the State's governmental activities separately from its business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange revenues.

For the Fiscal Year Ended September 30, 2003

Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. Fiduciary funds and fiduciary-type component units are excluded from the government-wide financial statements.

The Statement of Net Assets presents the reporting entity's non-fiduciary assets and liabilities, with the difference reported as net assets. Net Assets are reported in three categories:

Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.

Restricted net assets result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constitutional provisions or enabling legislation.

Unrestricted net assets consist of net assets that do not meet the definition of the two preceding categories. Unrestricted net assets often are designated, to indicate that management does not consider them available for general operations.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are reported as general revenue.

2. Fund Financial Statements

Separate fund financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with nonmajor funds being combined into a single column.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

1. Measurement Focus and Basis of Accounting

These financial statements are reported in conformity with generally accepted accounting principles (GAAP) unless otherwise noted on the face of the statement or in the Notes to the Financial Statements. GAAP basis reporting differs considerably in some ways from the budgetary and cash basis accounting under which the State budgets and operates.

a. Accrual Basis

Under GAAP, the government-wide statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary and fiduciary fund financial statements. Revenues are recognized and recorded when earned and expenses are recorded when a liability is incurred for exchange and exchange-like transactions, regardless of the timing of cash flows. For nonexchange transactions, revenues and expenditures and related assets and liabilities are recognized as required by GASB Statement No.33. For derived nonexchange transactions, receivables and revenues are recognized when the underlying exchange has occurred. For imposed nonexchange transactions, receivables are recognized when an enforceable legal claim has arisen. Revenues are recognized when resources are required to be used or the first period that use is permitted.

Property taxes are recognized as revenues in the year for which they are levied. For government mandated nonexchange revenues such as grants, GAAP require the recognition of assets, revenues, liabilities, and expenditures when all eligibility requirements have been met and (for revenues) resources are available. Agency funds, fiduciary in nature, do not recognize revenues and expenditures.

The State has elected to exercise paragraph 6 of GASB Statement No. 20, "Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting." Statement No. 20, paragraph 6, requires that all proprietary activities should apply all applicable GASB pronouncements as well as any Financial Accounting Standards Board

(FASB) Statements and Interpretations, Accounting Principles Board (APB) Opinions, and Accounting Research Bulletins (ARBs) of the Committee on Accounting Procedure (CAP) issued on or before November 30, 1989, unless such FASB, APB, and CAP pronouncements conflict with or contradict GASB pronouncements. FASB pronouncements issued after November 30, 1989, even if they modify an applicable FASB, APB, or CAP pronouncement, are not applicable unless adopted by a GASB pronouncement.

b. Modified Accrual Basis

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this focus, only current assets and current liabilities generally are included on the balance sheet. Revenues are recognized as they become susceptible to accrual; generally when they are both measurable and available. Revenues are considered to be available when they are collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State generally considers tax revenues and court settlements to be available if they are collected within sixty days of the end of the fiscal period. Revenues that the State earns by incurring obligations are recognized in the same period as when the obligations are recognized. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, expenditures related to debt service, compensated absences, and claims and judgments are recorded only when payment is due and payable.

Under the modified accrual basis of accounting, recognition criteria are different for exchange and nonexchange transactions. For exchange and exchange-like transactions, revenues and related current assets are recognized when measurable and available to finance operations during the year or if available to liquidate liabilities existing at the end of the year. Therefore, in governmental fund financial statements, revenues and the resulting assets are accrued at year-end only if the revenues are earned and the receivables are expected to be collected in time to pay for liabilities in existence at the end of the period. Expenditures are recognized when the related fund liability is incurred, except for items that are not expected to be liquidated with expendable available resources, such as the long-term portion of compensated absences payable and capital lease obligations. Therefore, expenditures and the related liabilities are accrued at year-end only when they are normally payable from current expendable funds. In order to determine which revenues should be accrued, an arbitrary time limit is established. Revenues are recognized when measurable and available. The State uses sixty days after fiscal year end as the time limit for the accrual of revenues. For nonexchange transactions, revenues and expenditures and related assets and liabilities are recognized as required by GASB Statement No. 33. For income taxes, general sales taxes, utility taxes, insurance premium taxes, general use taxes, and other derived nonexchange transactions, receivables and revenues are recognized when the underlying exchange has occurred and the resources are available. For property taxes, and other imposed nonexchange transactions, receivables are recognized when an enforceable legal claim has arisen. Revenues are recognized when resources are required to be used or the first period that use is permitted and the resources are available. For property taxes, revenues are recognized if received within sixty days; otherwise, deferred revenue is recognized. For federal grants and other government mandated nonexchange revenues, assets, revenues, liabilities, and expenditures are recognized when all eligibility requirements have been met and (for revenues) resources are available. For reimbursement-type federal grants, eligibility requirements are met when recipients incur allowable costs, not when those costs are submitted for reimbursement.

Material accruals are for income taxes, general sales taxes, utility taxes, insurance premium taxes, general use taxes, property taxes, federal grants, and interest.

2. Financial Statement Presentation

a. Major Funds

The State reports six major governmental funds. The **General Fund** is the State's primary operating fund. It accounts for all financial resources except those required to be accounted for in another fund. The **Education Trust Fund** accounts for the revenues collected for the support, maintenance, and development of public education in Alabama. The **Alabama Trust Fund** consists of income from the sale or lease of rights for offshore exploration and drilling for oil and gas off the Alabama coast. Investment income is used to support the General Fund, Forever Wild Land Trust, and a variety of capital projects and debt service. **Medicaid** accounts for the portion of the Medicaid program that is funded by Federal revenues and other non-State revenue sources. The **Public Road and Bridge Fund** accounts for highway construction, maintenance, and operations. The **Public Welfare Trust Fund** accounts for the administration of a broad range of social and protective services programs that provide financial assistance to individuals.

For the Fiscal Year Ended September 30, 2003

The State reports five major enterprise funds. The **Unemployment Compensation Trust** accounts for the payment of unemployment compensation benefits. The **State Port Authority** was created to engage in promoting, developing, constructing, maintaining, and operating harbors, seaports, and river ports within the State of Alabama. The **Alabama College System** accounts for the revenues and expenditures of the State's community, junior, and technical colleges. The **Alcoholic Beverage Control Board** was created to control alcoholic beverages through distribution, licensing, and enforcement. The **Public Education Employees Health Insurance Plan** provides health insurance coverage to all local school system employees as well as many employees of higher education institutions.

b. Nonmajor Funds

The State reports a number of nonmajor governmental funds, proprietary funds, and fiduciary funds.

Governmental Fund Types:

Special Revenue Funds include operating fund activities financed by specific revenue sources that are legally restricted for specific purposes. Examples include public health, education, and economic and community affairs.

Debt Service Funds account for the accumulation of resources for, and the payment of, governmental long-term debt principal and interest.

Capital Projects Funds account for the acquisition, construction, and improvement of major general governmental capital assets financed principally by bond proceeds.

Permanent Funds report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the government or its citizenry.

Proprietary Fund Types:

Enterprise Funds report the activities for which fees are charged to external users for goods or services, such as health insurance and the sale of surplus property.

Internal Service Funds provide goods or services primarily to other agencies or funds of the State, rather than to the general public. Examples include information technology, telecommunications, office building rentals, motor pool, printing, and state employees' health insurance. In the government-wide statements, internal service funds are included with governmental activities. Eliminations have generally been made to minimize the double counting of internal activity, including internal service fund type activity on the government-wide financial statements.

Fiduciary Fund Types:

Pension and Other Employee Benefit Trust Funds account for resources that are required to be held in trust for the members and beneficiaries of the State's defined benefit pension plans, deferred compensation plan, individual retirement accounts, and flexible employees' benefit plan. The defined benefit pension plans include plans for state employees, state police, some city and county employees, teachers, judges, peace officers, state dock employees, and circuit clerks of the courts.

Private Purpose Trust Funds account for resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments. The State's largest private purpose funds are education related for either college tuition benefits or local public schools. There are five endowment funds established by private citizens that the State manages as trustee for local school systems and reports as Local Education Endowments. The Foundation for Local Schools was established so that the Retirement Systems of Alabama can use its investing expertise to get maximum return on investments for numerous small local school foundations and trusts.

Agency Funds report assets and liabilities for deposits and investments entrusted to the State as an agent for others. The State has agency funds that account for some taxes collected, payroll withholdings, child support payments, cash bonds, and various other purposes.

D. Fiscal Year

The State fiscal year ends on September 30. One component unit, the Alabama Space Science Exhibit Commission, has the power to set its own fiscal year (*Code of Alabama 1975*, Section 41-10-307 as amended). The Commission has set its fiscal year to end on the last Sunday in September in order to coordinate its accounting period with the weekly cycle of campers. The Commission's fiscal year for 2003 ended on September 28. The difference in fiscal years had no material effect on the financial statements.

E. Assets, Liabilities, and Net Assets and Fund Balances

1. Cash and Cash Equivalents

Cash and Cash Equivalents, as reported on the financial statements (the government-wide and the fund financial statements), are under the control of the State Treasurer or other administrative bodies as determined by law. The cash in all funds operating from the State Treasury is pooled as treasury cash and invested by the State Treasurer. The State Treasurer has statutory authority to invest treasury cash in demand accounts or time deposit-open accounts with any qualified public depository. The State Treasurer can also invest up to twenty percent of treasury cash in securities and obligations of the U.S. Treasury or federal agencies for a period of time that may exceed one year. Cash equivalents in the State Treasury consist of short-term repurchase agreements and other allowable time deposits with an original maturity date of three months or less at the date of purchase. Commercial paper is reported as an investment regardless of the original maturity date. For funds operating outside the State Treasury, cash and cash equivalents generally include demand deposit accounts, petty cash accounts, and short-term, highly liquid investments with a maturity date of three months or less when purchased.

2. Receivables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are reported as either "Due To or Due From Other Funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

In the government-wide and governmental fund financial statements, the largest receivables are amounts due from other governments, consisting almost entirely of grants and reimbursements due from the federal government where collectibility is reasonably assured. Accordingly, no allowance for uncollectible accounts has been established. Amounts due from local governments are not a significant portion of amounts due from other governments.

The second largest receivables are amounts accrued for income taxes, general sales taxes, utility taxes, insurance premium taxes, general use taxes, and property taxes as required by GASB Statement No. 33. These are also accrued in the government-wide and governmental fund financial statements.

The property tax calendar for the State is simple. The levy date, the assessment date, and the lien date are all the same date – October 1. On October 1, the assessed value of all property is multiplied by the applicable rates to levy the property tax. On that date, the State has a lien (a legal claim) against the property. The property tax is not due until October 1 the following year. The property tax is paid in arrears between October 1 and December 31. After December 31, it is delinquent.

In the financial statements of the primary government, the State records few significant Accounts Receivable because those types of revenues are generally not susceptible to accrual under the provisions of Amendment 26 to the *Constitution of Alabama 1901*. Amendment 26 affects only those funds operating from the State Treasury under the control of the State Comptroller, which includes most of the funds of the primary government. The primary government has minimal amounts of Notes and Leases Receivable, as such agreements would constitute an illegal extension of credit by the State for any fund operating from the State Treasury. Interest and Dividends Receivable includes amounts earned on investments, notes, mortgages, and loans receivable.

For component units, Mortgages, Notes, and Loans Receivable consist primarily of loans made by the Alabama Housing Finance Authority. The mortgage loans of the Authority are carried at their unpaid principal balances less an allowance for loan losses. Also included in this category are student loans owed to the Alabama Higher Education Loan Corporation. The loans are reported net of an allowance for uncollectible loans.

For the Fiscal Year Ended September 30, 2003

Due From Other Governments as reported for the component units consist almost entirely of amounts owed by local governments. Most of the amount consists of loans made by the Alabama Water Pollution Control Authority. Accounts Receivable as reported for the component units are comprised primarily of amounts owed to colleges.

3. Inventories

Inventories of supplies in governmental fund financial statements are reported at cost using the purchases method. An inventory asset account is reported on the balance sheet with an offset to Reserved for Inventory. Inventories of materials and supplies on proprietary fund financial statements are determined by both physical counts and through perpetual inventory systems and are valued at the lower of cost or market. Valuation methods used on the proprietary and governmental fund financial statements include first-in first-out, average cost, weighted average, and retail inventory method.

Surplus supplies, materials, and property from State agencies and the Federal Government are recorded as inventory at historical cost in two internal service funds. The market value of the inventory in the surplus property funds is significantly lower than the historical cost because of the age and condition of the items.

4. Investments

Investments as reported on the Statement of Net Assets include long-term investments. As required by GASB No. 31, "Accounting and Financial Reporting for Certain Investments and for External Investment Pools", most investments are recorded at fair value. Securities traded on national or international exchanges are valued at the last reported sales price at current exchange rates. Short-term investments are reported at cost, which approximates fair value. Mortgage-backed securities are reported based on future principal and interest payments discounted at the current interest rate for similar instruments. The fair value of real estate investments is based on independent appraisals. No investments are recorded at amortized cost.

5. Restricted Assets

Component Unit assets required to be held and/or used as specified in bond covenants have been recorded as "Restricted Assets." These assets consist primarily of U.S. Treasury obligations and certificates of deposit.

6. Capital Assets

Capital assets, which include buildings, land, equipment, infrastructure (e.g., roads and bridges) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the State as assets with an initial cost of at least \$5,000 and an estimated useful life in excess of two years. Capitalized assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed. Capital assets are depreciated using the straight-line method over the following estimated useful lives:

<u>Assets</u>	<u>Years</u>
Buildings	40
Improvements Other than Buildings	25
Equipment	5-12

Land, infrastructure, construction in progress and historical artifacts are not depreciated. The State has elected to apply the modified approach to accounting for infrastructure (e.g., roadways, bridges, and tunnels). Under this approach, the infrastructure assets are not depreciated because the State is committed to maintaining the assets at a minimum condition level that the Department of Transportation (ALDOT) has determined to be adequate to meet the needs of the citizens. Costs for maintenance and preservation are expensed in the period incurred. Additions and improvements are capitalized. The ALDOT maintains an inventory of all infrastructure assets and performs regular condition assessments of those assets to establish that they are in fact being maintained at or above the condition level established. ALDOT also makes an annual estimate of the cost necessary to maintain and preserve those infrastructure assets at the target condition level. The State has elected to phase in the reporting of infrastructure. The cost of infrastructure reported this year consists only of projects capitalized during 2002 and 2003. It is

anticipated that the cost of infrastructure that was constructed and completed in prior years will be included in the fiscal year 2004 Comprehensive Annual Financial Report.

Extensive project documentation is required to meet various Federal and State guidelines concerning the construction of infrastructure. The completeness of this documentation affects the timing of project capitalization. The State capitalizes infrastructure when all costs for a project are incurred and all project documentation is satisfactorily completed, filed and accepted with the appropriate entities. Projects that meet the cost and documentation criteria are closed and appropriate entries are made to adjust the Infrastructure Construction in Progress and Infrastructure asset accounts annually. Due to the documentation requirements, there can be substantial time lags between the date a project is put into service on the State's roadway network and the date the project is capitalized. A significant portion of Infrastructure Construction in Progress consists of projects that have been put into service and maintenance costs could have been incurred.

7. Compensated Absences

Employees in permanent positions accrue annual leave at a rate of four to nine hours bi-weekly, depending upon their length of service. Upon separation from service, an eligible employee is paid for the actual number of annual leave days he has earned, up to a maximum of sixty days, with the amount being computed on the basis of his daily pay rate at time of separation multiplied by the number of days leave due.

Sick leave is accrued at a rate of four hours bi-weekly. Employees may accumulate up to a maximum of 150 days sick leave. Employees may be compensated for one-half of the maximum accrued sick leave only upon retirement from state service. The employee must have twenty five years of service or have attained the age of 60 and have ten years of service to be eligible to retire. State Troopers must have twenty five years of service or have attained the age of 52 and have ten years of service to be eligible to retire. When a state employee in the classified service dies while in active service to the State, the estate of the deceased employee shall receive a monetary payment of fifty percent of the accrued and unused sick leave, not to exceed 600 hours, which the employee was credited with at the time of his or her death.

The monetary value of accumulated annual and sick leave payable upon termination or retirement is included in the government-wide statement of net assets, proprietary fund financial statements, and fiduciary fund financial statements. In the governmental fund financial statements, amounts to be paid from expendable available resources are recognized as current fund liabilities. Current liabilities were determined from actual termination or retirement payments made during the two months following the end of the fiscal year. Amounts not payable from expendable available resources (long-term liabilities) are reported in the government-wide Statement of Net Assets.

