15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: In Kentucky, educators and others were certified to teach archery and safety skills to students in grades 4 through 12. More than 550 schools conducted archery programs during regular school hours with 105,398 students. The National Archery in the Schools Program trained 555 new archery instructors in 64 Basic Archery Instructor training classes, including agency staff at three Kentucky Department of Fish and Wildlife conservation camps. California Department of Fish & Wildlife's Advanced Hunting Clinics focus on the "how-tos" of hunting. The series includes sessions on how to hunt turkey, upland game, waterfowl, and big game. Topics covered in each clinic include type of firearm, ammunition, importance of sighting in the firearm, gauging distance, scouting, tracking, field dressing, shoot-don't shoot scenarios, hunter ethics, landowner-hunter relationships, conservation, and safety. The goal of this series of hunting clinics is to develop ethical, conservation-minded, successful hunters through education...taking the hunter a step beyond the basic hunter education course. Total costs: \$163,609 (\$122,700 Federal, \$40,902 State).

The Alaska Department of Fish and Game continues to expand hunter education, archery and shooting sports throughout Alaska and often in remote locations. Through these efforts, the National Archery in the Schools Program (NASP) has grown from 10 to 145 schools statewide. HIT staff traveled to the Pribilof Islands, located 4 hours by plane west of Anchorage in the Bering Sea near Russia, to successfully complete the furthest west Hunter Education class taught in North America. Total cost \$106,560 (\$79,920 Federal, \$26,640 non-Federal).

The South Carolina Department of Natural Resources (SCDNR) Shooting Sports Program aims to expand the National Archery in the Schools Program and the SC Scholastic Clay Target Sports by providing more opportunity for young sportsmen to participate in shooting sports. SCDNR staff train approximately 30 teachers a year, who will incorporate Junior Olympic Target Archery education into their curriculum and they continue to support and train young clay target shooters, with over 40 teams already formed. Total cost \$234,020 (\$175,515 Federal; \$58,505 non-Federal). Fiscal Year 2017: The Alabama Division of Wildlife and Freshwater Fisheries (WFF) continues to promote the National Archery in the School Program (NASP) and conducted hunter and shooting sports education and outreach to non-traditional audiences in Alabama. As part of this project WFF conducted 20 Basic Archery Instructor workshops for 266 teachers to implement the NASP curriculum and purchased archery equipment to supplement new schools enrolling in the program. Approximately 370 schools and 55,500 students participated in Alabama's NASP during this fiscal year. Thirty-three hundred and forty-one students from 145 schools participated in seven regional events and 74 teams with 1,237 student archers participated in a statewide event at the Montgomery Sportsplex.

Total cost \$180,000 (\$135,000 Federal; \$45,000 non-Federal).

Iowa Department of Natural Resources and Pheasants Forever, Inc. signed a cooperative agreement to hire a joint Iowa Outreach Coordinator. This position is a Pheasants Forever employee but works closely with the Iowa DNR on shooting sports efforts, mentored hunts, long-term mentoring efforts, youth habitat projects, and expanding youth/family events at the local level. Through this partnership 28 mentored hunts were held involving 539 youth, 84 shooting sports events were held involving 3410 youth, 26 field days were held involving 2038 youth, and 8 habitat projects were completed involving 1006 youth with 20 acres planted. Cost for the project was \$30,000 (\$22,500 federal and \$7500 state).

Vermont Fish and Wildlife Department held various advanced trainings designed to bridge the gap between hunter education certification and actually hunting or trapping and also to introduce new audiences to the outdoors. Some examples were the specialized hunting technique seminars such as deer processing, bowhunting, crossbows, and bear hunting where 216 people participated. Youth attended various advanced weeks at the Green Mountain Conservation Camps, 113 received their trapping certification, and 134 received their waterfowl certification. Becoming an Outdoors Family event had 51 families (154 participants) attend this year. Cost for these projects \$20,000 (\$15,000 Federal; \$5,000 State). Fiscal Year 2018: The Program has not yet selected projects for funding. The Program anticipates funding Section 10 Enhanced Hunter Educational projects and activities that are eligible each year.

CRITERIA FOR SELECTING PROPOSALS:

The State, Commonwealth, or territory agency having responsibility for the management of their resources must submit the projects. The State, Commonwealth's, or territory's wildlife resources must submit the projects. The State, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.611 Wildlife Restoration

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: The Western Association of Fish and Wildlife Agencies is working on a project titled, Crucial Habitat Assessment Tool (CHAT), providing GIS-based data, mapping and analytics for crucial habitats and species throughout the West. CHAT represents an unprecedented collaborative effort by 16 western states to create a cohesive, web-based mapping tool prioritizing important habitats for wildlife, including species of concern as well as species of economic and recreational importance. The CHAT program covers 58% of the U.S. land base, providing a significant benefit to the nations natural resources, with opportunities to increase that percentage to cover more or all of the United States, and potentially Canada.

The Max McGraw Wildlife Foundation is working on a project titled, Recruitment of Hispanic Hunters: Using a Case Studies approach to gain insights into Hispanic values toward wildlife, and motivations and participation in hunting. This project is using case study interviews of recently recruited Hispanic hunters to gain insight into their transition pathway from a non-hunter to a hunter. The case studies developed will examine key variables regarding processes within the Recruitment, Retention, and Reactivation (R3) model and values associated with wildlife and public trust. Development and adoption of successful hunter recruitment and retention programs under the R3 model depends on a detailed understanding of the model and how individuals specifically transition from a non-hunter to a consistent license-buying hunter. This case study approach will serve to inform specific recruitment efforts for Hispanics and also improve our understanding of how any demographic or minority may transition through the R3 model and ultimately what shapes their pathway into hunting. Six to nine states from across the U.S. will be selected based on available license data to ensure a range of geographic areas and percentage of Hispanic individuals per capita.

The Archery Trade Association (ATA) is working on a project titled, Diversifying Outdoor Education: Translate Explore Bowhunting into Spanish to Reveal an Untapped Market. The ATA wants to provide state wildlife agencies with the educational program Explore Bowhunting in Spanish. Explore Bowhunting is a unit-based educational curriculum that teaches the basic skills of bowhunting. Translating and distributing this one program will allow state 28 agencies to begin to tap into a market that has been given little attention over the years. By supplying state wildlife agencies with Explore Bowhunting in Spanish, we can

begin to open hunting opportunities to Hispanic communities and value this demographic as a viable recruitment effort. By removing, at least this one barrier, we can begin to educate entire families on our hunting heritage. Fiscal Year 2017: The American Sportfishing Association will be starting a project titled, Economic Significance of Sportfishing: Jobs, Tax Revenues and other Measures Needed to Achieve Greater Support. The project will provide each and all 50 states with scientific, easy-to-understand information about the expenditures, jobs, tax revenue, income and other economic data needed to strengthen their abilities to increase public awareness about the importance of fish and wildlife.

The Association will administer on behalf of the National Fish Habitat Board a project titled, Science and Conservation collaboration through the National Fish Habitat Partnership. The project will collectively advance fish habitat partnership habitat assessments through identification of mutual data needs, data acquisition and landscape-level analysis for the benefits of fish, mussels, and other aquatic animals. In addition, provide region and system-specific fish population, habitat, and human impact data to fill regional data gaps; achieve conservation results through strategic actions and allow further critical collaboration to occur among the Fish Habitat Partnerships.

The Council to Advance Hunting and the Shooting Sports (CAHSS) will be starting a project titled, Implementation of the National Hunting and Shooting Sports Action Plan. The objective is to conduct facilitated workshops necessary to develop state-level recruitment, retention, and reactivation (R3) plans. These collaborative sessions will serve to enhance cooperative efforts between nonprofits, industry and state fish and wildlife agencies the result in stronger and larger R3 partnerships at the state level. These activities will provide information regarding the most effective ways to preserve the hunting and shooting sports traditions. Fiscal Year 2018: The Program has not yet selected projects for funding. The Program anticipates funding projects that address species or habitat research activities, hunting and fishing recruitment and retention information collection, aquatic or hunter education activities, conservation planning, outreach and coordination.

CRITERIA FOR SELECTING PROPOSALS:

Projects will be reviewed and evaluated for scope, significance, feasibility, and cost effectiveness. In addition, projects must address one or more focus areas as described in the National Conservation Needs established annually by the Association of Fish and Wildlife Agencies (AFWA).

15.631 Partners for Fish and Wildlife

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Ocelot Recovery Los Fresnos, Texas: Once found in Texas, Arkansas and Louisiana, the federally-endangered ocelot is now found only in southern Texas preferring dense coastal shrub. Habitat loss and fragmentation are the greatest challenge to their recovery. In Texas, ocelots have lost more than 95% of their habitat to timber harvests, agriculture, and urban development. The Services ocelot recovery efforts are being led by the Laguna Atascosa National Wildlife Refuge and Lower Rio Grande Valley National Wildlife Refuge. The Coastal Program worked with partners to improve nearly 134 acres of habitat in southern coastal Texas. The project involved using of prescribed fire to control invasive species, planting of native trees and shrubs (i.e., coyotillo and thornshrub), and protecting the project in a permanent conservation easement. In addition to benefiting the ocelot, this project may also benefit the Texas jaguarondi and Texas ayenia.

Harts Light Spawning Reef St. Clair, Michigan: Once found in the Mississippi River, Hudson Bay and Great Lakes basins, only a remnant population of lake sturgeon can be found today in the Great Lakes region. Overfishing, habitat loss, dams, and pollution caused their population collapse. Lake sturgeon one of the Services Regional priority species, are listed as threatened or endangered in 19 of the 20 states within its original range in the United States. The Coastal Program worked with the Environmental Protection Agency, U.S. Geological Survey, and other partners to construct the Harts Light Reef. Larger than previously constructed reefs, the limestone cobble structure covers almost four acres. The Coastal Program assessed baseline fish use, supported project planning and partnership development, and post restoration monitoring. Project monitoring, which will continue through 2017, documented sturgeon eggs on the reef for the last two years.

Dune Restoration, City of Seaside, California: The Coastal Program collaborated with partners to restore 1.5 acres of dune habitat, along southern Monterey Bay. Over the next four years, this partnership will restore an additional 10 acres of dune habitat also on state park lands that will benefit the western snowy plover, Smith's blue butterfly, Monterey spineflower, and the California legless lizard. This project connects people with nature by educating and training 1,600 children and adults in the classroom and at volunteer planting events. It also supports the Department of the Interiors Pollinator Protection Plan by removing invasive vegetation and replanting 24,000 native flowering plants, which will provide habitat for the endangered Smith's blue butterfly. By removing the invasive vegetation and maintaining dune habitat, this project addresses the effects of climate change by enhancing biodiversity, habitat connectivity, and coastal resiliency. The Coastal Program will continue to assist with project design and implementation, environmental compliance, and project monitoring. Fiscal Year 2017: The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species. Fiscal Year 2018: The Program anticipates funding projects that help protect and restore fish and wildlife habitats that benefit Federal trust species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species and be cost effective. Project selection occurs at the field level. See the annual "Notice of Availability of Federal Assistance" in <http://grants.gov> for more details.

15.630 Coastal Program

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: 1) Youth Education, Outdoor classrooms, and Monarch/Pollinator Initiative

To complement each of the initiatives listed above The New Mexico (NM) Partners for Fish and Wildlife (PFW) program worked with 14 high school students from Albuquerque, NM to plant native pollinator plants, fruit trees, construct 2 greenhouses, 2 native bee santuarios (bee motels), created 2 outdoor classrooms, helped build 1 rainwater harvesting system and completed 38 hours of classroom time. PFW staff helped directly with organizing the hands-on field work activities, project implementation, transportation logistics and curriculum delivery. The work took place on four (4) organic community farms. This was a win-win for the students, the landowners, the community and the land!

2) Prairie Management Using Proper Ranching Techniques

The goal of this 1,320-acre private land project located in south central Kansas was to improve habitat conditions for grassland and aquatic wildlife species while benefiting working agricultural lands and surrounding communities through increased livestock forage, water quantity, economic growth and reduced risk of catastrophic wildfire. This project site is native mixed-grass prairie. The PFW Program provided technical and financial assistance for mechanical removal of invasive trees. Additionally, the project included guidance on prescribed grazing and prescribed burning for long-term maintenance of the project site. The PFW Program coordinated with locally lead community-based partnerships to leverage resources and develop long-term plans while incorporating goals of the ranch

3) Drexel Town Square Project

The U.S. Fish and Wildlife Services PFW Program in Wisconsin is not only working with rural landowners across Wisconsin, but assisting project managers in urban areas to connect people and the environment while improving water quality and wildlife habitat. A great example of this is within the City of Oak Creek, a suburb of Milwaukee, WI. Here the biologist worked with City planners and administrators to restore and enhance upland and wetland habitats located at the Drexel Town Square Project to create an amenity for the future redevelopment. The Project site is approximately eighty-five acres of a former industrial development that is now being redeveloped into a mixed use Town Center that will include the City of Oak Creeks new City Hall and Library, a large format retail store, a variety of smaller retailers, restaurants, commercial office buildings, multiple high quality residential developments, a public town square, and the enhanced wetland park and other public recreational amenities. Fiscal Year 2017: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats to benefit Federal trust species and declining species. Fiscal Year 2018: The Program has not yet selected projects to support. The Program anticipates funding projects that help protect and restore fish and wildlife habitats to benefit Federal trust species and declining species.

CRITERIA FOR SELECTING PROPOSALS:

All projects must benefit Federal trust species, involve partnerships, be-cost effective, and where applicable involve on-the-ground habitat restoration. Specific criteria for reviewing and ranking projects were established in the national Partners policy, at <https://www.fws.gov/policy/640fw1.html>. The program gives high priority to proposed projects that benefit the National Wildlife Refuge System, species at risk, conserve globally or nationally imperiled habitats; and reduce habitat fragmentation. Please review the annual Notice of Availability of Federal Assistance for additional selection criteria referenced in <http://www.grants.gov>.

RELATED PROGRAMS:

15.605 Sport Fish Restoration Program; 15.608 Fish and Wildlife Management Assistance; 15.611 Wildlife Restoration; 15.615 Cooperative Endangered Species Conservation Fund; 15.634 State Wildlife Grants

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Virginia Department of Game and Inland Fisheries delivered a comprehensive landowner incentive program focused on rare and listed wildlife species, with emphasis on aquatic habitats and species that provided private landowners and partners with the information and techniques necessary to restore, protect, enhance, and manage stream/river habitats on their properties resulting in significant gains for species recovery and conservation. In total, 59 projects were completed for a total amount of 107,483 linear feet of creek/river and 238 acres of adjacent terrestrial habitat restored. Fiscal Year 2017: Existing habitat improvement, restoration, land protection, and technical guidance activities continue. No new awards will be issued. Fiscal Year 2018: Existing habitat improvement, restoration, land protection, and technical guidance activities continue. No new awards will be issued.

CRITERIA FOR SELECTING PROPOSALS:

The State, the District of Columbia, Commonwealth, or territorial agency having lead responsibility for the management of their fish and wildlife resources must submit the projects. The State, the District of Columbia, Commonwealth, or territorial agency selects those projects submitted for funding under the program. If approved, projects must meet the basic criteria outlined in the regulations and the Fish and Wildlife Service Manual.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2016: SWG Program funds are positively impacting many Endangered Species Act listing decisions. The Program has likely helped to curtail growth of State and Federal expenditures on Federally-listed species since the Program was first created in 2001. The Service de-listed thirteen domestic fish and wildlife species due to recovery since 2001. SWG Program funding was a key funding source for the conservation and recovery of sevenmore than 50 percentof these species. The SWG Program has also helped States contribute to Service removal or withdrawal of a significant portion of Candidate species listingthose species found by the Service to be warranted for listing but not yet listed as Threatened or Endangered. Of the 58 domestic Candidate fish and wildlife species that were removed or withdrawn from the list for conservation-related reasons since 2001, at least 19 species about 33 percentwere conserved by State fish and wildlife agencies using STWG Program funds. The discretionary (competitive) subprogram received 21 applications and issued 14 awards. Fiscal Year 2017: The discretionary (competitive) subprogram anticipates receiving 25 applications and issuing 12 to 18 awards. The number of applications for mandatory grants varies annually based on State priorities and capacity. Fiscal Year 2018: The discretionary (competitive) subprogram anticipates receiving 35 applications and issuing 15 to 18 awards. The number of applications for mandatory grants varies annually based on State priorities and capacity.

15.623 North American Wetlands Conservation Fund

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Conservation Strategy for the Grasslands of the Chihuahuan Desert III In this third phase, partners will attend to the most urgent restoration needs identified in the Mountain Plover (MOPL) Conservation Business Plan 2015. The long term goal is to increase by 10% the MOPL populations in Janos-Casas Grandes through protection, habitat restoration, and threats mitigation such as the decline of prairie dogs colonies that represent optimal habitat for MOPL. Additionally, partners will strengthen the Regional Alliance of Producers in Janos Region through community collaboration and participation between livestock organizations, governmental agencies at a local, state and national level.

