Formula and Matching Requirements:

Statutory Formula:

Matching Requirements: (Formula): Section 427(b)(2) of the McKinney-Vento Act establishes the PPRN formula which determines the needs of a geographic area. PPRN is the dollar expression of the relative need assigned to metropolitan cities, urban counties, and all other counties determined by HUD in accordance with HUDs regulations for the Continuum of Care program. The formula uses nationally available data, including the following factors as used in the CDBG formula and Emergency Solutions Grant (ESG) formula on poverty, housing overcrowding, population, age of housing, and growth lag. To determine a rural county's PPRN, HUD will calculate the sum of the PPRN amount for the rural county as well as any metropolitan cities therein. The cumulative PPRN amount for the rural county will be the basis for determining the maximum award amount for which the county may apply.

Matching Requirements: There is a minimum of 25 percent cash or in-kind match on all eligible funding costs except leasing, data collection and administrative costs. For in-kind match, the government-wide grant requirements of HUDs regulations at 24 CFR 84.23 and CFR 85.24. The 25 percent match requirement is calculated on the total grant amount. Recipients have the responsibility to ensure that the funds that the recipient uses to satisfy HUD's match requirements are not prohibited to be used for this purpose under any statute that may govern the matching funds. MOE requirements are not applicable to this program.

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, non-Federal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503. The financial management systems used by governmental entities that are recipients under this program must provide for audits in accordance with 24 CFR 85. 14.269 HURRICANE SANDY COMMUNITY DEVELOPMENT BLOCK GRANT DISASTER RECOVERY GRANTS (CDBG-DR)

Community Development Block Grant Disaster Recovery program for Hurricane Sandy and other qualifying disasters occurring in 2011, 2012 and 2013

FEDERAL AGENCY:

Office of Community Planning and Development, Department of Housing and Urban Development

AUTHORIZATION:

Disaster Relief Appropriations Act, 2013 Public Law 113.2, Public Law 113-2.

OBJECTIVES:

The overall CDBG program objective is to develop viable urban communities, by providing decent housing and a suitable living environment, and by expanding economic opportunities, principally for persons of low and moderate income. CDBG DR program funds appropriated by P.L. 113-2 are for necessary expenses related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declaration due to Hurricane Sandy and other eligible events in calendar years 2011, 2012, and 2013.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Recipients may undertake a wide range of activities directed toward addressing unmet needs of disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization. However, CDBG DR funds may not be used for activities reimbursable by other sources of funds, such as those made available by the Federal Emergency Management Agency, the Army Corps of Engineers, or private insurance. Grantees must conduct an assessment of community impacts and unmet needs to guide the development and prioritization of planned recovery activities and develop their own programs and funding priorities as long as programs/activities conform to the statutory standards and program regulations. Some of the specific activities that can be carried out with Community Development Block Grant Disaster recovery (CDBG DR) funds include buying damaged properties in a flood plain and relocating residents to safer areas; relocation payments for people and businesses displaced by the disaster; debris removal not covered by FEMA; rehabilitation of homes and buildings damaged by the disaster; buying, constructing, or rehabilitating public facilities such as streets, neighborhood centers, and water, sewer and drainage systems; code enforcement; homeownership activities such as down payment assistance, interest rate subsidies and loan guarantees for disaster victims; public services (generally limited to no more than 15 percent of the grant); helping businesses retain or create jobs in disaster impacted areas; and planning and administration costs (limited to no more than 20 percent of the grant). Eligible activities must meet at least one of three program national objectives: benefit persons of low and moderate income, aid in the prevention or elimination of slums or blight, or meet other urgent community development needs because existing conditions pose a serious and immediate threat to the health and welfare of the community where other financial resources are not available. CDBG Disaster Recovery grants primarily benefit low-income residents in and around communities that have experienced a natural disaster. At least 50 percent of each grantee's CDBG-DR grant award must be used for activities that benefit low- and moderate-income (LMI) persons. These can be either activities in which all or the majority of people who benefit have low or moderate incomes or activities that benefit an area or service group in which at least 51 percent of the populous are of low- and moderate-income. Recipients may contract with other local agencies or nonprofit organizations to carry out components of their programs. Grantees must meet the 50 percent LMI expenditure requirement unless a waiver has been requested by the grantee and approved by HUD. Recipients may only carry out eligible activities as listed in 24 CFR 570.201-207 or for which a waiver or alternative requirement has been granted by the Secretary, based upon a determination that good cause exists and that the waiver or alternative requirement is not inconsistent with the overall purposes of Title I of the HCD Act. Recipients may only carry out eligible activities as listed in 24 CFR 570.201-207 or for which a waiver or alternative requirement has been granted by the Secretary, based upon a determination that good cause exists and that the waiver or alternative requirement is not inconsistent with the overall purposes of Title I of the HCD Act.

Applicant Eligibility:

CDBG Disaster Recovery funds are made available to States and units of general local governments designated by the President of the United States as disaster areas. These communities must have significant unmet recovery needs and the capacity to carry out a disaster recovery program (usually these are governments that already receive HOME or Community Development Block Grant allocations). Grantees may use CDBG Disaster Recovery funds for recovery efforts involving housing, economic development, infrastructure and

prevention of further damage to affected areas. However, CDBG DR funds may not be used for activities reimbursable by or for which funds are made available by the Federal Emergency Management Agency or the Army Corps of Engineers.

Beneficiary Eligibility:

The principal beneficiaries of CDBG DR funds are low- and moderate-income persons (generally defined as a member of a family having an income equal to or less than the Section 8 low income limit established by HUD) in communities that have experienced a disaster event. At least 50 percent of each grantee's CDBG-DR grant award must be used for activities that benefit low- and moderate-income (LMI) persons. These can be either activities in which all or the majority of people who benefit have low or moderate incomes or activities that benefit an area or service group in which at least 51 percent of the populous are of low- and moderate-income. Grantees must meet the 50 percent LMI expenditure requirement unless a waiver has been requested by the grantee and approved by HUD.

Credentials/Documentation:

Recipients must certify they will meet program requirements and applicable federal requirements. 2 CFR 225, Cost Principles for State, Local, and Indian Tribal Governments (previously OMB Circular A-87) applies to this program. 2 CFR 200, Subpart E - Cost Principles applies to this program. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

As a condition of making any grant under this appropriation, the Secretary is required to certify in advance that grantees have in place proficient financial controls and procurement processes and have established adequate procedures to prevent any duplication of benefits as defined by section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5155), to ensure timely expenditure of funds, to maintain comprehensive websites regarding all disaster recovery activities assisted with these funds, and to detect and prevent waste, fraud, and abuse of funds. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. Recipients submit an Action Plan for Disaster Recovery, SF Form 424, and certifications to HUD. In the Action Plan for Disaster Recovery, grantees must describe uses and activities that are authorized under Title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 et seq.) (HCD Act) or allowed by a waiver or alternative requirement published in the federal register notice covering the grant funds and also respond to a disaster-related impact. HUD reviews grantee Action Plans within 45 days of receipt and approves the Plan according to criteria identified in the federal register notice covering the grant funds.

Award Procedure:

P.L. 113-2 provides that funds shall be awarded directly to a State or unit of general local government (UGLG) at the discretion of the Secretary. To comply with statutory direction that funds be used for disaster-related expenses in the most impacted and distressed areas, the Department computed direct allocations to eligible grantees totaling \$14,181,892,000 based on the best available data that cover all the eligible affected areas. States and local governments receiving a CDBG DR allocation may carry out programs and/or activities directly or through subrecipients, including local governments, governmental agencies, and non-profit entities. The remaining \$999,108,000 appropriated under P.L. 113-2 has been awarded to eligible grantees based on a competition and is allocated under a separate CFDA number (14.272).

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

After a grantee receives an allocation under a published Federal Register notice, it must submit an initial Action Plan for Disaster Recovery within a time frame

specified in the specific applicable Federal Register Notice.

Appeals:

Administrative appeals process followed if grant funds are withheld or reduced, or repayment proposed for non-compliance or non-performance.

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory Formula: Title 24, Chapter 570. To comply with statutory direction that funds be used for disaster-related expenses in the most impacted and distressed areas, HUD computed allocations based on the best available data that cover all the eligible affected areas. P.L. 113-2 specifies that the CDBG DR funds be used for necessary expenses related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster and further specifies that the funds are not to be used for activities reimbursable by other available forces of funds such as FEMA, the Corps of Engineers, or private insurance.

For this allocation, similar to prior CDBG DR allocations, the Department makes a determination of unmet needs by estimating unmet needs related to the main intended uses of the funds, including restoration of housing, economic revitalization, and restoration of infrastructure. These estimated needs are then summed together and an allocation is made among the grantee universe based on their proportional share of unmet needs..

Length and Time Phasing of Assistance:

To ensure the timely expenditure of funds, section 904(c) under Title IX of P.L. 113-2 that all funds be expended within two years of the date HUD obligates funds to a grantee (funds are obligated to a grantee upon HUDs signing of the grantees CDBG DR grant agreement). Action Plans must demonstrate how funds will be fully expended within two years of obligation. For any funds that the grantee believes will not be expended by the deadline, the grantee may request an extension of the two-year expenditure deadline by submitting an Expenditure Extension Request consisting of a completed template and cover letter justifying why it is necessary to extend the deadline for a specific portion of funds. Extension requests submitted less than sixty days prior to the scheduled expenditure deadline must include a letter signed by the chief elected official of the grantee agency. Additionally, P.L. 113-2 requires that HUD obligate all funds provided under Chapter 9, Community Development Fund, not later than September 30, 2017. Method of awarding/releasing assistance: by letter of credit. Method of awarding/releasing assistance: by letter of credit.

Reports:

HUD requires grantees to enter information in HUDs Disaster Recovery Grant Reporting (DRGR) system in sufficient detail to permit the Departments review of grantee performance. No cash reports are required. No cash reports are required. Each grantee must submit a Quarterly Performance Report (QPR) through the DRGR system not later than 30 days following the end of each calendar quarter. Quarterly reports include information on obligations, expenditures, drawdowns, and accomplishments for all grantee activities. HUD reviews these quarterly reports to assess grantee compliance and performance. The Quarterly Performance Report (QPR), submitted by grantees on a quarterly basis through HUD's Disaster Recovery Grant Reporting (DRGR) system includes information on expenditures for all their activities. The Department performs regular performance monitoring of grantees both remotely and through on-site reviews. The Department determines on-site monitoring priorities based on a risk-analysis of the grantees portfolio of activities or known high-risk areas. For all headquarter-held grants under this appropriation, HUD conducts at least two on-site monitoring reviews each year. The Office of Community Planning and Developments CPD Notice CPD-12-02, Implementing risk Analysis for Monitoring Community Planning

and Development Grant Programs describes the Departments risk analysis process. Monitoring exhibits can be found in Chapter 6 of HUDs Community Planning and Development (CPD) Grantee Monitoring Handbook.

Audits:

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, non-Federal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503. In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, non-Federal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503. The auditee may elect to have a program-specific audit conducted under certain limited circumstances. CDBG DR grantees shall make reviews and audits, including onsite reviews of any subrecipients, designated public agencies, and UGLGs, as may be necessary or appropriate to meet the requirements of 42 U.S.C. 5304(e)(2), as amended, and as modified by the federal notice covering grant funds. Additionally, grantees must have an internal audit function in place for the detection of fraud, waste, and abuse where the responsible audit staff report independently to the chief officer or board of the organization designated to administer the CDBG DR award.

Records:

Grantees must maintain records with regard to eligibility, national objectives, financial management, citizen participation, relocation, other resources, acquisition, housing assistance to dwelling units and households, equal opportunity, environmental impact, labor standards and other requirements set forth in the program regulations. Records shall be retained for a period of three years from closeout of the grant, except as otherwise prescribed in the regulations.

14.272 NATIONAL DISASTER RESILIENCE COMPETITION

Community Development Block Grant P. L. 113-2

FEDERAL AGENCY:

Office of Community Planning and Development, Department of Housing and Urban Development

AUTHORIZATION:

Disaster Relief Appropriations Act, 2013 Public Law 113-2., Public Law 113-2.