The liability at September 30, 2003, was computed using salary rates effective at that date including the employer's share of social security and Medicare taxes payable and represents annual and sick leave earned up to the allowable ceilings. The sick leave is calculated separately for vested and non-vested employees. Sick leave is subjected to an actuarially determined probability multiplier that the employee will remain to retire and collect sick leave. The probability multipliers are as follows:

	Vested	Non-vested
Public Education Employees	.80	.45
State Employees	.74	.32

8. Long-Term Obligations

Long-term debt is recognized as a liability in governmental fund financial statements when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion expected to be financed from expendable available financial resources is reported as a liability in governmental fund financial statements. The remaining portion of such obligations is reported in the government-wide financial statements. Long-term liabilities expected to be financed from proprietary fund operations are accounted for in those funds in the proprietary fund financial statements.

For the Fiscal Year Ended September 30, 2003

9. Net Assets and Fund Balances

As discussed previously, net assets on the government-wide financial statements and the proprietary fund financial statements are reported in three categories: (1) invested in capital assets, net of related debt; (2) restricted net assets; and (3) unrestricted net assets.

Reservations of fund balance on the governmental fund financial statements indicate that a portion of the fund balance is not available for appropriation and expenditure or is legally segregated for a specific future use. Fund balance designations are established to indicate tentative plans for financial resource utilization in a future period. Such designations reflect managerial plans or intent as distinguished from legally required reserves.

F. Proprietary Fund Operating Revenues and Expenses

Proprietary funds report operating revenues and expenses separately from non-operating items. Operating items generally result from producing and delivering goods and services that are a normal part of the primary business of the fund. For example, investment income is an operating item for the Risk Management internal service fund, as they collect insurance premiums and invest the money until it is needed to cover claims. In most other proprietary funds, investing is not part of producing and delivering goods or services and is therefore a non-operating item. When not contradictory to this principal, operating items are defined consistent with the definition of operating items for cash flow statements in GASB Statement No. 9. The most significant non-operating items are reported as non-operating revenues for the Unemployment Compensation Trust and the Alabama College System. For the Unemployment Compensation Trust, these non-operating revenues consist primarily of federal drawdowns. For the Alabama College System, these non-operating revenues are federal grants.

G. New Accounting Pronouncements

During the current fiscal year, the State implemented the following new accounting pronouncements:

GASB Statement No. 38: Certain Financial Statement Note Disclosures; paragraphs 12-15

GASB Statement No. 41: Budgetary Comparison Schedules—Perspective Differences (an amendment of GASB Statement No. 34) GASB Technical Bulletin 2003-1: Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets

NOTE 2 - FUND BALANCES

A. Restatements

Fund balances and Net Assets as of October 1, 2002 have been restated for certain accounting changes necessary to conform to GAAP.

(Amounts In Thousands)	As	t. 30, 2002 Previously Reported	Rec	Fund lassific	ation_	Ac	or Period counting justments	As Restated
Primary Government								
Governmental Funds								
General Fund	\$	152,028		\$	-	\$	46	\$ 152,074

Governmental Activities								
September 30, 2002, as Previously Repor	t \$ '	7,457,260						
Capital Asset Restatements		37,082						
Long-term Debt Restatements		(5,416)						
Governmental Fund Restatements		73,280						
Internal Service Fund Restatements		(2,494)						
Net Assets, October 1, 2002, as Restated	\$ ^	7,559,712						

The restatement of (\$12,278,000) in the Education Trust Fund was the result of an error in the distribution of revenues in a prior year. An offsetting restatement for \$12,278,000 is included in the amount reported for Nonmajor Governmental Funds. Most of the restatement for the Public Road and Bridge Fund is for an amount Due From the Federal Government that was not reported last year. The Public Welfare Trust Fund was also restated for a federal receivable. Improved information on real property created most of the restatement of \$37,082,000 in Government-wide Capital Assets.

For the Fiscal Year Ended September 30, 2003

B. Fund Balance/Net Assets Deficits

1. Primary Government

Medicaid, a major governmental fund, had a deficit in unreserved, undesignated fund balance of \$58,310,000 leading to a total deficit in fund balance of \$57,540,000. This was due primarily to the accrual of claims outstanding on September 30, 2003. The expense was recognized in 2003 and will be paid in 2004.

The Alcoholic Beverage Control Board, a major proprietary fund, had a deficit in unrestricted net assets of \$3,951,000 at September 30, 2003, causing a deficit in total net assets of \$2,712,000. The deficits are largely due to the accrual of liabilities for compensated absences and salaries payable made in 2003. The Board, by law, operates on a cash basis and is required to distribute 100 percent of its earnings.

The Public Education Employee Health Insurance Plan, a major enterprise fund, had a deficit in net assets of \$6,179,000 at September 30,2003, causing a deficit in total net assets of \$6,179,000. The excess claims expense over premiums revenue was the primary reason for the deficit.

The Building Renovation Finance Authority, an internal service fund, had a deficit in net assets of \$11,619,000. The Authority has a deficit balance of \$29,873,000 in net assets invested in capital assets, net of related debt while having a positive unrestricted net assets balance of \$18,254,000. The fund's major assets are buildings, which have depreciated values that are less than the long-term debt associated with them.

The Revenue Administrative Special Revenue Fund had a deficit in unreserved undesignated fund balance of \$270,000, and the overall total fund balance is a positive \$521,000. The deficit was created primarily by the accrual of salaries payable.

2. Component Units

The Public School and College Authority, a major component unit, had a deficit in unrestricted net assets of \$1,211,216,000 causing a deficit in total net assets of \$1,197,446,000. The Authority issues bonds to raise money for grants which are made primarily to local school systems for the construction and improvement of educational buildings owned by those systems.

Water Pollution Control Authority, a major component unit, had a deficit unrestricted net asset balance of \$142,000 while the overall net assets balance was a positive \$202,188,000.

The Alabama Space Science Exhibit Commission, a nonmajor component unit, had a deficit in unrestricted net assets of \$5,767,000, and the overall total net assets balance is a positive \$16,528,000. Almost all of the Commission's assets are capital assets.

The Incentives Finance Authority, a nonmajor component unit, had a deficit in unrestricted net assets of \$139,379,000. The Authority issues bonds to raise money to fund financial commitments to industries relocating to Alabama and therefore the Authority accumulates few assets. The resources to pay the debt will come from future tax revenues.

The Twenty-first Century Authority, a nonmajor component unit, had a deficit in unrestricted net assets of \$50,269,000. The Authority issues bonds for the purpose of promoting economic development and industrial recruitment in the State and therefore the Authority accumulates few assets. The debt will be repaid with future revenues from the tobacco settlement.

The Alabama Supercomputer Authority, a nonmajor component unit, had a deficit in unrestricted net assets of \$41,000, while the overall net assets balance was a positive \$765,000. The deficit was caused by the accrual of compensated absences.

The State Industrial Development Authority, a nonmajor component unit, had a deficit in unrestricted net assets balance of \$16,170,000. The Authority issues bonds to finance projects that promote the industrial development of the State, primarily through grants to local development authorities. The resources to repay the debt will come from future tax revenues.

The Revolving Loan Fund Authority, a nonmajor component unit, had a deficit in unrestricted net assets of \$11,271,000. The Authority issues bonds for making grants to Regional Planning and Development Commissions to be utilized as revolving loans by the grantees. The resources to repay the debt will come from future tax revenues.

The Tennessee Valley Exhibit Authority, a nonmajor component unit, had a deficit in unrestricted net assets of \$1,986,000.

The Historical Commission, a nonmajor component unit, had a deficit in unrestricted net assets of \$1,741,000 while the overall net assets balance was a positive \$79,307,000.

NOTE 3 - ASSETS

A. Cash Deposits

The State Treasurer has statutory authority to deposit treasury cash in demand accounts or time deposit - open accounts with any qualified public depository. The State Treasurer may also invest up to twenty percent of treasury cash in securities and obligations of the U.S. Treasury or federal agencies for a period of time that may exceed one year. Funds may also be invested in obligations of the United States or its agencies under a repurchase agreement for a shorter period of time than the maturity date of the security.

Deposits of both the primary government and its component units are entirely insured by Federal depository insurance or protected under the Security for Alabama Funds Enhancement (SAFE) Program. The *Code of Alabama 1975* requires all State organizations, including component units, to participate in the SAFE Program. The SAFE Program is a multiple financial institution collateral pool. The SAFE Program requires all public funds to be deposited in a financial institution designated by the State Treasurer as a qualified public depository. Each qualified public depository is required to pledge collateral in accordance with the rules established by the SAFE Board of Directors. In the event that a qualified public depository defaults or becomes insolvent and the pledged collateral is insufficient to satisfy the claims of public depositors, the *Code of Alabama 1975*, Section 41-14A-9(3) authorizes the State Treasurer to make assessments against the other qualified public depositories in the pool so that there will be no loss of public funds.

For the Fiscal Year Ended September 30, 2003

B. Investments

Investments are made in accordance with the statutes creating the various agencies of the State of Alabama. The following describes the investments made by the major investing agencies of the State:

1. Primary Government

<u>State Treasurer</u> - The State Treasurer may legally invest state funds in repurchase agreements, obligations of the U.S. Treasury, Federal Land Bank bonds, Federal Home Loan Bank notes and bonds, Federal National Mortgage Association notes, and debentures or obligations guaranteed by the U.S. government.

<u>Alabama Trust Fund (ATF)</u> – Investments are limited to those authorized by law for the Retirement Systems of Alabama. The investments authorized for the Retirement Systems are described later in this section.

<u>Prepaid Affordable College Tuition (PACT) Program</u> - The State is responsible for the management of the investments of the PACT program, although the investments are not property of the State. The funds may be invested in any instrument, obligation, security or property that constitutes legal investments for investment of public funds in the State, including legal investments of the State Treasurer and the Alabama Trust Fund that are deemed most appropriate by the PACT board and may be pooled for investment purposes with any other investment of the State which is eligible for asset pooling.

2. Fiduciary Funds

Retirement Systems of Alabama (RSA) - The Retirement Systems of Alabama administers the Teachers' Retirement System, Employees' Retirement System, and Judicial Retirement Fund. RSA may invest in any types of investments that the Board of Control of each individual system approves. Each Board is limited only by the "Prudent Man Rule" which requires it to use due care, skill, prudence, and diligence under the prevailing circumstances that a prudent man acting in a like capacity and familiar with such matters would use in investing.

<u>Deferred Compensation Plan RSA-1</u> – A deferred compensation plan is administered by the Retirement Systems of Alabama (RSA). The plan is named the Public Employees' Individual Retirement Account/Deferred Compensation Plan, and is commonly referred to as RSA-1. By law, RSA-1 investments are made under the same rules, regulations, conditions, and guidelines governing the RSA.

3. Component Units

Alabama Water Pollution Control Authority (AWPCA) The AWPCA is authorized to invest in (a) any debt securities that are direct or general obligations of the U. S.; (b) any debt security unconditionally guaranteed (principal and interest) by the U. S.; and (c) repurchase agreements collateralized by securities of the type described in (a) and (b) above or with any registered broker/dealer subject to the Securities Investors' Protection Corporation jurisdiction or any commercial bank, if such broker/dealer or bank has an uninsured, unsecured, and unguaranteed obligation rated "Prime-1" or "A3" or better by Moody's Investor Service, Inc., and "A-1" or "A-" or better by Standard & Poor's Corporation.

Alabama Housing Finance Authority (AHFA) - The Authority is authorized to invest in bonds or other obligations issued or guaranteed by the U.S. Government, or any agency thereof, or the State of Alabama. In addition, the Authority may invest in interest-bearing bank and savings and loan association deposits, any obligations in which a State-chartered savings and loan association may invest its funds, any agreement to repurchase any of the foregoing, or any combination thereof. Each of the trust indentures established under the Authority's mortgage revenue bond programs contain further restrictions on the investment of non-expended bond proceeds; however, each trust indenture must be consistent with the Authority's authorizing legislation with respect to the definition of eligible investments. The Authority's program investments consist of Government National Mortgage Association (GNMA) or Federal National Mortgage Association (FNMA) pass-through certificates, all of which are pledged as security for the mortgage revenue bonds.

Other investments include unexpended bond proceeds, temporary and reserve funds established under the provisions of various trust indentures, and investments of the Authority's operating fund.

<u>Higher Education Loan Corporation</u> - The bond trust indentures authorize the Corporation to invest bond proceeds only in certain types of investments including, but not limited to: (1) direct obligations of, or obligations unconditionally guaranteed by, the U.S. Government; (2) bank demand deposits and certificates of deposit insured by the Federal Deposit Insurance Corporation or fully secured by obligations with the same characteristics as those described in items (1) above or (3) below; (3) obligations of or guaranteed by any agency or instrumentality of the U. S. Government; (4) obligations with the same characteristics as those described in items (1) and (3) above held by the Trustee under written agreement whereby a bank or trust company agrees to repurchase the obligations, providing that the market value of such obligations, as determined monthly, is always at least equal to the repurchase prices specified in the agreement; (5) money market funds consisting solely of securities similar to those described in items (1), (3), and (4) above; (6) guaranteed investment contracts, and (7) any other investments or obligations consented to by the bond insurance provider.

<u>Investments Made by Colleges and Universities</u> - The colleges and universities invest funds in accordance with the applicable limits set forth in the gift instruments, Board of Trustees guidelines, or other applicable laws. Certain bond indentures require that the bond funds invest all amounts in federal securities or eligible certificates. In accordance with GASB No. 31, most investments are stated at fair value.

C. Investment Credit Risk

The tables on the following pages summarize the carrying and fair value of the State's investments by type and categorizes the investments by level of credit risk as follows:

Category 1 - Insured or registered, or securities held by the State or its agent in the State's name.

Category 2 - Uninsured or unregistered, with securities held by the counterparty's trust department or agent in the State's name.

Category 3 - Uninsured or unregistered, with securities held by the counterparty, or its trust department or agent, but not in the State's name.

Investments not required to be categorized are presented "below the line," followed by reconciling items between this note and the total investments as shown on the balance sheet.

D. Securities Lending

The Teachers' Retirement System (TRS), the Employees' Retirement System (ERS), and the Judicial Retirement Fund (JRF) are authorized by the Boards of Control to participate in a securities lending program. The Alabama Trust Fund (ATF) investment managers are authorized by the Board of Trustees to engage in securities lending under guidelines established by the ATF Investment Committee. The Retirement Systems of Alabama's custodian, J. P. Morgan Chase and Company, administers the program for the TRS, ERS, JRF, and ATF. Certain securities from the TRS, ERS, JRF, and ATF are loaned to borrowers approved by the Retirement Systems of Alabama (RSA). Approved borrowers of securities provide acceptable collateral in the form of cash, U.S. Treasury securities, or U.S. Government Agency securities. All security loans are open loans and can be terminated on demand by the TRS, ERS, JRF, ATF, or borrower. At the inception of each loan, collateral must be provided in the amount of 105 percent and 102 percent of the fair value of the loaned securities for international and U.S. equity securities, respectively. Subsequently, collateral for each loan is allowed to fluctuate between the initial required percentage and 100 percent of the fair value of the loaned securities. If the fair value of the collateral falls below 100 percent of the fair value of the loaned securities, additional collateral is required to restore the collateralized amount to the initial required collateralization. All collateral remains in the exclusive possession of the RSA's custodial agent who is responsible for marking the collateral to fair value each day and ensuring that the loaned securities are properly collateralized at all times. The TRS, ERS, JRF, and ATF cannot pledge or sell collateral securities received unless the borrower defaults. Therefore, securities lent that are collateralized by other securities are categorized in the investment credit risk table based on how the collateral received is held. The securities received as collateral are not categorized since these securities cannot be sold or pledged without borrower default.

Cash collateral is invested in a dedicated short-term investment fund in the respective Systems' or Funds' name using investment guidelines provided by the TRS, ERS, JRF, and ATF Investment Committee. As a result, the securities purchased with cash collateral are categorized in the investment credit risk tables based on how they are held. The securities lent are included in the investment credit risk tables in the "Investments Not Categorized" section of the table. As of September 30, 2003, the cash collateral investments had a weighted-average maturity of one day for the TRS. Also, the average term of the loans was one day for the TRS. As of September 30, 2003, the ERS, JRF, and ATF did not have any outstanding balances related to securities lending. There is no direct matching of the maturities of the loans with the investments made with cash collateral.

At September 30, 2003, the fair value of the securities on loan was \$2,441,000 for the TRS. The fair value of the collateral pledged by the borrowers was \$2,505,000 for the TRS. Since the amounts owed by the TRS exceeded the amounts the borrowers owed to the TRS there was no credit risk exposure as of September 30, 2003. There were no significant violations of legal or contractual provisions, no borrower or lending agent default losses, and no recoveries of prior period losses during the year.