Ensuring Conservation Status for Last Unprotected Forests in Caribbean Guatemala The forests within Guatemala's Caribbean Rainforest Corridor are a vital link in the Mesoamerican Biological Corridor and the Caribbean migratory flyway of Central America. The Caribbean region of Guatemala is one of the country's biodiversity hotspots and the region is critical for Neotropical wintering migratory and resident birds; one hundred and twenty species of migratory birds are reported for the region, and use the remaining native habitats as their main wintering or stop-over habitat. However, between 1991 and 2010, 40% of the total forested surface disappeared, mostly due to weak law enforcement, the encroachment of subsistence agriculture and the expansion of extensive cattle ranching and oil palm plantations. The grantee will protect and manage remaining forests in cooperation with local communities and government agencies, and will continue monitoring bird populations to generate data related to migratory species in their wintering grounds, as well as monitoring forest cover change in order to evaluate long term impacts of the project. The project will also support the sustainable development of 6 neighboring Maya Q'eqchi communities, where environmental education campaigns will be implemented in order to promote bird friendly productive activities.

Adaptively Managing and Increasing Critical Habitat for Sprague's Pipit in Alberta The Grassland Natural Region of Canada is one of the most intensively-utilized landscapes in the world; in the province of Alberta, 95% of the grassland region is either used for farming or ranching. This loss and degradation of native habitat is widely considered the cause of continental declines in many populations of Neotropical migratory bird species. This project will restore important habitat in the South Saskatchewan River and Milk River watersheds. Between 5,000 and 10,000 acres will be added to the Sprague's pipit habitat management program through enrollment of new ranches in 10-year management agreements. In addition to grazing management strategies, the grantee will actively improve habitats through removal of encroaching shrubs, employment of moveable fence-lines, and reseeding of previously cultivated lands to native grasses. Through resulting improvements and increases to habitat quality/quantity, the grantee will effectively increase utilizable patch sizes to the recommended minimum of 360 acres, thus decreasing fragmentation effects on breeding Sprague's pipits. Fiscal Year 2017: Projects not yet selected. Award Procedure:

For the Monitoring Program, an inter-agency technical review committee evaluates proposals, and, for those selected for further consideration, subsequently the full investigation plans. The committee develops a draft monitoring program from the highest priority projects, based on their technical review and available funds. The draft monitoring plan is reviewed by ten regional advisory councils and the public. An inter-agency staff committee reviews all recommendations, and provides recommendations. The Federal Subsistence Board selects projects for the Monitoring Plan taking into account all recommendations and comments. Funding of the Monitoring Plan is administered by the Office of Subsistence Management (OSM).

For the Partners Program, an internal review is conducted to evaluate proposals and make recommendations for funding. The evaluations are based on the criteria outlined in the request for federal assistance. The proposals are ranked and the OSM Assistant Regional Director selects proposals that best support the program within available funding. Once a Monitoring Program project or Partners Program position is selected for funding, a funding instrument, i.e., notice of award, between Fish and Wildlife Service and the recipient is drafted by the OSM. The award is processed by OSM through the contracting office and sent to the recipient for signature. The award is considered executed when signed copies of the agreement are received from the recipient and the contracting office has obligated funds to the agreement. The awards are administered by OSM.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Project 16-302 Salmon River of the Pitka Fork Weir. Funds under this award are utilized to operate a weir on the Salmon River of the Pitka Fork in the Kuskokwim River basin to index Chinook salmon (*Oncorhynchus tshawytsch*) escapement into the headwaters of the Kuskokwim River, upriver from McGrath. Fiscal Year 2017: Project 16-351 Middle Kuskokwim River In-season Subsistence Salmon Harvest Monitoring and Estimation. Funds under this award are to be used to provide an index of relative abundance of salmon in a stretch of the middle Kuskokwim River, and further, investigate the feasibility of estimating the in-season Chinook Salmon harvest. Fiscal Year 2018: Program has not yet selected projects for funding. Program anticipates funding projects that address identified issues and information needs, and that have a direct association to a Federal Subsistence fishery.

CRITERIA FOR SELECTING PROPOSALS:

For the Monitoring Program, each proposal is evaluated using the following five criteria: (1) Strategic Priorities: Studies must be responsive to identified issues and information needs. All projects must have a direct association to a Federal subsistence fishery, and either the subsistence fishery or fish stocks in question must occur in waters within or adjacent to Federal public lands; (2) Technical and Scientific Merit: Technical quality of the study design must meet accepted standards for information and collection, compilation, analysis, and reporting. Studies must have clear objectives, appropriate sampling design, correct analytical procedures, and specified progress and final reports; (3) Investigators Ability and Resources: Investigators and their organizations should have demonstrated technical and administrative expertise to complete prior studies, or have co-investigators or appropriate partnerships with other organizations to meet all requirements of the study; (4) Partnership-Capacity Building: Studies must include appropriate partners and contribute to building capacities of rural organizations, local communities, and residents to participate in fisheries resource management. Investigators and their organizations should be able to demonstrate the ability to maintain effective local relationships and a commitment to capacity building and cost benefits. (5) Applicants cost/price proposal will be evaluated for reasonableness. For a price to be reasonable, it must represent a price to the government that a prudent person would pay when consideration is given to prices in the market. Normally, price reasonableness is established through adequate price completion, but may also be determined through cost and price analysis techniques.

For the Partners Program, each proposal is evaluated using the following equally weighted criteria: (1) Each project must have direct linkage to Monitoring Program projects; (2) Ability to successfully implement program identified under section IV, ii. Content and Form of Application, Describe the Program; (3) Strategic priority and past performance of the Monitoring Program projects identified in the proposal; (4) Letters of support from tribal and rural organizations, government agencies, project investigators, and schools/universities; (5) Annual and total cost of the proposal, including use of in-kind or matching contributions that either decrease cost or expand support for implementing the Partners Program; (6) Past performance on implementing Monitoring Program projects; (7) Past performance on current or past agreements with the Office of Subsistence Management; (7) Previous experience in mentoring, training, and supervising personnel; and (8) Past and current accounting practices to ensure deliverables and accountability.

Each of these items carries a "Go/No-Go" impact: direct linkage of a Monitoring Program project, enrollment in CCR; affirming in writing in your application that you have enrolled in CCR; providing your DUNS Number; submission of completed SF-424, SF-424A, and SF-424B package; and submission of approved Indirect Cost Negotiation Agreement if requesting reimbursement for indirect costs.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Blackfoot Tribe (\$200,000) - Keeping Aquatic Invasive Species out of Blackfoot Waters:
The Blackfoot Tribe in northern Montana remains free of the most noxious Aquatic Invasive Species (AIS) that plague the majority of the continental U.S. Once introduced, aquatic invasive species alter the food web and habitat for native species of concern like bull trout, and have severe economic impacts to domestic water supplies, irrigated agriculture and tourism. The Tribe has launched a pilot AIS prevention program and developed the Blackfoot Aquatic Invasive Species Prevention Strategy. The TWG funds will be used to protect over 25 lakes and 175 miles of streams from the threats of aquatic invasive species through activities that include inspected boat launching, water vessel decontamination, outreach about the AIS and additional activities to raise increase awareness of AIS threats.

Telida Village Council (\$200,000) - Monitoring Moose for Metals in the Upper Kuskokwim River Region: Telida Village Council is working with the U.S. Fish and Wildlife Service to begin monitoring Upper Kuskokwim River Region moose, the main food source, for metals to determine the extent of bioaccumulation of elements in the area moose. TVC has conducted three years of water quality testing in the Upper Kuskokwim River and are concerned about the elevated levels of metals such as arsenic, cadmium, and mercury in the water supply. It is important to see if the moose, a semiaquatic forager, which is consumed by most people in the region, is healthy enough to be eaten. TVC will work with the Alaska Department of Environmental Health and the Agency for Toxic Substances and Disease Registry to compare the monitoring results for metals against applicable state and federal food safety consumption standards. Afterwards, TVC will share the Report of Findings with the Alaska Department of Fish and Game and working together examine how the metals are possibly contributing to the low moose population dynamics.

15.647 MIGRATORY BIRD CONSERVATION**FEDERAL AGENCY:**

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Fish and Wildlife Act of 1956, as amended, 16 U.S.C. 742a-754; Fish and Wildlife Coordination Act of 1958, 16 U.S.C.661-667(e); Fish and Wildlife Conservation Act, 16 U.S.C. 2901-2911; and Migratory Bird Treaty Act, 16 U.S.C. 709a.

OBJECTIVES:

To maintain and enhance populations and habitats of migratory bird species found in the Upper Midwest (IL, IN, IA, MI, MN, MO, OH, WI).

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Grants may be used for the conservation of any bird species protected by the Migratory Bird Treaty Act and occurring in U.S. Fish and Wildlife Service (USFWS) Region 3 (Upper Midwest, including IL, IN, IA, MI, MN, MO, OH, and WI). Special emphasis will be placed on Birds of Concern in the Midwest (see <http://www.fws.gov/midwest/midwestbird/concern.html>) as these species are experiencing known or suspected population declines, are recreationally important, or are causing biological or social conflicts. Implementing national, regional, and flyway bird conservation plans, including the Partners in Flight North American Landbird Conservation Plan (<http://www.partnersinflight.org>), U.S. Shorebird Conservation Plan (<http://shorebirdplan.fws.gov>), North American Waterbird Conservation Plan (<http://www.waterbirdconservation.org>), North American Waterfowl Management Plan (<http://www.fws.gov/birdhabitat/NAWMP/index.shtml>), and Mississippi Flyway bird management plans, is the USFWS's highest priority, and proposals related to the priorities identified in these plans and Bird Conservation Region and state-level bird conservation planning efforts will receive high funding consideration. The following activities are also of high interest to the USFWS: a) Population surveys, monitoring, and assessments to determine the status, trends, distribution, demography, and responses to management of bird species and groups of concern. Emphasis will be placed on landscape-level applications of standardized inventory and monitoring protocols as identified through the Midwest Coordinated Bird Monitoring Partnership (<http://midwestbirdmonitoring.ning.com>). Local-scale bird monitoring (e.g., local land management units) will generally not be a focus of this grant program, nor will support for long-term operational bird monitoring efforts. Rather, the program seeks to address coordination of monitoring efforts and development and evaluation of new survey and monitoring techniques (both field and analytical); b) Conservation of focal species for which conservation plans and/or working groups have been developed and research, monitoring, and other priorities have been identified. Examples of focal species include: Golden-winged Warbler, Cerulean Warbler, Henslows Sparrow,

Bobolink, other Midwestern grassland birds, American Woodcock, Wilsons Phalarope, Upland Sandpiper, Marbled Godwit, Common Tern, Black Tern, King Rail, and Lesser Scaup (for further information on focal species, see <http://www.fws.gov/midwest/midwestbird/concern.html>; and c) Strategic Conservation, wherein the USFWS and partners integrate biological planning, landscape design, conservation delivery, and monitoring and evaluation in a way that generates the adaptive feedback loops that enable sound decisions and constantly improve our efficiency and effectiveness in saving birds (<http://www.fws.gov/midwest/science/SHC/FAQ.htm>). Strategic conservation involves applied research, including studies of bird habitat requirements, threats, limiting factors, and population responses to habitat conservation activities; and use of Geographic Information Systems, modeling, and similar tools to identify bird habitat focus areas and further bird conservation planning efforts. 18% of funding is discretionary.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: (1) Development of a full life cycle conservation plan for Bobolink, (2) wetland management for Midwest marsh birds, (3) strengthening a network for monitoring landbird migration, (4) using geolocators to determine mercury exposure in Common Terns throughout the annual cycle. Fiscal Year 2018: Program has not yet selected projects for funding, but anticipates supporting projects that relate to coordinated bird monitoring and full life cycle focal species conservation.

CRITERIA FOR SELECTING PROPOSALS:

Proposals will be reviewed to determine how well they address the migratory bird program priorities outlined above and in a Notice of Funding Opportunity published annually on the Grants.gov website for CFDA # 15.647. All applications received will be reviewed by a team of four USFWS wildlife biologists (GS-11 grade level or higher). (Any conflict of interest identified will require that a reviewer remove themselves from the evaluation process.) Each of the reviewers will independently score each proposal on a scale of 1-10 for each of the following criteria: (1) relevance to the stated description of funding opportunity, (2) relevance to the Midwest Region's Migratory Bird priorities (e.g., focal species); (3) overall scientific merit of the proposal; (4) clarity of proposal and especially its stated objectives; (5) appropriate methodology and timeline needed to achieve objectives; (6) demonstrated history of successful completion of similar projects by applicants; (7) budget within the range of available program funds. Scores will then be summed across all criteria for all reviewers; project proposals will then be ranked and grants will be awarded in priority order subject to available funding unless all reviewers agree that a particular proposal scored so low that the risk of failure or likelihood of inappropriate product is too great to justify an award.

The program is also working to develop outreach tools that government conservation agencies can use to increase their conservation messaging to the public and other stakeholders. Fiscal Year 2017: Program funding will continue to be used to develop and expand innovative programs that seek to increase participation by minorities in fishing and boating. A major focus of the funds will be focused on components of the 60 million anglers in 60 months initiative that is attempting to increase fishing participation by 15 million anglers in 5 years. Fiscal Year 2018: Programs funds will continue to be used to implement strategies and efforts that seek to increase fishing and boating participation. Specific examples are likely to include R3 programs (recruitment, retention and reactivation) that focus on anglers and boaters.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: A single cooperative agreement was funded from this program. The recipient used program funds to expand efforts to attract minorities and other under-represented groups (e.g., women) to fishing and boating. An example of this includes the VamosAPescar program that seeks to increase participation by Hispanics into fishing and boating. In addition, the recipient continues to maintain a national web site (TakeMeFishing.org) that provides the public with a wide range of information needed for fishing and boating. The recipient is also working with state and federal conservation agencies to test pilot projects that seek to recruit, retain, and reactivate individuals into fishing and boating while instilling a conservation ethic into the public. Fiscal Year 2017: A single cooperative agreement is being funded from this program. The recipient is expected to maintain a national web site that provides information needed to go fishing and boating. The recipient is continuing innovative programs that seek to increase fishing and boating participation by minorities and other underrepresented groups, such as a partnership with the Disney Corporation. Fiscal Year 2018: The program has not yet selected projects for funding. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2016: Enhanced/Restored 7,701 wetland/upland/coastal/marine acres, and 347 river/shoreline/riparian/trail miles. Managed/Protected 415,592 wetland/upland/coastal/marine acres. Made available for recreational opportunities 46,811 acres and 377 river/shoreline/riparian/trail miles. A total of 69 restoration projects were completed. Of these 69 projects, 18 provided benefits to the recovery of T&E species, 49 provided benefits to migratory birds, 15 provided benefits to interjurisdictional fishes, and 3 provided benefits to marine mammals (some projects benefitted more than one trust resource category). Fiscal Year 2017: In FY16, there were a few restoration projects that resulted in an unusually large number of acres managed/protected or made available for recreational opportunities. Therefore, we anticipate FY accomplishments to include approximately 4,000 acres and 100 miles of habitat enhanced or restored, 150,000 acres and 200 miles of habitat managed or protected, and 29,000 acres and 200 miles made available for recreational opportunities. We based this estimate on the 4 year average for each category. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: The Santa Clara River Trustee Council, comprised of the U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife, has used funds for restoration projects targeted at improving migratory bird habitat along the Santa Clara River. One primary focus for these habitat restoration projects is to remove or control the spread of the invasive and non-native plant, the giant reed (*Arundo donax*). In FY16, the multi-year giant reed removal efforts continued by targeting two key habitat segments along the Santa Clara River, of approximately 200 acres each. Removal efforts included both mechanical and hand clearing techniques. These projects will improve habitat for the endangered least bell's vireo (*Vireo bellii pusillus*), the endangered southwestern willow flycatcher (*Empidonax traillii extimus*), and the threatened yellow-billed cuckoo (*Coccyzus americanus*).

Jasper County, Missouri is part of the larger Tri-State Mining District where decades of mining activity has left legacy contamination. One primary focus of restoration projects in the Tri-State Mining District is to restore habitat and habitat quality for the benefit of migratory birds, which were injured from the legacy mining contamination. In FY16, approximately 87 acres of poor quality uplands, which were acquired from willing sellers, were restored by mowing, burning, and spraying exotic weeds, and then the area was seeded with native tallgrass prairie species. In addition to the upland restoration, approximately 2 miles of the riparian corridor along Bens Branch, a stream that flows through the restored area, have been restored by planting native shrubs and wildflowers. Finally, approximately 230 additional acres adjacent to the recently restored areas were acquired and protected with a conservation easement; they will be restored to higher quality habitat in the near future. All of these recent and future restoration activities will create more suitable habitat for migratory birds.

In FY16, an aquatic passage restoration project was completed using funding from a Natural Resource Damage Assessment and Restoration settlement with Enbridge as a result of their 2010 pipeline oil spill along and into the Kalamazoo River in Michigan. An old culvert system running under the E. Drive crossing of Pigeon Creek, a tributary of the Kalamazoo River, consisted of a stacked five-culvert system that inhibited the passage of aquatic organisms and did not adequately accommodate seasonal floods associated with storm events. The Calhoun County Conservation District replaced the previously inadequate road-crossing structure with a single bottomless culvert with a natural cobble substrate to facilitate fish passage and use by other aquatic organisms. To further improve fish passage, an in-stream rock ramp was incorporated to dissipate the force of water flowing through the culvert. Within a week of completion, fish were observed moving through the new culvert system. This restoration project provided direct benefits to 6.36 miles of stream, including 9.3 acres of benthic habitat, and provided fish passage through 80.7 miles of stream. Fiscal Year 2017: FY17 and FY18: We have not selected projects for funding. Project selection occurs on a local or regional basis and can occur throughout the FY. We anticipate funding projects to restore trust species and their habitats to compensate for injuries from hazardous substance releases and oil discharges. Fiscal Year 2018: We have not selected projects for funding. Project selection occurs on a local or regional basis and can occur throughout the FY. We anticipate funding projects to restore trust species and their habitats to compensate for injuries from hazardous substance releases and oil discharges.