OBJECTIVES:

The overall CDBG program objective is to develop viable urban communities, by providing decent housing and a suitable living environment, and by expanding economic opportunities, principally for persons of low and moderate income. The National Resilient Disaster Competition program funds appropriated by P.L. 113-2 are available for resilient recovery projects and necessary expenses related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared pursuant to the due to Hurricane Sandy and other eligible events in calendar years 2011, 2012, and 2013.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The competition supports innovative resilience projects at the local level while encouraging communities to adopt policy changes and activities that plan for the impacts of extreme weather and rebuild affected areas to be better prepared for the future. The competition underscores the ability communities have to not only recover from recent disasters but also rebuild better and stronger for the future. It will allow them to engage local stakeholders, nongovernmental organizations and the philanthropic sector to protect their own communities from the impacts of climate change by enhancing resilient infrastructure, building on sound science, and deploying innovative approaches to investments. These funds will enable eligible communities to access resources that help both recover from the previous disaster and make plans, decisions, and investments that make them more resilient to the next disaster. Recipients may undertake a wide range of activities directed toward disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization. However, Community Development Block Grant Disaster Recovery (CDBG DR) funds may not be used for activities reimbursable by or for which funds are made available by the Federal Emergency Management Agency (FEMA) or the Army Corps of Engineers. Grantees must conduct an assessment of community impacts and unmet needs to guide the development and prioritization of planned recovery activities and develop their own programs and funding priorities as long as programs/activities conform to the statutory standards and program regulations. Some of the specific activities that can be carried out with CDBG DR funds include buying damaged properties in a flood plain and relocating residents to safer areas; relocation payments for people and businesses displaced by the disaster; debris removal not covered by FEMA; rehabilitation of homes and buildings damaged by the disaster; buying, constructing, or rehabilitating public facilities such as streets, neighborhood centers, and water, sewer and drainage systems; code enforcement; homeownership activities such as down payment assistance, interest rate subsidies and loan guarantees for disaster victims; public services (generally limited to no more than 15 percent of the grant); helping businesses retain or create jobs in disaster impacted areas; and planning and administration costs (limited to no more than 20 percent of the grant). Eligible activities must meet at least one of three program national objectives: benefit persons of low and moderate income, aid in the prevention or elimination of slums or blight, or meet other urgent community development needs because existing conditions pose a serious and immediate threat to the health and welfare of the community where other financial resources are not available. CDBG DR grants primarily benefit low-income residents in and around communities that have experienced a natural disaster. Generally, grantees must use at least half of Disaster Recovery funds for activities that principally benefit low-and moderate-income

persons. These can be either activities in which all or the majority of people who benefit have low or moderate incomes or activities that benefit an area or service group in which at least 51 percent of the population are of low- and moderate-income. HUD can only waive this requirement on a showing of compelling need." Recipients may contract with other local agencies or nonprofit organizations to carry out components of their programs. Recipients may only carry out eligible activities as listed in 24 CFR 570.201-207 or for which a waiver or alternative requirement has been granted by the Secretary, based upon a determination that good cause exists and that the waiver or alternative requirement is not inconsistent with the overall purposes of Title I of the HCD Act.

Applicant Eligibility:

CDBG DR competitive funds are made available to States and units of general local governments designated by the President of the United States as disaster areas. These communities must have significant unmet recovery needs and the capacity to carry out a disaster recovery program (usually these are governments that already receive HOME or Community Development Block Grant allocations). Grantees may use CDBG Disaster Recovery funds for recovery efforts involving housing, economic development, infrastructure and prevention of further damage to affected areas. However, CDBG DR funds may not be used for activities reimbursable by or for which funds are made available by the Federal Emergency Management Agency or the Army Corps of Engineers.

Beneficiary Eligibility:

The principal beneficiaries of CDBG DR funds are low- and moderate-income persons (generally defined as a member of a family having an income equal to or less than the Section 8 low income limit established by HUD) in communities that have experienced a disaster event. Generally, grantees must use at least half of Disaster Recovery funds for activities that principally benefit low- and moderate-income persons. These can be either activities in which all or the majority of people who benefit have low or moderate incomes or activities that benefit an area or service group in which at least 51 percent of the population are of low- and moderate-income. HUD can only waive this requirement on a showing of compelling need."

Credentials/Documentation:

Recipients must certify they will meet program requirements and applicable federal requirements. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

As a condition of making any grant under this appropriation, the Secretary is required to certify in advance that grantees have in place proficient financial controls and procurement processes and have established adequate procedures to prevent any duplication of benefits as defined by section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5155), to ensure timely expenditure of funds, to maintain comprehensive websites regarding all disaster recovery activities assisted with these funds, and to detect and prevent waste, fraud, and abuse of funds. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. Recipients submit a comprehensive application to be considered for funding, SF Form 424, and certifications to HUD. The Application must meet the criteria of the NOFA and must identify the proposed use(s) of the grantees allocation, including criteria for eligibility, and how the uses address long-term recovery needs. Application for CDBG-RDR waiver and alternative requirement. The requirements for CDBG actions plans, located at 42 U.S.C. 12705(a)(2), 42 U.S.C. 5304(a)(1), 42 U.S.C. 5304(m), 42 U.S.C. 5306(d)(2)(C)(iii), 24 CFR 91.220, and 91.320 are waived for funds provided under the Appropriations Act. Instead, each grantee must submit to HUD an Application for CDBG-RDR. During the course of the grant, HUD will monitor the grantees actions and use of funds for consistency with the application, and meeting the performance and timeliness objectives therein and in this Attachment A. Per the Appropriations Act, and in addition to the requirements at 24 CFR 91.500, the Secretary may disapprove an amendment to an application if it is determined that the amended

application does not satisfy all of the required elements identified in this NOFA.

Award Procedure:

See NOFA or contact the headquarters office.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

> 180 Days. See NOFA or contact the headquarters office.

Appeals:

Administrative appeals process followed if grant funds are withheld or reduced, or repayment proposed for non-compliance or non-performance.

Renewals:

N/A.

Formula and Matching Requirements:

Statutory Formula: Title 24, Chapter V, Part 570.

Matching requirements are not applicable to this program.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

To ensure the timely expenditure of funds, section 904(c) under Title IX of P.L. 113-2 requires that all funds be expended within two years of the date HUD obligates funds to a grantee (funds are obligated to a grantee upon HUD's signing of the grantees CDBGDR grant agreement). Action Plans must demonstrate how funds will be fully expended within two years of obligation. For any funds that the grantee believes will not be expended by the deadline, it must submit a letter to HUD justifying why it is necessary to extend the deadline for a specific portion of funds. Additionally, P.L. 113-2 requires that HUD obligate all funds provided under Chapter 9, Community Development Fund, not later than September 30, 2017. However, NDR grantees have requested extensions of the expenditure deadline up until September 30, 2022. Those expenditure extensions will be published in a subsequent expenditure Federal Register notice. Method of awarding/releasing assistance: by letter of credit.

Reports:

HUD requires grantees to enter information in HUD's Disaster Recovery Grant Reporting (DRGR) system in sufficient detail to permit the Department's review of grantee performance on a quarterly basis through a Quarterly Performance Report (QPR). HUD reviews these quarterly reports to assess grantee compliance and performance. Quarterly reports include information on obligation, expenditures, leveraging, drawdowns, and accomplishments for all grantee activities. Each grantee must submit a QPR through the DRGR system no later than 30 days following the end of each calendar quarter. Cash reports are not applicable. The Quarterly Performance Report (QPR), submitted by grantees on a quarterly basis through HUD's Disaster Recovery Grant Reporting (DRGR) system include information on expenditures for all their activities. The Quarterly Performance Report (QPR), submitted by grantees on a quarterly basis through HUD's Disaster Recovery Grant Reporting (DRGR) system include information on expenditures for all their activities. The Department performs regular performance monitoring of grantees both remotely and through annual on-site reviews. The Department determines on-site monitoring priorities based on a risk-analysis of the grantees portfolio of activities or known high-risk areas. For all Headquarters-held grants under this appropriation, HUD staff will conduct at least one annual on-site monitoring review.

The Office of Community Planning and Development's CPD Notice CPD -12-02, 'Implementing Risk Analyses for Monitoring Community Planning and Development Grant Programs' describes the Department's risk analysis process. Monitoring exhibits can be found in Chapter 6 of HUD's Community Planning and Development (CPD) Grantee Monitoring Handbook.

The auditee may elect to have a program-specific audit conducted under certain limited circumstances. Additionally, grantees must have an internal audit function in place for the detection of fraud, waste, and abuse where the responsible audit staff report independently to the chief officer or board of the organization designated to administer the CDBGDR award.

Records:

Grantees must maintain records with regard to eligibility, national objectives, financial management, citizen participation, relocation, other resources, acquisition, housing assistance to dwelling units and households, equal opportunity, environmental impact, labor standards and other requirements set forth in the program regulations. 14.534 STRONG CITIES STRONG COMMUNITIES (SC2) NATIONAL RESOURCE NETWORK

FEDERAL AGENCY:

Office of Policy Development and Research, Department of Housing and Urban Development

AUTHORIZATION:

Consolidated and Further Continuing Appropriations Act, 2012: This program is approved by HUDs authority and administered under the Transformation Initiative (TI) account. , Public Law 112-55.

OBJECTIVES:

The purpose of the SC2 National Resource Network is to help strengthen local communities and spur economic growth. The SC2 Network will provide economically distressed communities with short-term technical assistance in basic operational areas as well as programmatic issues, dictated by local need. In addition, the SC2 Network will aggregate public and private resources to serve a wide range of governments and connect them through a peer-to-peer learning network.

The objectives of the programs are as follows:

Provide communities facing long-term economic challenges with easily accessible and comprehensive technical assistance that can help retool them for future economic growth;

Build capacity in distressed communities by connecting them with philanthropic organizations, non profits, public and private sector entities to facilitate long-term partnerships and economic investments;

Develop a set of best practices and policy recommendations that can be disseminated and shared across all communities facing similar economic challenges;

Improve the alignment of federal resources as well as strengthen federal and local partnerships.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Eligible costs include: salaries for program staff and technical experts, traveling expenses, expenses related to the eligible activities in the NOFA such as providing operational assessments, developing the clearinghouse and Peer to Peer network, tracking performance metrics, building Local Resource Networks, and evaluating the program. 1) Funding will only be provided to applicants who meet the standards for eligible applicants.

2) Funds will not be used to pay for activities outside the scope of the NOFA.

3) Grant funds awarded under this program may not be used to pay for computer hardware.

4) Honorariums cannot be charged against awards under this program.

5) An organization may not provide assistance to itself.

6) An organization may not provide assistance to another organization with which it contracts or sub-awards funds to carry out activities under this award.

7) No fee or profit may be paid to any recipient or contractor of an award under this NOFA.

8) Contractors providing technical assistance/capacity building services/products are not consultants and thus are not subject to the salary provisions applicable to consultants in the FY2012 General Section. HUD will determine whether the salary rates are reasonable and customary for the skill set provided and the area(s) being served.

Applicant Eligibility:

The grantee of the SC2 Network, will have five categories of eligible activities:

1. Structure Development: Develop the SC2 Network structure that would include a team of expert technical service providers (pro bono or paid) that represent the breadth of relevant expertise needed to address the long-term economic challenges of communities. This responsibility also includes developing a Peer-to-Peer network to share lessons learned and best practices.

2. Engagement: Develop the engagement strategy for how the network will assist economically-distressed cities. This responsibility also includes systematizing how cities are engaged, prioritizing the level of assistance for each city, and matching the level of assistance based on the needs of each city.

3. Capacity building: Increase the capacity of participating governments in the area of intervention, not just to provide a one-time service that they cannot replicate. This responsibility might also include establishing a Local Resource Network (LRN) for communities with potential private and philanthropic resources to sustain local capacity building over a longer term.

4. Evaluation: Carefully document and evaluate interventions to build a series of best practice strategies that can benefit places with similar challenges, and develop forums for sharing this knowledge.

5. Policy Recommendation: Identify for the SC2 Council how federal policy changes could help local governments better achieve their economic development visions, and other policies, systems, and practices that support holistic and sustainable economic development.

In addition to these five categories, the Administrator will also work with the other three components of SC2 (described under I.A.1. SC2 Components), as well as the SC2 Council (described under I.A.2 Executive Order) to meet the broad goals and objectives of the initiative.

Beneficiary Eligibility:

The grantee must also have a demonstrated ability to obtain other community, private sector, and federal resources that can be combined with HUDs program resources to achieve program objectives. In general, an ideal Administrator will have most or all of the following characteristics:

Place-based: The selected applicant, buoyed by support of agencies and the philanthropic community, will have experience working in many distressed communities, and will be able to match these communities to relevant technical experts quickly and efficiently.

Resource-maximizing: The selected applicant will have a national scope and will be well-accustomed to the challenge of distributing scarce resources across communities with distinct needs. The ability to effectively evaluate requests for service will be paramount to using the SC2 Networks resources to their greatest potential.

Nimble, responsive, and service-oriented: The SC2 Network will be designed to provide very timely assistance that can thoroughly understand and adapt to needs on the ground. Therefore, the selected applicant will have, or can quickly pull together a deep team of technical experts, and, when necessary, develop partnerships between experts on issues that require multiple skill sets and excellent customer service skills.

Objective: In some cases, procedures or regulations may be a barrier to local capacity building. The selected applicant will facilitate local partnering and provide honest feedback to HUD and the other SC2 agencies for relieving burdens on local governments, while retaining accountability for results.

Sustainable: The selected Administrator will have the nonprofit management expertise required to make the SC2 Network financially sustainable, and as an outside entity, can attract philanthropic funding and leverage HUDs investment several times over.

Housing and Community Development Act of 1992, Consolidated Appropriations Act of 2017, Public Law 102-550, 12 U.S.C 1515z - 13a.

OBJECTIVES:

To provide homeownership opportunities to Native Americans, Tribes, Indian Housing Authorities including Tribally Designated Housing Entities (TDHEs), and Indian Housing Authorities on Indian land, through a guaranteed mortgage loan program available through private financial institutions.

TYPES OF ASSISTANCE:

GUARANTEED/INSURED LOANS

USES AND USE RESTRICTIONS:

Mortgage loans are for the acquisition or rehabilitation of existing homes, purchase and rehabilitation of a home or construction of a new home; and refinancing of existing debt. The financial institution which originates the mortgage loan must meet certain requirements noted in the law.