E. Mortgage-Backed Securities

The State of Alabama periodically invests in mortgage-backed securities to improve yield and adjust the duration of the State's fixed income portfolio. These securities are subject to change in fair value due to changes in interest rates. Credit risk (the risk that the counterparty might be unable to meet its obligations) results from the same considerations as other counterparty risk assumed by the State.

F. Capital Assets

The State has elected to phase in the reporting of infrastructure. The cost of infrastructure reported this year consists only of projects capitalized during fiscal year 2002 and 2003. The cost of infrastructure constructed and completed in prior years is expected to be included in the fiscal year 2004 Comprehensive Annual Financial Report. The State capitalizes infrastructure when all costs for a project are incurred and all project documentation is completed and filed with the appropriate entities. Due to the documentation requirements, there can be substantial time lags between the date a project is put into service and the date the project is capitalized. A significant portion of Infrastructure Construction in Progress consists of projects that have been put into service and maintenance costs could have been incurred but the project documentation is not complete. As of September 30, 2003, the capital assets for the Primary Government and the Component Units are presented in the following tables:

NOTE 4 - LIABILITIES

A. Commitments

1. Construction Projects

a. Primary Government

At September 30, 2003, the Department of Transportation had construction and maintenance contracts of \$2,054,576,496. The amount already performed was \$1,881,323,281, leaving an outstanding balance of \$173,253,215. The funding sources for this amount are 60 percent Federal funds and 40 percent State and local funds.

The State Port Authority had commitments for capital expenditures of approximately \$21,200,000 at September 30, 2003.

b. Component Units

The University of Alabama at Birmingham had construction and acquisition commitments remaining at September 30, 2003, of \$271,229,000. These costs will be financed from bond proceeds and UAB reserves of \$126,132,000, federal funds of \$40,665,000, state funds of \$34,617,000, and other non-UAB funding sources of \$69,815,000. During 2003, approximately \$129,952,000 of construction was financed through debt proceeds. In addition, certain projects in the planning and design phase that UAB expects to complete have estimated costs totaling \$111,871,000.

The University of Alabama at Tuscaloosa had construction and renovation contracts remaining at September 30, 2003, of \$30,000,000. These costs are expected to be financed from gifts, grants, bond proceeds, and University funds.

Auburn University had construction and renovation contracts for various facilities that are estimated to cost approximately \$34,000,000. At September 30, 2003, the estimated remaining cost to complete the projects was approximately \$18,700,000 payable from University funds.

At September 30, 2003, Jacksonville State University had commitments on construction projects which included \$16,257,505 on renovating and expanding Ayers Hall, McClellan Building #3181, Houston Cole Library and the Stephenson Multipurpose Athletic Building.

The University of Montevallo had construction and renovation projects for a new student center remaining at September 30, 2003, of \$6,500,000. These costs are expected to be financed from bond proceeds and University funds.

Troy State University had construction and renovation projects for Memorial Stadium, Recreations Center, new labs and Whitley Hall remaining at September 30, 2003 of \$2,633,464.

2. Operating Leases

The State and its component units have entered into various lease agreements for real property. These leases do not represent material commitments by the State, therefore disclosure of minimum future lease payments is not provided.

3. Federal Programs

The State operates several Federal programs that have commitments for claims outstanding at September 30, 2003. These claims involve services provided to beneficiaries prior to September 30, but the claims were neither submitted to nor approved for payment by the State until after September 30. The amounts of these programs are not material.

4. Other Commitments

The Alabama Housing Finance Authority, a component unit, has designated \$39,554,000 of its net assets for fiscal year September 30, 2003 for funding of future single-family mortgage revenue bond programs, to support its single-family mortgage loan origination and warehousing operations, and to cover its operating expense budget for the following fiscal year.

B. Claims and Judgments

A judgment was entered against the State in favor of Alabama State University and Alabama A&M University. The State must pay each University \$1,000,000 for the next seven years. The amount outstanding is \$14,000,000. The Education Trust Fund is being used to liquidate this debt.

C. Long-term Debt

1. Debt Limitations and Methods of Bond Issuance

Under Section 213 of the Constitution of Alabama, as modified by Amendment 26, the State is constitutionally prohibited from incurring debt except to repel invasion or suppress insurrection. Therefore, the only method under which general obligation debt can be incurred is by amendment to the Constitution. Although conventions proposed by the legislature and approved by the electorate may be called for the purpose of amending the Constitution, historically all amendments have been adopted by a procedure which requires them to be proposed by a three-fifths majority of each house of the legislature and thereafter ratified by a majority of the electorate.

The Supreme Court of Alabama has ruled that the debt prohibition does not apply to debts incurred by separate public corporations functioning as State instrumentalities. The State has followed the practice of financing certain capital improvements by issuing debt through such public corporations. The Legislature (through enabling legislation) and the Governor (by executive order) have created public corporations and authorities of the State for the purpose of financing projects and programs such as public highways, public educational facilities, judicial buildings, student loans, affordable housing, and other projects. In most instances, State officials such as the Governor, Lieutenant Governor, Attorney General, State Treasurer, and the Director of Finance serve as board members of these corporations. The revenue bonds issued by these corporations are limited obligations of the corporation, not general obligations of the State, and the full faith and credit of the State is not pledged for their repayment. Certain revenues, usually earmarked taxes or revenues generated from the project financed, are pledged for the payment of the debt. Depending on the GASB criteria discussed in Note 1, some of these corporations are reported by blending them with the primary government and some are reported discretely.

The State and its component units issue serial and term bonds and capital appreciation bonds. Capital appreciation bonds are sold at a deep discount and do not pay any interest until the bonds mature. Based on the original offering price, the bonds increase in value as semi-annual interest is earned and is compounded from the original issuance date to the date of maturity. The issuance of this type bond postpones the cash flow until the bonds mature or are called. The increase in the value of the bonds is referred to as accretion.

2. General Obligation Bonds – Governmental Activities

The State has general obligation bond issues outstanding for the purpose of financing capital projects for: state waterways, State Port Authority's facilities, prisons, roads, bridges, mental hospitals, Mobile harbor, State parks, youth services facilities, state buildings, the State Coliseum, public schools and colleges, conservation projects, educational television, and diagnostic and research laboratories. The full faith and credit of the State is pledged for the payment of the bonds. The following schedule shows the general obligation annual debt service requirements and is followed by a detailed table describing each individual general obligation bond issue outstanding:

For the Fiscal Year Ended September 30, 2003

GENERAL OBLIGATION BONDS Debt Service Requirements to Maturity

Maturity	Principal	Interest	Total
2004	\$ 47,975,000	\$ 19,128,334	\$ 67,103,334
2005	50,130,000	16,714,675	66,844,675
2006	47,792,111	18,797,850	66,589,961
2007	43,839,880	25,624,876	69,464,756

‡ Plus: Unamortized Premiums				1,872,195	
Total General Obligation Bonds				\$ 490,085,486	

 $[\]dagger$ The amount outstanding includes \$10,528,500 accretion of interest.

[‡] Unamortized premiums were \$978,511 for Series 2001-E and \$893,684 for Series 2002-A.

3. Revenue Bonds

a. Primary Government - Governmental Activities

The Alabama Industrial Access Road and Bridge Authority is authorized to issue bonds to finance the construction of industrial access roads and bridges in the state. Revenues from gasoline, motor fuel, and lubricating oil taxes are pledged for the payment of these bonds.

The Alabama Corrections Institution Finance Authority issues bonds for the purposes of acquiring land and constructing correctional institutions. The bonds are payable from revenues derived from payments under a lease agreement between the Authority and the Department of Corrections.

The Montgomery Downtown Redevelopment Authority issued bonds to fund the construction of the Gordon Persons Building. Debt service is payable solely from the revenues and receipts paid pursuant to leases, proceeds of insurance in the event of damage or destruction of the building, amounts received in the event of condemnation of the building, amounts payable by MBIA under the Insurance Policy, amounts on deposit in the Reserve Fund held by the Trustee, earnings, if any on funds held by the Trustee, and funds received by the Trustee in the event of any foreclosure sale of the building.

The Alabama Building Renovation Finance Authority issues bonds to provide funding for the renovation, reconstruction, operation, and maintenance of public office buildings in the state capitol complex. The Authority also receives income from the rental of the office buildings to state agencies. The bonds issued by the Authority are payable from the rents received by the authority under lease agreements.

The Alabama Judicial Building Authority issues bonds for the purpose of funding the acquisition and construction of judicial facilities. The bonds are payable from revenues and receipts paid by the Judicial System pursuant to the lease, proceeds of insurance in the event of damage or destruction of the facilities, amounts, if any, received in the event of condemnation of the facilities, amounts payable by AMBAC under the Municipal Bond Insurance Policy, and earnings, if any, on funds held by the State Treasurer.

The Alabama Public Health Care Authority issues bonds for the purpose of funding the acquisition and construction of public health care facilities. Revenues received from leases with the county health departments, income from investments, real property, equipment, cash, securities, and a policy of municipal bond insurance are pledged for the payment of principal and interest on the bonds.

The Alabama Federal Aid Highway Finance Authority issues bonds for the purpose of funding the costs of constructing any roads, streets, parks, right of ways, bridges, railroad crossings, drainage structures, signs, guard rails, structures, interstates, surfaces, resurfaces, shoulders, road sides, or any other work which is eligible for federal aid financing assistance under Title 23, Chapter 1, of the United States Code and applicable regulations. The bonds are issued in anticipation of the receipt by the State of the federal share of the costs.

b. Primary Government – Business Type Activities

The Alabama State Port Authority (ASPA) issued bonds for the construction and maintenance of a wharf, warehouse, open storage area and other port facilities at Mobile Bay. The bonds are secured by the gross revenues of ASPA derived from charges made by ASPA for all services provided.

The Alabama College System has numerous bond issues outstanding for a variety of purposes. Most were issued for the construction, renovation, and acquisition of buildings for various purposes, including classrooms, research facilities, dormitories, student centers, dining facilities, and athletic facilities. The total principal amount outstanding on these bonds is \$119,667,083 for the Alabama College System and \$2,770,000 for Athens State.

[†] The liability reported on the balance sheet includes \$8,489,341 for the accretion of interest on Alabama Judicial Building capital appreciation bonds. The above table shows interest in the year it will be paid, not the year it is accrued.

[†] Amounts are due on October 1, but historically are paid a few days prior to the end of the previous fiscal year (September 30). The above schedule reflects the debt in the year it is actually paid.

For the Fiscal Year Ended September 30, 2003

c. Component Units

The Alabama Incentives Finance Authority issues bonds to fund financial commitments to industries relocating to Alabama under the terms of the State's Industrial Incentives legislation. Revenues from the Tennessee Valley Authority to the State "in lieu of taxes" are pledged for the payment of these bonds. At September 30, 2003, the outstanding principal balance of the 1995B bonds was \$33,874,000 which included \$3,874,000 in accreted interest, and the outstanding principal balance of the 1999C bonds was \$40,590,000. The interest rates for the Series 1999C bonds are variable and conditional. The 1999C bonds bear interest at the Weekly Rate, Term Rate or Bank Rate. The rate at 9/30/03 was 1.15%.

The Alabama Public School and College Authority (APSCA) is authorized to issue bonds to construct and improve educational buildings. Revenue from the sales and use taxes, the leasing tax, and the utilities gross receipts and use taxes are pledged for the payment of these bonds.

The State Industrial Development Authority issues bonds for the purpose of financing projects that promote the industrial development of the State. Revenues from cigarette and tobacco taxes are pledged for the payment of these bonds.

The Alabama Mental Health Finance Authority issues bonds for the acquisition, construction, improvement, and equipping of mental health facilities. Revenues from certain tobacco and liquor taxes are pledged for the payment of principal and interest on these bonds.

The Alabama 21st Century Authority issues bonds for the purpose of promoting economic development and industrial recruitment for the State of Alabama. The bonds are special obligations of the Authority payable solely from the Trust Estate created under the Indenture.

The Tennessee Valley Exhibit Commission issued bonds for the purpose of funding the Tennessee Valley Exhibit Center. The full faith and credit of the State do not back these revenue bonds. The principal and interest requirements on these bonds are payable from the revenues of the Commission. If these revenues are insufficient, then the "in lieu of taxes" payments made to the State by the Tennessee Valley Authority are used to pay the debt.

The Alabama Revolving Loan Fund Authority issues bonds for the purpose of making grants to the Regional Planning and Development Commissions which are utilized by the grantees as revolving loan funds. Revenues from privilege and license tax on providers of cellular radio telecommunication services are used to pay the debt.

The Alabama Housing Finance Authority issues bonds that are limited obligations of the Authority and are not a debt or liability of the State. Each bond issue is secured, as described in the applicable trust indenture, by all revenues, monies, investments, mortgage loans, and other assets in the funds and accounts of the program. Substantially all of the Authority's assets are pledged as security for the bonds. These bonds are variable rate bonds and bear interest at a weekly rate set by the remarketing agent.

The Alabama Water Pollution Control Authority issues bonds to provide funds for the purpose of making loans to certain local government units to construct sewage treatment plants and related facilities. Proceeds from loan agreements are used for payment of debt service related to the bonds.

The Alabama Drinking Water Authority issues bonds to provide funds for the purpose of making loans to local governments for planning, designing, acquiring, or constructing sanitary drinking water and related facilities. Proceeds from the loan agreements are used for payment of debt service related to the bonds.

The Alabama Space Science Exhibit Finance Authority issued bonds to finance the construction of the Space Camp and related housing facilities for the campers. The bonds are secured by a lease of the facilities to the Space Science Exhibit Commission as well as a pledge of all revenues of the Commission. At September 30, 2003, the outstanding principal balance of the 2001 bonds was \$9,955,000. The interest rate for the 2001 bonds is variable and determined by the Remarketing Agent. The rate at September 30, 2003 was 1.44%.

The Governmental Utility Services Corporation of Jefferson County - Tannehill Historical State Park was created for the purpose of issuing bonds to acquire and construct a sanitary sewer system and related facilities for the Tannehill State Park, which is operated by the Alabama Historic Ironworks Commission (formerly Tannehill Furnace and Foundry Commission). Three members of the Alabama Historic Ironworks Commission serve as directors of the corporation. The Commission also issued a bond to cover the cost of improvements to the state park and other historic sites operated by the Commission. Revenues of Tannehill State Park are pledged for payment of all bond principal and interest. The bond interest rate is 2.5% below the prime rate as published in The Wall Street Journal. At September 30, 2003, the bond rate was 1.5%.

The Alabama Higher Education Loan Corporation issues bonds to provide Alabama lending institutions with a secondary market for student loans made under the Higher Education Act, which established the federal Guaranteed Student Loan Program. The corporation issues tax-exempt revenue bonds in order to fund its operations. The proceeds are used to purchase student loans and fund operating costs of the corporation. The bonds are repaid from principal repayments on student loans, interest, and special allowance payments from the U. S. Department of Education, interest income from investments, guarantee payments on defaulted loans, proceeds from any sale of loans, issuance of refunding bonds, and if necessary, by drawing on the corporation's irrevocable letters of credit. The interest rate for the 1998-A bonds is an auction rate based on an auction period of 35 days. The rate at September 30, 2003 was .98%.

The boards of the various **institutions of higher education** have numerous bond issues outstanding for a variety of purposes. Most were issued for the construction, renovation, and acquisition of buildings for various purposes, including classrooms, research facilities, dormitories, student centers, dining facilities, hospitals, and athletic facilities.

[†] The liability reported on the balance sheet includes \$3,874,000 for the accretion of interest on Alabama Incentives Finance Authority capital appreciation bonds. The above table shows interest in the year it will be paid, not the year it is accrued.

4. Refunded and Redeemed Bonds

Advance refunding bonds are issued to retire existing bonds. A portion of the proceeds from the sale of the refunding bonds is deposited with an escrow agent according to an escrow trust agreement. The proceeds are invested by the escrow agent in certain U.S. Treasury obligations in such amounts with certain maturities to provide sufficient funds to pay the remaining maturing principal and interest on the refunded bonds as they become due. The refunded bond debt is considered to be retired for financial reporting purposes even though the debt is still legally outstanding and the issuer of the bonds has not been released from the debt obligations. The U.S. Treasury obligations constitute a trust fund to be held by the escrow agent for the benefit of the holders of the refunded bonds. Advance refundings and early redemptions are discussed in the remainder of this section.

In December 2002, the University of Alabama – Birmingham issued \$11,455,000 Series 2002 General Revenue Bonds which bear interest at 4.0% to 6.0%. The Series 2002 net proceeds were used to advance refund the outstanding Series 1993A General Revenue bonds. This current refunding resulted in an accounting loss of \$532,000. The University has economic gain of \$1,027,000.