CRITERIA FOR SELECTING PROPOSALS:

Specific criteria for individual proposals are set by the local and Regional office that is advertising the project opportunity. Criteria are based on the Natural Resource Damage Assessment and Restoration case-specific needs.

OBJECTIVES:

The U.S. Fish and Wildlife Service (USFWS) uses a science-based, adaptive framework for setting and achieving broad-scale conservation objectives that strategically address the problems fish and wildlife will face in the future. This framework, called Strategic Habitat Conservation, is based on the principles of adaptive management and uses population and habitat data, ecological models, and focused monitoring and assessment efforts to develop and implement strategies that result in measurable fish and wildlife population outcomes. This process uses the best available scientific information to predict how fish and wildlife populations will respond to changes in the environment, thus enabling the USFWS to focus habitat conservation and other management activities where they will be most effective. In addition, the USFWS needs focused, applied science directed at high impact questions surrounding threats to fish and wildlife resources for which management and/or mitigation is required to maintain species at healthy, sustainable, desired levels. USFWS must base its decisions on the best science available, in order to defend its regulatory decisions, biological opinions and species conservation recommendations to land managers.

TYPES OF ASSISTANCE:

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Program funded projects that 1) help build and maintain public support for management of the Yukon River salmon through outreach events, weekly teleconferences, and public meetings; 2) deal with monitoring salmon returns in rivers; and 3) improve fish passage. Fiscal Year 2017: Program anticipates funding projects that 1) help build and maintain public support for management of the Yukon River salmon through outreach events, weekly teleconferences, and public meetings; 2) determine the abundance and

run timing assessment of salmon; 3) identify in-season genetic stocks of salmon. Fiscal Year 2018: Program has yet to identify specific project needs, but anticipates directing significant funding towards projects that increase/improve the understanding of in-season subsistence harvest of Yukon River salmon species.

CRITERIA FOR SELECTING PROPOSALS:

Review criteria are based on the applications requirements as posted in the call for proposals. Selections for funding are principally based on the merit of the project and how well the project addresses one or more of the priorities and factors identified in the call for proposals. Proponents success in previous projects and their ability to successfully and efficiently execute the new project is also taken into consideration. Finally, timeliness in the submission process is also used as a criterion for approval.

15.672 WILDLIFE WITHOUT BORDERS AMPHIBIANS IN DECLINE FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to provide funding for specific conservation actions that have a high likelihood of creating durable benefits to amphibian species facing immediate threat of extinction, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The program will fund projects that conserve the worlds rapidly declining amphibian species. Species eligible for funding are those frogs, toads, salamanders, newts, and caecilians that face a very high risk of extinction in the immediate future. Species should meet the criteria to be listed as Critically Endangered or Endangered on the International Union for the Conservation of Nature (IUCN) Red List. Species listed as Data Deficient on the IUCN Red List are also eligible if the applicant can provide information that suggests a similar urgency for conservation action. Species listed as Extinct in Wild are eligible if the applicant is proposing a reintroduction attempt. The following species are NOT eligible for funding: Species with natural habitat range located primarily within the United States, territories of the United States, Canada, and the high income economies of Europe; and Non-amphibian species.

Applied research projects should address specific management needs and actions. Funds provided under this program will not be used for: the purchase of firearms or ammunitions; buying of intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. Funds may not be used to provide material support or resources to individuals, entities, or organizations of countries that have been identified by the U.S. Department of State as state sponsors of terrorism. This program is administered in compliance with the Federal Grants and Cooperative Agreements Act of 1977, as amended. These funds may not be used towards training U.S. Federal Government personnel. Project work should occur in countries outside of the United States that have within their boundaries amphibian habitats and be conducted by any person or group with the demonstrated expertise required for the successful implementation of the proposed project. 100%.

Applicant Eligibility:

Applications may be submitted by any non-domestic (outside of the United

States) government agency responsible for amphibian conservation and any other U.S.-based or non-domestic public or private organization or institution or individual with demonstrated experience in amphibian conservation.

Beneficiary Eligibility:

Non-domestic (outside of the United States) government agencies responsible for amphibian conservation and any other U.S.-based or non-domestic public or private non-governmental organization or institution or individual with demonstrated experience in amphibian conservation.

Credentials/Documentation:

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: No new awards were issued in FY16. USFWS is no longer accepting proposals for this program. Fiscal Year 2017: N/A. Fiscal Year 2018: N/A.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested proposal elements. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:
Demonstrates the high degree of threat or extinction risk that the target species experiences;

Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate what quality makes the species exceptional, but examples would include a species that strongly influences the ecological community in which it occurs, a species that is genetically distinct with few close relatives, a species that exhibits a distinctly unusual behavior, or a species whose conservation would catalyze the conservation of multiple species);

Occurs in a region or conserves a taxon poorly represented in the Amphibians in Decline portfolio;

Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;

Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;

Applies the best scientific and technical information and methods available in support of project activities;

Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;

Is feasible and likely to be successfully implemented as stated;

Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;

Emphasizes conservation action rather than data collection; and

Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

The above considerations are not listed in any order of importance. All considerations listed do not necessarily apply to every proposal. Following review, applicants may be asked to revise the project scope and/or budget before a final funding decision can be made.

**15.673 WILDLIFE WITHOUT BORDERS CRITICALLY
ENDANGERED ANIMAL CONSERVATION FUND**

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

The goal of this grants program is to reduce threats to highly endangered wildlife in their natural habitat. Proposals should identify specific conservation actions that have a high likelihood of creating durable benefits, such as: Protection of at-risk populations; Veterinary/wildlife health interventions; Activities related to execution of species survival plans; Strengthening local capacity to conserve the target species; Actions addressing unsustainable exploitation; Efforts to mitigate or stop wildlife-human conflict; and Rehabilitation and rescue.

Project activities that emphasize data collection and status assessment should describe a direct link to management action, and explain how lack of information has been a key limiting factor for management action in the past. Proposals that do not identify how actions will reduce threats, or do not demonstrate a strong link between data collection and management action, have a lower likelihood of being selected. Proposed project work should occur within the species range, or, if work is to be conducted outside of the range, the proposal should show a clear relevance to its conservation.

TYPES OF ASSISTANCE:

Fiscal Year 2016: No new awards were issued in FY16. USFWS is no longer accepting proposals for this program. Fiscal Year 2017: N/A. Fiscal Year 2018: N/A.

CRITERIA FOR SELECTING PROPOSALS:

To be considered for funding, proposals must specify a conservation action for an eligible species, listed above in the Description of Funding Opportunity. The Division of International Conservation ranks proposals by scoring how well each addresses the program priority areas and the requested elements listed in the Application and Format section above. High priority, well-justified and feasible projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. Other review criteria include considering the degree to which a project:

- Demonstrates the qualification of the target species as experiencing a high degree of threat or extinction risk; Addresses a conservation need of a species that is exceptional ecologically, evolutionarily, or in conservation (Note that it is the responsibility of the applicant to articulate the exceptional quality of the species, but examples would include a species that strongly influences the ecological community in which it occurs, that is genetically distinct with few close relatives, that exhibits a distinctly unusual behavior, or whose conservation would catalyze the conservation of multiple species);
- Occurs in a region or conserves a taxon poorly represented in the CEACF portfolio;
- Makes a significant and durable contribution to the survival of the species, or to the integrity of its habitat or an area with significant conservation value for the species;
- Addresses a conservation need identified by a specialist group or by a regional, national or global strategy;
- Applies the best scientific and technical information and methods available in support of project activities;
- Includes the participation of local partners in project activities, including meaningful involvement of government, community or civil society stakeholders;
- Is feasible and likely to be successfully implemented as stated;
- Advances the practice of conservation by being designed and implemented in a way that the successes and failures of activities can be credibly assessed and shared;
- Emphasizes conservation action rather than data collection; and
- Implements activities or provides benefits that have the potential to be sustaining beyond the period of performance of the grant, including training that develops local capacity to implement or manage conservation projects.

These considerations are not listed in order of importance. All considerations listed do not necessarily apply to every proposal. The Division of International Conservation occasionally receives and funds proposals outside of the announced submission deadlines that are of such a critical nature (examples include projects resulting from a natural disaster, disease outbreak, other imminent threats or population crash, among others) that they warrant immediate consideration.

15.679 COMBATING WILDLIFE TRAFFICKING

FEDERAL AGENCY:

Fish and Wildlife Service, Department of the Interior

AUTHORIZATION:

National Strategy for Combating Wildlife Trafficking; Executive Order 13648; July 5, 2013; Implementation Plan of the National Strategy for Combating Wildlife Trafficking; February 11, 2014; Endangered Species Act of 1973, as amended (16 U.S.C. 1531-43).

OBJECTIVES:

On February 11, 2014, President Obama issued the National Strategy for Combating Wildlife Trafficking. Incorporating recommendations from the Advisory Council on Wildlife Trafficking, the Implementation Plan was released on February 11, 2015 to guide and direct the efforts of Federal agencies in executing the Strategy. The Presidents plan establishes three priorities:

- 1.) Strengthen Global Enforcement (both domestic and global),
- 2.) Reduce Demand for Illegally Traded Wildlife, and
- 3.) Expand International Cooperation and Commitment.

The Plan establishes 24 Implementation Plan Objectives for which the U.S. Fish and Wildlife Service (USFWS) is identified as a lead or participating agency.

Financial assistance will be provided for innovative projects that advance counter wildlife trafficking activities (wildlife defined to include terrestrial and aquatic species and timber) as outlined in the Next Steps of the National Strategy Implementation Plan.

Priority will be given to innovative projects that address one or more of the Implementation Plan Objectives and Next Steps detailed at: <https://obamawhitehouse.archives.gov/the-press-office/2014/02/11/fact-sheet-national-strategy-combating-wildlife-trafficking-commercial-b>.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Wildlife trafficking threatens a staggering array of terrestrial, freshwater, and marine species, including: elephants, rhinos, tigers, sharks, tuna, sea turtles, land tortoises, great apes, exotic birds, pangolins, sturgeon, coral, iguanas, chameleons, and tarantulas. Wildlife trafficking also includes trafficking of fisheries products and related threats to food supplies and food security. It is also well-established that wildlife trafficking is facilitated and exacerbated by illegal harvest of and trade in plants and trees, which destroys needed habitat and opens access to previously remote populations of highly endangered wildlife, such as tigers.

Projects submitted for funding under this program must address the above cited species, both terrestrial and marine, and take a multifaceted approach in dealing with the problem of illegal wildlife trafficking as outlined in the Implementation Plans Objectives. Funds provided under this program will not be used for: the purchase of firearms or ammunitions; buying of Intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur. Funds may not be used to provide material support or resources to individuals, entities, or organizations of countries that have been identified by the U.S. Department of State as state sponsors of terrorism. These funds may not be used towards training U.S. Federal Government personnel. Program will fund projects that link directly to the National Strategy for Combating Wildlife Trafficking: Implementation Plan.

(<https://www.whitehouse.gov/sites/default/files/docs/nationalstrategywildlifetrafficking.pdf>). 100% of funding is discretionary.

How the proposed activities build upon or differ from past efforts.

J.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Funding was used for projects that contributed to management and recovery of the Mexican Wolf. Fiscal Year 2017: Should funding become available, the U.S. Fish and Wildlife Service (Service) intends to fund projects that contribute to the management and recovery of the Mexican Wolf species in the United States. CRITERIA FOR SELECTING PROPOSALS:

This opportunity is limited to projects that further the recovery of the Mexican Wolf, which may be described in the Mexican Wolf approved recovery plan, in the implementation schedule of the recovery plan, actions recommended in a completed 5-year status review of the Mexican wolf or Mexican Wolf management plan. Each proposal is evaluated using the following criteria: (1) Strategic Priorities: proposals must be responsive to identified issues and information needs. All projects must have a direct association with the recovery of the Mexican wolf (2) Technical and Scientific Merit: Technical quality of the

proposal must meet accepted standards for information and collection, compilation, analysis, and reporting. Proposals must have clear objectives and specified progress and final reports; (3) Organizations should have demonstrated technical and administrative expertise to complete the proposed recovery activity, and (4) Applicants cost/price proposal will be evaluated for reasonableness. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. The program will post an annual Notice of Participation Opportunity on Grants.gov. The annual notice will provide a link to the NWRS website where individual cooperative agricultural opportunities will be posted as they become available (<https://www.fws.gov/refuges/>). Individual cooperative agriculture opportunities will also be advertised through other national, regional, and local outreach channels as determined by the Service to be appropriate. The notice for each new opportunity will include a general description of the opportunity, the objective criteria the Service will use to evaluate applicants, the application due date, and application instructions.

Individual cooperative agriculture agreements are typically approved for a 3-5 year period. Once that period ends, the Service will determine if those same cooperative agriculture activities should continue. If the Service will continue those same cooperative agriculture activities, a new individual cooperative agriculture opportunity will be posted on the NWRS website and made available for eligible entities to apply.

In general and at a minimum, applicants must provide completed FWS Form 3-1383-C (<https://www.fws.gov/forms/3-1383-C.pdf>) to apply for a cooperative agricultural opportunity. The Service will accept applications at the local refuge or complex office listed in the Notice in compliance with the terms and conditions in the Notice.

Award Procedure:

The Service will score each application based on the objective criteria outlined in the NOFO, specific opportunity requirements, and factors that make a potential recipient uniquely qualified. The Service will select the applicant best suited to conduct cooperative agriculture on NWRS lands. The Service will notify all applicants individually within 90 days after the closing of the opportunity notice. Unsuccessful applicants will be notified in writing describing why they were unsuccessful and of their right to appeal any adverse decision in accordance with 50 CFR 25.45.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: During the project period, several state geological surveys proposed to scan and make digitally available historic photographs obtained during geological field work, including mineral, oil and gas resource, and geologic hazard investigations. The photographs capture outcrops, geological landscapes and structures, rock formations, pastoral scenes, and mine sites many of which have been modified by vegetation overgrowth, urbanization, and landscape processes. These photographs provide historic information that may otherwise be unavailable for a variety of purposes, such as geologic investigations, planning and development, environmental compliance, hazard mitigation, and cultural and archeological research.

Several state geological surveys proposed to catalog, digitize, and provide access to exploration and mining-related documents and ancillary artifacts, including geochemical data, reports, field notebooks, physical samples, and maps. These readily-available mining materials and associated data provide insightful information for research, educational, and historical pursuits; save users millions of dollars in recollection costs; and help generate new exploration projects, which benefit the economy and resource development. The historic mining collections are used by a variety of users, including geologists, miners, academics, governmental agencies, archeologists, historians, environmental consultants, legal community, and general public for a variety of purposes. Historic mining information helps to identify hazards and informs mitigation strategies for abandoned mine sites. U.S. Department of Interior, Office of Surface Mining Reclamation and Enforcement and state reclamation agencies frequently use historic mining information to investigate the location, depth, and extent of mines to plan land reclamation or re-development efforts. In Tennessee, historical field notebooks provided the only source of information for identifying unknown and abandoned underground mines, which have caused sinkholes in urbanized areas. Missouri efforts to preserve geologists field notebooks have yielded information for identifying areas contaminated with heavy metals resulting from mining activities.

Many states planned to preserve, photograph, and create metadata for rock core and cuttings collections obtained during oil and gas exploration and development. The photographs and associated information will be posted on the Internet to enhance access and use of these collections. Users will be able to view photographed characteristics of the specimens without having to travel to the core facilities to physically view samples. The readily available information will provide the opportunity for researchers to learn about the existence of the samples, inform studies of the subsurface, and may direct further exploration activities, such as determining locations of future drilling operations for resource development.

The preserved data, collections, and artifacts are described in the National Digital Catalog (<https://www.sciencebase.gov/catalog/item/4f4e4760e4b07f02db47dfb4>) and information about the Program is available at datapreservation.usgs.gov. Fiscal Year 2017: Information not available, because successful projects have not yet been selected. Fiscal Year 2018: No current data available.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2016: This program focuses on satellite remote sensing data and technologies in support of applied research, K-18 education, workforce development and technology transfer. Federal funds are leveraged to work together with other State organizations, Federal agencies and across States (StateViews). Continued educational and technical working groups to increase efficiencies. Continued work to develop remote sensing curricula that can be shared with and tailored to each participating educational institution (as well as workforce training). Select States worked to create a shareable archive of various remote sensing data that all State, local and non-governmental organizations can access.