Applicant Eligibility:

The loan applicant must be members of a federally recognized Indian tribe, band or community, which includes Native Americans, Alaska Natives, or an Indian Housing Authority including a Tribally Designated Housing Authority (TDHE) or a Tribe which meets certain requirements. Applicant eligibility is validated by current enrollment in a federally recognized tribe.

Beneficiary Eligibility:

The homeowner is the ultimate beneficiary of the program. When the Indian Housing Authority, TDHE or Tribe is the homebuyer, they may then rent the property. In these cases, the person renting the home would be an indirect beneficiary.

Credentials/Documentation:

Loan applicants must provide the lender with documentation on eligibility, assets, income, debts and liabilities to show ability to obtain and repay the mortgage loan. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

The lender verifies the land status of the proposed property.

Award Procedure:

The financial institution obtains and reviews all documentation and forwards it to HUD's Office of Native American Programs. HUD sends the Section 184 Loan Guarantee Firm Commitment Form to the Lender if the mortgage meets the Section 184 Program underwriting criteria. The financial institution is responsible for assuring Tribal eligibility, land status, property acceptability and the creditworthiness of the loan applicant. HUD has responsibility for the approval or disapproval of the loan (the application for loan guarantee). Eligible lenders may originate loans under the Direct Guarantee Program. Direct Guarantee lenders underwrite, approve and close the loan prior to submission to HUD for the Loan Guarantee Certificate.

Not Applicable.

Range of Approval/Disapproval Time:

All applicants meeting the criteria in 25 CFR Part 900 will be funded. Appraisals are conducted for all transactions involving trust property. The time required to complete an appraisal depends on the number of requests being processed by a specific office and the resources available to meet the requests. Lease Compliance funds are distributed to the Regional offices based on three factors: (1) total number of leases, (2) total number of acres, and (3) total amount of income derived from leases. Awards for lease compliance are determined by the number of qualifying leases reported to the Agency and Regional Offices. Minimum funding of \$50,000 is allocated to each Regional office. In allocating program resources, priority is given to activities involving agriculture, oil and gas, mining, industrial, business, recreational, and other income-producing leases.

Funds are used to improve, repair and rehabilitate facilities and in some instances replace components of education facilities and may include other improvements to real property as noted under Replacement School Construction. Contact the headquarters office for more information.

Applicant Eligibility:

Federally Recognized Indian Tribal Governments and Tribal Organizations, including School Boards, who have a prioritized Replacement School Construction or Facilities Improvement and Repair, for which funds have been specifically approved through the appropriation process, or for which ARRA funds have been allocated.

Beneficiary Eligibility:

American Indian children attending Bureau owned or funded primary and secondary schools and/or American Indian children residing in Bureau owned or funded dormitories.

Credentials/Documentation:

When an eligible project has been identified, the Tribe or Tribal Organization is invited to submit an initial application accompanied by a copy of the authorizing resolution from the Federal Recognized Indian Tribal Government to be served. If a currently effective authorizing resolution covering the scope of a project has already been provided, a reference to that resolution is acceptable. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Taking into account organizational risk ratings, the agency consults with the Tribe as to how it wishes the project to be managed. An informal conference with the Bureau agency representatives is strongly recommended to determine the application and award procedures to be followed. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. For a Self-Determination Contract (or Grant), applications are filed in accordance with 25 CFR Part 900 "Contracts under the Indian Self-Determination and Education Assistance Act;" for a Financial Assistance Award applications are filled pursuant to 43 CFR Part 12, Subpart C "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," and the Tribally Controlled Schools Act of 1988, as amended, 25 U.S.C. 2501 et seq., as applicable.

Award Procedure:

Although eligible applicants do not compete for awards, an award to a particular entity is not mandatory because requirements related to the scope of the project work, project cost, and other compliance measurements must be agreed to before funding is provided to the recipient. For non-ARRA funded projects, projects representing the greatest needs at schools and related facilities are prioritized as part of the process of obtaining Congressional appropriations of fund the projects. Funds must be appropriated before any project awards can be made, and a change in priorities may require Congressional consultation and, for some projects above a certain dollar amount, Congressional approval of the reprogramming of funding to a different project. For ARRA funded projects, a similar prioritization of projects representing greatest needs was implemented, resulting in the identification of projects eligible to receive ARRA funds, followed by communication with prospective recipients of the available ARRA funds for the identified projects. For both ARRA funded and non-ARRA funded projects, the award of a self-determination contract is made in accordance with the procedures contained in 25 CFR Part 900 "Contracts under Indian Self-Determination and Education Assistance Act," and the award of a financial assistance grant amendment to the existing education grant from the Bureau of Indian Education to the Tribe or Tribal Organization is made in accordance with the Tribally Controlled Schools Act of 1988, as amended, 25 U.S.C. 2501 et seq. The requirements in 43 CFR Part 12, Subpart C "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" apply to financial assistance awards. ARRA projects also are subject to additional requirements related to performance, funding, and compliance through implementation of ARRA in the areas of transparency and reporting, oversight, risk accountability, accelerated timeframes and other statutory objectives. Projects are prioritized before the funds are appropriated. Funds must be appropriated before the award can be made. The award is made in accordance with the procedures contained in 25 CFR Part 900 "Contracts under the Indian Self-Determination and Education Assistance Act," 43 CFR Part 12, Subpart C "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," or the Tribally Controlled Schools Act of 1988, as amended, 25 U.S.C. 2501 et seq., as applicable.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Applications will be processed within 90 days for Self-Determination Contracts/Grants as provided under applicable procedures for other financial assistance awards.

Appeals:

An unsuccessful applicant may request an informal conference with the deciding official. Full appeal procedures are found in 25 CFR Part 900.

Renewals:

For non-ARRA funded projects, depending upon the size and complexity of the overall construction, improvement or repair project it may take several increments of funding assistance to complete the entire projects; often an initial award is issued as a new contract/grant amendment with second and subsequent funding increments issued as renewals to existing contracts/grants. ARRA funds are for one-time specific projects that must be started and completed expeditiously.

Formula and Matching Requirements:

This program has no statutory formula. Matching requirements are not applicable to this program. MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Funds remain available until expended in accordance with terms of the award. No ARRA funding will be awarded after September 30, 2010. See the following for information on how assistance is awarded/released: Information not available.

Reports:

Program reports are not applicable. Cash reports are not applicable. Narrative program progress reports are required for TCSA grants. Program progress

reporting requirements will be negotiated with the Self-Determination contracts/grantee. ARRA funded projects have a separate set of online reporting requirements and data is entered by the recipient at FederalReporting.gov. Federal Financial Report, SF 425 is required for Public Law 93-638 Self Determination Contracts and SF-271, Outlay Report and Request for Reimbursement for Construction Programs is required for Public Law 100-297 TCSA grants. Both the SF 425 and SF 271 require interim and final reports. Performance monitoring is not applicable.

Audits:

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, non-Federal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503.

Records:

For all projects (ARRA and non-ARRA) financial records must be retained for 3 years from the date of submission of the Single Audit Report applicable to the project, procurement records must be retained for 3 years from the date of final payment. Property records must be retained for 3 years from the date of disposition, replacement, or transfer. Records pertaining to any litigation, audit exceptions or claims must be retained until the dispute has been resolved.

Obligations:

(Direct Payments for Specified Use) FY 16 Not Separately Identifiable; FY 17 Not Separately Identifiable; and FY 18 Not Separately Identifiable - School Construction and Facility Repair.

Range and Average of Financial Assistance:

The amount of financial assistance can range from approximately \$6 million to \$25 million depending on the size of the school, both grade level and student enrollment, the program requirements, and the location. For the higher amounts, funding may be incremental over 2, 3, or even 5 years. Because of the limited number of schools that have received funding in the last few years and the increasing costs for construction, there is no way to determine a true representative "average" of financial assistance. Facilities Improvement and Repair: The amount of financial assistance can range significantly from a few thousand dollars to approximately \$7 million. There are several categories of projects that are included under Facilities Improvement and Repair, such as, Emergency, Roofing, Replacement/Repair, and Portable Classrooms. The average amount of financial assistance can vary depending on the category. An average amount is not calculable.

CRITERIA FOR SELECTING PROPOSALS:

Replacement School Construction: Funds are appropriated based on the "Education Facilities Replacement Construction Priority List" as published in the Federal Register on March 24, 2004. Criteria emphasize providing safe, functional, code-compliant, economical and energy-efficient facilities that meet applicable accreditation standards and space guidelines. Facilities Improvement and Repair: Criteria to evaluate projects emphasize eliminating critical health and safety-related deficiencies and reducing the substantial backlog of needed improvement and repairs. Projects are prioritized on a Bureau-wide basis using a computerized formula that evaluates the seriousness of the deficiencies and the relative risks of those deficiencies to facility users. To be considered it is essential that deficiencies and projects for a Bureau funded school or dormitory to be identified in the automated inventory of Bureau facilities. In addition, there are limited funds provided under this program to address safety and health deficiencies on an immediate or interim basis as well as funds for emergency repairs under certain conditions, and for other purposes. Project objectives have been to thin the forest in the wildland urban interface and improve forest resilience. Timber value from the thinning has been used to offset the thinning of precommercial trees as well as trail maintenance of local hiking and biking trails. One of the primary employers in Weaverville is a lumber mill which relies on timber supplied from project like this to continue operation. Fiscal Year 2017: No Current Data Available. FEDERAL AGENCY:

Office of Surface Mining, Department of the Interior

AUTHORIZATION:

Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, as amended, 91 Stat. 445-532. Consolidated Appropriations Act, 2016 Division G, Title I, Public Law 114-113.

OBJECTIVES:

TYPES OF ASSISTANCE:

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grants support the operation of an approved State or Tribal Abandoned Mine Land (AML) reclamation program. Approved programs use grant funds for mine site reclamation projects on eligible lands, which are lands and waters mined or affected by coal mining processes that occurred prior to August 3, 1977 (as well as certain post-1977 and noncoal mining activities). Grants also support project administration. Grants may also include funding for AML-related activities including: abating emergency mining-related dangers to public health and safety; restoring water supply facilities impacted by coal mining; setting aside funds in a trust account to fund future acid mine drainage treatment; and developing a self-sustaining State subsidence insurance program. Approved programs which have completed coal mine reclamation in their state or on lands within their jurisdiction may use funds for other activities as authorized in SMCRA. Additionally, The AML Pilot Program shall be used for economic and community development in conjunction with the priorities found in section 403(a) of the Surface Mining control and Reclamation Act of 1977 (SMCRA) is limited to eligible Appalachian States as authorized under the Appropriation law. Restrictions can be referenced in the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, as amended, 91 Stat. 445-532.

Applicant Eligibility:

The AML program is restricted to states with (1) an approved coal mining regulatory program, (2) lands eligible for reclamation, and (3) active coal

mining operations within their borders that are paying coal reclamation fees into the Abandoned Mine Reclamation Fund; and to federally-recognized Indian tribes with (4) eligible lands, and (5) active mining operations paying fees into the Fund. An eligible state or Indian tribe may submit a reclamation plan to the Office of Surface Mining Reclamation and Enforcement (OSMRE) for approval. The AML Pilot Program is restricted to the three Appalachian states with the highest amount of inventoried priority coal problems as described in paragraphs (1) and (2) of section 403(a) of SMCRA. As a result, grants under this pilot program are available only to Commonwealths of Kentucky and Pennsylvania and the State of West Virginia.

Beneficiary Eligibility:

15.421 ALASKA COASTAL MARINE INSTITUTE

(ALASKA CMI)

FEDERAL AGENCY:

Bureau of Ocean Energy Management, Department of the Interior

AUTHORIZATION:

43 U.S.C. 1345 (e); 43 U.S.C. 1346 Section 20.

OBJECTIVES:

The Bureau of Ocean Energy Management (BOEM) provides major economic and energy benefits on a national and local level to the taxpayers, States and the American Indian community. The BOEM oversees the exploration and development of oil, natural gas and other minerals and renewable energy alternatives on the Nations outer continental shelf. BOEM continues to look for better ways to serve the American people and to ensure that the Nation receives the best value for its resources now and into the future. The program not only supports decisions made within the Department of Interior, but also provides coastal States and local governments with the information necessary to ensure that all stages of offshore energy and mineral activities are conducted in a manner to protect both the human and natural environments. Outer Continental Shelf Lands Act (OCSLA) Section 1346 mandates the conduct of environmental and socioeconomic studies needed for the assessment and management of environmental impacts on the human, marine, and coastal environments which may be affected by oil and gas or other mineral development. OCSLA Section 1345 authorizes the use of cooperative agreements with affected States to meet the requirements of OCSLA, including sharing of information, joint utilization of available expertise, formation of joint monitoring arrangements to carry out applicable Federal and State laws, regulations, and stipulations relevant to outer continental shelf operations both onshore and offshore. The purpose of the Alaska Coastal Marine Institute is to use highly qualified scientific expertise at local levels to collect and disseminate environmental information needed for OCS oil and gas and marine minerals decisions; address local and regional OCS-related environmental and resource issues of mutual interest; and strengthen the BOEM-State partnership in addressing OCS oil and gas and marine minerals information needs.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

The Environmental Studies Program allocates up to \$100,000 per year for cooperative research at the University of Alaska. The University of Alaska invites proposals that are reviewed by a Technical Steering Committee including the University, State of Alaska, and BOEM, and funds individual awards. Applications must be for scientific research projects which are within the BOEM' area of responsibility. The majority of funds are used to support research that will enhance understanding of long-term effects of oil and gas, and marine minerals projects. Funds can also be used for attendance at national conferences for the dissemination of project results. Funds are not normally used for capitalization.