In June 2003, the University of Alabama – Birmingham issued \$69,930,000 Series 2003A General Revenue Bonds which bear interest at 4.0% to 5.25%. A portion of the Series 2003A net proceeds were used to advance refund the outstanding Series 1993 Student Housing Revenue Refunding bonds. This current refunding resulted in an accounting loss of \$140,000. The University has economic gain of \$663,000.

For the Fiscal Year Ended September 30, 2003

On January 15, 2003, Auburn University issued \$21,900,000 Series 2003 Athletic Revenue Bonds. The Series 2003 net proceeds were used to advance refund the outstanding Series 1993 Athletic Revenue bonds. This current refunding resulted in an accounting loss of \$912,619. The University has economic gain of \$884,255.

On March 6, 2003, Auburn University issued \$49,460,000 Series 2003 General Fee Revenue Bonds. The Series 2003 net proceeds were used to advance refund the outstanding Series 1993 General Fee Revenue bonds. This current refunding resulted in an accounting loss of \$1,595,852. The University has economic gain of \$1,878,448.

On March 13, 2003, Auburn University issued \$15,645,000 Series 2003 Housing and Dining Revenue Bonds. The Series 2003 net proceeds were used to advance refund the outstanding Series 1993 Housing and Dining Revenue bonds. This current refunding resulted in an accounting loss of \$672,295. The University has economic gain of \$808,021.

During the year ended September 30, 2003, the Alabama Housing Finance Authority called approximately \$167,583,000 of bonds in advance of their scheduled maturities. The extraordinary loss on early retirement of these bonds is \$512,000 and is primarily comprised of unamortized deferred debt financing costs and unamortized discount.

On January 1, 2003, the Alabama Water Pollution Control Authority issued \$52,650,000 Series 2003B refunding bonds. The Series 2003B net proceeds were used to refund \$54,210,000 of the outstanding Series 1992A bonds. The refunding resulted in an accounting loss of \$2,000,000. The Authority has economic gain of \$1,000,000.

On August 1, 2003, the Alabama Water Pollution Control Authority issued \$11,385,000 Series 2003C refunding bonds. The Series 2003C net proceeds were used to refund \$11,695,000 of the outstanding Series 1992B bonds. The refunding resulted in an accounting loss of \$253,000. The Authority has economic gain of \$50,000.

On May 1, 2003, the Tennessee Valley Exhibit Commission issued \$2,610,000 Series 2003 refunding bonds. The Series 2003 net proceeds were used to refund \$2,605,000 of the outstanding Series 1992 bonds. The refunding resulted in an accounting loss of \$44,421. The Commission has economic gain of \$226,543.

On January 1, 2003, the Alabama Corrections Institution Finance Authority issued \$17,530,000 Series 2003A refunding bonds. The Series 2003 net proceeds were used to refund \$16,835,000 of the outstanding Series 1993B bonds. The refunding resulted in an accounting loss of \$251,037. The Authority has economic gain of \$1,023,391.

Defeased Bonds:

Component Units

Auburn University	\$10,495,000
University of Alabama in Tuscaloosa	12,440,000
University of South Alabama	9,040,000
University of Montevallo	455,000

5. Arbitrage

The Tax Reform Act of 1986 requires that governmental entities issuing tax-exempt debt subsequent to August 1986, to calculate and rebate arbitrage earnings to the federal government. The U.S. Treasury has issued regulations on calculating the rebate amount and complying with the provisions of the Tax Reform Act of 1986. Governmental issuers must comply with the rebate regulation in order for their bonds to maintain tax-exempt status.

The regulations require the excess of the aggregate amount earned on investments purchased with bond proceeds over the amount that would have been earned if the proceeds were invested at a rate equal to the bond yield to be rebated to the federal government. Income earned on excess earnings is also subject to rebate. Rebate payments, if required, are due at least once every five years over the life of the bonds. Bond issues with arbitrage liabilities outstanding at September 30, 2003, were as follows:

Component Units	Amount
Water Pollution Control Authority	\$ 807,345
Drinking Water Finance Authority	427,283
Alabama Higher Education Loan Corp.	7,858,205
Housing Finance Authority	25,504,000

These lists are based upon incomplete data since some bond issues have not yet been included in arbitrage calculations. Any refunded bond issue is subject to the rebate requirement until the last bond is redeemed. Bond issues that have already been redeemed may be subject to additional payments if an arbitrage rebate or spending payment is owed and has not been paid.

6. Bonds Authorized But Not Issued

Bonds Authorized But Not Issued (Amounts in Thousands)

Primary Government	Authorized	Issued	Unissued
General Obligation Bonds			
State of Alabama	\$ 350,000	\$ 139,955	\$ 210,045

Alabama Public School and College Authority	75,000	7,400	67,800
Alabama Incentives Financing Authority	175,000	165,220	9,780
Total Component Units	385,735	231,010	154,925
Total Reporting Entity	<u>\$ 991,735</u>	\$ 502,660	\$ 489,275

[†] The State Industrial Development Authority is authorized to issue a total of \$100,000,000 in bonds in addition to any bonds authorized prior to 1991.

No more than \$40,000,000 in aggregate principal amount of such bonds may be outstanding at any one time. At 9/30/03, \$21,230,000 was outstanding.

7. Forward Delivery Agreements

In September 1994, the Alabama Public School and College Authority (APSCA) and the Alabama Industrial Access Road and Bridge Authority (AIARBA) each entered into debt service forward delivery agreements with Merrill Lynch Capital Services, Inc. (MLCS). Under the agreements, the APSCA received \$9,800,000 and the AIARBA received \$1,084,841. In exchange for the above amounts, each Authority agreed to deposit one-sixth of the semi-annual interest and one-twelfth of the annual principal

For the Fiscal Year Ended September 30, 2003

payable on certain bonds to MLCS each month. MCLS agreed in turn to deliver qualified securities that will mature on or before the bond payment dates. Because the interest that normally would be earned on these deposits belongs to the General Fund, the \$10,884,841 paid by MLCS was deposited in the General Fund. The Agreements are being amortized on a straight-line basis over twelve years. This amortization is reflected in the General Fund as debt service expenditure and interest revenue.

8. Interest Swap Agreement

On March 13, 2002, JPMorgan Chase Bank entered into an interest rate swap agreement with the Public School and College Authority (PSCA) with respect to the Authority's Capital Improvement Bonds, Series 1998, Tax-Exempt Special Obligations Bonds, Series 1999-A, Capital Improvement Bonds, Series 1999-C, and Capital Improvement Pool Bonds, Series 1999-D (collectively, the "Bonds"). The Authority received a lump sum payment from JPMorgan Chase Bank in return for an option to swap transactions on the Bonds, whereby the Authority will make a fixed rate payment to JPMorgan equal to the fixed rate payments on the Bonds and JPMorgan Chase will make corresponding variable rate payments to the Authority determined by the nationally recognized index, LIBOR. The swap agreement is based on a notional amount of \$710,215,000 and expires on September 1, 2029. The agreement was amended on January 16, 2003 to change the variable rate payments to the Authority from 70% to 67% of the nationally recognized index, LIBOR rate. The option is exercisable in the years 2008 through 2011. As of September 30, 2003, the swap had a negative fair value of approximately \$35,509,000. This valuation was calculated by using proprietary models based on well recognized financial principles and reasonable estimates about relevant future market conditions. In calculations of the present value of all future cash flows, estimates about future market conditions were performed using reasonable estimates. The Authority received lump sum payments of \$12,587,000 which are being amortized as an adjustment to interest expense using the straight line method over the life of the option.

In December 2002, The Alabama State Port Authority entered into a swaption contract with an investment company in order to monetize potential debt service savings on the Authority's callable 1996 Series bond. The swaption gave the counterparty the option to enter into a variable-to-fixed interest rate swap at a specified future date. The counterparty has the option to exercise the agreement on July 18, 2006. If the option is exercised, the interest rate swap will commence on October 1, 2006 with the Authority paying a fixed interest rate of 5.38% and the Authority receiving a variable interest rate of 67% of the on-month LIBOR. The swap agreement is based on a notional amount of \$60,455,000 and expires on October 1, 2021. Upon exercising of the option by the counterparty, the Authority anticipates issuing variable-rate refunding bonds in an amount sufficient to refund the fixed rate Series 1996 bonds. If the option is exercised and refunding bonds are not issued, the 1996 Series Bonds will not be refunded and the Authority will make net swap payments as required by the terms of the contract as stated above. The Authority does not anticipate any potential problems with being able to issue the refunding bonds at the future date. As of September 30, 2003, the swap had a negative fair value of approximately \$7,626,000. The swaption is calculated using an industry accepted option pricing model that uses market interest rates and volatility assumptions on the valuation date. The interest rate and volatility data is used to calculate the present value of the potential future cash flows of the swaption. In consideration for writing the option the Authority received a premium payment of \$5,025,000. The Authority will recognize the premium payment as an adjustment to interest expense using the effective interest method over the life of the option.

9. Resolutions Authorizing Issuance of General Obligation Bonds

As security for the State's obligation for certain commitments made to Hyundai Motor Manufacturing Alabama, LLC (HMMA), the State has authorized the issuance of two general obligation bonds payable to HMMA, each in the principal amount of \$27,400,000, which are dated January 1, 2004 and April 1, 2004 respectively. The bonds are to be held in escrow by a trustee with irrevocable instructions that if the State deposits into the Training Equipment Fund (a State account) the sum \$27,400,000 during the last quarter of 2003 and an additional \$27,400,000 during the first quarter of 2004, the general obligation bonds payable to HMMA will terminate and the bonds will be destroyed without delivery. Should the State fail to make the first required deposit of \$27,400,000 by December 31, 2003 the escrow trustee shall deliver the bond dated January 1, 2004 to HMMA and such bond shall begin to bear interest at a post-default rate of 7% until such time as the corresponding deposit into the Training Equipment Fund of \$27,400,000 by March 31, 2004, then the escrow trustee shall deliver the bond dated April 1, 2004 to HMMA and such bond shall begin to bear interest at a post-default rate of 7% until such time as the corresponding deposit into the Training Equipment Fund is made. Each bond shall further provide that, if the applicable payment to the Training Equipment Fund is not made within six months of the date of the bond, then the principal of, and interest on, such bond shall become payable to HMMA in immediately available funds.

On January 16, 2003 the Amendment 666 Bond Commission, by resolution, authorized the issuance of four bonds, each in the principal amount of \$20 million payable to the Alabama Port Authority which are being held in escrow. Bond number one is dated January 1, 2004, and matures on July 1, 2004. Bond number two is dated January 1, 2005, and matures on July 1, 2005. Bond number three is dated January 1, 2006, and matures on July 1, 2006. Bond number four is dated January 1, 2007, and matures on July 1, 2007. If the State makes a payment of \$20 million to the Port Authority on or before December 31, 2003, the obligations evidenced by bond number one will terminate. If the State makes a payment of \$20 million on or before December 31, 2004, the obligations evidenced by bond number two shall terminate. If the State makes a payment of \$20 million on or before December 31, 2005, the obligations evidenced by bond number three shall terminate. If the State makes a payment of \$20 million on or before December 31, 2006, the obligations evidenced by bond number four shall terminate.

The Alcoholic Beverage Control Board has the most interfund payables, \$11,615,000 in total. The Board owed \$7,180,000 to the General Fund and \$3,955,000 to the Public Welfare Trust Fund. The Board is required by law to distribute profits and certain taxes collected to those two funds, local governments, and the Mental Health component unit. The law also allows ABC to delay distribution for 120 days in order to maintain sufficient operating cash.

The Internal Service Funds hold the most interfund receivables, \$16,621,000 in total. These amounts generally represent normal billings for services rendered or goods sold to the other funds late in the fiscal year which will be paid early in the subsequent fiscal year.

The vast majority of the interfund balances due to the Nonmajor Governmental Funds from the General Fund, Education Trust, and the Nonmajor Governmental Funds consists of routine short term borrowings of cash between funds of individual agencies.

All of the interfund balances are expected to be repaid within one year.

For the Fiscal Year Ended September 30, 2003

B. Balances with Component Units

Balances owed to State funds by component units at September 30, 2003, consisted of (amounts in thousands):

PAYABLE FROM:										
	Water			Drinking		State	Miscel-			
	Pollution			Water		Industrial	laneous			
	Control Mental		Historical Finance		Super- Development		Component	Fiduciary

Totals	\$ 577	\$ 658	\$ 38	\$ 16	\$ 1	\$ 56	\$ 6	\$ 76	\$ 1,428	

The component units of the State owe \$1,428,000 to various funds of the State. The largest portion, \$680,000, is owed to Internal Service Funds. These amounts generally represent normal billings for services rendered or goods sold late in the fiscal year which will be paid early in the subsequent fiscal year. The second largest amount is \$577,000 that the Water Pollution Control Authority owes to the Department of Environmental Management, a Nonmajor Governmental Fund, for various administrative services performed by the Department.

Balances owed by State funds to component units at September 30, 2003 consisted of (amounts in thousands):

RECEIVABLE BY

		11.	CELTITOEE				
	Mental	Historical	Super-	Component	Fiduciary		
PAYABLE BY	Health	Commission	computer	Units	Funds	Total	
General Fund	\$ -	\$ -	\$ 3	\$ -	\$ 1	\$ 4	
Education Trust	18	-		-	-	18	
Public Road							
& Bridge Fund	-	203	-	-	-	203

Nonmajor							
Enterprise	13			3	4	20	
Totals	\$ 3,703	\$ 203	\$ 3	\$ 3	\$ 12	\$ 3,924	

The largest payable was \$2,732,000 owed by the Alcoholic Beverage Control Board to the Mental Health component unit. The Board is required by law to distribute profits and certain taxes collected to other State funds, local governments, and the Mental Health component unit. The law also allows ABC to delay distribution for 120 days in order to maintain sufficient operating cash

The second largest amount is \$805,000 owed by Nonmajor Governmental Funds to Mental Health. Nearly this entire amount is owed by the Department of Rehabilitation Services to Mental Health.

For the Fiscal Year Ended September 30, 2003

C. Interfund Transfers

Transfers among the various funds of the primary government during fiscal year 2003 were as follows (amounts in thousands):

TRANSFERS IN													
					Public	Public		Alcoholic				Non-

Transfers are often made between funds as required by the legislature in the appropriation acts as well as by a variety of existing statutes. Of the \$158,440,000 transferred to other funds by the General Fund, \$135,506,000 was transferred in compliance with the appropriation acts. Of that amount, \$72,899,000 was transferred to the Public Welfare Trust Fund and \$68,273,000 was transferred to various Nonmajor Governmental Funds. The remainder of the General Fund transfers was made in small amounts to comply with a variety of statutes. The Education Trust Fund transferred \$255,066,000 as required by the appropriation acts to subsidize the operations the Alabama College System. The appropriation acts also required the Education Trust to transfer \$7,177,000 to the Public Welfare Trust Fund. The Education Trust Fund transferred \$12,420,000 to Nonmajor Governmental Funds, \$8,880,000 of that amount was required by the appropriation acts and the remainder to comply with a variety of statutes.

The General Fund also received \$14,819,000 from the Alcoholic Beverage Control Board, which represents the General Fund's statutorily mandated share of the Board's profits.

The Alabama Trust Fund, in compliance with Amendments to the Constitution, is required to transfer to other funds a substantial portion of its investment earnings as well as a portion of new income from offshore oil and gas rights. In compliance with these amendments, the General Fund received \$104,868,000, the Forever Wild Trust Fund, a Nonmajor Governmental Fund, received \$11,652,000, the County and Municipal Improvement Trust, a Nonmajor Governmental Fund, received \$10,416,000, and the Alabama Capital Improvement Fund, a Nonmajor Governmental Fund received \$41,666,000. The remaining \$170,000 was transferred from the Forever Wild Stewardship Account to the Forever Wild Trust Fund as authorized by the Constitution for maintenance of lands.

The Alabama Trust made one transfer which would not be considered routine, and that was the transfer of \$179,993,000 to the Education Trust Fund which was a partial withdrawal of the Education Rainy Day Account which resides in the Alabama Trust as authorized by the Constitution. That transfer also triggered a constitutionally required transfer of \$44,998,000 to the County and Municipal Improvement Trust, a Nonmajor Governmental Fund.

D. Interfund Eliminations

Interfund receivables and payables have been eliminated from the government-wide statements to the extent that they occur within either the governmental or business-type activities. Balances between governmental and business-type activities are reported as Internal Balance on the government-wide Statement of Net Assets. Receivables and payables involving fiduciary funds are presented as accounts payable or receivable on the government-wide Statement of Net Assets. Eliminations have also been made in the government-wide financial statements to eliminate the effects of transactions between the Internal Service Funds and the individual functions and business-type activities presented on the government-wide Statement of Activities.