Increased education and training in Earth Sciences (K-18). Conducted critical applied research real-time applications relevant to each State, sometimes expanding to and of benefit to regions of the U.S. Provided feedback to the U.S. Geological Survey to better understand State and local needs and user requirements. Additionally, the grant recipient continues to explore a distributed cloud-based network utilizing key educational institutions throughout the U.S. to aid in the more efficient distribution of large data sets such as Landsat. Fiscal Year 2017: Several FY16 activities will continue, along with a focus on regional and topical working groups to address various needs and issues at the regional, state and local levels. Work will continue on data access, educational efforts integrating remote sensing into more K-18 curricula and determining local communities remote sensing requirements to address timely issues such as water quantity and quality, hazard mitigation, and

resource management. Projects will continue in this final grant period estimated to be a 6-month period of performance. Fiscal Year 2018: Anticipate receiving 10 applications and issuing 1 award.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Various projects were initiated in FY 2016 across eight (8) DOI CSCs focusing on Climate Change initiatives such as: Effects of temperature and precipitation on the Colorado River Water Resources to study climate projections for the Southwest drought related to reductions in streamflow caused by decreases of winter precipitation resulting in forecasts of reduced streamflow of the Colorado River. Managing for Drought in the Red River Valley identified more severe flooding and more severe droughts in the Western Red River basin. The scientific results have provided models for the Chickasaw Nation to use in their drought contingency planning efforts related to the Red River Valley. Warmer waters impacting sport fishing in Wisconsin found that temperatures in the lakes and streams are changing habitat conditions

fish species. Other examples include: climate change monitoring, terrestrial aquatic monitoring, actionable science for decision analysis and science communication, conservation management decisions related to sea-level rise, forest vulnerability to climate change, climate variability drought tolerance and fire response, modeling effects of environmental change on crucial wildlife habitat, ecological and management implications of climate change induced shifts in phenology of coastal fish and wildlife species in the Northeast, assessing the impacts of drought on migratory waterbirds in the Western U.S., impacts of drought on southwestern cutthroat trout, changes in the Pacific coastal temperate rainforest of Alaska. Projects in FY 2016 were selected based on CSC Science Plans and directed science initiatives. Projects were both internally funded (USGS and other Federal Agencies) and externally funded (via Cooperative Agreements or Grants). Fiscal Year 2017: Information not available. Fiscal Year 2018: Information not yet available.

CRITERIA FOR SELECTING PROPOSALS:

Application proposals will be reviewed by the appropriate geographical DOI CSC Center Director and/or the headquarters NCCWSC Director to ensure projects fall within the authorized program purpose. Criteria for judging applications will include scientific excellence and relevance to the solution of important problems within the mission of the Department of the Interior. Applications will be funded only to the extent permitted by available funds.

At the same time, the applicant is requested to observe certain simple preservation precepts with regard to the property. Should subsequent occurrences alter the historic qualities of the property, landmark status may be revoked and the plaque removed. Automatic listing of National Historic Landmark properties in the National Register of Historic Places affords a degree of Federal protection under Section 106 of the Historic Preservation Act of 1966, and fulfills one of the prerequisites for Federal assistance under the National Register grants-in-aid program (see 15.904). Certain landmarks are also made eligible for Federal tax benefits and protections and technical preservation assessment and assistance.

Applicant Eligibility:

Property owners and general public.

Beneficiary Eligibility:

Anyone may suggest that a property be considered for inclusion in an appropriate National Historic Landmark theme study, provided the property has a high degree of historic integrity and potential national significance with relation to some broad facet of American history. The owner of the property may be an individual, government, or corporate body. Properties of only State or local significance do not qualify.

If the property is already listed in the National Register, provide a brief resume of the historical facts that justify consideration of national significance. Properties nominated to, or already listed in, the National Register of Historic Places at a national level of significance by the State Historic Preservation Officer may be reviewed by the National Historic Landmarks Survey staff

Award Procedure:

When the property has been investigated, findings, in the form of a thorough NHL nomination form, are presented to the National Park System Advisory Board which evaluates the property's national significance and high integrity and recommends a final action to the Secretary of the Interior. Owners of proposed landmarks are contacted prior to a landmark study, given an opportunity to comment on a final study, and then notified after designation of the landmark.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Determined by scheduling of theme studies, availability of staff or funds, and proximity to twice yearly Advisory Board meetings.

OBJECTIVES:

To expand and maintain the National Register of Historic Places for planning, preservation, research, public education and tourism efforts; to make the information on districts, sites, buildings, structures and objects of historical, architectural, archeological, engineering and cultural significance more accessible to the public in order to increase and broaden the public's understanding of the information, foster a national preservation ethic, and to promote greater appreciation of America's heritage; to coordinate with Federal agencies, State and Tribal preservation offices, and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; and to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218).

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING

USES AND USE RESTRICTIONS:

Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.904), when funding is available, to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major Federal tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" and for charitable contributions for conservation purposes of partial interests in historic properties.

Applicant Eligibility:

Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix IV of the Catalog); or the Tribal Preservation Officers; Federal agencies required to nominate and consider historic properties within their jurisdiction or as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, and the National Historic Preservation Act operating under programs administered by representatives (listed in Appendix IV of the Catalog) appointed by the heads of the agencies; and, in States without approved State Historic Preservation Programs, persons and local governments. Applicants eligible for Federal Tax benefits include owners of individually listed properties and properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Beneficiary Eligibility:

Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Credentials/Documentation:

The remaining funds will comprise Group 2, and will be awarded to the remaining eight States, the District of Columbia, and any Federally-recognized Indian Tribes located in those States, through an application process and based on need as described in proposals submitted by the States and Tribes to the NPS. In apportioning the \$38 million from Group 1 that will be assigned to CT, NJ, NY, and RI, because State Historic Preservation Offices (SHPO) in those States have not yet completed damage assessments to historic properties, there is no single best method of determining need. Funds will be distributed using a formula that takes into account three evaluation factors, each having equal weight: 1) population of counties eligible for both IA and PA, 2) land area of counties eligible for both IA and PA, and 3) the number of properties listed in the National Register of Historic Places in counties eligible for both IA and PA.

The income tax deduction for the donation of conservation easements applies to income-producing and non-income producing buildings. The NPS does not award tax credits or deductions, but only certifies to the Internal Revenue Service whether buildings qualify as certified historic structures and whether rehabilitations undertaken qualify as certified rehabilitations (and therefore may be eligible to claim the 20% rehabilitation tax credit). Other Internal Revenue Code requirements apply.

15.981 WATER USE AND DATA RESEARCH**FEDERAL AGENCY:**

U.S. Geological Survey, Department of the Interior

AUTHORIZATION:

Public Law 111-11, Subtitle F Secure Water: Section 9508 Water Availability and Use Assessment Program.

OBJECTIVES:

To support State water resource agencies in developing water use and availability datasets that are integrated with each appropriate dataset developed or maintained by the USGS or that integrate any water use or water availability dataset of the State water resource agency into each appropriate dataset developed or maintained by the USGS. The Water Use Data and Research program will allow State Water Resource agencies to improve the collection and reporting frequency of water use categories, including the inclusion of categories that have been discontinued in the past due to limited resources. Data collection, and improvement efforts, as well as research conducted will complement priorities and investigations carried by Federal, State, and Local Governments, and by private industry in water availability assessments for human and ecological uses.

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

Funding will be used to support State Water Resource agencies in improving data collection techniques and methods, data delivery and management, and data integration with each appropriate dataset developed or maintained by the USGS. Funding for each State cannot exceed \$250,000 cumulatively over the length of the program.

Applicant Eligibility:

Proposals will be accepted from state agencies that collect and maintain water use data and databases. Various elements of the data that are required for the Water Use Data and Research (WUDR) program are often available from different agencies within a state; however only one agency is eligible to submit a proposal for the program. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2016: Example 1: The project will survey water users in Soil and Water Conservation Districts to collect information on irrigated crop acreage, water sources, and irrigation practices. The data will be used as input for a soil water balance and crop demand model to estimate irrigation use per acre for major crop types.

Example 2: The project will develop a new computer program/application that will collect, store, and deliver water-use data. The program will combine several existing systems, and include new quality-assurance checks on water-use data, providing public water supply customer group data, quantifying consumptive use, and reporting data by HUC-8 and county levels. In addition, water use forms will be updated and new water use reporting application will be phased in for all allocated water users.

Example 3: The project will include compilation and estimation of water use-data from 2011 to 2015 for the following categories: public supply, industrial, mining, commercial, self-supplied domestic, hydroelectric power, aquaculture, irrigation-crop, livestock, thermoelectric, irrigation-golf courses, and wastewater treatment. Quality-assurance procedures for analyzing water-use data will be implemented and documented. Additionally, delivery/transfer of data from the state agency to the USGS will be improved. Fiscal Year 2017: Program has not yet selected projects for funding. Program anticipates funding projects that improve the availability, quality, compatibility, and delivery of water-use data that are collected and/or estimated by States. Fiscal Year 2018: Program has not yet selected projects for funding. Program anticipates funding projects that improve the availability, quality, compatibility, and delivery of water use data that are collected and/or estimated by States.

16.015 MISSING ALZHEIMER'S DISEASE PATIENT ASSISTANCE PROGRAM

Alzheimer's Initiatives

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Violent Crime Control in Law Enforcement Act of 1994., 42 U.S.C 14181.

OBJECTIVES:

This program provides funds for projects that aid in the protection and location of missing persons living with Alzheimers disease and related dementias and other missing elderly individuals. It is currently estimated that more than 5 million people in the United States alone are living with Alzheimers disease or some form of dementia. Over 60 percent (nearly 3.1 million individuals) of those with dementia are at risk of wandering at some point. More than 50 percent of those who wander become lost and separated from their loved ones or caregivers. Law enforcement agencies often expend resources searching for missing persons with Alzheimers disease, and if not found quickly, they are at high risk of serious injury or even death. In addition, law enforcement officers may not be trained or equipped to handle the special needs of those with Alzheimers, once they are found.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Applications are solicited for projects, pursuant to Congressional appropriations, that may include one or more of the following: (1) Develop or enhance local and national outreach programs to increase awareness among law enforcement agencies and the public in addressing the needs of missing persons with Alzheimers disease; (2) Develop and/or implement a process for aiding in the location of lost persons with Alzheimers disease; and/or (3) Provide training and substantive informational material to law enforcement agencies through a national or regional initiative. All funds must be focused solely on initiatives to benefit those with Alzheimers disease or other forms of dementia.

Applicant Eligibility:

None.

Violence Against Women Office, Department of Justice

AUTHORIZATION:

Violence Against Women Act, as amended, Public Law 109-162, 42 U.S.C 13925(b)(7).

OBJECTIVES:

The purpose of the Research and Evaluation (R&E) Program is to further develop and make maximum use of the evidence base for approaches to combatting domestic violence, sexual assault, dating violence, and stalking. By generating more knowledge about strategies for serving victims and holding offenders accountable, communities that benefit from VAWA funding will be better equipped to align their work with practices that are known to be effective, and they will be more capable of generating empirical knowledge on the efficacy of new and promising ways of doing things. Because OVW has very limited funds to support research and evaluation, this program prioritizes topics for which a stronger evidence base would help OVW grantees use federal funds most effectively.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

OVW is interested in funding research and evaluation to generate knowledge in the six areas of study listed below:

1. Victims needs. How victimization and its aftermath affect peoples lives, especially people who are marginalized; and what they need to cope, heal, and achieve safety and justice
2. Cultures, disparities, and access. Ways that cultural differences and social inequalities matter in terms of where and to whom people go for help, and whether people are able to access justice and get services that are useful to them
3. Justice. Ways the justice system can effectively pursue and achieve justice in cases involving domestic/dating violence, sexual assault, and stalking; with justice broadly understood to include autonomy for victims, accountability for offenders, procedural fairness for all, and restorative justice
4. Impact. Short- and long-term impact of the justice systems response, victim services, and other VAWA-funded interventions on victim safety and offender accountability
5. Indicators of success. What success looks like and how to measure itfor people who work with victims and offenders, for victims pursuing safety and justice, and for offenders being accountable for their violence
6. Prevention. How to prevent violence from happening.

Applicant Eligibility:

Eligible applicants are limited to: States (including territories), units of local government, federally recognized Indian tribal governments as determined by the Secretary of the Interior, nonprofit organizations (including tribal nonprofit organizations), institutions of higher education (including tribal institutions of higher education).

AUTHORIZATION:

The Juvenile Justice and Delinquency Prevention Act, Part E, 42 U.S.C. 5665-66, and an act appropriating funds for the Department of Justice.

OBJECTIVES:

The Community-Based Violence Prevention (CBVP) Program helps states and localities support a coordinated and multidisciplinary approach to community youth gun and gang violence through prevention, intervention, suppression, and reentry in targeted communities. The CBVP Program is designed to support and enhance the coordination of existing community-based violence prevention and intervention programs and strategies approaches that are attempting to

replicate models and strategies which that have been proven to have a positive impact on the reduction of violence in target communities. Toward achievement of the ultimate goal of eliminating community violence, the Community-Based Violence Prevention Program the CBVP Program has three main goals objectives: to change community norms regarding violence; to provide alternatives to violence when gangs and individuals in the community are making risky behavior decisions; and, to increase awareness of the perceived risks and costs of involvement in violence among high-risk young people. The CBVP Program supports effective use of focused deterrence (enforcement) strategies and public health and education approaches to stop violence. This Program will work with community-based organizations to develop and implement strategies to reduce and prevent violence, particularly shootings and killings. This will be accomplished by relying on supporting communities to establish and strengthen partnerships between law enforcement and outreach workers, clergy, and other community leaders and family members in efforts to deter young people from committing violence, particularly shootings and killings. To intervene in conflicts or potential conflicts and promote alternatives to violence. The Community-Based Violence Prevention Program will also involve law enforcement in its efforts and depends heavily on a strong public education campaign to instill in people the message that shootings and violence are not acceptable. Finally, the model CBVP Program also calls for the strengthening of communities so they have the capacity to exercise informal social controls and to respond to issues that affect them, including community violence. 16.309 LAW ENFORCEMENT ASSISTANCE NATIONAL INSTANT CRIMINAL BACKGROUND CHECK SYSTEM

(NICS)

FEDERAL AGENCY:

Federal Bureau of Investigation, Department of Justice

AUTHORIZATION:

none.

OBJECTIVES:

To provide a system so that any Federal Firearm Licensee (FFL) could receive an immediate determination by telephone or by other electronic means, on whether receipt of a firearm and/or explosive by a prospective buyer would violate Federal or State laws.

TYPES OF ASSISTANCE:

PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

The NICS Operations Center conducts NICS background checks by analyzing and evaluating criminal history records to determine whether the transfer of a firearm to an individual may violate State or Federal law. The staff at the Operations Center provides technical and operational support to users, provides customer service to FFLs and State Point of Contacts (POCs), processes appeals of denied transactions, and prepares management and statistical reports on the operation of the NICS.

Applicant Eligibility:

All persons purchasing firearms.

Beneficiary Eligibility:

The Federal Firearm Licensees and American public.

Credentials/Documentation:

Initial request for services must be from a licensed and enrolled FFL. For checks performed by the FBI, FFLs may contact the NICS Section by telephone via a toll-free number or, electronically by the NICS E-Check via the Internet. The FFLs will provide the required descriptive information requested on the Bureau of Alcohol, Tobacco, Firearms and Explosives Form 4473 and each background check is assigned a unique NICS Transaction Number. If a NICS background check results in no matching records, the transfer will be a proceed.

If one or more matching records are found, a NICS Legal Instruments Examiner (Examiner) will review the record(s) to determine if the subject of the record may be identical with the prospective purchaser and to determine if the record contains state and/or federal firearm prohibitive criteria which may prohibit the transfer of the firearm. If it is determined that prohibitive criteria exists, the NICS Examiner will advise the FFL to deny the firearm transaction. If potentially prohibitive criteria exists and more information is required in order to make the determination, the NICS Examiner will advise the FFL to delay the firearm transaction. When a transaction is delayed, the NICS Examiner begins extensive research on the potential prohibitor. The NICS Examiner will contact local, state, and federal law enforcement agencies and courts to resolve questions about an individual who appears to be prohibited from purchasing or possessing a firearm, as well as to request clarification regarding information in a prior record or disposition. When the research is complete, the NICS Examiner calls the FFL and gives a decision on the firearm transaction. Individuals who are denied the purchase of a firearm will be advised by the FFL of the process for appealing the denial decision if he/she believes it is incorrect. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Funding under this program is intended to assist victims of severe forms of human trafficking as defined by the Trafficking Victims Protection Act (TVPA). This includes male and female victims of sex and labor trafficking. The Office for Victims of Crime (OVC) awarded its first cooperative agreements to victim service organizations in FY03 to provide a comprehensive array of direct services to trafficking victims.

OVC funds victim service agencies to provide high-quality services to victims of all forms of human trafficking as defined by the Trafficking Victims Protection Act of 2000 and to enhance interagency collaborative and coordination in the provision of services to such victims. OVC makes annual grant funding available for direct comprehensive and specialized services tailored to the needs of human trafficking victims. These services include intensive case management, food, clothing, shelter, medical and dental care, mental health treatment, translation and interpretation services, legal assistance, and more. This OVC funding also supports victim service providers in increasing the capacity of their communities to respond to victims through the development of interagency partnerships and public outreach and awareness efforts.