Applicant Eligibility:

University of Alaska may make application for support by a named principal investigator. Non-UA scientists may participate in collaboration with a UA principal investigator.

Beneficiary Eligibility:

Research scientists, Federal, State and local decision-makers, Native American Organizations, and the general public will ultimately benefit from the program.

Credentials/Documentation:

Evidence of the applicants qualifications for performance of the proposed research including past professional publications, resumes, and lists of past projects must be provided. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

Limited discussions regarding funding availability and program interest are permitted. Environmental Impact Statements are not required for these projects. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. Letters of intent responding to particular information needs/areas will be requested. From these, selected full proposals will be invited for mission-relevant research likely to provide needed information for OCS oil and gas resource management decisions. Proposals must include a full statement of work, estimated budget, and resumes. The standard SF-424

application forms required by 2 CFR Part 215.12, and the Department of the Interior Code of Federal Regulations at 43 CFR Part 12, Subpart F, or its revisions, must be used.

Award Procedure:

Awards are made on the basis of a competitive peer review of proposals by a panel consisting of government research managers and external reviewers, as appropriate. Criteria for judging proposals include mission relevance, technical merit, and the quality and appropriateness of the personnel including past performance and publication record, project management, logistics plan, safety management, permits and interagency coordination, outreach, budget/matching funds, and where appropriate, minimization of impacts. Notification of an award is issued. It is anticipated that 6 applications will be received and 6 awards will be granted in FY 2016, with a similar number anticipated for FY 2017.

Fiscal Year 2016: The Alaska CMI has 60 completed /ongoing funded studies since its inception in 1993 totalling approximately \$20.5 million. All CMI funded projects require a one-to-one cost share with non-federal partners. Cost sharing ensures stakeholders are participating in the CMI research program. The following list of cost share partners demonstrates the breadth of support for CMI-funded programs: Alaska Department of Fish and Game; Alaska SeaLife Center; Arctic Supercomputing Center, UAF; Center for Global Change, UAF; Department of Civil and Environmental Engineering Geophysical Institute, UAF ;Institute of Northern Engineering, UAF; International Arctic Research Center, UAF; JAMSTEC ; Naval Research Laboratory; North Slope Borough; Oregon State University; Pacific Gyre; PenAir; School of Fisheries and Ocean Sciences, UAF; Shell Alaska; and Teck Alaska.

In addition to the completion of Annual Reports, peer review journal articles and reports have been completed. During the last two years, there have been student awards issued independently. Both the students and professors who receive CMI funding present their findings on an annual basis. Over the last several years this has occurred in coordination with the Alaska Marine Science Symposium. Fiscal Year 2017: No Current Data Available. Fiscal Year 2018: No Current Data Available.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2016: Operation and Maintenance of the Ocean Energy Safety Institute (OESI).

The mission of the OESI is provide a forum for dialogue, shared learning and cooperative research among academia, government, industry and other non-government organizations in offshore-related technologies and activities that help ensure environmentally safe and responsible offshore operations. OESI represents a cooperative agreement partnership between BSEE, Texas A&M University, University of Texas and University of Houston.

OESI stems from a recommendation from the Ocean Energy Safety Advisory Committee, a federal advisory group comprised of representatives from industry, federal government agencies, non-governmental organizations and the academic community. OESI is an important source of unbiased, independent information and will not have any regulatory authority over the offshore industry. OESI is a collaborative venture that will also include involvement on science and technology issues from the Bureau of Ocean Energy Management.

OESI will promote collaboration among Federal agencies, industry, standards organizations, and academia in order to provide technical assistance to BSEE, BOEM, and the industry in areas related to emerging technologies, the best available and safest technologies (BAST), and the identification of gaps in safety research. In addition, it will assist in the development of databases to measure and assess the reliability of safety systems and train Federal employees to enable them to remain current on state-of-the-art technology. Information on issues related to offshore safety and best practices will be shared with industry, government, and the public through OESI held forums. Fiscal Year 2017: To date, OESI has conducted eight forums which include Risk, Data Collection, Research, Human Factors, Shallow Water Blowouts, SEMS Next Steps, Keeping a Focus on Barriers for Safer Offshore Operations and Alarm Management Best Practices and Focus on Managing Drilling Margin and Well Control Risk. These forums have created a forum for dialogue for shared learning and cooperative research among academia, government, industry and other non-governmental organizations, in ocean energy related technologies and activities that ensure safe and environmentally responsible ocean energy operations. OESI supported BSEE as they hosted the 2015 BSEE Domestic and International Standards Workshop in Houston, Texas in May 2015. OESI also supported BSEE by hosting a BAST Forum on November 12, 2015 in Houston, Texas. On May 5, 2017, OESI will host a second International and Domestic Standards workshop in support of BSEE, the theme for the event is Integrity Management. Their expertise assisted BSEE as we shared the BAST Determination draft process with industry stakeholders. BSEE has also engaged OESI to assist in the hosting of a forum on BSEE Technology Assessment. The event occurred in February 2017, in Houston. BSEE has recently solicited OESI assistance in hosting a phase 2 public forum on BAST with focus on Early Kick Detection (EKD) and Methane Gas Detection (MGD) in April 2017. OESI has also published a draft white paper to highlight potential application for real-time monitoring on drilling operations. OESI is conducting a presentation on this topic at a separate forum on April 17, 2017 in Houston.

Through the work of Director of Operations of OESI and the Primary Investigator, there is now an established Advisory Committee in place. The latest AC meeting was held in January 2017; the next one is scheduled for April 25, 2017 which will be hosted by Weatherford, The AC is in place to further assist in establishing future directions of the Safety Institute. The Advisory Committee consists of stakeholders from the four representative groups oil and gas, which are academia, industry, federal agencies and Non-Governmental Organizations (NGOs). Recent members to join the committee are from Department of Energy, United States Coast Guard and (NGO) Resources for the Future. OESI has conducted recent discussions with Louisiana State University

(LSU), and hope they will joining the Advisory Committee very soon. They have presented a list of topics for possible forums for 2017, and await response from the AC on next steps. The last one conducted in 2016 focused on well control operations, and occurred in November. OESI has consistently produced an OESI annual report and made available to all stakeholders for review. Latest one was completed in October 2016. BSEE personnel conducted a site visit to OESI, and were presented the annual report draft in October 2016.

OESI is conducting a third party assessment for the offshore training program for BSEE engineers. OESI will be conducting an overall assessment of engineer training by SMEs that specialize in education/learning and others in training requirements and technical development of engineers. BSEE is looking for assessment tools such as measures that can continue to assess the BSEE engineer training program and make adjustments for improvement where necessary. OESI has aggressively started to conduct task associated with this work, and held internal meetings with identified SMEs, in addition to conferences with BSEE management and the Chief of the Offshore Training Branch. Assessment is scheduled to be completed NLT 6 months from execution of modification. Within the scope of work associated with this report, OESI conducted a site visit to BSEE Lake Jackson District in November 2016. The final draft report should be available for review late March 2017, with final completion in April 2017.

In the area of RTM, this scope of work includes a pilot training program, and then full implementation of RTM training and subject matter expertise in this area. The official kick off meeting for RTM took place on September 20, 2016 in Houston. BSEE and OESI representatives have been collaborating on the topic of RTM since the execution of the cooperative agreement modification in late July early August timeframe. They have produced a draft white paper on RTM that has been published and available to the public. OESI has been asked to produce a strawman framework on the implementation of RTM, that is under consideration by BSEE.

OESI will be reviewing recommendations prepared by the National Academy of Science (NAS) and how RTM should be implemented as it pertains to best available and safest technologies (BAST).

Latest monitoring report reflected task associated with year two of the BSEE Tech Challenge. Year one was a tremendous success, and recognized by the Secretary of DOI as well as the public. OESI is a partner with BSEE in conducting the youth initiative, and serves as the project manager. This event is in support of DOIs Youth initiative. This years challenge will be expanded to allow students in the Gulf of Mexico and Pacific Region areas to participate. This event highlights the work of BSEE and provides the opportunity to engage and serve/impact the communities geographically located in our areas of responsibilities. OESI staff briefed BSEE Senior Management in December 2016, and obtained approval for the execution of tech challenge year two. Dates are 3 March 2017- University of Houston, March 31, 2017 University of Louisiana in Baton Rouge, 5 April 2017 in the Bakersfield California area, are the dates for the events.

OESI has also been recognized by the oil and gas industry, and routinely sets on various panels, or attends meeting with companies as well as trade associations such as American Petroleum Institute (API) and the Offshore Operators Committee (OOC). Fiscal Year 2018: No Current Data Available.

FEDERAL AGENCY:

Bureau of Safety and Environmental Enforcement, Department of the Interior

AUTHORIZATION:

Public Lands Corps Act (PLCA), 16 U.S.C. 1723(c)(1).

OBJECTIVES:

The Bureau of Safety and Environmental Enforcement (BSEE) program provides major economic and energy benefits on a national and local level to the taxpayers and states. The Agency oversees the exploration and development of oil, natural gas and other materials and renewable energy alternatives on the Nation's outer continental shelf. BSEE continues to look for better ways to serve the American people and to ensure that the Nation receives the best oversight and regulation of National resource development now and into the future. The program not only supports decisions made within the Department of the Interior, but also provides coastal states and local governments with the information necessary to ensure that all stages of offshore energy and mineral activities are conducted in a manner to protect both the human and natural environments.

Through this cooperative agreement, training and learning opportunities will be provided to young people in order to develop the next generation of lifelong conservation stewards and protect, restore, and enhance Americas Great Outdoors. Specifically, this cooperative agreement will give young people the opportunity to learn about the importance of the BSEE mission to promote safety, protect the environment and conserve resources offshore through vigorous regulatory oversight and enforcement while exploring future career options with BSEE.

The Alaska Native Science and Engineering Program (ANSEP) are designated as tax exempt under the IRS for Institutions of Higher Education. ANSEP moves Native American and Alaskan Native students into science, technology, engineering and mathematics degree programs, and fosters a stronger Indigenous American representation within the science workforce of BSEE. Established in 1995, ANSEP has evolved into a longitudinal education model that provides a continuous string of components beginning with students in sixth grade and continuing on through high school, into science and engineering undergraduate and graduate degree programs through PhD. ANSEP has received numerous recognitions for successfully preparing students for professional science and engineering careers including the U.S. Department of Energys Minorities in Energy Initiative, the U.S. Department of the Interior Partners in Conservation Award, and the Ash Center for Democratic Governance and Innovation, Harvard University-Top 25 Innovations in Government. ANSEP, through this cooperative agreement, provides an opportunity to further engage Alaskas Native professionals, and develop the future scientific and engineering employment pool required to support the BSEE mission.

OBJECTIVES:

Title XVI of Public Law 102-575, as amended (Title XVI), directs the Secretary of Interior, acting through the Commissioner, to undertake a program to identify and investigate opportunities to reclaim and reuse wastewaters and naturally impaired ground and surface water in the 17 Western States and Hawaii. Title XVI also provides authority for the Secretary to provide up to the lesser of 25 percent of, or the Federal appropriations ceiling (typically \$20 million), for the cost of planning, design, and construction of specific water recycling projects, as well as up to 50 percent of the cost of Title XVI feasibility studies and 25 percent of the cost of Title XVI water reclamation and reuse research studies.

TYPES OF ASSISTANCE:

Formula Grants (Cooperative Agreements)

USES AND USE RESTRICTIONS:

The Title XVI Program applies to reclamation, recycling, and reuse of municipal, industrial, domestic, and agricultural wastewater and to naturally impaired ground and surface waters. Through this program, Reclamation provides financial and technical assistance for feasibility studies, water reclamation and reuse research, and full-scale construction of facilities to deliver and/or treat wastewater or naturally impaired ground or surface water for reuse applications. For purposes of the Title XVI Program, a water reuse project is a project (including the necessary facilities and features) that reclaims and reuses municipal, industrial, domestic, or agricultural wastewater or naturally impaired groundwater and/or surface waters. Consistent with State law, reclaimed water can be used, for a variety of purposes including, but not limited to, environmental restoration, fish and wildlife, groundwater recharge, municipal, domestic, industrial, agricultural, power generation, or recreation. Funds can be used for water treatment features where the improvement of the water quality is necessary to allow for reuse. Reclamation has general authority to participate in planning, research and demonstration of water recycling projects. Specific project authority is required for Reclamation to participate in

the construction of a project.

Applicant Eligibility:

Eligible recipients of Title XVI funding are identified under the 1902 Act and include a State, regional, or local authorities; Indian tribes or tribal organizations; or other entities such as a water conservation or conservancy district, wastewater district, rural water district, all located within the 17 Western States or Hawaii. To be eligible to receive funding for construction activities, a water reclamation and reuse project must be specifically authorized under Title XVI.

Beneficiary Eligibility:

Water users, including municipal, industrial, and agricultural, that benefit from the additional drought resistant water source created.