NOTE 6 - RISK MANAGEMENT

The State manages risk through risk control and risk financing to minimize the adverse effects of certain types of losses. Risk financing includes self-insurance through several different funds. The State Insurance Fund provides coverage for state buildings and contents against fire and casualty losses. The General Liability Trust Fund insures state employees against the risk of loss from employment-related liability claims. The State Employee Injury Compensation Trust Fund was created by the 1994 legislature to provide benefits to eligible state employees for job-incurred injury. The State Insurance Fund, the General Liability Trust Fund, and the State Employee Injury Compensation Trust Fund are administered by the Division of Risk Management of the Department of Finance.

There was no significant reduction in insurance coverage by the three Division of Risk Management funds from the prior year. These funds do not have acquisition costs; therefore, no cost is amortized for the period. The funds use the accrual basis of accounting for reporting purposes. As required by GASB 31, "Accounting and Financial Reporting for Certain Investments and External Investment Pools," most investments are recorded at fair value. Liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNR). Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liabilities does not necessarily result in an exact amount. Claims liabilities are reevaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Estimated claims liabilities are calculated by the plans' actuary based on prior claims data for the General Liability Trust Fund and State Employee Injury Compensation Trust Fund. For the State Insurance Fund, estimated claims liabilities are based on management's judgment.

The separately issued financial report of the Division of Risk Management contains additional note disclosures and supplementary information regarding claims development and liabilities.

For the Fiscal Year Ended September 30, 2003

A. The State Insurance Fund

The State Insurance Fund (SIF) was established in 1923 under the *Code of Alabama 1975*, Section 41-15-1 for the purpose of insuring direct physical loss on buildings and contents in which title in whole or in part is vested in the State of Alabama or any of its agencies or institutions or in which funds provided by the State have been used for the purchases of land, construction of buildings, purchase or maintenance of any equipment, machinery, furniture, fixtures or supplies in such buildings and public school buildings together with the contents of all such buildings. All covered property shall be insured for no more than its replacement cost and shall be insured for no less than 80 percent of its actual cash value. City or county boards of education or district boards of education of independent school districts may insure school buildings and property either in the state insurance fund or with an insurance company, whichever in the opinion of such board provides the best coverage for such school buildings and property. The principles of private industry insurance companies are utilized to establish rates, premium discounts, and experience credits to result in equitable premiums charged to policyholders. Excess insurance and reinsurance is acquired to assure the solvency of the fund while providing additional coverage such as earthquake and flood insurance.

The SIF has a \$7,500,000 annual deductible and a \$3,500,000 deductible per occurrence on claims. Excess insurance covers claims exceeding \$7,500,000 with a \$500,000,000 limit. Settlements for 2003 exceeded the SIF's deductibles by \$281,670. Settlements did not exceed the deductible amounts in fiscal years 2001 and 2002.

The following table presents the changes in claims liabilities for the past two years:

	<u>2003</u>	<u>2002</u>
Unpaid Reported Claims Liabilities:		
Unpaid claims and adjustment expense at beginning of year	\$7,121,103	\$6,551,521
Incurred claims and adjustment expenses:		
Provision for insured events of the current year	9,274,467	5,111,611
Increase (Decrease) in provision for insured events of prior years	<u>5,684,351</u>	3,407,740
Total incurred claims and adjustment expenses	14,958,818	8,519,351
Payments:		
Claims and adjustment expenses attributable to insured events of the current	(7,664,895)	(2,296,674)
year	(6 = 00 4 = 6)	(5 (50 005)
Claims and adjustment expenses attributable to insured events of prior years	(6,708,456) (14,272,251)	(5,653,095)
Total payments	(14,373,351)	(7,949,769)
Total unpaid claims and adjustment expenses at end of year	7,706,570	7,121,103
Incurred But Not Reported (IBNR):		
Incurred but not reported at beginning of year	733,062	1,463,587
Increase (Decrease) in incurred but not reported	(32,283)	<u>(730,525)</u>
Incurred but not reported at end of year	700,779	733,062
Total Unpaid Reported Claims Liabilities and IBNR at end of year	\$8,407,349	\$7,854,165
	 	

B. General Liability Trust Fund

The General Liability Trust Fund (GLTF) was established in 1984 to protect state employees from personal financial liability resulting from lawsuits that are based on alleged negligence while acting within the line and scope of state employment. Claims are investigated and defended through the Office of Attorney General. Auto liability is fully reinsured and the re-insurer, American Southern Insurance Company, handles all claims. The GLTF is managed much like a commercial insurance company, with exposure evaluated and commensurate premiums assigned to state agencies. Investment activities are an essential part of the General Liability Trust Fund's financial stability to maintain lower-cost employee liability coverage. Funds in excess of those needed for immediate operations are invested to maximize return and keep premiums down.

The GLTF had a \$3,300,000 deductible on claims. Excess insurance coverage was not renewed in April 2002 so they are currently without excess coverage. Settlements for 2001 exceeded the deductible by \$480,070, by \$1,489,950 in 2002 and \$7,560 in 2003.

The following table presents the changes in claims liabilities for the past two years:

	2003	<u>2002</u>
Unpaid Reported Claims Liabilities:		
Unpaid claims and adjustment expense at beginning of year	\$9,811,469	\$5,717,009
Incurred claims and adjustment expenses:		
Provision for insured events of the current year	1,408,145	2,979,894
Increase (Decrease) in provision for insured events of prior years	7,979,487	<u>5,297,589</u>
Total incurred claims and adjustment expenses	9,387,632	8,277,483
Payments:		
Claims and adjustment expenses attributable to insured events of the current year	(1,006,310)	(1,251,418)
Claims and adjustment expenses attributable to insured events of prior years	(3,034,198)	(2,931,605)
Total payments	(4,040,508)	(4,183,023)
Total unpaid claims and adjustment expenses at end of year	15,158,593	9,811,469
Incurred But Not Reported (IBNR):		
Incurred but not reported at beginning of year	10,777,309	11,019,711
Increase (Decrease) in incurred but not reported	1,256,681	(242,402)
Incurred but not reported at end of year	12,033,990	10,777,309
Total Unpaid Reported Claims Liabilities and IBNR at end of year	<u>\$27,192,583</u>	<u>\$20,588,778</u>

For the Fiscal Year Ended September 30, 2003

C. State Employee Injury Compensation Trust Fund

The State Employee Injury Compensation Trust Fund (SEICTF) was created by the legislature on October 1, 1994. Its purpose is to provide benefits to eligible state employees for job-incurred injury. Benefits under SEICTF include all reasonable medical expenses arising from a job-incurred injury, lost wages (including benefits for time lost from the job), and benefits to dependents of employees who are fatally injured on the job. Specifically excluded from coverage are employees of the State Port Authority, educational institutions, and boards of education. A key element in assuring effective and efficient operation of SEICTF was the creation of a statewide medical provider network with a focus on professionals who are experts in treating occupational injury. Excess insurance and reinsurance is acquired to assure the solvency of the fund.

The SEICTF has a deductible per occurrence. Settlements did not exceed the deductible amounts in fiscal year 2003. Settlements for 2001 exceeded the deductibles by \$108,617 and \$442,114 in 2002.

The following table presents the changes in claims liabilities for the past two years:

	<u>2003</u>	<u>2002</u>
Unpaid Reported Claims Liabilities:		
Unpaid claims and adjustment expense at beginning of year	\$4,702,785	\$3,926,111
Incurred claims and adjustment expenses:		
Provision for insured events of the current year	843,397	739,753
Increase (Decrease) in provision for insured events of prior years	1,877,240	2,959,010
Total incurred claims and adjustment expenses	2,720,637	3,698,763
Payments:	, ,	, ,
Claims and adjustment expenses attributable to insured events of the current year	(600,570)	(584,418)
Claims and adjustment expenses attributable to insured events of prior years	(1,336,754)	(2,337,671)
Total payments	(1,937,324)	(2,922,089)
Total unpaid claims and adjustment expenses at end of year	5,486,098	4,702,785
Incurred But Not Reported (IBNR):		
Incurred but not reported at beginning of year	3,421,104	2,780,743
Increase (Decrease) in incurred but not reported	1,253,598	640,361
Incurred but not reported at end of year	4,674,702	3,421,104
Total Unpaid Reported Claims Liabilities and IBNR at end of year	<u>\$10,160,800</u>	<u>\$8,123,889</u>

D. State Employees' Insurance Plan

The State Employees' Insurance Plan (SEIP) was established in 1965 by Alabama Act No. 833 to provide health insurance benefits for state employees. The SEIP is administered by the State Employees' Insurance Board (SEIB). The monthly premiums for employee and dependent coverage are determined annually and are set at a rate necessary to provide sufficient funds to pay all claims and reasonable expenses of administering the plans. The State pays a monthly premium for each employee and the employee pays the established dependent premium. The SEIB establishes claims liabilities based on estimates of the ultimate cost of claims (including future retroactive claims adjustments) that have been reported but not settled, and of estimated claims that have been incurred but not reported. Because actual claims liabilities are affected by complex changing factors such as inflation, medical technology, and changes in legal doctrines, the process used in computing claims liabilities does not result in an exact amount. Actual claims costs incurred may vary from estimated claims liabilities depending on the similarities in the nature and frequency of the claims between current and prior years. Adjustments of the estimated claims liabilities based on actual results are charged or credited to expense in the periods in which such adjustments are determined.

The SEIB also administers a local government health insurance plan (LGHIP) in the same manner as the SEIP. The following table represents changes in those aggregate liabilities for SEIB during the years ended September 30 (approximately 70% of claim liabilities are related to the SEIP and the remainder to the LGHIP):

	<u>2003</u>	<u>2002</u>
Reported claims payable and estimated claims incurred but not reported at		
beginning of year	\$31,281,302	\$24,772,691
Incurred claims and adjustment expenses:		
Provision for insured claims of the current year	344,788,059	293,865,043
Adjustment to estimated claims incurred but not reported at end of year	<u>5,653,574</u>	<u>4,347,874</u>
Total incurred claims and adjustment expenses	350,441,633	298,212,917
Payments:		
Claims and adjustment expenses attributable to insured claims of the current year	(322,888,177)	(270,960,372)
Claims and adjustment expenses attributable to insured claims of prior years	(25,722,908)	(20,743,934)
Total payments	(348,611,085)	(291,704,306)
Reported claims payable and estimated claims incurred but not reported at end of		
year	<u>\$33,111,850</u>	<u>\$31,281,302</u>

At year-end, unpaid claims liabilities are computed using the gross method without discounting the accrued claims payable. The separately issued financial report contains note disclosures and supplementary information regarding claims development.

E. Public Education Employees' Health Insurance

The Public Education Employees' Health Insurance Fund (PEEHIF) was established in 1983 by the provisions of *Act 83-455* to provide a uniform plan of health insurance for current and retired employees of public educational institutions and to provide a method of funding the benefits related to the plan. The plan is administered by the Public Education Employees' Health Insurance Board (PEEHIB).

The State contributes a specified amount monthly to each respective participating school system. Each participating school system must then pay the employer rate to the PEEHIF each month. That rate was \$433 per participant for 2003 and \$414 per participant for 2002. In addition to the employer payments each month, the employee pays certain premium amounts. PEEHIB established claims liabilities based on the actual cost of claims reported but not settled, and estimates of claims that have been incurred but not reported. Because actual claims liabilities are affected by complex changing factors such as inflation, medical technology, and changes in legal doctrines, the process used in computing claims liabilities does not result in an exact amount. Actual claims costs ultimately incurred may vary from the estimated claims liabilities depending on the similarities in the nature and frequency of the claims between current and prior years. Adjustments to claims liabilities are charged or credited to expense in the periods in which they are made.

The following table presents the changes in claims liabilities during 2003 and 2002:

	<u>2003</u>	<u>2002</u>
Unpaid claims and claim adjustment expense at beginning of year	\$63,966,008	\$55,961,869
Incurred claims and adjustment expenses:		
Provision for insured events of the current year	669,577,643	585,644,385
Increase (Decrease) in provision for insured events of prior years	(3,001,573)	(4,802,201)
Total incurred claims and adjustment expenses	666,576,070	580,842,184
Payments:		
Claims and adjustment expenses attributable to insured events of the current year	(596,615,950)	(521,678,377)
Claims and adjustment expenses attributable to insured events of prior years	(60,964,435)	(51,159,668)
Total payments	(657,580,385)	(572,838,045)
Total unpaid claims and adjustment expenses at end of year	<u>\$72,961,693</u>	<u>\$63,966,008</u>

For the Fiscal Year Ended September 30, 2003

The separately issued financial report contains additional note disclosures and supplementary information regarding claims development.

F. Alabama Health Insurance Plan

The Alabama Health Insurance Plan (AHIP) was established to provide health insurance coverage to eligible individuals as an alternative to federal oversight required in the Health Insurance Portability and Accountability Act of 1996. AHIP was established in 1997 under Regulation 115 pursuant to Act 97-713, codified as Section 27-52-1 in the *Code of Alabama 1975*, and is governed by a nine member Board of Directors. The plan provides major medical benefits limited to \$1,000,000 for the lifetime of a participant. The plan provides that participants pay monthly premiums for health insurance coverage. Coverage is also available for eligible dependents of participants. Premiums are determined annually and are set at a rate necessary to provide sufficient funds to pay all claims and reasonable expenses of administering the plan.

Regulation No. 115 authorizes the Plan to recoup losses by assessing participating insurers based on their health insurance premiums written in the state for any year in which the Plan incurs a deficit. Assessments in excess of actual losses are to be held in interest and used by the board to offset future losses or to reduce future assessments. AHIP obtained funding from assessments totaling \$9,736,765 and \$8,174,641 in 2003 and 2002, respectively.

AHIP established claims liabilities based on estimates of the ultimate cost of claims (including future retroactive claims adjustments) that have been reported but not settled and of estimated claims that have been incurred but not reported. The estimation of claims costs depends on many factors including historical loss experience. Adjustments of the estimated claims liabilities based on actual results are charged or credited to expense in the periods in which such adjustments are determined.

The following table presents the changes in claims liabilities during the years ended September 30, 2003 and 2002:

	<u>2003</u>	<u>2002</u>
Reported claims payable and estimated claims incurred but not reported at		
beginning of year	\$4,776,916	\$4,258,308
Incurred claims:		
Provision for insured events of the current year	23,990,661	23,845,116
Increase (Decrease) in provision for insured events of prior years	0	0
Total incurred claims and adjustment expenses	23,990,661	23,845,116
Payments:		
Claims and adjustment expenses attributable to insured events of the current year	(22,530,151)	(21,086,517)
Claims and adjustment expenses attributable to insured events of prior years	(2,163,310)	(2,239,991)
Total payments	(24,693,461)	(23,326,508)
Reported claims payable and estimated claims payable incurred but not reported		
at end of year	\$4,074,116	\$4,776,916

At year-end, unpaid claims liabilities are computed using the gross method without discounting the accrued claims payable.

The separately issued financial report contains additional note disclosures and supplementary information regarding claims development.

G. Alabama State Port Authority

The Alabama State Port Authority is partially self-insured with respect to workers' compensation claims. Claims are self-insured to the extent of claims less than \$300,000 with no aggregate limit with respect to the number of such claims. Additionally, any individual claims in excess of \$5,000,000 are self-insured. An accrual for uninsured claims is included in other accrued liabilities in the Statement of Net Assets. The liability for uninsured claims includes an estimated amount for claims that have been incurred but have not been reported. The following represents changes in those aggregate liabilities for the Authority during the years ended September 30, 2003 and 2002:

	<u>2003</u>	<u>2002</u>
Reported claims payable and estimated claims incurred but not reported at		
beginning of year	\$874,209	\$689,620
Provision for claims	737,870	479,165
Total payments	(448,560)	(294,576)
Reported claims payable and estimated claims payable incurred but not reported		
at end of year	\$1,163,519	<u>\$874,209</u>

The separately issued financial report contains additional note disclosures and supplementary information regarding claims development.

NOTE 7 - <u>RETIREMENT PLANS</u>

A. Retirement Systems of Alabama

The Retirement Systems of Alabama (RSA) administers three retirement programs: The Teachers' Retirement Systems, Employees' Retirement Systems, and Judicial Retirement Fund for the benefit of state employees and public education employees.

1. Plan Descriptions

The Teachers' Retirement System of Alabama (TRS) is a cost-sharing multiple-employer defined benefit pension plan, established as of September 15, 1939 under the provisions of the 1939 *Alabama Acts* 419. The system provides retirement allowances and other specified benefits for qualified persons employed by state-supported educational institutions. The Board of Control has responsibility for the general administration and operation of the TRS.