This funding is also made available to state and local law enforcement agencies and victim services organizations in support of multidisciplinary, victim-centered task forces dedicated to investigating trafficking crimes and providing comprehensive services to victims. Administered jointly by OJP's Bureau of Justice Assistance (BJA) and OVC, the Enhanced Collaborative Model to Combat Human Trafficking Program jointly funds law enforcement and service providers to work together to collaboratively respond to human trafficking as a task force. 16.321 ANTITERRORISM EMERGENCY RESERVE

FEDERAL AGENCY:

Office for Victims of Crime, Department of Justice

AUTHORIZATION:

42 U.S.C. 10601(d)(5), 42 U.S.C. 10603b(b), 42 U.S.C. 10603c.

OBJECTIVES:

Encompasses two programs for victims of terrorism and/or mass violence: (1) Antiterrorism and Emergency Assistance Program (AEAP) and (2) The International Terrorism Victim Expense Reimbursement Program (ITVERP). The AEAP provides assistance and compensation services for victims of domestic terrorism and intentional mass criminal violence and assistance for victims of international terrorism. ITVERP provides reimbursement for victims of acts of international terrorism that occur outside the United States for expenses associated with that victimization.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

AEAP funds are available specifically for services to victims of terrorism and/or intentional mass criminal violence. Funded activities may include compensation, emergency relief, including crisis response efforts, assistance, and ongoing assistance, including during any investigation or prosecution to victims of terrorist acts or mass violence occurring within and outside the United States. Nonmonetary assistance is available for training and technical assistance. ITVERP provides direct reimbursement for out-of-pocket expenses to victims of international terrorism. Claimants may seek reimbursement for expenses incurred for medical, mental health, funeral and burial, property loss, and other miscellaneous costs (including emergency travel, temporary lodging, and telephone costs).

Applicant Eligibility:

AEAP: Criteria will vary depending on the grant. For terrorism or mass violence occurring within or outside the U.S., eligible applicants for funding under VOCA, Title II, 42 U.S.C. 10603b, 1404B, include states, victim service organizations, and public agencies (including federal, State and local governments) and non-governmental organizations that provide assistance to victims of crime. With the exception of ITVERP, OVC does not provide funding directly to individual crime victims. ITVERP: For an applicant to be eligible to receive reimbursement under ITVERP as authorized under VOCA, Title II, 42 U.S.C. 10603c, 1404C, an individual must be a national of the United States or an officer or employee of the U.S. Government, as of the date

on which the act of terrorism occurred. In addition, the individual must have suffered direct physical or emotional injury or death as a result of an act of international terrorism occurring on or after October 23, 1983, with respect to which an investigation or prosecution was ongoing after April 24, 1996.

Beneficiary Eligibility:

AEAP: Public and private nonprofit victim assistance agencies; victims of domestic and international terrorism. Eligibility depends on the nature of the grant. ITVERP: The law requires that the individual victim must have suffered direct physical or emotional injury or death as a result of an act of international terrorism occurring on or after October 23, 1983, with respect to which an investigation or prosecution was ongoing or was commenced after April 24, 1996. In the case of a victim who is a minor, incompetent, incapacitated, or is killed, a family member or legally designated representative of the victim may receive expense reimbursement on behalf of the victim. In addition to the victim, claimants may include the following: Spouse of the victim, Parents of the victim, Children of the victim, Siblings of the victim, Legally designated victim representative.

Credentials/Documentation:

All potential applicants shall submit a written proposal along with a budget and budget narrative to the OVC Director for consideration. Proposals submitted by State crime victim compensation program administrators should include the following: (1) a description of the qualifying crime; (2) the projected number of claims to be paid and the projected number of claimants to receive payments; (3) the state's maximum award amount by category, such as medical, mental health, lost wages, funeral, etc.; and (4) a description of the range of expenses covered by the program and the amount of state funding available to cover victim claims. Proposals submitted by State crime victim assistance administrators, and all other applicants seeking crime victim assistance, should include the following: (1) type of crime and description of the criminal event; (2) identification of the lead law enforcement agency conducting the investigation; (3) estimated number of victims affected by the crime; (4) description of the applicant's role in responding to the victim population since the date of the incident; (5) description of services that this funding will support and how these efforts will complement services already in place or will respond to an unmet need; (6) the amount of funding requested and the time frame for support; and (7) description of outreach and coordination with other public and private entities during the process of preparing the request for assistance. Once approved for applying, an AEAP solicitation, with detailed instructions on applying as well as reporting requirements, will be posted on the OJP electronic Grants Management System (GMS). Applicants, except Federal agencies, must submit through GMS (1) SF-424, Application for Federal Funding and applicable assurances and forms; and (2) Budget and budget narrative including a description of all other federal and nonfederal contributions (cash or in-kind). Applications for the AEAP must be submitted to the OVC Director as soon as practical following a terrorist or mass violence event by the appropriate State or federal official or private victim service and non-governmental organizations. ITVERP: All potential applicants shall submit a written application along with all supporting documentation to OVC for consideration. Claimants may apply for itemized, interim emergency, or supplemental reimbursement. An Itemized application should be used by those eligible claimants who are making a first-time request for reimbursement of out-of-pocket expenses that were paid following an international terrorism event. An Interim Emergency application should be used by eligible claimants seeking funds for an immediate need such as medical treatment, short-term lodging, or emergency transportation. A Supplemental application should be used by eligible claimants whose expenses have changed since they submitted an initial application. The supplemental application is for bills that may have been received late, or for new services that were not originally thought necessary or included in the original application. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. AEAP: Whereas the

previously submitted proposal letter, budget, and budget narrative were key factors in determining eligibility for funding, they were submitted prior to the posting of a solicitation. Application materials submitted electronically through GMS in response to either the assistance or compensation solicitation become permanent parts of the award file. Thus, it will be necessary to resubmit the proposal letter, budget, and budget narrative documents as part of the application package. Applications will be accepted following an incident of terrorism or mass violence in accordance with the timetable set forth in the AEAP Guidelines. There are two factors that determine the application submission requirements for the AEAP: (1) the applicant status, i.e., government agency (Federal, State, or local), non-governmental organization, or victim service organization; and (2) the type of support requested, i.e., crisis response, consequence management, criminal justice, victim compensation, technical assistance (nonmonetary assistance). Application requirements are listed below. Application requirements for State crime victim compensation programs - Funding will be made available to State crime victim compensation programs in response to an incident of terrorism or intentional mass criminal violence within the United States in the form of a grant. Requests for funding from State crime victim compensation programs may be made at any time in the aftermath of an incident and should include: (1) Responses to the questions or issues raised in the AEAP Compensation Solicitation ; (2) Proposal letter ; (3) Budget.; (4) Budget narrative; and (5) SF-424, Application for Federal Assistance and applicable assurances and forms.. Application requirements for all other recipients of funds -All other applicants seeking Antiterrorism Emergency Reserve support are required to submit: (1) Responses to the questions or issues raised in the AEAP Assistance Solicitation; (2) Proposal letter; (3) Budget; (4) Budget narrative; and (5) SF-424, Application for Federal Assistance and applicable assurances and forms. While no direct funding is available, OVC may provide its own consultants to meet the training and technical assistance needs of applicants. Training and technical assistance may be requested by submitting a letter describing the nature of the problem; the type of expertise or assistance needed; the duration of assistance; and the projected outcomes of the technical assistance or training. See OVC guidelines published in the Federal Register (Vol. 67, No. 21, Thursday, January 31, 2002) for additional information on application requirements for the AEAP. ITVERP: Step 1: Identify the type of application you are applying for by marking the appropriate type at the top of the application form. In addition, a supplemental sheet must be filled out by applicants. Sections B, F and H should be answered by all applicants; section G should be answered by Itemized and Supplemental applicants only. Detailed instructions are included. Step 2: If you believe that you are an eligible victim of a "designated" international terrorism event, please use the following forms and information to prepare your application for reimbursement. Required Documentation: A victim is required to submit documentation that provides proof of identity, citizenship, employment, and damage/injury sustained during the international terrorism event. A victim's family member or representative is required to submit documentation of his/her relationship to the victim plus medical information or a death certificate as appropriate, in addition to the items named above. In all cases, receipts for expenses incurred in the recovery process will be required. If any of the required documents have been destroyed and are unavailable from any other source, you must provide and certify a list of destroyed documents and how each would apply to your ITVERP application.

Award Procedure:

AEAP: Upon receipt and internal review of a complete application, it is the intention of OVC to notify applicants of funding decision within 5 business days or as soon as practicable. The applicant may be notified by telephone, Internet or facsimile. ITVERP: After review of each application, the Director shall determine the eligibility of the victim or representative and the amount, if any, eligible for reimbursement, specifying the reasons for such determination and the findings of fact and conclusions of law supporting it. A copy of the determination shall be mailed to the claimant at his last known address.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

AEAP: It is OVC's intention to make a funding decision within 5 business days

of receipt of a complete application or as soon as practicable. ITVERP: It is OVC's intention to review and process payments as soon as practicable. For itemized and supplemental claims, range of approval/disapproval is dependant upon receipt of an official determination of a reasonable indication of an act of international terrorism from the Assistant Attorney General of National Security for a particular event. Processing time is also dependant upon timely response by claimants of any outstanding documents or information required to process claim applications. Claimants may apply for an interim emergency payment, prior to a determination under Section 94.21(a). If the Director determines that such payment is necessary to avoid or mitigate substantial hardship that may result from delaying reimbursement until complete and final consideration of an application, such payment may be made to cover immediate expenses such as those of medical care, funeral and burial, short-term lodging, and emergency transportation.

Appeals:

For both programs, hearing by the Assistant Attorney General, Office of Justice Programs.

16.576 CRIME VICTIM COMPENSATION**FEDERAL AGENCY:**

Office for Victims of Crime, Department of Justice

AUTHORIZATION:

42 U.S.C. 10602 (a); and an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The Office for Victims of Crime (OVC), Department of Justice, administers the Crime Victim Compensation formula grant program. OVC annually awards a grant to each state, the District of Columbia, the U.S. Virgin Islands, and the Commonwealth of Puerto Rico to support state crime victim compensation programs. These programs help pay for some of the expenses resulting from crimes involving violence or abuse.

TYPES OF ASSISTANCE:**FORMULA GRANTS****USES AND USE RESTRICTIONS:**

Funds under this program shall be used by the States for awards of compensation benefits to crime victims, with the following exception: States may retain up to 5 percent of their total grant for administrative and training purposes. Formula grant funds to an eligible State crime victim compensation program is based on 60 percent of the amounts States expended during the fiscal year preceding the year of collections for the Crime Victims Fund, other than amounts awarded for property damage. If the sums available in the Fund for grants under this program are insufficient to provide grants of 60 percent as provided above, grants from the sums available will be made to each eligible crime victim compensation program so that all such programs receive the same percentage of the amounts awarded by such programs during the preceding fiscal year, other than amounts awarded for property damage. A crime victim compensation program is an eligible crime victim compensation program if (1) such program is operated by a State and offers compensation to victims and survivors of victims of criminal violence, including drunk driving and domestic violence for: (A) medical expenses attributable to a physical injury resulting from a compensable crime, including expenses for mental health counseling and care; (B) loss of wages attributable to a physical injury resulting from a compensable crime; and (C) funeral expenses attributable to a death resulting from a compensable crime; (2) such program promotes victim cooperation with the reasonable requests of law enforcement authorities; (3) such State, possession or territory certifies that grants received under this program will not be used to supplant funds otherwise available to provide crime victim compensation; (4) such program, as to compensable crimes occurring within the State, possession or territory, makes compensation awards to victims who are nonresidents of the State, possession or territory on the basis of the same criteria used to make awards to victims who are residents of the State, possession or territory; (5) such program provides compensation to victims of Federal crimes occurring within the State on the same basis that such program provides compensation to victims of State crimes; (6) such program does not, except pursuant to rules issued by the program to prevent unjust enrichment of the offender, deny compensation to any victim because of that victim's familial relationship to the offender, or because of the sharing of a residence by the victim and the offender; (7) such program does not provide compensation to any person who has been convicted of an offense under Federal law with respect to any time period during which the person is delinquent in paying a fine, other monetary penalty, or restitution imposed for the offense; and (8) such program provides such other information and assurances related to the purposes of this section as the Director may reasonably require. Any amount of crime victim compensation that the applicant receives through a crime victim compensation program under this section shall not be included in the income of the applicant until the total amount of assistance that the applicant receives

from all such programs is sufficient to fully compensate the applicant for losses suffered as a result of the crime. As used in this section: (1) the term "property damage" does not include damage to prosthetic devices, eyeglasses or other corrective lenses, or dental devices; (2) the term "medical expenses" includes, to the extent provided under the eligible crime victim compensation program, expenses for eyeglasses and other corrective lenses, for dental services and devices and prosthetic devices, and for services rendered in accordance with a method of healing recognized by the law of the State; (3) the term "compensable crime" means a crime the victims of which are eligible for compensation under the eligible crime victim compensation program, and includes crimes involving driving while intoxicated and domestic violence; and (4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and any other possession or territory of the United States.

The Federal share of these grants may not exceed 75 percent of the total costs of the projects described in the applications. Projects to victim service providers for victim services or for

All funds designated as match are restricted to the same uses as the Office on Violence Against Women funds and must be expended within the grant period. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503.

AUTHORIZATION:

Omnibus Appropriations Act, Public Law 106-113, Division B, Section 1000(a); and an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The State Criminal Alien Assistance Program (SCAAP) is a payment program designed to provide federal assistance to states and localities that incur costs for incarcerating undocumented criminal aliens who are being held as a result of state and/or local convictions. The Bureau of Justice Assistance (BJA) administers this program in conjunction with the Department of Homeland Security's (DHS) Immigration and Customs Enforcement (ICE), and U.S. Citizenship and Immigration Services branches.

TYPES OF ASSISTANCE:

Direct Payments for Specified Use

USES AND USE RESTRICTIONS:

The Department of Justice Reauthorization Act of 2005 (Public Law 109-162, Title XI) included the following requirement regarding the use of SCAAP funds: "Amounts appropriated pursuant to the authorization of appropriations in paragraph (5) that are distributed to a State or political subdivision of a State, including a municipality, may be used only for correctional purposes." All funds must be used for correctional purposes only. To be eligible for reporting, inmates must have been convicted of a felony or second misdemeanor for violations of state or local law, and housed in the applicant's state or local correctional facility for 4 or more consecutive days during the reporting period. Once a person meets these criteria, all pre-trial and post-conviction time served may be included in the application. Salary information reported in the SCAAP application must reflect the total salaries and wages paid to full and part-time correctional officers and others who meet the SCAAP definition. See the SCAAP Guidelines at <http://www.ojp.usdoj.gov/BJA/>. Funds may be used only for correctional purposes. BJA may further define the eligible uses of funds. For further information, see <http://www.ojp.usdoj.gov/BJA/grant/scaap.html>.

Applicant Eligibility:

Eligible applicants include States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands and localities or local jurisdictions exercising authority with respect to the incarceration of an undocumented criminal alien. This covers state prison facilities and local jails, whether operated by counties or cities. Applicants are generally States and units of local government. Note: Only one application is accepted from each separate political division (i.e., State, county, city).

Beneficiary Eligibility:

States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands and localities or local jurisdictions.

Credentials/Documentation:

Applicants who are seeking funding must complete an electronic application form via the Office of Justice Programs Grants Management System (GMS). Inmate data, including the proper inmate identifiers, will either be manually key-stroked into the on-line application system, or submitted on-line by electronically attaching the applicable portions of the applicants inmate databases. The authorized official certifies compliance with all SCAAP requirements, including that the applicant has been authorized by the Chief

Executive Officer of the applicable unit of government; the inmate identifiers required have been submitted to BJA in the proper format(s) for Immigration and Customs Enforcement (ICE) verification within the prescribed deadlines; all inmates counted by the applicant have been convicted of either a felony or two misdemeanor offenses under the applicant's law; and, only salary costs for corrections officers were included in the Total Salary Costs. By certifying on-line, the authorizing signing official is also assuring that all federal certifications and assurances are being met. The certification and assurance forms (Assurances, OJP Form 4000/3 and Certifications Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements, OJP Form 4061/6) are provided on-line to allow applicants to review and accept them electronically. This program is excluded from coverage under 2 CFR 200, Subpart E - Cost Principles.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

This program is excluded from coverage under 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. SCAAP applications are administered via the Office of Justice Programs Internet-based Grants Management System. Inmate data, including the proper inmate identifiers, may either be manually key-stroked into the on-line application system, or submitted on-line by electronically attaching the applicable portions of their inmate databases. Awards are announced after the ICE inmate verification process is done. Technical assistance is available to applicants for preparation of the on-line application process by calling the OJP Grants Management System Hotline at 1-888-549-9901.

Award Procedure:

The final payment process requires that all applications and all data be fully processed and verified before any payments are made. Inmate data will be verified by the ICE, who will attempt to match the inmate data records provided to records in its databases to obtain the maximum number of confirmed matches. These matches are expected to include three categories: 1) those positively identified (matched) as qualifying undocumented criminal aliens; 2) those unknowns and 3) those positively identified as non-criminal aliens. Applicants will be given credit for a percentage of inmates whose eligibility cannot be determined through positive identification or "match," but have valid foreign countries of birth. Payments will be based on the days of incarceration for the verified number of aliens incarcerated by each applicant. Payments are granted by the Director of the Bureau of Justice Assistance, Office of Justice Programs, Department of Justice. The payment must be accepted on-line and the acceptance will effect a simultaneous assurance of compliance with conditions. Acceptance of the payment on-line initiates the automatic electronic transfer of funds from OJP to the recipient.