Credentials/Documentation:

To be eligible to receive funding for construction activities, a water reclamation and reuse project must be specifically authorized under Title XVI. Funds for construction activities associated with an individual project will not be disbursed until all Title XVI pre-construction requirements have been met for that project. These include: (1) a finding that the feasibility study meets the requirements of Title XVI; (2) complete compliance with the National Environmental Policy Act and other environmental clearances; (3) an approved determination of financial capability; and (4) an executed grant or cooperative agreement for financial assistance. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Federal funding for Title XVI construction projects is limited to 25% of the total project or a specified maximum amount, whichever is less. The maximum amount varies by project. Generally, projects authorized after 1996 have a ceiling of \$20 million or less; the specific details are available in the authorizing legislation. If a project conducted under the Title XVI Program includes planning, design, and construction, the Reclamation Wastewater and Groundwater Study and

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Inland Empire Utilities Agency, in association with the Chino Basin Desalter Authority, received \$7,200,000 in Federal funding to expand the capacity of the existing Chino II Desalter plant. The water produced by this project will replace water that would otherwise be imported from the Colorado River and/or Sacramento-San Joaquin Bay-Delta.

The Sweetwater Authority Water Reclamation Project in California received \$3,700,000 to expand the Richard A. Reynolds Groundwater Desalination Facility to provide a more secure, local water supply. This phase of the project will expand the Reynolds Facility from the current capacity of 3,600 acre-feet per year to a total capacity of 8,800 acre-feet of locally-produced desalinated groundwater annually. Water that is produced by the Reynolds Facility supplements potable water supplies, and directly offsets imported water from the Sacramento-San Joaquin Bay-Delta and Colorado River systems. Fiscal Year 2017: Information not available. Fiscal Year 2018: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Reclamation will place priority on funding projects that reduce existing water diversions or address specific water supply issues in a cost-effective manner, address environmental and water quality concerns, are economically justified, and meet other program goals.

OBJECTIVES:

To make funding available for eligible applicants to leverage their money and resources by cost sharing with Reclamation on three different types of projects:

projects that conserve and use water more efficiently, increase the use of

renewable energy and improve energy efficiency, and support sustainability benefits such as making conserved water available to address endangered species issues;

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

WaterSMART Grants provide cost-shared financial assistance on a competitive basis to carry out water and energy efficiency improvements, small-scale water efficiency improvements, development of water marketing strategies, and other water management improvements. Reclamation may also provide financial assistance for these types of water conservation projects under this CFDA using this statutory authority, either competitively or non-competitively, for other non-WaterSMART projects when another Reclamation CFDA is not available. In addition, Section 9504 of Public Law 111-11 requires the following:

(2) If the activities funded under this Agreement result in an infrastructure improvement that is integral to the existing operations of a federally owned facility, the Federal Government shall continue to hold title to the facility and improvements to the facility.

(3) The non-Federal share of the cost of operating and maintaining any infrastructure improvement funded through this Agreement shall be 100 percent.

(4) Except as provided under chapter 171 of title 28, United States Code (commonly known as the Federal Tort Claims Act), the United States shall not be liable for monetary damages of any kind for any injury arising out of an act, omission, or occurrence that arises in relation to any facility created or improved under this Agreement, the title of which is not held by the United States. For further information please contact the regional office.

(2) When applicable, a funding plan showing how the applicant will pay for its 50 percent cost share requirement, and an official resolution adopted by the irrigation or water district's governing board of directors, resolving that, if selected, it will negotiate and execute a grant or cooperative agreement with Reclamation. (3) A detailed project cost proposal, including a budget with the annual estimated project costs, including salaries and wages, fringe benefits, travel, equipment, supplies, contracts, and indirect costs, an estimate of annual operation and maintenance costs, and the value of in-kind contributions of goods and services. 2 CFR 200, Subpart E - Cost Principles applies to this

program.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: The Huntley Project Irrigation District near Billings, Montana, will use \$1 million in Federal funding to complete a \$3.7 million project line 1,623 feet of diversion tunnel with steel and concrete, significantly improving operational efficiency. The improvements are expected to result in annual water savings of 6,558 acre-feet currently lost to seepage, reducing the Districts diversion from the Yellowstone River and improving instream flows, while also benefitting downstream users.

The Aberdeen-Springfield Canal Company in southeastern Idaho will use \$176,000 in Federal funding to complete a \$360,000 project to line 1.4 miles of open canal currently experiencing significant seepage losses with a geomembrane liner. The project is expected to result in annual water savings of

23,007 acre-feet, which will help offset groundwater use. The project will help the Company to comply with an agreement between the Idaho Ground Water Users Association and the Surface Water Coalition to reduce groundwater diversions of the Eastern Snake Plain Aquifer.

Examples of all projects funded to date are available at <http://www.usbr.gov/WaterSMART/weeg/>. Fiscal Year 2017: Information not available. Fiscal Year 2018: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Criteria vary by funding category. See <http://www.usbr.gov/WaterSMART/weeg/> for details. Depending on funding category, projects should seek to conserve and use water more efficiently, increase the use of renewable energy and improve energy efficiency, protect endangered and threatened species, result in the development of water marketing strategies, or carry out other activities to address climate-related impacts on water or prevent any water-related crisis or conflict.

Desert Terminal Lakes Program

FEDERAL AGENCY:

Bureau of Reclamation, Department of the Interior

AUTHORIZATION:

Public Law 107-171, Farm Security and Rural Investment Act of 2002, Sec. 2507; Public Law 108-7, Energy and Water Development Appropriations Act, 2003, Sec. 207 (to implement the Truckee River Settlement Act, P.L. 101-618); Public Law 108-137, Energy and Water Development Appropriations Act, 2004, Sec. 217; Public Law 109-103, Energy and Water Development Appropriations Act, 2006, Sec. 208; Public Law 110-161, Consolidated Appropriations Act, 2008, Sec. 207 and 208; Public Law 110-246, Food, Conservation, and Energy Act of 2008, Sec. 2807; Public Law 111-8, Omnibus Appropriations Act, 2009, Section 207 and 208; Public Law 111-85, Energy and Water Development and Related Agencies Appropriations Act, 2010, Sec. 206-208; Public Law 111-88, Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010, Sec. 440.; Public Law 112-74, Consolidated Appropriations Act, 2012 [H.R. 2055] Enacted 12/23/11, Title II, Division B, Sec. 208 a and b, and Public Law 113-79, Agricultural Act of 2014, Title II, Section 2507, Enacted 2/7/14.

OBJECTIVES:

Under this authority, Reclamation will fund various activities for the benefit of at-risk terminal lakes to provide water and assistance to a terminal lake to carry out research, support, and conservation activities for associated fish, wildlife, plant, and habitat resources in Nevada and California.

TYPES OF ASSISTANCE:

Project Grants (Cooperative Agreements or Contracts)

USES AND USE RESTRICTIONS:

Funding is directed to be used for terminal lakes and associated watersheds in the State of Nevada and California. For further information please contact the regional office.

Applicant Eligibility:

State and local public agencies, Indian tribes, nonprofit organizations, educational institutions, and individuals may submit a proposal which will be considered by Reclamation. Foreign entities and Federal agencies are not eligible to apply.

Beneficiary Eligibility:

State and local entities, public nonprofit institutions/organizations, other public institutions/organizations, Federally recognized Indian Tribal Governments, individuals, small businesses, profit organizations, private organizations, quasi-public nonprofit organizations, other private institutions/organization, general public, native American organizations, higher education institutions, irrigation districts, municipal water authorities, farmers/ranchers/agriculture producers, and land/property owners.

Credentials/Documentation:

(1) A detailed written technical proposal including background data regarding the applicant, technical approach proposed to accomplish the work, a scope of

work that separates the work into major tasks, type of personnel implementing the proposal, experience in performing this type of work, benefits to be received by implementation of the project(s), environmental impact(s), timeline(s), the level of cooperation with other parties involved in the proposal, and other information that may be useful for proposal evaluation. (2) A detailed cost proposal by project including a budget covering labor categories, salaries and wages with estimated hours, fringe benefits, travel, equipment, supplies, subcontracts, indirect cost rates, other funding sources and commitments, cost-sharing, value of in-kind contributions of good and services, and a narrative discussion. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Funding is allowed for work that will be for the benefit of at-risk terminal lakes and to carry out research, support, and conservation activities for associated fish, wildlife, plant, and habitat resources in Nevada and California. An environmental NEPA document may be required depending on the nature of the proposal and its impact on the environment. Compliance with National Historic Preservation Act and Endangered Species Act may also be required. Pre-application Coordination: Although it is not mandatory, Reclamation strongly encourages offerors to submit a pre-proposal to eliminate the possibility of submitting a full proposal that would not be considered for award. The pre-proposal should describe 1) how the proposal will provide benefits to a terminal lake or associated watershed, 2) the quantity of water anticipated to be provided if part of the proposal or benefit to the associated riparian and watershed resources, 3) the associated estimated cost, 4) potential environmental impacts, 5) state, local and other permits or approvals needed to implement the proposal. Pyramid Lake Pre-application Coordination: Initially pre-proposal solicitation announcement was issued by Reclamation; the initial solicitation occurred in FY05. No additional solicitation announcements have occurred.

This program is excluded from coverage under E.O. 12372. No additional solicitation is planned in FY14. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. Funding is allowed for work for the benefit of at-risk terminal lakes and to carry out research, support, and conservation activities for associated fish, wildlife, plant, and habitat resources in Nevada and California. For Summit Lake, Reclamation will only accept proposals from the Summit Lake Paiute Tribe, since the lake is entirely within the reservation boundaries and any proposal affecting the lake would need the consent of the Tribe; the exception is if DTL funding is reprogrammed in another DTL grant for Summit Lake. For all other terminal lakes, Reclamation may accept applications after the applicant provides enough pre-application information to Reclamation to assure that the proposed work will be for the benefit of at-risk natural desert terminal lakes and associated riparian and watershed resources in Nevada and California or fund designated activities, the associated cost is reasonable, and it is likely Reclamation can satisfy its federal Indian trust, endangered species, environmental, and other responsibilities. Discretionary funding opportunities will be posted on Grants.gov. Submission of a complete technical proposal and a project budget proposal in accordance with the instructions in the FOA is mandatory. In addition, applicants must submit all applicable SF424 forms, which are referenced in the FOA. Reclamation does not anticipate accepting unsolicited applications in FY14.

Award Procedure:

Terminal Lakes Proposals will be evaluated using a merit-based review process. Some past Pyramid Lake proposals were also reviewed on the basis of a competitive, merit-based review process, and were rated in accordance with the evaluation criteria stated in the FOA. Reclamation made awards to the highest-rated proposals based on the amount of funding available at that time. Reclamation reserves the right to prioritize projects based on availability of funds and to ensure balance among the program objectives listed in the FOA.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application

deadlines.

Range of Approval/Disapproval Time:

Contact Reclamation for the range of time when proposals are approved or disapproved.

Appeals:

the supply and quality of water available for use in the United States and the Republic of Mexico. Such programs shall consist of cost-effective measures and associated works to reduce salinity from saline springs, leaking wells, irrigation sources, industrial sources, erosion of public and private land, or other sources. For ARRA funded projects and in addition to the program objectives above, the section 3 of the ARRA states the following objectives:

- (1) To preserve and create jobs and promote economic recovery.
- (2) To assist those most impacted by the recession.
- (3) To provide investments needed to increase economic efficiency by spurring technological advances in science and health.
- (4) To invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits.
- (5) To stabilize State and local government budgets, in order to minimize and avoid reductions in essential services and counterproductive state and local tax increases.

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

Eligible owners or operators in the Colorado River Basin above Imperial Dam may receive assistance to treat salinity problems. For further information, please contact the regional office.

Applicant Eligibility:

Any legal entity that is the owner or operator of the features to be replaced and/or to be constructed and capable of contracting with Reclamation..

Beneficiary Eligibility:

Any person who uses or reuses Colorado River water for irrigation, domestic, municipal or industrial water supply, or for fish and wildlife habitat will benefit.

Credentials/Documentation:

Some projects may require compliance with the National Environmental Policy Act and Endangered Species Act. Information regarding whether these requirements must be met will be included in the funding opportunity announcement posted on www.grants.gov. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Environmental compliance for this program may be required depending on the scope of the specific project funded. This may result in the need for an environmental impact assessment or environmental impact statement prior to the commencement of project activities. An environmental impact statement is required for this program. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should contact the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Funding opportunity announcements for this program, along with registration procedures, application packages and instructions, SF-424 forms and any other forms to be used to submit application information, points of contact, and procedures for submitting applications will be available on www.grants.gov.

Award Procedure:

Reclamation will solicit proposals and award funding through a Funding Opportunity Announcement (FOA) process. The FOA will request proposals from public and private sectors that would control salinity based on cost per ton. The proposals will be ranked based on their cost effectiveness for preventing salt from entering the Colorado River system. The ranking would consider risk factors that might affect the project's performance. Upon receipt of applications/proposals by the date identified in the announcement(s), the applications will be reviewed to determine if application/proposal(s) are consistent with requirements identified in the announcements. The application/proposal(s) are reviewed against identified criteria by a Federal technical team of experts, that may include representatives of states as advisors. Based on the review, a ranking will be defined. Negotiations will be conducted and/or awards will be made based on recommendations from the technical

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: One example of a current funded project is the Grand Valley Irrigation Company Phase 4 Project. Selected under the 2015 FOA, the GVIC was awarded a \$2.8 million cooperative grant to line approximately 1.65 miles of their main irrigation canal within the Grand Valley. This will result in a salt load reduction of approximately 2,363 tons annually at a cost effectiveness of \$49.64 per ton. The canal lining will consist of a 30-mil PVC membrane with 3-4 inches of shotcrete cover. The cooperative agreement was executed in August 2016, and construction will begin in November of 2017. It is expected to be completed in 2019. Fiscal Year 2017: No information available. Fiscal Year 2018: No information available.