The Employees' Retirement System of Alabama (ERS) is an agent multiple-employer defined benefit pension plan established as of October 1, 1945, under the provisions of the 1945 *Alabama Acts* 515. This system provides retirement allowances and other specified benefits for state employees, state police, and employees of cities, counties, towns, and quasi-public organizations on an elective basis. The Board of Control is responsible for the general administration and operation of the ERS.

The Judicial Retirement Fund (JRF) is a cost-sharing multiple-employer defined benefit pension plan, established under the 1973 *Alabama Acts* 1163. This system provides retirement allowances and other specified benefits for any Justice of the Supreme Court of Alabama, Judge of the Court of Civil Appeals, Judge of the Court of Criminal Appeals, Judge of the Circuit Court, or office holder of any newly created judicial office receiving compensation from the State Treasury. Act Number 1205 of the Legislature of 1975 supplemented the provisions of Act Number 1163 and enlarged the scope and coverage of the JRF to include District and Probate Judges. The Board of Control of the ERS administers and operates the JRF.

The TRS, ERS, and JRF provide retirement benefits as well as death and disability benefits as established by state law. The retirement benefit provisions are established by Title 36, Chapter 27 of Alabama State Law and must be amended by statute. Benefits for TRS and ERS members vest after 10 years of credited service. Teachers and state employees who retire after age 60 (52 for state police) with 10 years of credited service or with 25 years of service (regardless of age) are entitled to an annual retirement benefit, payable monthly for life. Service retirement benefits are calculated by two methods with the member receiving payment under the method which yields the highest monthly benefit: (1) minimum guaranteed, or (2) formula. Under the formula method, members of TRS and ERS (except state police) are allowed 2.0125 percent of their final average salary (highest 3 of the last 10 years) for each year of service. State Police are allowed 2.875 percent for each year of state police service in computing the formula method. Disability retirement benefits are calculated in the same manner.

JRF benefits vest from five to eighteen years. Except for justices or judges who were either disabled, elected prior to July 30, 1979, or have at least 25 years of credited service, no justice or judge shall be eligible to receive judicial service retirement pay

For the Fiscal Year Ended September 30, 2003

prior to attaining sixty years of age. Service retirement benefits for justices and judges are dependent upon the particular office held in the judicial branch of government. A retirement benefit is payable upon the request of any member who has: (1) 25 years of credited service (regardless of age), (2) completed 12 years of credited service and has attained age 65, (3) completed 15 years of credited service and whose age plus service equals or exceeds 77, (4) completed at least 18 years of credited service or three full terms as a judge or justice and has attained age 65 (5) completed 10 years of credited service and has attained age 70, (6) been elected prior to July 30, 1979 and has 18 years of service (regardless of age). A member eligible to retire who has not requested his retirement benefit to commence at the end of the term in which his seventieth birthday occurs is entitled only to the refund of his contributions (except for members with at least 25 years of credited service). The service retirement benefit for a member other than a probate judge is equal to 75 percent of the state-paid salary prescribed by law for the position from which the member retires. If a probate judge is paid on a fee basis, the service retirement benefit is equal to 75% of the salary upon which such judge contributes immediately prior to retirement.

A pre-retirement death benefit is offered in which the account is credited with TRS and ERS employer contributions and investment income on such funds. The pre-retirement death benefit (group term life insurance) is paid in addition to the return of member contributions upon the death of an active TRS or ERS member who has completed at least one year of active membership in the system and whose date of death was within 180 days of such member's last date of actual service. However, a surviving spouse beneficiary of a deceased member who was eligible for service retirement may elect a survivor allowance in lieu of this benefit. The pre-retirement death benefit is equal to the annual earnable compensation of the member as reported to the system for the preceding year ending June 30, for TRS and September 30, for ERS. There is no pre-retirement death benefit available for JRF members.

When a member withdraws from service prior to becoming vested, the member's accumulated contributions and a portion of accumulated interest credited to the Annuity Savings account are returned to the member. The portion of accumulated interest, which by law, is not payable to the member, is transferred to the Expense fund.

RSA issues a stand-alone financial report that includes financial statements and required supplementary information (including the six-year trend) for the year ended September 30, 2003. Copies may be obtained by writing to:

The Retirement Systems of Alabama P.O. Box 302150 135 South Union Street Montgomery, AL 36130-2150

Title 36, Chapter 27 of the Alabama State Law established the contribution requirements and must be amended by state statute. The law provides that the Boards of Control engage an actuary to prepare an annual valuation of the assets and liabilities of the various reserve funds.

At September 30, 2003, the number of participating employers in each system was as follows:

	TRS	ERS
Cities	-	260
Counties	-	64
Other Public Entities	-	461
Universities	13	-
Post-Secondary Institutions	28	-
City & County Boards of Education	128	-
State Agencies & Other	33	
Total	202	785

2. Summary of Significant Accounting Policies

a. Basis of Accounting

The TRS, ERS, and JRF financial statements are prepared using the accrual basis of accounting. Contributions are recognized as revenues when earned, pursuant to plan requirements. The financial statements are prepared in accordance with requirements of the Governmental Accounting Standards Board and are considered component units of the State of Alabama.

b. Investments

The Boards of Control of the Systems have the responsibility and authority to invest and reinvest available funds, through the Secretary-Treasurer and Investment Committee, in bonds, mortgage-backed securities, common and preferred stock, or other investment vehicles with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use. All plan assets are carried at fair value. Securities traded on national or international exchanges are valued at the last reported sales price at current exchange rates. Short-term investments are reported at cost, which approximates fair value. Mortgage-back securities are reported based on future principal and interest payments discounted at the prevailing interest rate for similar instruments. The fair value of real estate investments is based on the estimate of independent appraisals.

As of September 30, 2003, the TRS and ERS owned debt and equity securities of Raycom Media Corporation which represent approximately 8.2 percent and 11.6 percent respectively, of the net assets held in trust for pension benefits. Also, the TRS and ERS owned debt and equity securities of Community News Corporation, which represented approximately 7.5 percent and 6.3 percent, respectively, of the net assets held in trust for pension benefits. Also, the JRF owned debt securities of Texas Utilities Electric, which represented 5.1 percent of the net assets held in trust for pension benefits.

3. Contributions Required and Contributions Made

The actuary has computed, as of the date of the latest available actuarial valuation (June 30, 2003 for TRS and September 30, 2002 for the ERS and JRF), the estimated present value of benefits payable to retired members, beneficiaries and active members. The actuarial valuations are prepared using the entry age method for TRS and ERS, and projected unit credit method for JRF. The present value of all expected benefits payable from each system to the present group of members and beneficiaries is calculated by adding the present value of the expected benefits payable to the active members to the present value of the expected future payments to retired members and beneficiaries.

As required by statute, the TRS, ERS, and JRF funding policies provide for employer contributions at actuarially determined rates (expressed as percentages of annual covered payroll)that are sufficient to accumulate assets to pay benefits when due. The employer contributions required to support the benefits of each system are determined following a level funding approach and consist of a normal contribution, an accrued liability contribution, and a portion to finance administrative costs.

For the TRS and ERS, the normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of the employer contributions which, if applied to the compensation of the average new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf. The amortization period is open for the June 30, 2003 actuarial valuation for TRS and the September 30, 2002 actuarial valuation for ERS. The remaining amortization period for TRS, ERS-state employees, and ERS-state policemen is 10 years, 20 years, and 20 years, respectively.

For the JRF, the normal contribution is determined using the "projected accrued benefit" (unit-credit) method. Under this method, the benefits of each individual included in an actuarial valuation are allocated by a consistent formula to valuation years. The actuarial gains (losses), as they occur, generally reduce (increase) the unfunded actuarial accrued liability. The remaining amortization period is 20 years and the period is open.

The required contribution rate of active plan members for TRS and ERS (excluding state police and certified law enforcement, correctional officers and firemen) is 5 percent of earnable compensation. State police members of the ERS are required to

For the Fiscal Year Ended September 30, 2003

contribute 10 percent. JRF members and certified law enforcement, correctional officers, and firemen members of the TRS and ERS are required to contribute 6 percent of earnable compensation.

For fiscal year 2004, the required contribution rate of the employer for ERS (state employees) is 4.19 percent and the rate for TRS is 6.56 percent. The employer contribution rate for ERS state policemen and JRF is 13.87 percent and 21.93 percent, respectively.

a. TRS and JRF

A schedule of Employer Contributions for the TRS and JRF (Cost-sharing plans) is shown below:

	Fiscal Year	Annual Required	Percentage
	Ended	Contribution *	Contributed
TRS	2001	279,880	100%
	2002	265,670	100
	2003	235,786	100
JRF	2001	7,598	100
	2002	8,222	100
	2003	8,637	100

^{*} Amounts in Thousands

b. State Employer Segment of ERS

Contributions in 2003 for agent employer ERS were made in accordance with actuarially determined contribution requirements determined through an actuarial valuation performed at September 30, 2000.

Actuarial Methods and Assumptions for ERS:

Valuation Date: September 30, 2000

Actuarial Cost Method: Entry Age

Asset Valuation Method: 5 Yr Smoothed Market Amortization Method: Level Percent Open

Remaining Amort Period: State Employees 35 years, State Policemen 39 years

Period Closed/Open: Open

Actuarial Assumptions:

Investment Rate of Return: 8% *

Projected Salary Increases: 4.61%-7.75% *

Cost of Living Increases: None

Three-Year Trend Information:

	Annual	Percentage	Net
Year	Pension	of APC	Pension
Ended	Cost (APC)	Contributed	Obligation
2001	47,538,835	100%	0
2002	46,161,155	100	0
2003	48,703,521	100	0

^{*}Includes inflation at 4.5%

B. Other Pension Plans

The State Port Authority administers two single-employer pension plans, the Hourly Plan and the Terminal Railway Plan, for a small number of hourly workers and railway employees. The Peace Officers Annuity and Benefit Fund is a cost-sharing multiple-employer defined benefit pension plan that provides a small additional pension benefit to State and local peace officers beyond that which is paid by the Employees' Retirement System. The Clerks and Registers Supernumerary Fund is a cost-sharing multiple-employer defined benefit pension plan that provides pension benefits to circuit clerks and registrars of courts. The Alabama Housing Finance Authority established the Alabama Housing Finance Authority Employees' Pension Plan (Plan), a single-employer defined benefit pension plan on September 26, 2002. The Plan provides retirement, death, disability and termination benefits to plan participants and beneficiaries. These pension plans are not material to the State.

NOTE 8 - DEFERRED COMPENSATION

The State offers employees the opportunity to participate in an optional deferred compensation plan created in accordance with Internal Revenue Service Code Section 457. The plan is available to all state employees and permits them to defer a portion of their salary until future years. The current value of the employee contributions may be withdrawn upon termination, retirement, death, or an unforeseeable emergency.

It is the opinion of the State's legal counsel that the State has no liability for losses under this plan but does have the duty of due care that would be required of an ordinary prudent investor.

The Public Employees' Individual Retirement Account Fund/Deferred Compensation Plan (RSA-1) is administered and operated by its Board of Control. All members of the Teachers' Retirement System of Alabama, Employees' Retirement System of Alabama, Judicial Retirement Fund, and employees of employers eligible to participate in the Employees' Retirement System, are eligible to participate in this plan. At September 30, 2003, plan assets, net of warrants payable, totaled \$739,397,464.

State employees may also participate in a plan administered by the Public Employees' Benefit Services Corporation (PEBSCO). This plan is also a deferred compensation plan organized under IRC Section 457. The plan contract has been modified in accordance with new legislation that requires the assets to be held in trust for the benefit of plan participants. The State has no fiduciary responsibility for the assets and therefore does not include the plan in its reporting entity.

NOTE 9 - POSTEMPLOYMENT HEALTH BENEFITS

In addition to the pension benefits described in The Retirement Systems of Alabama note, the State provides postretirement health care benefits, in accordance with *Code of Alabama 1975*, Section 36-29-10, to all retired state employees through the State Employees' Health Insurance Plan (SEHIP) and, in accordance with *Code of Alabama 1975*, Section 16-25A-17, to all retired employees of State educational institutions through the Public Education Employees' Health Insurance Plan (PEEHIP). Employees covered under these two plans who retire from active service and begin receiving monthly benefits from the Employees' Retirement System of Alabama or from the Teachers' Retirement System of Alabama may elect to continue coverage under the group insurance plan by consenting to have deducted from their monthly benefit payment the difference in the total cost of their insurance coverage and the portion authorized to be expended by the SEHIP or the PEEHIP for coverage of such retired employees.

The cost of teachers' retiree health care benefits is recognized as expenditures to PEEHIP as claims are paid. The cost of the benefits is paid from the regular appropriations made to individual education entities. Total active enrolled members were 98,007 and total retired members were 51,698 in fiscal year 2003. The retired employee allocation is funded through the active employee premium. Of the active employee premium, approximately \$111,948,948 was on behalf of retired members of PEEHIP for fiscal year 2003. Retirees who are eligible for Medicare benefits must pay \$1.14 per month for the Hospital/Medical coverage while those who are not eligible for Medicare must pay \$78.00 per month for the coverage. Optionally, the retirees may use this insurance allocation to purchase two plans of supplemental insurance offered by PEEHIP with no out-of-pocket cost. Total premiums paid to PEEHIP by retirees for Hospital/Medical coverage was \$12,690,545 for the year. The retirees must pay additional premiums to cover their dependents.

For the Fiscal Year Ended September 30, 2003

The State provides health care benefits for retired state employees through SEHIP. The cost of benefits is recognized as an expense in the month in which it is incurred. The State pays 100 percent (\$110 per month) of the premium for a retiree who is over 65 and eligible for Medicare for a total cost to the State in 2003 of \$12,563,320. The State pays a portion of the premium for a retiree who is under 65 at a total cost to the State in 2003 of \$6,161,100. Under the SEHIP statute, the fixed amount per month per retiree is funded on a pay-as-you-go basis through the active employee premiums each agency pays for its active employees. Average enrollment in 2003 was 9,518 for retirees over 65, and 4,668 for retirees under 65. COBRA insurance is also available to state employees who terminate state service, but the employee is liable for the premiums.

NOTE 10 - RELATED ORGANIZATIONS

The State's officials are responsible for appointing a majority of the members of the boards of other organizations, but the State's accountability for these organizations does not extend beyond making appointments. The State appoints the nine-member board of the Private Colleges and Universities Facilities Authority and a majority of the five-member Alabama Shakespeare Festival Finance Authority.

NOTE 11 - JOINT VENTURES AND JOINTLY GOVERNED ORGANIZATIONS

A. Joint Ventures

The Tennessee-Tombigbee Waterway Development Authority is a joint venture created by a compact executed between the State of Alabama and the States of Mississippi, Tennessee, and Kentucky. Its purpose is to develop and promote a navigable waterway between the Tennessee and Tombigbee rivers and provide a nine foot deep navigable channel. The State of Alabama provided \$98,321 and \$104,823 to the Authority for fiscal year 2003 and fiscal year 2002, respectively. The fiscal year of the Tennessee-Tombigbee Waterway Development Authority ends on December 31. Key financial data for the Authority is shown below.

(Amounts in Thousands)

	2003		2	002
Current Assets	\$	286	\$	271
Capital Assets		33		33
Total Assets		319		304
Liabilities		-		-
Fund Balance		319		304
Revenues		319		293
Expenditures		304		290

Complete financial statements for the Authority can be obtained at P. O. Drawer 671, Columbus, MS 39703.

B. Jointly Governed Organizations

The Historic Chattahoochee Commission is a jointly governed organization that was created by a compact executed between the State of Alabama and the State of Georgia. The Commission had \$348,755 in revenues in 2003, \$162,294 of which was received from the State's General Fund. The remainder was from other revenue sources and the State of Georgia.

NOTE 12 - <u>RELATED PARTY TRANSACTIONS</u>

The Montgomery Downtown Redevelopment Authority, a public corporation, issued \$65,200,000 of bonds in 1988 to construct the Gordon Persons office building. These bonds were partially refunded in 1992 with a new bond issue of \$66,150,000. The Series 1992 bonds were refunded in 2002 with a new bond issue of \$43,265,000. The bonds' final maturity is on October 1, 2013. Members of the board of directors of the Authority are appointed by officials of the City of Montgomery, but the Authority is not a part of the City's reporting entity and is therefore considered a separate "stand-alone government." The bonds issued constitute conduit debt obligations of the Authority, and are therefore reported as revenue bond debt of the State. The Authority has also issued conduit debt on behalf of other governments and third parties, none of which is reported in these financial statements. The State operates and maintains the building and has entered into an agreement with the Authority whereby the rental payments from state agencies occupying the building are paid to the Authority, which then uses the money to pay the bond principal and interest. The payments to the Authority are reported by the State as debt principal and interest expenditures.