This program has no matching requirements.
This program does not have MOE requirements.

Length and Time Phasing of Assistance:

SCAAP awards are usually obligated and announced by the end of September and released for drawdown by mid-October. There are no restrictions placed on

the time permitted to spend the money awarded because SCAAP funds are considered no year funds. Beginning with FY 2007 SCAAP awards, SCAAP funds must be used for correctional purposes only. Jurisdictions receiving SCAAP awards will be asked to report the projected use of these funds at the time the award is accepted. See the following for information on how assistance is awarded/released: SCAAP payments are calculated simultaneously, with applicants receiving a prorated payment based on the appropriation; costs submitted, and inmates as determined by DHS. All SCAAP payments are made electronically to the applicant's bank account of record identified during the application process. Please use the jurisdiction's EIN (tax identification) and vendor number when applying for SCAAP funds.

Once SCAAP data has been validated and analyzed, applicants will receive e-mail notification that awards are ready for online acceptance and drawdown. Formal acceptance of an award via GMS is necessary for the electronic transfer of funds into the applicants bank account of record. Applicants have 45 calendar days to accept awards through GMS once notice is provided. SCAAP payments must go to the jurisdictions general fund.

Reports:

No reports are required.

Audits:

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, non-Federal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503.

16.607 BULLETPROOF VEST PARTNERSHIP PROGRAM (BVP)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Bulletproof Vest Partnership Grant Act of 1998, Public Law 105-181, June 16, 1998, as amended.

OBJECTIVES:

To protect the lives of law enforcement officers by helping State, local, and tribal law enforcement agencies provide officers with armored vests.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS FOR A SPECIFIED USE

USES AND USE RESTRICTIONS:

The program pays up to 50 percent of the total cost of each vest order. Total cost includes the cost of the vests, vest carriers, attachments, inserts, and covers considered integral or essential for its proper care, use, and wearability, shipping, handling, fitting charges, and applicable taxes. The total invoiced price, after all vendor and prompt payment discounts have been deducted, is what the Bureau of Justice Assistance (BJA) uses to determine the Federal match. This program only allows the purchase of body armor that has been tested and found to comply with applicable ballistic and stab standards promulgated by the National Institute of Justice's (NIJ) Standard 0101.06 Ballistic Resistance of Police Body Armor. In FY 2001, stab-resistant body armor was also included in the program as an allowable purchase.

Applicant Eligibility:

Only chief executives of jurisdictions (or their designees) may apply for funds. Jurisdictions are defined as general purpose units of local government (e.g., cities, towns, townships, boroughs, counties, etc.), Federally-recognized Indian tribes, the 50 State governments, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands. The chief executive of the jurisdiction registers on-line, submits the jurisdiction application, and requests payment for completed vest orders.

Beneficiary Eligibility:

Only law enforcement officers may receive vests through this program. According to the Act, "law enforcement officer" means any officer, agent, or employee of a State, unit of local government, or an Indian tribe authorized by law or by a government agency to engage in or supervise the prevention, detection, or investigation of any violation of criminal law, or authorized by law to supervise sentenced criminal offenders. Eligible officers may be full-time, part-time, paid or volunteer.

Beginning with FY 2011, in order to receive BVP funds, jurisdictions must certify, during the application process, that all law enforcement agencies benefitting from the BVP Program have a written "mandatory wear" policy in effect. FAQ: <https://ojp.gov/bvpbasi/docs/FAQsBVPmandatoryWearPolicy.pdf>

The BVP Reauthorization Act of 2015 included a provision that states that BJA may give preferential consideration to BVP recipients that provide armor vests to law enforcement officers that are uniquely fitted for such officers, including vests uniquely fitted to individual female law enforcement officers. A certification section has been added to the 2017 application (in the BVP system) stating the jurisdictions and law enforcement agency are aware of and will comply with this requirement.

Credentials/Documentation:

Eligible jurisdictions must be general purpose units of local government, Federally-recognized Indian tribes, the 50 state governments, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands. The validity of the on-line registration process is verified through independent reviews which may include certification by the banking institutions serving the jurisdiction, the U.S. Census Bureau, and agencies within the U.S. Department of Justice. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

This is an Internet-based program. The jurisdiction is required to complete and submit an on-line registration form, providing information about the jurisdiction's chief executive officer, program contact person, and electronic banking information. The registration process is handled through the program's web site <http://ojp.gov/bvpbasi/home.html>. Only those jurisdictions with approved registrations are permitted to make application. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards applies to this program. The jurisdiction submits the application to BJA via the Internet web site <http://vests.ojp.gov>. On-line instructions guide the jurisdiction through the application process. Law enforcement agencies or agencies with law enforcement functions which meet the Act's definition, will assist in completing the jurisdiction's on-line application by indicating the types, numbers, and costs of vests they intend to order. Only those jurisdictions that complete and submit applications will be eligible for matching funds from BJA.

Award Procedure:

Applications received by BJA are reviewed for completeness, accuracy, and compliance with all program requirements. Each application is then checked against the availability of funds to cover up to 50 percent of the application's total cost, in keeping with established criteria for program fund allocation. When all checks are complete and the application approved, the jurisdiction is notified through e-mail that the necessary funds have been obligated.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

A minimum of 15 working days may be required for complete registration validation, although jurisdictions and law enforcement agencies will have immediate access to certain program components during this validation process.

A minimum of 60 working days may be required after the program closes for approval of the jurisdiction's application for funding. A minimum of 25 working days may be required for the electronic transfer of funds from the U.S. Treasury to the jurisdiction's bank account, once the request for funds has been received, reviewed, and approved by the Office of Justice Programs.

Appeals:

Not Applicable.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula. Matching Requirements: Percent: 50%. The program requires that each applicant jurisdiction be responsible for providing at least 50 percent of the cost of each vest purchased. Tribal governments may use Federal funds to provide this match; all other jurisdictions must use nonfederal match funds. Nonfederal fund sources include State and/or local jurisdiction revenues, private or personal funds, and contributions from insurance or workman's compensation consortiums. Asset forfeiture funds may also be used to meet the jurisdiction's matching requirement. Beginning in FY 2002, changes (Bulletproof Vest Partnership Act of 2000; Public Law 106-517) gives preference to small jurisdictions (those populations below 100,000) guaranteeing them the full 50 percent match payment before payments are calculated and approved for larger jurisdictions.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Jurisdictions with approved applications must request the federal match no later than August 31st of the second federal fiscal year following the end of the federal fiscal year in which their application was approved. In other words, the jurisdiction has two years beyond the year of their application to request payments for vests contained in that application. Payments of the federal match will be made whenever the jurisdiction indicates that at least part of the approved vest order was received and invoiced. See the following for information on how assistance is awarded/released: Funds will be available approximately three to four months after the application deadline. Applicants will be notified, via email, when the award is made and the funds are available. Please see the main BVP web site for more details: <http://ojp.gov/bvpbasi/home.html>.

Reports:

No reports are required.

Audits:

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, non-Federal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503. Payments and transactions are subject to audits by the General Accounting Office, Department of Justice's Office of the Inspector General, state or local government auditors, and auditors from independent public accounting firms. Jurisdictions must follow their local procurement policies and procedures, including maintenance of reliable and accurate accounting systems, record keeping, and systems of internal control.

Records:

In accordance with the requirement set forth in 2 CFR 200, Subpart F, grantees must maintain all financial records, supporting documents, statistical records, and all other records pertinent to the award for at least 3 years following the close of the most recent audit.

Account Identification:

OBJECTIVES:

The COPS Office was established in 1994 to assist state, local and tribal law enforcement agencies in enhancing effectiveness and building the capacity to advance public safety through the implementation of community policing strategies. Community policing entails developing partnerships between law enforcement agencies and the communities they serve so they can work collaboratively to resolve problems and build community trust. It is a philosophy that promotes organizational strategies that support the systematic use of partnerships and problem solving techniques, in order to proactively address the immediate conditions that give rise to public safety issues such as crime, social disorder, fear of crime, and satisfaction with police services. Community policing is comprised of three key components:

Community Partnerships

Collaborative partnerships between the law enforcement agency and the individuals and organizations they serve to develop solutions to problems and increase trust in police:

- Other government agencies
- Community members/groups
- Nonprofits/service providers
- Private businesses
- Media

Organizational Transformation

The alignment of organizational management, structure, personnel, and information systems to support community partnerships and proactive problem solving:

- Agency management
- Climate and culture
- Leadership
- Labor relations
- Decision-making
- Strategic planning
- Policies
- Organizational evaluations
- Transparency
- Organizational structure
- Geographic assignment of officers
- Despecialization
- Resources and finances
- Personnel
- Recruitment, hiring, and selection
- Personnel supervision/evaluations
- Training
- Information systems (Technology)
- Communication/access to data
- Quality and accuracy of data

Problem Solving

The process of engaging in the proactive and systematic examination of identified problems to develop and rigorously evaluate effective responses:

Scan: Identify and prioritize problems
Analysis: Research what is known about the problem
Response: Develop solutions to bring about lasting reductions in the number and extent of problems
Assessment: Evaluate the success of the responses
Use the crime triangle to focus on immediate conditions (victim/offender/location).

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Since 1994, the COPS Office has invested approximately \$14.9 billion to add officers to the nation's streets; enhance crime fighting technology; support crime prevention initiatives; promote police reform; and provide training and technical assistance to help advance community policing. The programs and initiatives developed have provided funding to more than 13,000 of the nation's 16,000 law enforcement agencies. Through these efforts, the COPS Office has helped create a community policing infrastructure across the nation.

In FY 2017, COPS Office will fulfill its mission of advancing public safety through community policing by continuing to:

- Provide grants under the COPS Hiring Program (CHP) to support the hiring of sworn and non-sworn law enforcement personnel nationwide;
- Promote the hiring of veterans into non-sworn law enforcement positions;
- Continuing oversight and coordination of the National Blue Alert System, created under the Rafael Ramos and Wenjian Liu National Blue Alert Act of 2015. The system is designed to rapidly disseminate information to law enforcement, the media and the public to aid in the apprehension of violent criminals who pose a risk to law enforcement;
- Advancing the work of the national Officer Safety and Wellness (OSW) Group, which brings together representatives from law enforcement, federal agencies, and the research community to focus attention on this critical aspect of public safety. Semi-annual meetings of the OSW Group help amplify critical officer safety issues and result in reports which highlight best practices around different safety and wellness topics;
- Provide grants under the Coordinated Tribal Assistance Solicitation to support the implementation of community policing and meets the needs of law enforcement in Tribal Nations;
- Provide grants under the Preparing for Active Shooter Situations to support training providers who can offer integrated, scenario-based response courses as described in the 2016 Police Act;
- Provide grants under the COPS Anti-Meth Task Force and COPS Anti-Heroine Task Force to support law enforcement agencies with multijurisdictional reach interdisciplinary team structures;
- Provide grants under the COPS Community Policing Development program to advance community policing through training and technical assistance, the development of innovative community policing strategies, applied research, guidebooks and best practices. Applicants may select from the following topics: Cooperative Partnerships with federal law enforcement to combat illegal immigration, officer safety and wellness resources, enhancing officer safety through increased respect for police, critical response technical assistance, and online training development;
- Develop, deliver, and continue to evaluate state-of-the-art training and technical assistance to enhance law enforcement officers problem-solving and community interaction skills;
- Expanding the number of sites reached by the Collaborative Reform Initiative for Technical Assistance;
- Align training and technical assistance to problems identified in the officer hiring program;
- Promote improved public safety outcomes by infusing community policing core principles in all grant programs, and acting on evidence that it advances public safety;
- Support innovative programs that respond directly to the emerging needs of state, local, and tribal law enforcement in order to shift law enforcement focus to preventing, rather than reacting to, crime and disorder within their communities;
- Provide responsive, cost effective customer service delivery to grantees to ensure success in implementing community policing strategies within their

communities; and
100% of COPS funds are discretionary funds. The COPS Office authorizing statute contains specific restrictions applicable to all programs. In addition, annual appropriations acts may impose additional restrictions. 100% of COPS funds are Discretionary funds.

OBJECTIVES:

The Gang Resistance Education and Training (G.R.E.A.T.) is a school-based, law enforcement officer-instructed classroom training curriculum. G.R.E.A.T.'s violence prevention curriculum is a life-skills competency program designed to provide students with the skills they need to avoid gang pressure and youth violence. The program's primary objective is prevention and minimizing the probability of high risk youth engaging in delinquency, youth violence, and gang membership. The instruction is taught in the classroom by specially trained, uniformed law enforcement officers. The curriculum can be used in conjunction with other prevention programs encouraging positive relationships between the community, parents, schools, and law enforcement. The G.R.E.A.T. program is comprised of a continuum of curricula: Middle School (6th-8th grades); Elementary (3rd and 4th grades); Families Component (parents/guardians and youth) and Summer Component. The various components and curricula build on and reinforce each other in addressing the factors that contribute to youth violence and gang involvement.

Renewals:

Subject to annual appropriations.

Formula and Matching Requirements:

Statutory Formula: Title I, Chapter Subchapter V, Part A, Subpart 42 USC 3756. Statutory Formula: Once each fiscal year overall JAG Program funding level is determined, BJA partners with the Bureau of Justice Statistics (BJS) to begin a four-step grant award calculation process which consists of:

1. Computing an initial JAG allocation for each state and territory, based on their share of violent crime and population (weighted equally).
2. Reviewing the initial JAG allocation amount to determine if the state or territory allocation is less than the minimum (de minimus) award amount defined in the JAG legislation (0.25 percent of the total). If this is the case, the state or territory is funded at the minimum level, and the funds required for this are deducted from the overall pool of JAG funds. Each of the remaining states receives the minimum award plus an additional amount based on their share of violent crime and population.
3. Dividing each state's final award amount (except for the territories and

District of Columbia) between state and local governments at a rate of 60 and 40 percent, respectively.

4. Determining local unit of government award allocations, which are based on their proportion of the states three-year violent crime average. If a local eligible award amount is less than \$10,000, the funds are returned to the state to be awarded to these local units of government through the state agency. If the eligible award amount is \$10,000 or more, then the local government is eligible to apply for a JAG award directly from BJA.

Matching requirements are not applicable to this program.

MOE requirements are not applicable to this program.

Length and Time Phasing of Assistance:

Awards of at least \$25,000 or more begin October 1 of the FY and are four years in length. Awards that are less than \$25,000 begin October 1 of the FY and are two years in length. Requests for up to two additional years to complete performance of the award will be granted automatically. Extensions beyond a four-year period for all JAG awards may be approved on a case-by-case basis at the discretion of BJA. See the following for information on how assistance is awarded/released: Reimbursement.

16.740 STATEWIDE AUTOMATED VICTIM INFORMATION NOTIFICATION (SAVIN) PROGRAM

(SAVIN)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

Pub. L. 110-5, emb. secs. 101-104; Pub. L. No. 109-108, 119 Stat. 2290, 2299; 28 U.S.C. 530C(a)(1); and, an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The SAVIN Program, administered by the Bureau of Justice Assistance (BJA), helps protect victims and survivors of crime from further victimization and ensures their rights are secured by providing registered individuals with timely and accurate information about any important dates and developments relating to the criminal proceedings at issue in their case (e.g., trial dates, times, or changes; probation hearings; inmate relocation; and offender release). This program allows victims and survivors to discretely receive information that can help them make informed decisions about their level of participation in the legal process. Effective SAVIN programs require broad multiagency support, increased victim safety, compliance with legislative requirements, and minimization of costs associated with keeping registered participants informed throughout the criminal justice process. SAVIN programs provide a single point of shared services for victims located anywhere in a state to learn about the status of their offenders case.

Key SAVIN components include:

Governance: An authorized statewide agency to oversee the planning and implementation of the SAVIN program. The administering agency should establish a governance process that includes representatives of criminal justice and law enforcement agencies, technology staff, and victim advocates, including direct participation of a cross-section of victims of crime to guide the development and delivery of SAVIN services. The governance committee or board should meet (in person or via conference call) on a regular basis to discuss help inform the progress of the grant goals and objectives and the overall SAVIN program.

Technology: The use of technology solutions designed to collect, manage, and share critical information to and from victims that provide these services in a timely, confidential, and cost-effective manner.

Program Management: An organizational structure that will execute the program as directed by the established governance process and will enable the state to establish or expand existing notification capabilities based upon measures of the effectiveness of the program by collecting data on victims and survivors served and cost effectiveness. For example, conducting surveys with victims and survivors to ensure that the system is meeting their needs.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Technology improvement programs. SAVIN grantees are required to use the National Information Exchange Model (NIEM) (www.niem.gov), follow associated SAVIN implementation guidelines, and adopt the guidelines as part of their SAVIN program planning. Funds may not be used to supplant State and local funds.

Applicant Eligibility:

Applicants are limited to state-approved agencies that are authorized to manage the SAVIN program. State-approved agencies must be authorized either through state legislation or identified through the Governors office to manage the planning and implementation of a SAVIN program. Federally recognized Indian tribes (as determined by the Secretary of the Interior) are also eligible to receive grant funding for the planning and implementation of an automated victim notification program.