CRITERIA FOR SELECTING PROPOSALS:

In 1984, the Salinity Control Act was amended to direct the Secretary of the Interior to give preference to units which reduce salinity at the least cost per unit of salinity reduction (or cost-effectiveness). Cost-effectiveness is defined as the Salinity Program's annual cost per ton of salt prevented from entering the Colorado River system. Conceptually, cost-effectiveness is analogous to determining the cost per mile to own and operate a car. That computation combines the annual expenses (loan payments, gas, maintenance, etc.) and

divides by the miles traveled each year. The key to understanding this approach is to appreciate that the government evaluates all projects as if the money is borrowed from a loan institution and repaid in annual installments over the life of the project. This economic evaluation principle is required by the "Economic and Environmental Principles Guidelines for Water and Related Land Resources Implementation Studies", March 1983. This method lends consistency in the comparison of non-federally financed alternatives (which must borrow funds) to Federally financed projects. Each proposal will be evaluated by an application review committee in accordance with the following criteria and corresponding percentage weights: (a) Technical merit - those passing will be evaluated further, (b) Cost effectiveness 70 percent of the annual cost for each ton of salt load reduction, expressed in dollars per ton, (c) Performance risk 30 percent of performance risk will evaluate the cost and effectiveness risks of the proposal. More detailed information will be included in each funding announcement or may be obtained from the Salinity Control Program contacts listed above. For Recovery Act projects: The purposes are among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: This program funds collaborative Drought Contingency Plans that will help provide water managers prepare in advance of a drought. For example, the Dolores Water Conservancy District in Colorado will develop a Drought Contingency plan in partnership with the Ute Mountain Ute Tribe Farm and Ranch Enterprise, and the Montezuma Valley Irrigation Company. The plan will include the areas served by the Bureau of Reclamation's Dolores Project, located in southwest Colorado, which provides irrigation water for approximately 36,600 acres of irrigated land, provides municipal and industrial water to the Ute Mountain Ute Tribe, the tribal community of Towaoc, several other towns and cities, and serves downstream fish and wildlife purposes. The Dolores Project suffered severe shortages (25%) from drought in 2013. The plan will include a comprehensive evaluation of mitigation and response actions to reduce water shortages and improve drought resiliency for water users through collaboration with local agricultural districts, tribal farmers, municipal and industrial users, non-governmental organizations, and Federal and state agencies

This program also funds Drought Resiliency Projects that help provide water managers with flexibility during periods of drought. For example, in Arizona, the City of Phoenix, will purchase components for a well as part of an Aquifer Storage and Recovery Well Restoration project at their Deer Valley Water Treatment plant. The City will construct a dual-purpose well that will directly inject under-utilized surface water supplies into the aquifer for later withdrawal during times of drought. The City, which services more than 1.5 million residents, is currently experiencing drought conditions. This project enables the City to maintain a supply of surplus water while offering operational flexibility during times of drought. The City estimates the groundwater recharge to be 2,400 gallons per minute, or approximately 3,874 acre-feet per year. Fiscal Year 2017: No information available. Fiscal Year 2018: No information available.

CRITERIA FOR SELECTING PROPOSALS:

Drought contingency plans must include input and participation by multiple stakeholders. Plans will also consider climate change impacts to drought conditions and identify potential drought mitigation and response actions to build resilience to drought as exacerbated by climate change.

Drought resiliency projects supported by an existing drought contingency plan (e.g., an existing state, county, municipal, or other plan is acceptable) receive prioritization. Projects that are eligible for funding should address at least one of the following goals: 1) increase the reliability of water supply and sustainability; 2) improve water management; 3) implement systems to facilitate voluntary sale, transfer, or exchange of water; 4) provide benefits for fish and wildlife and the environment; and 5) mitigate poor water quality caused by drought.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Cost-share cooperative agreements were awarded to a number of non-federal partners, such as states or counties, in an effort to facilitate planning and development of recreation and fish and wildlife facilities on various Bureau of Reclamation water project recreation areas. These projects were identified primarily through existing resource management plans (RMPs), budget availability, and in coordination with managing partners. Many of the projects funded promote active and health youth opportunities on public lands and waters through development and/or expansion of outdoor day-use and camping facilities, water access points to enjoy fisheries, etc. Provided below are just some of the many examples of cost-share funded projects in Reclamation.

The Tri-Cities Joint Job Development Authority (JJDA) of North Dakota (ND) completed cost share projects consisting of a fish cleaning station, a playground, a hiking trail, and camper cabins at Heart Butte Reservoir. Dickinson Parks and Recreation Department of ND contributed funding towards the Crooked Crane hiking trail at Edward A. Patterson Lake which is currently in progress. The Stutsman County Parks Board in ND began the development of the Pelican Point recreation site at Jamestown Reservoir. South Dakota Game, Fish, and Parks (SDGFP) contributed to the development of recreation at Shadehill, Angostura, Belle Fourche, and James Diversion Lakeside. In addition, SDGFP also contributed funding for wildlife enhancement facilities and habitat improvements on Reclamation lands. Wyoming State Parks and Trails is currently in the process of constructing camper cabins and a shower house at Keyhole Recreation Area. Larimer County, Colorado has completed the construction of a new visitor center at Horsetooth Reservoir. In addition, Larimer County is in the process of developing the South Shore Campgrounds. Estes Valley Recreation and Park District began construction of ADA accessible bathroom, shower facilities, a sewer line, and dump station in the campground area. The Oklahoma Tourism and Recreation Department completed several cost share projects including accessible day use sites, a comfort station, and a swim beach route. The development of other accessible comfort station projects are currently in progress. The Central Oklahoma Master Conservancy District completed an accessible fishing dock with an associated sidewalk and parking lot.

Oregon State Parks and Recreation (OSPR) completed campground improvements and ADA retrofits at Prineville State Park Big Bend. In addition, OSPR has contributed funding towards O&M at Prineville State Park. OSPR has also contributed 90% of cost share for completion of a boat ramp at Owyhee State Park. The Idaho Parks and Recreation Department completed an

O&M cost share project at Lake Walcott State Park and another O&M project is currently in progress at Cascade State Park.

California State Parks and Recreation (CSPR) began facility improvements at Millerton Lake (South Shore Service Yard) which is a significant project. Casitas Municipal Water District has contributed cost share funding for the management of open space and recreation improvements at Lake Casitas. Santa Barbara County Parks has completed the design and engineering at Lake Cachuma Recreation Area and cost shared with Reclamation for other recreation maintenance activities. CSPR contributed funding for the Auburn Recreation Area Resource Management Plan. The Nevada Division of State Parks also provided cost share for recreation planning, and O&M activities at Lahontan Recreation Area. Colusa County contributed funding to an ADA Disk Golf course.

The Pine River Irrigation District is in the process of providing operation, maintenance, and replacement (OM&R) of recreation facilities at Vallecito Reservoir. New Mexico State Parks is currently conducting O&M at Reclamations reservoirs in New Mexico. Utah State Parks is conducting rehabilitation at Deer Creek, Jordanelle, and Steinkjer recreation areas. Fiscal Year 2017: Information not available. Fiscal Year 2018: Information not available.

CRITERIA FOR SELECTING PROPOSALS:

For ARRA funded projects: The purposes of the Recovery Act are, among others, to quickly and prudently commence activities that preserve and create jobs and to promote economic recovery, and to invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. To meet these purposes, Reclamation will allocate funds based on the criteria set forth in the Recovery Act and the accompanying conference report, and will target activities that quickly infuse money into the economy.

CRITERIA FOR SELECTING PROPOSALS:

The Las Vegas Wash Coordination Committee has decided that the SNWA will be the lead agency for receiving funding for this program due to the high costs and types of environmental improvement and enhancement, and ability to maintain restoration projects. The Las Vegas Wash Program plays an important role in environmental and water resource issues in Southern Nevada. Historically, the Las Vegas was an ephemeral stream carrying storm flows from the Las Vegas Valley to Lake Mead and the Colorado River. Urban development over the past 60 years has resulted in the formation of the wetlands that helped remove nutrients from these wastewater flows. As the rate of discharges increased, erosion also increased, gradually destroying the existing natural treatment systems and wildlife habitat and creating a large delta in the Las Vegas Bay of Lake Mead. Accelerating erosion, declining water quality, and loss habitat are some of the more pressing issues. Proposals submitted will be reviewed and awarded based on priority fulfillment of the 44 action items identified in the Plan and the availability of funding appropriations.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Examples of projects funded in FY 2014 include: (Note: the last announcement for the LCCs was made in FY 2014, which is why these examples date back to 2013 and 2014. New examples will be provided after FY 2017 projects are selected).

Desert LCC: The Environmental Defense Fund (EDF) will use modeling tools and data from the 2014 Minute 319 pulse flow to develop an integrated system that will assist with future pulse flow release experimental determinations. The Minute 319 pulse flow is a temporary release of water to mimic natural spring floods in the Colorado River Delta to study how best to restore native riparian habitat. The new system will integrate data and models such as environmental conditions and designed pulse flow releases with targeted environmental variables to predict the environmental reaction to future pulse flow releases, thereby supporting adaptive management and planning in the future. By linking data and models together into an integrated system, EDF intends to reduce the time required to analyze scenarios and to provide data that would help guide the pulse flow design.

Southern Rockies LCCs: The Museum of Northern Arizona will leverage tools previously developed through its Springs Stewardship Initiative to help resource managers in the southwestern U.S. collect, analyze, report upon, monitor and archive the complex and inter-related information associated with springs and spring-dependent species in the region. Building upon those past efforts, the project will include compilation of existing springs-related information to make the information more readily available online and further development of interactive online maps and climate change risk assessment tools of springs-dependent sensitive plant and animal species. This project builds on an effort funded in FY 2013 to complete similar work for the Desert LCC. Fiscal Year 2017: Information not available. Fiscal Year 2018:

Information not available.

CRITERIA FOR SELECTING PROPOSALS:

Specific evaluation criteria will be included in the funding announcements posted on www.grants.gov. All applications will be evaluated using criteria that give priority to a project's technical merit, the relevance to the LCC, dissemination of results to Reclamation and LCC partners, connections to Reclamation activities and exceed the minimum 50 percent non-Federal cost-share requirement.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2016: The primary objective of the Dixie Valley Ground Water Export Study is to determine how much water is available for export from Dixie Valley. The original plan of study included evaluating the feasibility of conveying the water to various points of use within Churchill County, Nevada. It was to be completed in three phases over a 5 year period, beginning in early 2009, concluding in 2014. The first phase included data collection/analysis to develop an understanding of the study areas hydrogeologic framework, ground-water flow, and water quality. The second phase was to include development of groundwater models for estimating hydrologic impacts and analyses of associated economic and environmental impacts. The third phase was contingent on Phase 2 results and would include pipeline design and cost estimating activities. Phase 1 is complete and reports of findings are either published or in publishing. The Phase 2 groundwater modeling is ongoing. The Phase 2 economic and environmental analyses, as well as the Phase 3 design and cost estimating work, will not be completed due to inadequate funds. In 2016, the groundwater model report was finalized and findings were presented to the Churchill County Commissioners who approved/accepted all study findings. The project has been completed. RELATED PROGRAMS:

11.407 Interjurisdictional Fisheries Act of 1986; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Alabamas Department of Conservation and Natural Resources Marine Resources Division (AMRD) uses \$165,000 in Sport Fish Restoration funds annually , with a non-federal match of \$55,000 to operate and maintain the Claude Petet Mariculture Center (CPMC). Located in Gulf Shores, Alabama, Marine finfish hatcheries can play a significant role in replenishing depleted fish stocks as degraded habitats negatively impact fish populations and are a cause for concern among fisheries managers. AMRD will culture and stock red drum (*Sciaenops ocellatus*), Florida pompano (*Trachinotus carolinus*), and Southern flounder (*Paralichthys lethostigma*) to satisfy sport fishing demand. Due to this facility, anglers will benefit with increased catch rates, the local economy will benefit from increased expenditures, and there will be invaluable benefits to the restoration of the Gulf of Mexico.

Nine States Partner on Largemouth Bass Project - Nine state fish and wildlife agencies are partnering on a project Estimation of Fishing Mortality and Development of Live Well Management Procedures to Improve the Survival of Largemouth Bass. State agencies include: Arkansas Game and Fish Commission, Kansas Department of Wildlife, Parks, and Tourism, Kentucky Department of Fish and Wildlife Resources, Louisiana Department of Wildlife and Fisheries, Maryland Department of Natural Resources, Mississippi Department of Wildlife, Fisheries, and Parks, Texas Parks and Wildlife Department, West Virginia Division of Natural Resources, and Tennessee Wildlife Resources Agency. This three year research project aimed at improving the quality of largemouth bass populations (LMB) throughout the United States by providing useful information to fisheries managers to effectively manage populations and inform recreational anglers and tournament anglers and organizations about best practices for handling LMB, a frequently sought fish species by recreational anglers throughout the country. Decreased survival of LMB following capture and handling in bass tournaments has been attributed to a number of factors. However, the independent effects of these factors on the survival of LMB subjected to angler capture and tournament handling have not been measured. Further, the effect of water temperature on the survival of LMB caught and immediately released has not been measured. This project will help to ensure that LMB across continue to be managed with the best available science-based management strategies to help ensure continued conservation and management for current and future generations of anglers.