These financial statements exclude certain foundations and other organizations affiliated with state colleges and universities. While the purpose of these foundations and associations is to operate exclusively for the benefit of the colleges and universities, the colleges and universities are not financially accountable for them; therefore, such organizations do not constitute component units under the provisions of Governmental Accounting Standards Board (GASB) Statement No. 14, "The Reporting Entity." These are: the University of Alabama in Huntsville (UAH) Foundation, the UAH Eminent Scholar Foundation, the University of Montevallo Foundation, the University of South Alabama (USA) Foundation, the USA Health Services Foundation, the National Alumni Association of the University of Alabama, the Capstone Foundation, the University of Alabama (USA) Foundation, the Alabama Cusa Foundation, the Alabama State University Foundation, the Alabama State University Trust for Educational Excellence, the Jacksonville State University Foundation, the Jacksonville State Alumni Association, the University of Alabama Birmingham Educational Foundation (UABEF), the University of Alabama Birmingham Research Foundation (UABRF), the University of Alabama Birmingham Research Foundation, Inc.

The University of Alabama Birmingham Educational Foundation made contributions to the University of Alabama at Birmingham of \$4,071,000 during the 2003 fiscal year, and the University generated \$27,206,000 in unrestricted current revenues from transactions with HSF.

The University of Alabama at Birmingham (UAB) and HSF have entered into an agreement dated October 7, 1996 which established a common management group, the UAB Health System. The purpose of this agreement is to provide common management for their existing and future health care delivery operations. UAB contributed \$4,566,630 during 2003 to the UAB Health System Board.

The University of South Alabama Health Services Foundation and the South Alabama Medical Science Foundation reimburses the University for certain administrative and other support services. Total amounts received for such services in 2003 were \$18,638,000 from the Health Services Foundation, and \$1,240,000 from the Medical Science Foundation.

NOTE 13 - <u>CONTINGENCIES</u>

A. Grants

The State receives federal grants for specific purposes that are subject to review and audit by the grantor agencies. Entitlement to these resources is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal regulations, including the expenditure of resources for allowable purposes.

Federal grantor agencies from time to time review State records to determine whether the State has complied with the terms and conditions of grant agreements and federal regulations. Any disallowance resulting from a federal audit may become a liability of the State but cannot be reasonably estimated at this time. It is believed that any liability resulting from a determination of noncompliance will not materially affect the State's financial condition.

For the Fiscal Year Ended September 30, 2003

B. Tobacco Settlement

As a party to a successful multi-state legal settlement with the tobacco industry, the State received \$118.6 million in fiscal year 2003 and \$224.7 million in the two prior years. This settlement money is intended to compensate the State for smoking related health care costs incurred by various State programs. Annual payments will continue and could total \$3.2 billion over 25 years but future settlement payments are subject to adjustment for a number of factors such as inflation, the effect of other lawsuits, decreased sales volume and the financial health of the tobacco companies. Because the exact amount of the future settlement amounts is not measurable, no receivable for these amounts is recorded in these financial statements.

C. Litigation

The State is a party to numerous legal proceedings that occur in the normal course of governmental operations, some of which involve significant amounts. The lawsuits involving significant amounts are described below. Proceedings involving amounts that, when aggregated, will have no material effect on the accompanying government-wide financial statements may have an impact on the related state agencies and funds. The monetary impact, if any, of litigation resulting in adverse rulings is usually addressed in subsequent state budgets and modifications of state laws. Due to the uncertainty involving the ultimate outcome and amounts of the unresolved litigation described below, no provision for potential liability has been recorded in the accompanying financial statements.

Lee v. Macon is a group of cases arising from the desegregation cases filed in the 1960s. The State Board of Education was brought back into these cases in 1997 and is assisting local school districts in negotiating Consent Decrees with the Justice Department, NAACP Legal Defense, and plaintiffs' attorneys. The goal is the creation of unitary school districts, in which the vestiges of segregation have been removed from all aspects of the operation of public schools. State attorneys continue to work on statewide issues and with local districts for unitary status decrees. A statewide consent decree has been negotiated for special education and is being negotiated for facilities.

Two ongoing lawsuits, Johnny Reynolds, et al. v. Alabama Department of Transportation, et al., and Eugene Crum, Jr., et al. v. State of Alabama, et al., involve employment discrimination. These are class action lawsuits alleging that the State has engaged in illegal discriminatory practices in the hiring and promoting of employees. The parties in the Reynolds case have entered into a court-approved settlement effective in April 1994; however, numerous issues have been raised before the Court regarding the implementation of the settlement. The total cost of the Reynolds case has exceeded \$185,000,000, with additional costs likely to be incurred in future settlement negotiations. The potential cost of the Crum case is currently undeterminable.

The State of Alabama has been involved in several lawsuits challenging the constitutionality of the franchise tax in effect before 2000. The U. S. Supreme Court ruled that Alabama's franchise tax scheme unconstitutionally discriminated against interstate commerce. The State is continuing to negotiate settlements with corporations for refunds of the unconstitutional tax, with an estimated total refund or settlement liability of \$250,000,000. Most of the corporations have settled for significantly lesser amounts. The State Legislature enacted laws to remedy the significant loss of revenue.

The State of Alabama Department of Revenue is also involved in additional significant tax-related lawsuits or actions that challenge the legality of certain taxes or challenge other provisions of tax laws and procedures. These cases have a combined potential refund liability or loss of revenue of approximately \$90,000,000. Adverse rulings in these cases could also reduce future revenues.

The Department of Human Resources is involved in many lawsuits that occur in the normal course of its operations, the most significant of which is the R. C. v. Fuller case concerning the care and custody of emotionally disturbed children and children with behavioral disorders. The Department of Human Resources had until October 1, 2002 to comply, at significant cost, with a Consent Decree approved by the Court whereby a new child welfare system, known as the "System of Care" will be fully implemented. Currently, there are 66 counties in compliance with the Consent Decree.

The Department of Mental Health and Mental Retardation has numerous lawsuits that have occurred in the normal course of its

operations related to treatment, injuries, and deaths of patients or recipients of mental health services. These cases have a combined potential liability of more than \$60,000,000.

The Department of Corrections has one significant case, Laube v. Haley, a class action alleging overcrowding and conditions of confinement issues at its institutions for female prisoners (primarily at Tutwiler prison). The court has ordered the Department of Corrections to take steps to relieve the overcrowding and other conditions at its facilities. In addition, the Department of Corrections has been ordered by the courts on other cases to relieve the overcrowding of county jails with state inmates awaiting transfer to a state facility. The Department also has lawsuits that have occurred in the normal course of its operations related to treatment, injuries, and deaths of prisoners and victims of prisoners.

The Department of Youth Services is involved in several cases that have occurred in the normal course of their operations related to the incarceration, treatment, and several alleged abuses of youths. One of the abuse cases originally consisted of several lawsuits that have been consolidated where the plaintiffs have demanded in excess of \$171,000,000. The remaining cases have a combined potential liability of more than \$5,000,000.

In addition to the Reynolds case described above, the Department of Transportation is involved in two other significant cases. In Harbert International Inc. v. Alabama Department of Transportation, the plaintiff is claiming approximately \$13,000,000 for work performed on the Cochrane Bridge in Mobile. Another case concerning groundwater contamination in and around the Department's Montgomery facilities, possibly affecting three residential neighborhoods, will likely require the Department to expend funds to clean up the site and for any potential condemnations of residences.

NOTE 14 - DONOR-RESTRICTED ENDOWMENTS

The Uniform Management of Institutional Funds Act, as adopted in Alabama, permits the boards of the educational institutions of the State to allocate an amount of realized and unrealized endowment appreciation as the boards determine to be prudent for donor-restricted endowments. The colleges' policies are to retain the endowments realized and unrealized appreciation with the endowments after the spending rate distributions. Endowments' earnings are classified in accordance with donor restrictions and are reported in the component units as net assets restricted for permanent trust – expendable or non-expendable as appropriate. The University of Alabama's endowments are invested and administered in a common investment pool. At September 30, 2003 the cost of the endowment pool exceeded the fair value by \$43,327,000. The board approved a spending rate of 5% of a moving three-year average of the fair (unit) value. In addition, the board approved, if necessary, the utilization of realized endowment gains to meet the spending rate, with all remaining realized endowment gains reinvested in the pool. The other four-year colleges have approved similar spending rate policies with rates ranging between 3 and 6%. The net appreciation of the other colleges at September 30, 2003 was \$20,837,276.

NOTE 15 - SUBSEQUENT EVENTS

On December 1, 2003, the Alabama Public School and College Authority issued Series 2003 bonds in the amount of \$106,045,000. The interest rates on the bonds range from 2 percent to 5 percent to be paid semiannually on each June 1 and December 1, beginning June 1, 2004. The maturity date of the bonds is December 1, 2023.

On December 1, 2003, the Drinking Water Finance Authority issued Series 2003A Revolving Loan Bonds totaling \$38,915,000. The Series 2003A bonds include \$24,805,000 serial bonds commencing August 15, 2006 and due August 15, 2021, which bear interest rates ranging from 2.00 percent to 4.50 percent; \$7,465,000 term bonds due August 15, 2024, which bear interest at 4.73 percent and \$6,645,000 term bonds due August 15, 2027 which bear interest at 4.75 percent.

From October 1, 2003 through March 18, 2004, the Alabama Housing Finance Authority called approximately \$88,065,000 of bonds prior to their scheduled maturities in the single family bond program, issued \$24,686,000 of bonds in the multifamily bond program and \$8,250,000 of bonds in the single family bond program, and redeemed \$3,450,000 of multifamily bonds prior to their scheduled maturities.

For the Fiscal Year Ended September 30, 2003

On October 30, 2003, UAB issued \$25,450,000 in Series 2003B General Revenue Bonds. The bonds pay interest at varying rates from 2.0% to 3.0% with principal due annually through October 1, 2009. The proceeds from this offering will be used to refund \$25,045,000 of Series 1993C General Revenue Bonds. UAB incurred an economic gain of approximately \$1,514,000 and an accounting loss of \$2,612,000.

During October 2003, the Alabama State Port Authority approved a \$38,000,000 land option with Exxon Mobil Corp that allows Exxon Mobil to begin seeking permits for construction of a liquefied natural gas terminal at the Middle Bay Port facility. The agreement, with an effective date of October 31, 2003, gives Exxon Mobil three separate one-year option periods during which Exxon Mobil can decide to buy the facility. For each year covered by the option, Exxon Mobil must make a payment of \$1.5 million to the Authority. In consideration for providing the option, the Authority received an initial signing payment of \$350,000, of which \$100,000 relates to the initial option payment of \$1.5 million. Unless terminated under the provisions of the agreement, the remaining \$1.4 million of the initial option payment is to be remitted to the Authority within 120 days from the effective date of the agreement.

On December 1, 2003, the University of North Alabama issued \$11.9 million in Student Housing Revenue Bonds to fund the construction of new on-campus student housing. These bonds are secured by student housing revenue and general fees of the University.

The Troy State University Board of Trustees approved the construction of a new Troy campus classroom and renovation of Clements Hall Dormitory. Construction will begin on both of these facilities during fiscal year 2004. The source of funds for these undertakings will be a \$7,860,000 bond issue. This bond issue closed during December, 2003.

In December, 2003 the Alabama Public School and College Authority issued Series 2003 Bonds. A portion of the proceeds (\$56,028,000) were deposited to the Hyundai Training Fund to satisfy commitments made to Hyundai Motor Manufacturing Alabama, LLC. After the deposit was made, the January 1, 2004 and April 1, 2004 bonds were terminated and the trustee delivered the two \$27,400,000 general obligation bonds being held in escrow to the State.

In regard to the resolution to issue bonds to the Alabama Port Authority in the principal amount of \$20,000,000 dated January 1, 2004, the State failed to make a payment of \$20,000,000 to the Port Authority before December 31, 2003. On January 31, 2004, the Bank of New York delivered the \$20,000,000 bond, dated January 1, 2004, being held in escrow, to the Port Authority.

REQUIRED SUPPLEMENTARY INFORMATION Notes on Budgetary Accounting and Reporting

For the Fiscal Year Ended September 30, 2003

A. Budgetary Process

Formulation of the budget begins with the preparation of estimates of expenditure requirements for the next fiscal year by the administrative head of each budgeted agency and institution. These estimates are submitted annually to the Executive Budget Office of the Finance Department on or before the first day of the third month preceding each regular session of the Legislature. The budget is prepared by program elements for each agency. Requested changes in programmatic expenditures over the prior fiscal year must be explained, and proposed capital expenditures must be justified as required by the Executive Budget Office.

The budget document, as finally developed by the Governor, is published and transmitted to the Legislature on or before the second legislative day of each regular session. For each agency, comparative summaries of appropriations and revenues are presented for the prior year, current year, the agency's request for the next year, and the Governor's recommendation for the next year. The recommended appropriation bills indicate the programmatic appropriation to each agency and the source of funds from which each appropriation is to be paid. The Legislature then legally enacts the State budget into law through the passage of a number of bills as Appropriation Acts. Some conditional appropriations are mentioned in the Appropriation Acts. The agencies do not include these conditional amounts in the original budget. During 2003 approximately \$40 million of supplemental appropriations and \$13 million of conditional and other appropriations were distributed to various agencies from the General Fund. Some expenditures are required by law to be fully funded and estimated amounts are approved in the General Fund appropriation bill. Increases to these estimated amounts do not require a new bill and are included as other appropriations. Emergency appropriations cannot exceed two percent of the total amount appropriated. There were no emergency appropriations in fiscal year 2003. The Department of Corrections budget increased by approximately \$30 million. The other \$23 million in appropriations were distributed to various other agencies. The Education Trust Fund appropriations were reduced by approximately \$5 million as a result of proration and increased by \$4 million because of supplemental, lapsed, and other appropriations.

The Appropriation Acts budget by agency and program rather than by GAAP basis funds. The State funds its budgetary activities under three budgetary fund groups. The first is the General Fund, which includes many of the general operations of the three branches of government. The second is the Education Trust Fund (ETF), which is restricted to funding all levels of educational activity in the State. The third budgetary group is referred to in the budget documents as Earmarked Funds. The Earmarked Funds group includes the operations of most governmental funds of both the primary government and the component units, as well as portions of some proprietary and fiduciary operations.

The Appropriation Acts do not include a revenue budget. At the time of their passage, estimates prepared by legislative and executive branch professional staff assure the legislature that adequate revenues will be available to meet the level of appropriations approved. The Appropriation Acts specify that in addition to the appropriations made, all gifts, grants, or contributions in excess of the amount appropriated are automatically appropriated to be used for the purposes specified in the grant. This includes Federal funds which are included in the Earmarked Funds. Most of the \$3 billion increase in the Earmarked Funds are increased Federal funds.

Numerous statutes exist which restrict the use of most state revenue sources to specific uses. The General Fund is funded by a wide variety of taxes, licenses, and interest income. The ETF is funded primarily by income taxes and sales taxes. The Earmarked Funds are generally funded by a combination of federal funds, local funds, and specific taxes and licenses. State law also requires that if revenues actually received are inadequate to fund the appropriations, then the appropriations must be prorated to the level that the revenues will support. For the Budgetary Comparison Schedule, the budgeted revenues consist of the amount of budgeted expenditures allocated among the revenue categories in proportion to the actual amounts received.

B. Budgetary Control

The legal level of control is the agency and program specified in the Appropriation Acts. For example, "Lab Analysis and Disease Control" and "Agricultural Inspection Services" are two programs within the agency Agriculture and Industries. Below this legal level of control, the professional management of the Finance Department, under the authority of the Governor's policy, exercises budgetary control at the fund and object level. Each agency must submit an operations plan detailing planned expenditures down to the object level, and then must follow that plan or explain why a change must be made. Allotments of appropriations are made quarterly based on the plans of operations submitted by the agencies. Beyond these additional policy constraints, agencies have full authority for administering their appropriations.

REQUIRED SUPPLEMENTARY INFORMATION Notes on Budgetary Accounting and Reporting

For the Fiscal Year Ended September 30, 2003

The Department of Finance enforces both the legal level and the professional management level of budgetary control through automated edits which must be complied with before making expenditures against an appropriation. A change between objects within appropriations for programs (financial management level) must have the approval of the Budget Officer and the Finance Director.

The Budget Management Act legally authorizes the transfer of appropriations between programs within an agency with the approval of the Governor. Any transfers approved by the governor must be reported to the Legislature. Transfers between agencies, but within the same program, may be made pursuant to interagency agreements executed for the purposes of accomplishing the objectives for which the Legislature made the appropriation. These interagency agreements must also be approved by the Governor. Under the Budget Management Act, the Governor cannot create new budget authority, he can only transfer existing authority.