In order to apply for SAVIN program funding, eligible applicant agencies must include the state legislation designating authority to manage the SAVIN program for their state. If there is no authorizing state legislation, a letter from the Governor must be attached as part of the application. The letter must designate the applicant as the approved SAVIN program manager on behalf of the state.

Beneficiary Eligibility:

States, Territories and Tribal governments.

Credentials/Documentation:

Each applicant must submit a completed application that meets the requirements specified in the program guidance. 2 CFR 200, Subpart E - Cost Principles applies to this program.

There are no appeal rights for rejection of a discretionary application. Please see section 28 Code of Federal Regulations (CFR) Part 18.

Renewals:

Renewals are subject to annual appropriations.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.

Matching Requirements: It is not anticipated that a match will be required (depending upon final appropriation authority) but is recommended to promote program sustainability and partnerships across the state. 16.742 PAUL COVERDELL FORENSIC SCIENCES IMPROVEMENT GRANT PROGRAM

Coverdell Program

FEDERAL AGENCY:

National Institute of Justice, Department of Justice

AUTHORIZATION:

Title I of the Omnibus Crime Control and Safe Streets Act of 1968, Part BB, Sections 2801 - 2806, Pub. L. No. 90-351, 34 USC 10561 - 34 USC 10566 and an act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

To improve the quality and timeliness of forensic science and medical examiner services. Among other things, funds may be used to eliminate a backlog in the analysis of forensic evidence and to train and employ forensic laboratory personnel and medicolegal death investigators, as needed, to eliminate such a backlog.

TYPES OF ASSISTANCE:

FORMULA GRANTS; Project Grants

USES AND USE RESTRICTIONS:

Under the Coverdell program, SAAs may apply for both base (formula) and competitive funds. Units of local government may apply for competitive funds. Coverdell SAAs and units of local government may apply directly to NIJ for funding.

Approximately 85 percent of the funds available for Coverdell grants will be allocated among eligible States based on population (State base funds). The Coverdell statute requires that the remaining 15 percent of program funds be awarded competitively. A State or unit of local government that receives a Coverdell grant must use the grant for one or more of these six purposes:

1. To carry out all or a substantial part of a program intended to improve the quality and timeliness of forensic science or medical examiner/coroners office services in the State, including those services provided by laboratories operated by the State and those operated by units of local government within the State.
2. To eliminate a backlog in the analysis of forensic science evidence, including, among other things, a backlog with respect to firearms examination, latent prints, impression evidence, toxicology, digital evidence, fire evidence, controlled substances, forensic pathology, questioned documents, and trace evidence.
3. To train, assist, and employ forensic laboratory personnel and medicolegal death investigators, as needed to eliminate such a backlog.
4. To address emerging forensic science issues (such as statistics, contextual bias, and uncertainty of measurement) and emerging forensic science technology (such as high throughput automation, statistical software, and new types of instrumentation).
5. To educate and train forensic pathologists.
6. To fund medicolegal death investigation systems to facilitate accreditation of medical examiner and coroner offices and certification of medicolegal death investigators.

Funds may be used for personnel, computerization, laboratory equipment, supplies, accreditation, education, training, certification, facilities (the Coverdell law limits the amount of funds that may be used for the costs of a new facility or facilities), and administrative expenses (not to exceed 10 percent of the total amount of a Coverdell grant). Expenses that are not permitted include expenses other than those listed above (including expenses for general law enforcement functions or non-forensic investigatory functions), costs for any new facility that exceed the limits described by the Coverdell law, recipient administrative expenses (direct or indirect) that exceed 10 percent of the total grant amount, and/or the use of funds for the purchase and/or lease of vehicles, such as crime scene vans. Coverdell competitive funds may be awarded to SAAs or dispersed directly to units of local government based on the merits of the respective applications. States and local governments that provide forensic-science or medical-examiner services may apply for the competitive funding.

Applications for competitive funding are reviewed by an independent panel made up of subject-matter experts from the forensic science community. The panelists review and rate the applications individually based on specific evaluation criteria specified in the solicitation.

Applicant Eligibility:

Under the Coverdell program, SAAs may apply for both base (formula) and competitive funds. Units of local government may apply for competitive funds. Coverdell SAAs and units of local government may apply directly to NIJ for funding.

The Coverdell law (at 34 USC 10562) requires that, to request a grant, an applicant for Coverdell funds must submit:

1. A certification and description regarding a plan for forensic science laboratories. Each applicant must submit a certification that the State or unit of local government has developed a plan for forensic science laboratories under a program intended to improve the quality and timeliness of forensic science or medical examiner services in the State, including such services provided by the laboratories operated by the State and those operated by units of local government within the State. Applicants must also specifically describe the manner in which the grant will be used to carry out that plan.
2. A certification regarding use of generally accepted laboratory practices. Each applicant must submit a certification that any forensic laboratory system, medical examiners office, or coroners office in the State, including any laboratory operated by a unit of local government within the State, that will receive any portion of the grant amount (whether directly or through a subgrant) uses generally accepted laboratory practices and procedures established by accrediting organizations or appropriate certifying bodies.
3. A certification regarding forensic science laboratory accreditation. Each applicant must submit a certification that any forensic science laboratory system in the State, including any laboratory operated by a unit of local government within the State, that will receive any portion of the grant amount (whether directly or through a subgrant) either is accredited, or, is not so accredited, but will (or will be required in a legally binding and enforceable writing to) use a portion of the grant amount to prepare and apply for such accreditation not more than two (2) years after the date on which a grant is awarded under the FY 2017 Paul Coverdell Forensic Science Improvement Grants Program.
4. A certification and description regarding costs of new facilities. Each applicant must submit a certification that the amount of the grant used for the costs of any new facility constructed as part of a program to improve the quality and timeliness of forensic science or medical examiner services will not exceed certain limitations set forth in the Coverdell law at 34 USC 10562. (See information on permissible expenses in the next section of this solicitation.) Applicants must also specifically describe any new facility to be constructed as well as the estimated costs of the facility.

5. A certification regarding external investigations into allegations of serious negligence or misconduct. Each applicant must submit a certification that a government entity exists and an appropriate process is in place to conduct independent external investigations into allegations of serious negligence or misconduct substantially affecting the integrity of the forensic results committed by employees or contractors of any forensic laboratory system, medical examiner office, coroners office, law enforcement storage facility, or medical facility in the State that will receive a portion of the grant amount..

Beneficiary Eligibility:

Eligible applicants must be State or local (i.e., county and municipal) governments. The purpose of this solicitation is to request applications for grants from State and units of local government to improve the quality and timeliness of forensic science and medical examiner services and/or to eliminate backlogs in the analysis of forensic evidence, including firearms examination, latent prints, impression evidence, toxicology, digital evidence, fire evidence, controlled substances, forensic pathology, questioned documents, and trace evidence for criminal justice purposes in State and local forensic laboratories.

Credentials/Documentation:

The applicant must furnish the following along with the application for a grant: a certification that states there exists a plan for forensic science laboratories that is designed to improve the quality and timeliness of forensic science or medical

examiner services; a certification that states each forensic laboratory, forensic laboratory system, medical examiner's office, or coroner's office that will receive any portion of a Coverdell grant uses generally accepted laboratory practices and procedures as established by accrediting organizations or appropriate certifying bodies; a certification regarding forensic science laboratory accreditation except with regard to any medical examiner's office, or coroner's office in the State; a certification that states that a government entity exists and an appropriate process is in place to conduct independent external investigations into allegations of serious negligence or misconduct by employees or contractors substantially affecting the integrity of forensic results, and resumes of key personnel.

The cost principles are generally applicable, except with respect to for-profit entities or to organizations listed at Appendix VIII to 2 CFR Part 200. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Potential applicants are encouraged to request the program announcement for additional information about eligibility requirements and application and selection procedures.

Applicants must contact their SAA to determine if the program has been selected for review by the State. The date that the application was sent to the SAA, or the reason such submission is not required, must be included in the application.

A. Base Funds for States: Eighty-five percent of the funds available for Coverdell grants will be allocated among eligible States based on population (State base funds). To be eligible, a State must satisfy the specific application requirements outlined in this announcement and all other general requirements for NIJ and OJP grants. Coverdell SAAs may apply for competitive funds for forensic sciences improvements above and beyond those it can accomplish with its base funds. State applications for competitive funding will only be accepted from Coverdell SAAs. Other State agencies or departments who wish to apply for competitive funds must coordinate with their respective SAA. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O.

12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review. 16.746 CAPITAL CASE LITIGATION INITIATIVE

(CCLI)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

42 U.S.C. Section 14163 and 14163a.

OBJECTIVES:

Capital Case Litigation Initiative (CCLI) - In an effort to improve the quality of legal representation and to ensure reliable jury verdicts in state capital cases, the CCLI seeks to improve the quality and effectiveness of representation in death penalty cases through training for both the prosecutors who represent the public and the defense attorneys who represent indigent defendants in state capital cases. Wrongful Conviction Review Program - The objective of the Wrongful Conviction Review Program is to provide high quality and efficient representation for defendants in post-conviction claims of innocence. Post-conviction innocence claims are likely to include complex challenges to the reliability or accuracy of evidence presented at trial that fall mainly into three categories: 1) eyewitness identification evidence; 2) confession evidence; and 3) forensic evidence. In some cases, post-conviction DNA testing alone can establish innocence, but the majority of cases will rely on other forms of evidence, and many will involve DNA testing together with additional sources of proof and/or expert testimony, which may be extremely costly.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Capital Case Litigation Initiative (CCLI): Funds are given to States that currently enforce their death penalty statutes or to a national organization capable of providing training and technical assistance. CCLI funds may not be used to fund, either directly or indirectly, representation in, or prosecution of, specific capital cases. Wrongful Conviction Review Program: Funds are awarded to institutions of higher education, non-profit organizations with missions dedicated (in whole or in part) to exonerating the innocent, to state or local public defender offices, to public and nonprofit organizations that have experience and expertise in providing representation to wrongfully convicted defendants in post-conviction claims of innocence cases, as well as providing training and technical assistance on the subject. Funds may not be used to

supplant State and local funds.

Applicant Eligibility:

Capital Case Litigation Initiative: Applicants are limited to state agencies in states that authorize capital punishment and that conduct, or will conduct prosecutions in which capital punishment is sought. For the state agency to be eligible, its state must have an effective system for providing competent legal representation for indigent defendants in capital cases. An effective system is defined in 42 U.S.C. 14163(e) as a system that invests the responsibility for appointing qualified attorneys to represent indigent defendants in capital cases either: (A) In a public defender program that relies on staff attorneys, members of the private bar, or both, to provide representation in capital cases; (B) In an entity established by statute or by the highest state court with jurisdiction in criminal cases, which is composed of individuals with demonstrated knowledge and expertise in capital cases, except for individuals employed as prosecutors; or (C) Pursuant to a statutory procedure enacted before the date of the enactment of the CCLI Act [October 30, 2002] under which the trial judge is required to appoint qualified attorneys from a roster maintained by a state or regional selection committee or similar entity. Wrongful Conviction Review Program - Eligible applicants are limited to institutions of higher education, non-profit organizations with missions dedicated (in whole or in part) to exonerating the innocent, to state or local public defender offices, as well as to public and nonprofit organizations that have experience and expertise in providing representation to wrongfully convicted defendants in post-conviction claims of innocence cases.

Beneficiary Eligibility:

Capital Case Litigation Initiative: Defense counsel, prosecutors and judges in the States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, America Samoa, Guam, and the Northern Mariana Islands that currently enforce their death penalty statutes. Wrongful Conviction Review Program: State or local government public defenders and non-profit organizations dedicated to exonerating the innocent.

Credentials/Documentation:

The applicant must submit a completed Application for Federal Assistance (Standard Form 424), including signed assurances that it will comply with statutory and administrative requirements. 16.754 HAROLD ROGERS PRESCRIPTION DRUG MONITORING PROGRAM

(PDMP)

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

An act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

To enhance the capacity of regulatory and law enforcement agencies to collect and analyze controlled substance prescription data through a centralized database administered by an authorized state agency and federally recognized Indian tribal governments.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

The Harold Rogers Prescription Drug Monitoring Program (PDMP) allows for states discretion as they plan, implement, or enhance a PDMP to accommodate local decision-making based on state laws and preferences, while encouraging the replication of promising practices.

In FY 2012, the program expanded to provide funding to federally recognized Indian tribal governments for the specific purpose of enabling tribal health care providers to provide data to and access data contained within state PDMPs. In FY 2013, the program expanded again to enable applications for data-driven, multidisciplinary approaches to reducing prescription drug abuse, encouraging greater utilization of the PDMPs and their data. In FY 2015 the program added a fourth funding category to promote practitioner and researcher partnerships and contribute to the larger body of knowledge on PDMP best practices.

Grant funds under this program can be used to:

Build a state-level data collection and analysis system to enhance the capacity of regulatory and law enforcement agencies and public health officials for future prevention efforts.

Enhance existing programs abilities to analyze and use collected data to identify drug abuse trends, identify and address sources of diversion, and increase the number of users of the PDMP.

Promote the use of data from the PDMP and other sources to measure drug abuse trends, identify and address sources of diversion, and better inform decision making by prescribers and dispensers.

Facilitate and participate in national evaluation efforts to assess efficiency and effectiveness of potential best practices.

Encourage and implement the exchange of information under the PMIX Architecture among states to prevent cross-border diversion.

Contribute to state level opioid abuse prevention plans and determine methodologies to encourage replication of strategies that are proven to be effective.

Assess the efficiency and effectiveness of state-level programs to make

improvements and encourage additional states to implement programs.

Enhance collaborations with law enforcement, prosecutors, treatment professionals, the medical community, pharmacies, and regulatory boards to establish a comprehensive PDMP strategy.

Enable federally recognized Indian tribal governments to establish the policy, legal, and technological infrastructure to share PDMP data from health care facilities with the appropriate state PDMP.

Establish multidisciplinary action groups consisting of county, state, and federal criminal justice professionals; state and local health authorities; and treatment providers to determine best practices for sharing data, regulatory schemes, deconfliction strategies, intelligence gathering, targeted regulatory and enforcement activity, and prioritization of treatment and prevention efforts for at-risk individuals and communities.

Applicant Eligibility:

None.

Beneficiary Eligibility:

Category 1: Implementation and Enhancement: Applicants are limited to state governments that have a pending or enacted enabling statute or regulation requiring the submission of controlled substance prescription data to an authorized state agency.

Category 3: Data-Driven Multidisciplinary Approaches to Reducing Rx Abuse Grants: Applicants are limited to state agencies (health departments, law enforcement authorities, etc.) and units of county government located in states with existing and operational prescription drug monitoring programs.

Credentials/Documentation:

The applicant must submit a completed Application for Federal Assistance (Standard Form 424), including signed assurances that it will comply with statutory and administrative requirements. By certifying on-line, the authorizing signing official is also assuring that all federal certifications and assurances are being met. These needs include housing and employment challenges, relationship and family issues, and substance abuse and mental health problems.

The Second Chance Act of 2007 (Pub. L. 110-199) helps to address these significant challenges by providing comprehensive responses to the significant number of incarcerated adults who are returning to communities from prison, jail, and juvenile residential facilities. Programs funded under the Second Chance Act help to promote public safety by ensuring that the transition individuals make from prison and jail to the community is successful.

16.813 NICS ACT RECORD IMPROVEMENT PROGRAM (NARIP)

FEDERAL AGENCY:

Bureau of Justice Statistics, Department of Justice

AUTHORIZATION:

42 U.S.C. 3732 and the NICS Improvement Amends Act Public Law 110-180 , Public Law 110-180, 42 U.S.C 3732.

OBJECTIVES:

To improve the FBI's National Instant Criminal Background Check System (NICS) by providing assistance to states to improve the completeness, automation and transmittal to state and federal systems the records utilized by the NICS. Such records include criminal history records, records of felony convictions, warrants, records of protective orders, convictions for misdemeanor involving domestic violence and stalking, records of mental health adjudications, and others, which may disqualify an individual from

possessing or receiving a firearm under federal law. Helping states to automate these records will also reduce delays for law-abiding gun purchasers.

The NICS Improvement Act amends the Brady Handgun Violence Prevention Act of 1993 (the Brady Act) (Public Law 103-159), under which the Attorney General established NICS. The Brady Act requires Federal Firearms Licensees (FFLs) to contact the NICS before transferring a firearm to an unlicensed person for information on whether the proposed transferee is prohibited from receiving or possessing a firearm under state or federal law. The NICS Improvement Act was enacted in the wake of the April 2007 shooting tragedy at Virginia Tech. The Virginia Tech shooter was able to purchase firearms from an FFL because information about his prohibiting mental health history was not available to the NICS and the system was therefore unable to deny the transfer of the firearms used in the shootings.

The Act seeks to address the gap in information available to NICS about such prohibiting mental health adjudications and commitments and other prohibiting backgrounds. Filling these information gaps will better enable the system to operate as intended to keep guns out of the hands of persons prohibited by federal or state law from receiving or possessing firearms.