The District of Columbias Department of Energy and Environments (DOEE) Aquatic Resources Education Center (AREC) offers interpretive exhibits, educational programs, and coordinates teacher trainings for government and non-governmental organizations. It is one of only three facilities like it in the Northeast Region. They host special events throughout the year including: an open house that focuses on teaching basic fly fishing and spin casting skills to public school teachers, RiverSmart Educational Boat Tours where the public can learn about the history of the river and the wildlife that use the river, a year-round fishing club that will use the Hooked on Fishing Not on Drugs curriculum, and Project Aquatic Wild and Growing Up WILD teacher trainings so that these educators can use these national curricula to teach aquatic resources education lessons with their students. The staff provides a multitude of education materials including a full curriculum for grades Pre K-12, brochures, and self-guided tour booklets. They attend outreach events including science fairs and environmental education trainings and offer angler education classes to teach the public how to fish safely, and partner with other organizations including Anacostia Riverkeeper, Anacostia Watershed Society, and the Smithsonian Anacostia Museum. The Districts aquatic resources are under the constant threat of increasing population and urbanization. This project has been successful in getting school groups to participate in programs. Staff is integrating aquatic resource lessons into the DC school system in order to instill the importance of DCs aquatic resources on youth, and also teach basic angling skills that build confidence and promote safe and ethical fishing.

Massachusetts Division of Marine Fisheries (DMF) used \$110,250 of Sport Fish Restoration funds and \$36,700 of State saltwater license funds to build an artificial reef in Nantucket Sound. The reef was constructed in March of 2016 using 1600 cubic yards of concrete rubble material, including 1000 cubic yards of repurposed material from the Harwich High School demolition. The material covers 11 percent of the total 9.9 acre permitted area, is located two miles south of the entrance to Saquatucket Harbor, and is easily accessible for small boat anglers. The artificial reef provides habitat for invertebrate and finfish species, and provides saltwater angling opportunities. The DMF has prohibited commercial fishing in a 39.5 acre closed area surrounding the reef to protect recreational angling. This project is a continuation of the statewide Marine Artificial Reef Plan that provides a framework for long-term management of reefs within the Commonwealth. Following the reef construction in March of 2016, DMF divers revisited the site in May and June and recorded an abundance of marine life, including black sea bass, scup, tautog and several crab species. The rapidity at which the marine species claimed the reef suggests the reef was a productive habitat enhancement. The newly established fish populations have also encouraged private and for-hire boat recreational anglers to visit Nantucket Sound.

Puerto Ricos Department of Natural and Environmental Resources Aquatic Resources Education Program (AREP) at the count of four, cast event is a collaborative project between with the Puerto Rico Department of Education, which has endorsed the program as part of their curriculum. AREP recruits new anglers, retains active anglers, and promotes outdoors ethics and increases the understanding of water resources and aquatic species. AREP develops and offers fishing clinics and tournaments, aquatic resources and fishing techniques workshops, and educational materials relevant to aquatic ecosystems and sport fishing. So far, this project has reached 46 public and private schools, 162 teachers and 984 students. Fiscal Year 2017: The Texas Parks and Wildlife Department (TPWD) will use its aquatic education grant and program to recruit, train, and retain a Volunteer Network of at least 500 volunteers that teach the Angler Education Program and assist at school and community outreach events that will reach approximately 35,000 Texan anglers and potential anglers. TPWD provides resources for instructors and the general public, including a Tackle Loaner program.

The Kentucky Department of Fish and Wildlife Resources (KYDFW) is developing the Lake Cumberland Tailwater into one of the best trout fisheries in the South. They stock various strains of brown trout and evaluate stocking success and growth rate. Fall electrofishing sampling evaluates population levels. They stock about 20,000 rainbow trout per month into the Cumberland Tailwater from April through November. Recently, KYDFW purchased shoreline along the Tailwater to improve angler access to one of the best fishing areas. These Sport Fish Restoration efforts provide anglers from Kentucky and other States with quality trout fishing.

The South Carolina Department of Natural Resources produces and stocks 500,000 fingerling and catchable size rainbow, brown, and brook trout per year in cold water rivers, streams, lakes, and ponds across the state. As many as 50,000 trout anglers contribute approximately \$18 million to the states economy as a result of trout angling in South Carolina.

In Massachusetts, a fishing pier was needed in Oak Bluffs on Marthas Vineyard - a recreational fishing hotspot. The pier project was fully permitted, but required funding. At the same time, a new state salt water fishing permit was implemented that dedicated a minimum of 30% of each years proceeds to recreational fishing access. The Massachusetts Division of Marine Fisheries and the Massachusetts Office for Boating and Fishing Access partnered with the Services WSFR Region 5 (Northeast) Office to make the Oak Bluffs Recreational Fishing Pier a reality. A huge success, recreational anglers have already begun using the newly completed pier - even before the ribbon cutting ceremony. The Americans with Disabilities Act (ADA) compliant sport fishing pier extends 317 feet from the seawall into Nantucket Sound and includes a 60 foot long section parallel to the shoreline. Sport Fish Restoration monies allowed us to complete a greatly needed, handicapped accessible, recreational fishing access pier in one of the states top tourist destinations.

In Alaska, the Alaska Department of Fish and Game (ADF&G), uses Sport Fish

Restoration funds to contribute to Chinook salmon research across the state including population assessments on rivers in Southeast Alaska. Chinook salmon management and research in Alaska focuses on spawning and juvenile abundance estimates. Spawning abundance has been estimated in several indicator stocks in Southeast Alaska since the early 1970s and estimates of juvenile abundance first began in the early 1990s. Combined, these programs produce estimates of marine survival, total harvest, harvest rate, and total run which facilitate abundance-based management as dictated through the Pacific Salmon Treaty.

Also in Alaska, the William Jack Hernandez Sport Fish Hatchery sits on three acres and replaces the ADF&Gs Elmendorf and Ft. Richardson hatcheries. At full capacity, it will increase historic stocking levels by 50 percent. All rearing tanks at this facility are located indoors. Hatchery programs include coho and Chinook salmon smolt, Chinook salmon catchables, rainbow trout catchables, Arctic char catchables, grayling and lake trout in addition to rainbow and Arctic char brood stock. Fish produced at this hatchery will be stocked in over 200 locations, contributing to a large number of fisheries throughout the state and annually provide approximately 400,000 angler days of fishing time for residents and visitors to the state. Fiscal Year 2018: Program has not yet selected projects for funding. Program anticipates funding projects that increase sport fishing and boating opportunities through wise investment of excise tax dollars in sport fishery development, research, and management projects.

CRITERIA FOR SELECTING PROPOSALS:

The States, the District of Columbia, Commonwealths, or territorial agencies having lead responsibility for the management of their fish resources must submit the projects. If approved, projects must meet the basic criteria outlined in the regulations and the U.S. Fish and Wildlife Service Manual.

Renewals:

Grantees may renew projects on an annual basis if justifiable and if funds are available.

Formula and Matching Requirements:

Statutory Formula: Public Law 16 U.S.C. 669b. The program is funded by a permanent appropriation from revenues collected from taxes on bows, arrows, archery equipment, sporting firearm, ammunition, handguns, pistols, and revolvers. The revenues are deposited in the Federal Aid to Wildlife Restoration fund in the U.S. Treasury.

These funds are annually apportioned according to the formula prescribed by the Act: 50 percent based on land area of the State, Commonwealth, or territory and 50 percent based on paid hunting license holders; no State may receive more than 5 percent or less than one-half of 1 percent of the total apportionment; the Commonwealth of Puerto Rico is apportioned up to one-half of 1 percent; and Guam, U.S. Virgin Islands, American Samoa, and Commonwealth of Northern Mariana Islands each receive up to one-sixth of 1 percent of the total apportionment. Section 4(c) Hunter Education and Safety Program Funds are formula-based apportionment based on State population. No State may receive more than 3 percent or less than 1 percent of the total Hunter Education funds apportioned. Commonwealth of Puerto Rico, Guam, U.S. Virgin Islands, American Samoa, and the Commonwealth of Northern Mariana Islands receive up to one-sixth of 1 percent of the total apportionment. Matching Requirements: Yes. Grant funds may be disbursed to States for up to 75 percent of the total cost of a project. Grant funds may be disbursed from 75 to 100 percent of the total project costs to the Commonwealths of Puerto Rico, Northern Mariana Islands and the territories of Guam, the U.S. Virgin Islands, and American Samoa. Each Regional Director decides on the specific Federal share between 75 and 100 percent based on what he or she decides is fair, just, and equitable.

MOE requirements are not applicable to this program.

Apportioned funds are available for obligation for a period of two years.

Balances remaining unobligated after the period of availability revert to the U.S. Fish and Wildlife Service. Any funds not obligated within two years by a State, Commonwealth, or territorial fish and wildlife agency revert to the U.S. Fish and Wildlife Service and will be spent under the provision of the Migratory Bird Conservation Act. In addition, under the provisions of the Wildlife Restoration Act, the interest accumulated by Wildlife Restoration account is available to the North American Wetland Conservation program. Funds are disbursed to recipients as requested and in accordance with the payment methods prescribed in 2 CFR 200, or as otherwise prescribed in program-specific legislation. RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.615 Cooperative Endangered Species Conservation Fund; 15.626 Hunter Education and Safety Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: FY16: Alaskas Intensive Management (IM) is a management objective established in Alaska statute and can be applied to ungulate populations in which hunter harvest has inexplicably declined. Populations managed under IM are assessed to determine limiting factors for abundance. Sitka black-tailed deer (SBTD) in Prince William Sound (PWS) Alaska are an introduced population which exists at the northernmost latitude of their range. A study of SBTD in PWS was recently initiated to estimate adult deer abundance, survival rates, nutritional status, and evaluate population objectives. Fifteen deer were successfully net-gunned from a helicopter, tagged with GPS collars, assessed for body condition, and released. Ability to capture (net) deer from a helicopter was experimental, but successful in PWS. Ability to obtain very high-resolution color-infrared imagery (CIR) was successful and will be used for habitat classification. Collared deer provide the basis to learn about their habitat selection, nutritional condition, population abundance, and

the effect of winter conditions. Ultimately, these study results will inform management actions. Harvest of deer is extremely important in the coastal communities of PWS and southeastern Alaska.

Georgias Wildlife Resources Division currently manages more than 1 million acres of land for wildlife and hunter access. One of many examples of recent ground level enhancements includes pine savannah restoration activities ongoing on Wildlife Management Areas in southwest Georgia. These projects will positively benefit bobwhite quail, which is the state game bird, other game species such as deer and wild turkey, and other wildlife that depend on open pine savannah habitat. Also in Georgia, Wildlife Restoration funds were used help build the Shooting Sports Education Center at Georgia Southern University. Within the last year, this 30,000 square foot facility was open to the public and equipped to serve a variety of shooting sports interests through the 16 lane, 25 meter firing range, 16 lane, 25 meter archery center, and two training / seminar rooms.

Marylands Department of Natural Resources is playing a major role in the recovery of the endangered Delmarva fox squirrel with the use of Wildlife Restoration and Section 6 funds over the past four decades. On December 16, 2015, the Delmarva fox squirrel was removed from the federal list of endangered species after 48 years of recovery efforts. It was placed on the original list of endangered species in 1967 along with the bald eagle, California condor, and black-footed ferret, and is the 31st species to recover and become delisted. Wildlife Restoration funds are used to monitor populations, document the fox squirrels range expansion, study its natural history, and re-establish populations in portions of its historic range from which the Delmarva fox squirrel had disappeared. Beginning in 1978, wild caught Delmarva fox squirrels were translocated to 15 different locations in Maryland (11), Delaware (2), Virginia (1), and Pennsylvania (1). Ultimately, 11 populations were successfully established and the range now includes 8 Maryland counties, and a Delaware and Virginia county as well. These populations continue to grow and expand into new areas.

Mississippi Department of Wildlife, Fisheries & Parks (MDWFP) is constructing a shooting range facility (McIvor Creek Shooting Range) in northern Mississippi at the Charles Ray Nix Wildlife Management Area (WMA) in Panola County, Mississippi. The MDWFP seeks to provide a safe, quality, clean, and family friendly public shooting range facility; provide more educational and shooting range facilities to support classroom training and live fire opportunities for Hunter Education classes and support the expansion of programs that will encourage participation in shooting sports and hunting. As proposed, the facility will include a 3-D archery range, 15-station sporting clays course, trap and skeet complex, pistol range, 100 and 300 yard rifle ranges, and a duck flush (five-stand). The project is being funded in part utilizing \$1,406,111 in Wildlife Restoration funds and in partnership with the Olin Corporation (Winchester Ammunition), which contributed over \$1,400,000 to the project. The groundbreaking ceremony was held on August 30, 2016.