Both the *Alabama Constitution* and the statutes require a balanced budget for annual financial operations. The Finance Department monitors revenue projections during the year to ensure that adequate funds will be available to meet budgeted expenditures. If cash collections do not meet budget projections, the Governor is required to prorate appropriations and restrict allotments to prevent an overdraft or budget deficit in any fiscal year. The General Fund was not prorated in 2003, but the Education Trust Fund was prorated by 4.41% for appropriations not eligible for Education Rainy Day Funds. The Education Rainy Day Fund is legally reserved for the Education Trust Fund and approximately \$180 million was transferred to the Education Trust Fund in fiscal year 2003.

C. Encumbrance Accounting

Encumbrances represent commitments related to unperformed contracts for goods and services. Encumbrance accounting is used as purchase orders are issued to insure that purchase orders plus expenditures do not exceed allotment balances. At fiscal year end this control becomes stricter, as purchase orders plus any other obligations or accounts payable incurred against fiscal year appropriations may not exceed allotment balances.

Encumbrances outstanding at year end in governmental funds are reported on the GAAP basis statements as a reservation of fund balance. Encumbrance balances are reported on the budgetary basis statements as expenditures.

D. Lapsing of Appropriations

All balances of non-capital outlay appropriations not reserved by encumbrances or accounts payable lapse at September 30 of each fiscal year. Furthermore, any appropriation balance not reserved by encumbrances lapses at November 30 following each fiscal year. Encumbrances remain valid for a period of one year following the end of the fiscal year. Balances of encumbrances are reported on the Budgetary Comparison Schedule as expenditures. Capital outlay appropriations for the purchase of land, the construction of buildings, or for the maintenance of roads and bridges of the state highway system continue until the completion of the project.

E. Budgetary Basis of Accounting and Fund Structure

The State budgets and operates primarily on the budgetary basis which approximates the cash basis with certain material exceptions. During the fiscal year, encumbrances, which represent obligations against current fiscal year appropriations, are accrued. At year end, fund balances are reserved to accrue expenditures for those outstanding encumbrances and estimated accounts payable. In compliance with Amendment 26 to the *Constitution*, the total reservation may not exceed the cash on hand in the State Treasury. Therefore, at year end, cash always exceeds obligations (encumbrances and estimated accounts payable). The Budgetary Comparison Schedule (Non-GAAP Basis) presents comparisons of the adopted budget with actual data on a budgetary basis. The budget excludes funds for all entities operating outside the State Treasury, certain distributive accounts such as those for making distributions to local governments, and most debt service accounts. Since the accounting principles used in the State's budgetary basis of accounting differ significantly from those used to present financial statements in conformity with GAAP, a

STATE OF ALABAMA

REQUIRED SUPPLEMENTARY INFORMATION Notes on Budgetary Accounting and Reporting

For the Fiscal Year Ended September 30, 2003

reconciliation of the differences is presented on the schedule. The new Governmental Accounting Standards Board (GASB) Statement No. 41 requires that budgetary comparison schedules be presented as RSI based on the fund, organization, or program structure that the government uses for its legally adopted budget for a government with significant budgetary perspective differences that result in the government's not being able to present budgetary comparisons for the general fund and each major special revenue fund. The budgetary fund structure for the General Fund group and the Education Trust Fund group is essentially the same as the GAAP fund structure. The Earmarked Fund group does not correspond to a major GAAP fund and these perspective differences are included in the Budget-to-GAAP Reconciliation. The budgets of some major funds are spread throughout various agencies and programs in the Earmarked Fund group. A Detail Schedule of Budget and Actual Expenditures appears in the Supplemental Schedules Section of the CAFR. This schedule provides detail information at the legal level of control for each individual appropriation item contained in the budget for all budgetary fund groups.

REQUIRED SUPPLEMENTARY INFORMATION

Information About Infrastructure Assets Reported Using the Modified Approach

For the Fiscal Year Ended September 30, 2003

Modified Approach

As allowed by GASB Statement Number 34, the State has adopted the modified approach for reporting roadway and bridge infrastructure assets. Under the modified approach, depreciation is not recorded. Infrastructure costs that result in an increase in the capacity, an improvement in the efficiency, or a replacement of a portion of the infrastructure network are capitalized and added to the historical cost of the assets. Costs that allow the infrastructure network to be used efficiently over the expected useful life of the assets are expensed as general maintenance costs. Certain maintenance costs that extend the useful life of the assets but do not increase capacity or efficiency are classified as preservation costs. Preservation costs are expensed and reported in lieu of a charge for depreciation expense. Assets accounted for under the modified approach in fiscal year 2003 include approximately 10,846 miles of state maintained highways and 5,583 of state maintained bridges and culverts.

In order to utilize the modified approach, Alabama is required to:

- Maintain an asset management system that includes an inventory of eligible infrastructure assets.
- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Estimate annually the amount to maintain and preserve the assets at the condition level established and disclosed by the State.
- Document that the assets are being preserved approximately at or above the established condition level.

A. Roads

Measurement Scale

The Alabama Department of Transportation (ALDOT) uses a Distress Rating to measure and monitor pavement conditions. The Distress Rating is a zero to one hundred score assigned to 50-meter segments of pavement and then averaged for each roadway route using an algorithm developed by the ALDOT Material and Testing Bureau. The algorithm uses the distress categories of roughness, alligator cracking, block cracking, rutting, patching, raveling, transverse cracking, and longitudinal cracking. The 100 point scale is as follows:

RATING	CONDITION	DESCRIPTION
Less than 55	Marginal	Significant Maintenance Required (Resurfacing or
		Reconstruction)
55 – 70	Satisfactory	Routine Maintenance Required
		(Patching and/or Sealing)
Greater than 70	Good	Negligible Maintenance Required

Established Condition Level

The weighted average rating of all State maintained roadways shall be "Satisfactory" or better.

Assessed Conditions

The following table represents the most recent condition assessment for roadways classified by Non-Interstate Non-National Highway System Routes, Non-Interstate National Highway System Routes, and Interstate Routes:

CATEGORY	As of 09	0/30/2003	As of 09/30/2002, as restated		
	MILES	RATING	MILES	RATING	
Non-Interstate Non-National Highway System	7,201.2	77.32	7,201.2	78.68	
Non-Interstate National Highway System	2,739.4	80.59	2,739.4	80.78	
Interstate System	905.6	86.50	905.6	84.35	
SUMMARY TOTAL AND WEIGHTED AVERAGE RATING	10,846.2	78.91	10,846.2	79.70	

B. Bridges

Measurement Scale

ALDOT uses a weighted rating of the major structure components and the deck area of a bridge or culvert. The GASB 34 Bridge Rating is a zero to ten score assigned to each component-rating category and then averaged for each bridge asset classification using an algorithm developed by the ALDOT Maintenance Bureau. The algorithm uses the assessed weighted ratings, each bridge deck area, and the sum of all deck areas. The ten point scale is as follows:

RATING	CONDITION	DESCRIPTION								
1 – 4.99	Marginal	Structural elements have been seriously affected by								
		deterioration.								
5 – 6.99	Satisfactory	Structural elements are sound but have minor deterioration.								
7 or Greater	Good	Structural elements show negligible signs of deterioration.								

Established Condition Level

The weighted average rating of all State maintained bridges and culverts shall be "Satisfactory" or better.

Assessed Conditions

The following table represents the most recent condition assessment for bridges and culverts classified by Non-Interstate Non-National Highway System Routes, Non-Interstate National Highway System Routes, and Interstate Routes:

	09/30/200	03	As of 09/30/2002,

STATE OF ALABAMA

REQUIRED SUPPLEMENTARY INFORMATION

Information About Infrastructure Assets Reported Using the Modified Approach

For the Fiscal Year Ended September 30, 2003

C. Estimated and Actual Costs

In both fiscal years 2003 and 2002, the State estimated it would need to spend \$205,000,000 to preserve and maintain all roadway and bridge assets at or above the "Established Condition Levels" presented above. In fiscal years 2003 and 2002, the State spent \$124,388,121 and \$186,391,931, respectively for maintenance and preservation of the roadway and bridge assets. Even though actual spending on maintenance and preservation of infrastructure assets fell below estimated, condition levels are expected to continue to meet or exceed the "Established Condition Levels," as supported by the most recent condition assessment.

Nonmajor Special Revenue Funds

Nonmajor Special Revenue Funds account for specific revenue sources that are legally restricted to finance particular functions and activities of the State.

Public Health Department

Accounts for resources used for the primary operations of the Department of Public Health, which promotes the general physical health, enforces laws relating to public health and operates programs providing preventive and treatment services to the public.

Education Department

Accounts primarily for Federal programs administered by the State Department of Education.

Economic and Community Affairs

The Department of Economic and Community Affairs oversees federal and State programs related to energy management, skills enhancement and employment opportunities, traffic control and accident prevention, and state and regional planning.

Revenues Allocated to Local Governments

Account for revenues from gasoline taxes, motor vehicle licenses, TVA payments, and other revenue sources which are shared with local governments.

Other Medicaid Fund

Accounts for activity associated with the Medicaid program that is not reported in the Major Governmental Funds under either the General Fund or the Medicaid Fund.

Rehabilitation Services

Accounts for the operation of the Department of Rehabilitation Services which operates programs that provide services to aid handicapped citizens.

Public School Fund

Accounts for revenues and expenditures which are allocated to local boards of education for support of educational programs.

Children First Trust

Accounts for tobacco settlement revenues that are restricted to various programs that benefit children.

Revenue Administrative

Administers the collection of most state taxes and licenses.

Industrial Relations

Administers the employment security, workers compensation, and industrial safety and accident prevention programs.

Conservation and Natural Resources

Is responsible for the management of the State's game and wildlife resources as well as operation of the State parks system.

Other Special Revenue Funds

Are aggregated for reporting purposes and account for various other resources which must be used for specific purposes.

Nonmajor Debt Service Funds

Nonmajor Debt Service Funds account for the accumulation of resources which are used for the payment of general governmental debt principal and interest.

Industrial Access Road & Bridge Authority

Accounts for the accumulation of resources used to pay the interest and principal on debt issued by the Industrial Access Road and Bridge Authority for the purpose of financing road and bridge construction to industrial sites.

Corrections Institution Finance Authority

Accounts for the accumulation of resources used to pay the interest and principal on debt issued by the Corrections Institution Finance Authority for the purpose of financing prison construction.

Judicial Building Authority

Accounts for the accumulation of resources used to pay the interest and principal on debt issued by the Authority for the purpose of financing the construction of facilities used by the unified judicial system.

Public Health Care Authority

Accounts for the accumulation of resources used to pay the interest and principal on debt issued by the Authority for the purpose of financing the construction of public health facilities.

General Obligation Bond

Accounts for the accumulation of resources used to pay general obligation interest and principal on debt issued by the State for the purpose of financing a wide variety of construction projects.

Federal Aid Highway Finance Authority

Accounts for the accumulation of resources used to pay the interest and principal on debt issued by the Authority for the purpose of financing road and bridge construction.

Nonmajor Permanent Funds

Nonmajor Permanent Funds report resources that are legally restricted so that only earnings, not principal, may be used for purposes that support the State's governmental programs.

Marine, Game and Fish Endowment

Invests the proceeds of lifetime hunting and fishing licenses and uses the investment income to preserve, protect, propagate, and develop wildlife within the State.

Alabama Research Institute

Is a trust fund which awards research grants to State universities to promote science and technology.

Other Permanent Funds

Accounts for several small permanent funds which further educational, health, and social programs.

Nonmajor Enterprise Funds

Nonmajor Enterprise Funds are used to account for the operations of State agencies that provide goods and services to the public in a manner similar to private business enterprises. The cost of providing the goods or services are recovered primarily through user charges.

Alabama Health Insurance Plan

Provides health insurance coverage for citizens who have lost their group health insurance.

Local Government Employees' Health Insurance

Is a public entity risk pool providing health insurance coverage for the employees of local governments.

Surplus Property

Accounts for the disposition of surplus State equipment as well as the distribution of federal surplus property.

Other Enterprise Funds

Are aggregated for reporting purposes to account for other small enterprise funds operated by the State, including the Guaranteed Student Loan Fund, Military Billeting, and the canteen funds of the National Guard and the Department of Corrections.

Internal Service Funds

Internal Service Funds account for the operation of State organizations which provide goods and services to other State agencies on a cost-reimbursement basis.

Information Services Fund

Provides equipment, computer services, information technology, and planning and coordination in equipment and system selection.

Telecommunications Fund

Provides for the coordination and promotion of the efficiency in the acquisition, operation and maintenance of telecommunications equipment, systems, and networks used by state agencies.

Service Division

Account for various services provided to State agencies including rental of office buildings, janitorial services, motor pool, mail services, and building maintenance.

Printing & Publications

Provides printing services to State agencies.

State Employees' Health Insurance

Provides health insurance coverage for State employees.

Correctional Industries

Accounts for the agricultural operations and manufacturing activities of the State's correctional facilities.

Building Renovation Finance Authority

Accounts for the rental and maintenance of the buildings in the State Capitol Complex.

Risk Management

Accounts for resources used to provide insurance coverage for State buildings, school buildings, and their contents. Risk Management also insures State employees against work related injuries as well as the risk of loss from employment-related liability

Other Internal Service Funds

Account for other small internal service funds operated by the Finance and Military Departments.

Pension (and Other Employee Benefit) Trust Funds

Pension (and Other Employee Benefit) Trust Funds account for the resources held in trust for members and beneficiaries of retirement plans and other employee benefit plans administered by the State.

Employees' Retirement System

Accounts for the accumulation of resources for pension benefit payments to State employees, State police, and employees of other eligible governmental organizations such as cities and counties within the State.

Teachers' Retirement System

Accounts for the accumulation of resources for pension benefit payments to employees of state-supported educational institutions.

Judicial Retirement Fund

Accounts for the accumulation of resources for pension benefit payments to judges of the State's Supreme Court, Court of Civil Appeals, Court of Criminal Appeals, and Circuit Court.

Peace Officers' Annuity and Benefits

Provides a pension benefit to State and local peace officers.

State Port Authority Hourly Plan

Is a retirement fund for certain hourly employees of the Alabama State Port Authority who are not members of the State Employees' Retirement System.

State Port Authority Railway Plan

Is a retirement fund for certain employees of the Alabama State Port Authority who are not members of the State Employees' Retirement System.

Clerks And Registers Supernumerary

Is a pension plan for certain employees of the court system.

Flexible Employee's Benefit Board

Provides a number of benefit programs to State employees such as a cafeteria plan, health care reimbursement accounts, and dependent care reimbursement accounts.

Employee Savings Plans

Accounts for resources contributed by public employees for deferred compensation plans and individual retirement accounts.

Agency Funds

Agency Funds report assets held by the State in a purely custodial capacity (assets equal liabilities). Agency funds typically involve the receipt, temporary investment, and remittance of resources to individuals, organizations or other governments.

State Clearing Accounts

Accounts for the collection and distribution of State taxes and licenses as well as amounts collected and held by courts for individuals.

Taxes Collected For Local Governments

Accounts for local taxes which are collected by the State as a service for local governments. These taxes do not represent future revenues of the State.

Payroll

Accounts for amounts withheld from employees that are not yet distributed to outside organizations or governments.

Other Agency Funds

Are aggregated for financial reporting purposes and represent amounts held for child support payments, cash bonds, and numerous other amounts held for individuals and organizations outside of State government.

Nonmajor Component Units

Higher Education Loan Corporation

Provides Alabama lending institutions with a secondary market for student loans made under the Higher Education Act, which established the Federal Guaranteed Student Loan Program.

Drinking Water Finance Authority

Issues revolving loan bonds and lends the bond proceeds to local governments at below market rates for the construction of drinking water treatment and distribution facilities.

Alabama Agricultural and Mechanical University

Reports the operations and balances of the University.

Alabama State University

Reports the operations and balances of the University.

Jacksonville State University

Reports the operations and balances of the University.

University of North Alabama

Reports the operations and balances of the University.

Troy State University

Reports the operations and balances of the University.

Space Science Exhibit Commission

Operates the U.S. Space and Rocket Center and the U.S. Space Camp.

Historical Commission

Preserves and maintains buildings, objects, and sites of historical significance.

Incentives Finance Authority

Issues bonded debt for the purpose of making incentive grants to major industries locating or expanding within the State.

Twenty-first Century Authority

Finances economic development and industrial recruitment incentives primarily with debt secured by tobacco settlement revenues.

Other Nonmajor Component Units

Combined totals of other nonmajor component units, which are reported in more detail later in this report.