Pennsylvanias Game Commission has launched a prescribed fire program on their state games lands system that has over 800,000 acres of fire-dependent wildlife habitats. Fire shaped Pennsylvanias wildlife habitats for thousands of years with recurring fires that maintained oak forests, open woodlands, and grassy meadows the perfect mix for turkeys, deer, and other wildlife. But such habitats are actually threatened with fire removed from the equation. After 70 100 fire-free years, formerly open habitats are now clogged with rank vegetation and oak forests are being replaced by fire-intolerant birch and maple; all to wildlifes detriment. Thats why prescribed burning is an essential tool thats being used to restore vibrant wildlife habitats. Prescribed burns also reduce the risk of wild fire because prescribed burns are normally repeated every 3 10 years, so fuels cannot build to dangerous levels. Pennsylvania first requested Wildlife Restoration funds to jumpstart its prescribed fire program in 2010. Since then the agency has used prescribed fire to improve habitat and hunting opportunity on 26,738 acres. The program goal is to burn 20,000 acres annually by the year 2020, and funds are instrumental in training over 200 staff to National Wildfire Coordinating Group (NWCG) standards, purchasing wildland fire equipment, and developing fire breaks and mechanical fuel reductions.

Virginias Department of Game and Inland Fisheries (VDGIF) used Wildlife

Restoration funds, combined with funds from other partners, to purchase of over 2,600 acres of land in eastern New Kent County, Virginia. This acquisition, approved by the VDGIF board for the price of \$9.3 million dollars, includes more than two miles of frontage on the York River in addition to five miles along the Ware and Philbates creeks. The property includes over 720 acres of tidal wetlands, 1800 acres of upland forested habitats, and 100 acres of croplands. These valuable ecosystems are home to a variety of wildlife, including deer and turkey, small game such as rabbits and squirrels, waterfowl, black ducks, teal, mallards, and a host of neo-tropical songbirds including warblers, thrushes, tanagers, and vireos. The property also contains substantial tidal and upland wildlife habitat. Coastal wetlands protect against flooding, provide habitat for wildlife, and contribute to outdoor recreational opportunities. This property will be a significant addition to the VDGIFs Wildlife Management Area system, serve as a crucial filter for runoff entering waterways, and provide public access for outdoor recreation in perpetuity. Fiscal Year 2017: FY17: Idaho Department of Fish and Game (IDFG) is researching the population drivers of pronghorn in various habitat types including native shrub-steppe, altered shrub-steppe, and agricultural communities. This project will evaluate factors affecting pronghorn herds in eastern Idaho, and develop a reliable, cost-effective technique for monitoring status and trend of pronghorn herds in Idaho. Pronghorn will be captured, fitted with radio collars, have their body condition assessed, and be monitored with telemetry. Habitat quality, nutritional condition of vegetation, neonatal survival and cause specific mortality will be assessed. Monitoring methods will focus on the vital rates deemed most likely to influence populations. This information is necessary for conservation and management decisions, including hunting seasons, habitat improvement efforts, and technical assistance to public and private landowners.

Oregon has a Statewide Habitat Management grant that covers habitat restoration efforts in seven distinct Watershed Districts (Deschutes, John Day, Malheur, Klamath, Rogue, South Willamette, and Umpqua). Goals of the project are to (1) maintain, restore, or enhance wildlife habitat on public and private lands to optimize wildlife populations, while paying particular attention to listed species; (2) evaluate, protect, or enhance existing habitat conditions or restore lost habitats on private and public lands; (3) assist landowners by providing resources to restore and improve fish and wildlife habitat; and (4) provide technical advice and assistance to local, State, and Federal agencies regarding land-use activities and proposed developments to promote conservation of fish and wildlife habitats. The areas managed under this grant are designed to provide year-round habitat for wildlife species and to reduce and/or minimize agricultural damage and depredation to surrounding communities by wildlife. By coordinating with agencies and private landowners to implement and administer the proposed activities, the general public can benefit from healthier habitats for many species.

The Indiana Department of Natural Resources, in partnership with Hamilton County Parks and Recreation Department, recently completed construction of the Koteewi Park Archery Range. The facility includes beginner archery ranges with 10-25 yard targets, advanced archer ranges with up to 90 meter targets, practice shooter ranges, and a 3-D target shooting trail. The facility provides a safe environment to learn about archery, shooting sports, and bow hunting that serves the local, regional, and national communities. This range is one example of many ranges that have been constructed throughout the country with Wildlife Restoration funds.

The Arkansas Game and Fish Commission (AGFC) is renovating 11 Wildlife Management Areas to benefit waterfowl. In addition to replacing and upgrading pumps and pipeline for increased water management ability, AGFC is also establishing three new moist-soil units and expanding or renovating at least 20 more. More than 1,300 acres of waterfowl habitat will be created or improved and the ability to control water levels greatly enhanced on thousands of additional acres. Fiscal Year 2018: FY18: The Program has not selected projects for funding. The Program anticipates funding projects to restore, conserve, manage and enhance wild birds and mammals and their habitats and to provide hunter development and safety programs.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territorial agency having lead responsibility for

the management of their wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

The projects cumulatively protect, restore or enhance more than 10,000 acres of important coastal wetland habitat, including several miles of shoreline. Conservation of this habitat not only benefits coastal-dependent federal trust species, but also enhances flood protection and water quality, and provides economic and recreational benefits to commercial fishermen and anglers. Fiscal Year 2017: The program received 25 applications from 11 coastal States. Of these, 20 projects from 10 states were funded with \$17.4 million federal share and \$20.3 million in non-federal share. The projects cumulatively protect, restore or enhance more than 13,000 acres of important coastal wetland habitat, including several miles of shoreline. Conservation of this habitat not only benefits coastal-dependent federal trust species, but also enhances flood protection and water quality, and provides economic and recreational benefits to commercial fishermen and anglers. Multiple fish and bird species that use watershed along with elk, deer, black bear and river otters will benefit from the protection. Red Banks Alvar State Natural Area, WI - The Wisconsin Department of Natural Resources was awarded \$152,496 to help acquire and protect 140 acres on the Red Banks Alvar State Natural Area located adjacent to the Bay of Green Bay in Brown County, Wisconsin. The property is dominated by palustrine emergent, scrub/shrub and forested wetlands that provide important habitat for the threatened dwarf lake iris as well as migratory and breeding birds and other wildlife. San Francisco Bay Estuary, CA - The California State Coastal Conservancy was awarded \$1 million to restore and enhance 68 acres of seasonal coastal wetlands at Bel Marin Keys on San Pablo Bay in the San Francisco Bay Estuary. It is part of the larger Hamilton Wetlands Restoration

Project that will result in a restored coastal wetlands complex up to 2,500 acres in extent. The project will restore seasonal wetlands that will provide valuable habitat for migratory waterfowl and shorebirds on the Pacific Flyway, as well as high tide refugia for listed tidal marsh species, including the endangered Ridgeway rail. Extensive tidal marsh restoration made possible by the construction of a setback levee will help with resilience to sea level rise. Fiscal Year 2018: Program has not yet selected projects for funding. Program anticipates funding projects that acquire, restore, and enhance wetlands in coastal States.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: The Illinois Department of Natural Resources, Office of Resource Conservation proposes to support the City of Ottawas Heritage Harbor in development of 26 new transient slips and a restroom and shower facility for eligible boaters. Heritage Harbor is located at a pivotal point along the Illinois River for pleasure boating, between Chicago and Peoria, Illinois. The docks will be furnished with potable water and electrical service. A fueling system will also be installed for the convenience of traveling boaters. The Boating Services Division of the Maryland Department of Natural Resources proposes to assist Harbor East Marina in downtown Baltimore to develop transient boater services for boaters traveling the Chesapeake Bay. The partners will develop 122 berths for eligible vessels and provide better overnight accommodate with upgraded electrical service. The enhanced facility will provide access to all the many historic and cultural assets that Baltimore has to offer. Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that include: construction of tieup facilities for nontrailerable, recreational vessels of 26 feet or greater in length; development of amenities for eligible boaters, such as restrooms or other facilities; development of utilities or other services for eligible vessels. RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.611 Wildlife Restoration; 15.614 Coastal Wetlands Planning, Protection and Restoration Act; 15.635 Neotropical Migratory Bird Conservation

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Example of US Standard Grant project, Lowcountry Protection II, South Carolina. The proposal is located in the Atlantic Coast Joint Ventures ACE Basin and South Lowcountry Waterfowl Focus Areas and significantly contributes to the goals of national and regional bird conservation plans. This phase will protect 3,779 acres including 646 acres of palustrine emergent wetlands, 88 acres of estuarine emergent wetlands, 949 acres of palustrine forested wetlands and 2,015 acres of associated forested uplands to benefit breeding, migrating and wintering birds in accordance with the recommendations of South Atlantic Migratory Bird Initiative. This proposal will complement a growing protected landscape where substantial federal investments including 19 standard NAWCA grants in the past ten years have created and expanded public ownership, restoration and management throughout the Lowcountry. Two separate acquisition tracts, consisting of 1,761 and 2,018 acres, are located within a two county area of south coastal South Carolina. The closest U.S. Fish and Wildlife Service facility is the Savannah River National Wildlife Refuge, located approximately 15 air miles from the southernmost tract. These tracts lie outside the approved boundary of the refuge. Non-Service ownership of the proposal tracts eliminates the need for increased staff for separate refuge units and reinforces local participation in the long-term acquisition planning/management of this region. Fiscal Year 2017: Example of US Standard Grant project, Southwest Wetlands Initiative of Minnesota (SWIM) III. SWIM III provides an efficient and effective partnership to deliver long term wetlands and wetland-associated upland habitat for the benefit of waterfowl and other wildlife. This proposal focuses on wetlands in the Prairie Coteau of Minnesota and works primarily on restoring converted wetlands and enhancing degraded wetlands through permanent habitat protection efforts on both public and private lands. This is the third proposal of a multiple year initiative with an overall goal to accelerate the permanent protection of prairie wetland complexes open to the public and to ensure every Waterfowl Production Area and Wildlife Management Area is providing the maximum benefits for waterfowl and wetland dependent species. More specifically, SWIM III accelerates efforts to permanently protect in fee title and easement 690 acres of Waterfowl Production Areas and Wildlife Management Areas and 61.9 acres via Re-Invest in Minnesota perpetual conservation easement. Further, this partnership restores 40 acres on Hurricane Lake WMA and enhances another 270 acres of wetland habitat on Chen Bay and Sioux Valley WMAs. Projects within this proposal will address both reproductive and migration habitat needs of waterfowl and wetland dependent species within the area. The project area and project components are important to successful implementation of the NAWMP and the PPJV Implementation Plan. Several stateside conservation plans are served by the work outlined in this proposal as well, including the Minnesota Prairie Conservation Plan and Minnesota's duck and pheasant plans. Fiscal Year 2018: Program has not yet selected projects for funding. Program anticipates funding projects that protect and improve habitat for migratory birds and other wetland-associated species. More examples of NAWCA projects can be found at <http://www.fws.gov/birds/grants/north-american-wetland-conservation-act.php>.

CRITERIA FOR SELECTING PROPOSALS:

The Council selects proposals based on factors given in Section 5 of the North American Wetlands Conservation Act, results of site visits, available funds and other factors deemed important to meeting Act objectives.

Formula and Matching Requirements:

Statutory Formula: Yes. States and insular areas are apportioned funds for Hunter Education - Section 4 (c) (traditional funds) and Hunter Education - Section 10 (enhanced funds). Each state receives an annual apportionment for Section 4 (c) and Section 10 funds based their population compared to the total U. S. population with no state receiving more than 3 percent or less than 1 percent. Insular areas receive 1/6 of 1 percent.

Revenues from manufacturers' excise taxes collected on pistols, revolvers, bows, arrows, archer accessories and arms and ammunition are deposited to the Wildlife Restoration Account. 1/2 of the excise taxes collected on pistols, revolvers, bows, arrows and archer accessories are used to fund Section 4 (c). After funding Section 4 (c), \$8 million is deducted from the Wildlife Restoration Account to fund Section 10.

The funds remaining in the Wildlife Restoration Account fund WSFR administration, the Multistate Conservation Grant Program and the Wildlife Restoration Program.

Section 4 (c) funds may be used for hunter education projects or wildlife restoration projects. If all Section 4 (c) funds apportioned in a fiscal year are obligated for hunter education projects, the Section 10 funds apportioned in the same fiscal year may be used for either hunter education or wildlife restoration projects. However, if all Section 4 (c) funds apportioned in the fiscal year are not obligated for hunter education projects, Section 10 funds must be used for hunter education.

Matching Requirements: Yes. Grant funds may be disbursed to States for up to 75 percent of the total cost of a project. Grant funds may be disbursed from 75 to 100 percent of the total project costs to the Commonwealths of Puerto Rico, Northern Mariana Islands and the territories of Guam, the U.S. Virgin Islands, and American Samoa. Each Regional Director decides on the specific Federal share between 75 and 100 percent based on what he or she decides is fair, just, and equitable.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Any funds not obligated within one year by a State, Commonwealth, or

territorial fish and wildlife agency revert to the U.S. Fish and Wildlife Service and reapportioned to States, Commonwealths, and territories that obligated their Section 4(c) Hunter Education and Safety apportionment on eligible hunter education and safety activities. See the following for information on how assistance is awarded/released: Funds are disbursed to recipients as requested and in accordance with 2 CFR 200, Subpart E-Cost Principles, or as otherwise prescribed in program-specific legislation or special award terms.