The Act authorized two grant programs to assist states in providing certain information to the NICS, and prescribes grant penalties for non-compliance with the Acts record completeness goals. Pursuant to the Act, there are certain conditions, described below, that a state must satisfy in advance of receiving grants under the Act. The NICS Improvement Act has provisions that require states to meet specified goals for completeness of the records submitted to the Attorney General on individuals prohibited by federal law from possessing firearms. The records covered include automated information needed by the NICS to identify felony convictions, felony indictments, fugitives from justice, drug arrests and convictions, prohibiting mental health adjudications and commitments, domestic violence protection orders, and misdemeanor crimes of domestic violence.

The Act provides for a number of incentives for states to meet the goals it sets for greater record completeness. First, the Act allows states to obtain a waiver, beginning in 2011, of the state matching requirement under the National Criminal History Improvement Program (NCHIP) grant program, if a state provides at least 90 percent of its records identifying persons in specified prohibited categories. Second, the Act authorizes grant programs described herein, which, pursuant to the Act, are being administered consistent with NCHIP, for state executive and judicial agencies to establish and upgrade information automation and identification technologies for timely submission of final criminal record dispositions and other information relevant to NICS checks. Finally, the Act provides for discretionary and mandatory Byrne Justice Assistance Grant (JAG) program grant penalties, beginning 3 years after enactment, for non-compliance with specified record completeness requirements within certain timeframes: after 3 years, 3 percent may be withheld in the case of less than 50 percent completeness; after 5 years, 4 percent may be withheld in the case of less than 70 percent completeness; and after 10 years, 5 percent shall be withheld in the case of less than 90 percent completeness (although the mandatory reduction can be waived if there is substantial evidence of the state making a reasonable effort to comply).

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

The Act outlines the allowable uses of grant funds:

Grants to States:

Section 103 of the NICS Improvement Act, regarding implementation assistance to the states, provides that the grants "shall be used by the States and Indian tribal governments, in conjunction with units of local government and State and local courts, to establish or upgrade information and identification technologies for firearms eligibility determinations." In accordance with the Act, a grant to a state, territory or Indian tribes may only be used to:

Create electronic systems, which provide accurate and up-to-date information

which is directly related to checks under the NICS, including court disposition and corrections records;

Assist states in establishing or enhancing their own capacities to perform NICS background checks;

Supply accurate and timely information to the Attorney General concerning final dispositions of criminal records to databases accessed by NICS;

Supply accurate and timely information to the Attorney General concerning the identity of persons who have a federally prohibiting mental health adjudication or commitment;

Supply accurate and timely court orders and records of misdemeanor crimes of domestic violence for inclusion in federal and state law enforcement databases used to conduct NICS background checks;

Collect and analyze data needed to demonstrate levels of state compliance with the Act; and

Maintain the required relief from disabilities program in accordance with the Act however, not less than 3 percent and no more than 10 percent of each grant shall be used for this purpose.

State Court Grants

Section 301 of the Act provides that grants shall be made to each state and territory, consistent with the states plans for the integration, automation, and accessibility of criminal history records, for use by the court systems to improve automation and transmittal to federal and state repositories of: (1) criminal history dispositions; (2) records relevant to determining whether a person has been convicted of a misdemeanor crime of domestic violence or a prohibiting domestic violence protection order; and (3) prohibiting mental adjudications and commitments. Further, the law provides that the amounts granted shall be used by the state court system only to:

Carry out, as necessary, assessments of the capabilities of state courts to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories; and

Implement policies, systems, procedures to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories.

Applicant Eligibility:

Applications must be submitted by (a) the agency designated by the Governor to administer the National Criminal History Improvement Program (NCHIP); (b) the state or territory central administrative office or similar entity designated by statute or regulation to administer federal grant funds on behalf of the jurisdiction's court system; or (c) a federally recognized Indian tribal government.

Beneficiary Eligibility:

In accordance with the NICS Improvement Amendments Act (see 18 U.S.C. 922 note), there are two specific conditions that each state must satisfy before being eligible to receive grants:

1. First, each State shall provide the Attorney General with a reasonable estimate, as calculated by a method determined by the Attorney General of the number of the records subject to the NIAA completeness requirements. (Id.)
2. Second, to be eligible for a grant under this [program], a State shall certify, to the satisfaction of the Attorney General, that the State has implemented a relief from disabilities program. (Id.)

For the purpose of this solicitation, a relief from disabilities program is a program that permits persons who have been adjudicated a mental defective or committed to a mental institution to obtain relief from the firearms disabilities imposed by law as a result of such adjudication or commitment. This relief must be based on a finding, in accordance with principles of due process, by a state court, board, commission, or other lawful authority, that the circumstances of the disability and the persons record and reputation are such that the person will not be likely to act in a manner dangerous to the public safety and that the granting of relief would not be contrary to the public interest. The certification form is available on the ATF website at www.atf.gov/forms/download/atf-f-3210-12.pdf. For further information, please visit NICS Improvement Act Questions and Answers on the BJS website.

Further, applications submitted on behalf of state court systems must specifically assure that: (1) the court system has the capability to contribute and will transmit pertinent information to the NICS established under section 103(b) of the Brady Handgun Violence Prevention Act (18 U.S.C. 922 note), and (2) that it will coordinate the programs proposed for NARIP funding with other federally funded information technology programs, including directly funded local programs.

Credentials/Documentation:

The applicant must furnish all documentation required by the program solicitation, along with the application for an award, including; a detailed budget, a budget narrative, and a program narrative describing how funds would be utilized. Applicants must also furnish a NICS Record Improvement Plan as part of the application which reflects (a) the formation of a NICS Record Improvement Task Force, an assessment of the quality and availability of qualifying NICS records in the State, obstacles preventing full and complete transmission to the NICS of the available records, and strategies planned to address such challenges and achieve completeness goals.

Regarding the question below relating to the applicability of 2 CFR 200, Subpart E Cost Principles: The cost principles are generally applicable, except with respect to for-profit entities or to organizations listed at Appendix VIII to 2 CFR Part 200. 2 CFR 200, Subpart E - Cost Principles applies to this program.

16.820 POSTCONVICTION TESTING OF DNA EVIDENCE

Kirk Bloodsworth Program

FEDERAL AGENCY:

National Institute of Justice, Department of Justice

AUTHORIZATION:

An act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

This program offers assistance to States, units of local government, and public institutions of higher education (including tribal institutions of higher education), to help defray the costs associated with postconviction case review, evidence location, and DNA testing in violent felony cases where actual innocence might be demonstrated. This supports the DOJ mission to ensure fair and impartial administration of justice for all Americans. While successful exonerations to correct injustice are notable program outcomes, the careful

review, consideration and closing of cases subjected to postconviction DNA testing that do not ultimately demonstrate innocence also work to advance the public interest that justice has been fairly applied. Funding may be used to review postconviction cases of violent felony offenses (as defined by State law), and to locate and conduct DNA analysis of biological evidence samples associated with these cases. Where a strong justification is provided, a small percentage of Federal award funds may be used for permissible case identification activities.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Funds may be used to acquire laboratory supplies for DNA analysis of biological evidence; pay overtime for people directly engaged in case review, location of evidence, or DNA analysis of biological evidence; to hire consultants and/or temporary contract staff to conduct case reviews, locate evidence, or conduct DNA analysis of biological evidence; for contracts with accredited fee-for-service vendors to conduct DNA analysis of biological evidence; to upgrade, replace, lease, or purchase computer hardware or software that will be used exclusively for case review, location of evidence, or DNA analysis of biological evidence; for salaries and benefits of additional full- or part-time employees to the extent such employees are directly engaged in case review, location of evidence, or DNA analysis of biological evidence; and, in limited cases, for case identification activities. Funds may not be used for salaries and benefits for victim advocacy services; laboratory equipment; construction; renovation; costs for postconviction relief litigation, after DNA testing of biological evidence has been completed; or outreach and initial screening activities not included in case identification.(as this term is defined in the program announcement).

Applicant Eligibility:

Eligible applicants are States, units of local government, and public institutions of higher education (including tribal institutions of higher education). For the purposes of agency program announcements, the term State includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands.

Beneficiary Eligibility:

Ensures the availability of fair and impartial administration of justice to Americans who may have been unjustly convicted.

Credentials/Documentation:

If an award is made, prior to receiving award funds an applicant must submit an express certification from the chief legal officer of the State (typically the Attorney General) that the State:

- i. Provides postconviction DNA testing of specified biological evidence under a State statute, or under State rules, regulations, or practices, to persons convicted after trial and under a sentence of imprisonment or death for a State offense of murder or forcible rape, in a manner intended to ensure a reasonable process for resolving claims of actual innocence.
- ii. Preserves biological evidence secured in relation to the investigation or prosecution of a State offense of murder or forcible rape, under a State statute, local ordinances, or State or local rules, regulations, or practices, in a manner intended to ensure that reasonable measures are taken by all jurisdictions within the State to preserve such evidence.

Any certification that is submitted must be personally executed by the chief legal officer of the State after a determination that the certification may properly be made. While it may be submitted with the application package, submission of this certification is not required at the time of application. If an award is made, access to award funds will be withheld until this certification is received and approved by NIJ.

Applicants proposing postconviction DNA testing projects involving cases outside of the applicants State are to provide (prior to receiving award funds) the express certification described above executed by the chief legal officer of the appropriate State for each State for which postconviction cases are sought to be funded in response to the program announcement.

Specifically, the initiative supports implementation of the principles outlined in the OJJDP report, Emergency Planning for Juvenile Justice Residential Facilities (www.ncjrs.gov/pdffiles1/ojjdp/234936.pdf). This report is targeted to state, county, and local juvenile justice authorities charged with the custodial care and supervision of youth in the juvenile justice system, with particular focus on those authorities who oversee residential treatment and correctional and detention facilities that house juveniles via court-ordered placements. The principles outlined in this document may also apply to emergency planning for youth in out-of-home placement.

16.825 SMART PROSECUTION INITIATIVE

Smart Prosecution

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

An act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The Smart Prosecution Initiative builds off of the lessons learned from BJAs other SMART Suite programs and seeks to pair action researchers with prosecutor offices to develop solutions such as hot spot strategies, sophisticated crime analysis, offender-based policies, and risk and needs assessment that create prosecution strategies in an effort to break down information silos, advance communities, improve public trust and confidence in the justice system, and increase public safety.

As prosecutors implement innovative, best practices or evidenced-based approaches to address the goals listed below, there is a need to evaluate their efforts. The Smart Prosecution Initiative seeks to encourage exploration of new solutions to public safety concerns, as well as internal operations and organizational structure, while employing research partners at the problem definition stage through assessment of strategies and solutions. Some creative solutions developed by prosecutors around the country include changing how their organizations prioritize cases, using zone/geographic prosecution, using crime analysis tools to reduce gun violence, nuisance abatement, crime prevention through environmental design, drug-free and prostitute-free zones, restorative justice, community courts, truancy abatement, diversion programs, crime analysis, and cyber-crime strategies to improve public safety. Prosecutors are becoming partnership builders who bring the police, the community, and other criminal justice and local agencies together to find ways they can work together to solve problems in their jurisdictions.

The goal of Smart Prosecution is to develop a body of knowledge about data-driven strategies innovative, best practice, or evidenced-based as they are implemented by prosecutors. BJA sought applications from state, local, or tribal prosecutor agencies interested in testing data-driven approaches that address one or more of the following three goals:

- Promoting fair, impartial, and expeditious pursuit of justice;
- Ensuring safe communities; and
- Promoting integrity in the prosecution profession and effective coordination in the criminal justice system.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

Funding is for site-based awards and training and technical assistance (TTA). Funds may be used to test data-driven strategies innovative, best practice, or evidenced-based as they are implemented by prosecutors. Smart Prosecution applicants will identify a problem to be addressed and enlist a local research partner to help assess the effectiveness of their Smart Prosecution effort.

Applicant Eligibility:

Site-based-- Eligible applicants are limited to state, local, and tribal prosecutor agencies or a government agency acting as fiscal agent for the applicant.

TTA-- Eligible applicants are limited to for-profit (commercial) organizations, nonprofit organizations, and institutions of higher learning that support national initiatives to improve the functioning of the criminal justice system. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2016: Kings County District Attorneys Office (Brooklyn)

PROJECT: The Brooklyn Young Adult Justice Initiative

As of June 23, the site reports 1,781 open cases pending in the Adolescent Diversion Court, which offers diversion instead of prosecution for young adults, 16-24 years old, charged with misdemeanor offenses, who are at the greatest risk for re-offending and/or are facing more serious criminal consequences.

Two Assistant District Attorneys joined the Bureau since June, bringing the total number of prosecutors in the unit up to five.

San Diego City Attorneys Office

PROJECT: The Community Justice Initiative (CJI)

CJI uses data and evidence-based practices to restore justice and increase effectiveness and efficiency through a post-plea, city-wide diversion initiative to provide accountability, early intervention, and swift consequences for participants charged with eligible misdemeanor offenses.

As of June 30, the site reports that: 3,943 offers made; 2,650 offers accepted; 1,293 offers rejected; 2,048 offers completed; and 423 participants failed out of the program. These numbers reflect enrollment since November 2016. The site has also completed 224 CJI Proxy Risk Screenings and 61 CJI assessments.

The site received its software platform/kiosk for client screening. The kiosks will electronically administer the proxy screen to determine high, medium, or low risk scores for program participants (a case manager previously conducted the risk assessment). The site is working with the courthouse for installation, and expects the kiosks to be up and running by September. The site is also building new software for the kiosks.

District of Columbia Office of the Attorney General

PROJECT: Using Our Brains: Reducing Recidivism among Youth and Young Adults

The site is furthering collaboration with the DC US Attorneys Office (USAO). Both offices plan to develop a diversion-based initiative, using restorative justice, for youth (ages 12-17) and young adults (ages 18-24) who commit certain crimes, such as theft, destruction of property and non-injury simple assault cases with victim consent. The team is evaluating USAO data for program development.

The site hired a restorative justice coordinator and two facilitators who will staff their restorative justice panels. The site team, partners, and office staff will receive ongoing support and assistance for program implementation and

restorative justice training from the Baltimore Community Conferencing Center.

Jackson County Prosecutors Office (Kansas City)
PROJECT: Jackson County Prosecutors Office Smart Prosecution Initiative

The sites geographic-based initiative targets the East Zone, the most violent area within Kansas City. Team members will collaborate with law enforcement, community partnership specialists, and community members to assess crime-related problems in the East Zone and implement strategies to address them.

A system for hot spot cases has been developed. The site has access to sophisticated mapping software.

The Essex County Prosecutors Office (Newark)
PROJECT: Essex County SMART Social Media Initiative

A specialized unit has been developed to investigate and prosecute cases based on suspects usage of social media. The site envisions a systematic, proactive approach to social-media mining that will reduce crime, empower victims, promote fair and impartial justice, and instill the publics confidence in criminal justice.

Since the beginning of the initiative, the team has experienced successful identification hearings where witnesses and victims identify defendants without law enforcement involvement. The site continues to educate the judges about this process. The site continues screening about 3-6 potential cases per week, and reports that most cases have social media connections, due to witnesses initially identifying defendants through social media. Since June, the site has 19 confirmed cases in the treatment group, and another 50 tentative cases.

District Attorney of Chatham County (Savannah)
PROJECT: The Chatham County Smart Prosecution Program

The initiative aims to reduce gun, local group, and gang violence by focusing on: identifying and targeting a geographic hot spot for gun violence in the Savannah area and most violent offenders within it; tracking and prioritizing prosecution and individuals within the hot spot; diverting non-essential cases (e.g., theft and simple drug possession) to alternative programs; and, engaging with community groups within the hot spot through meetings, social media forums, and other outreach strategies. As of June 26, there are 19 active cases in the target zone area, including both new charges and probation violations. Total cases including active and disposed cases have reached 30. The sites goal is to reach 50 active cases soon.

The site continues its work with engaging community members, by attending neighborhood association meetings. The program End Violence Now is now housed under the District Attorneys office; this move will promote community engagement and allow team members to work directly with the Youth Intercept Program.

The sites researchers at Georgia Southern University are developing a process evaluation tool. The researchers are also creating one-page briefs on certain topics (such as policing hot spots) that can be quickly digested and used by practitioners. The researchers are currently focusing on social network analysis and spatial analysis, and have recently received data from the Savannah Area Regional Intelligence Center. 16.827 JUSTICE REINVESTMENT INITIATIVE

JRI

FEDERAL AGENCY:

Bureau of Justice Assistance, Department of Justice

AUTHORIZATION:

An act appropriating funds for the Department of Justice in the current fiscal year.

OBJECTIVES:

The Justice Reinvestment Initiative employs a data-driven approach to improve public safety, reduce corrections and related criminal justice spending, and reinvest savings in strategies that can decrease crime and strengthen neighborhoods. JRI provides technical assistance and competitive financial support to states, counties, cities, and tribal authorities that are either currently engaged in justice reinvestment or are well positioned to undertake such work.

JRI technical assistance supports states justice system stakeholders and policy leaders as they devise and implement data-driven approaches to criminal justice reform. Under the JRI model, a governmental working group with bipartisan and inter-branch representation analyzes the correctional population and its costs, develops cost-effective policy options, and implements reforms to manage correctional populations while enhancing public safety. JRI jurisdictions reinvest these cost savings into high-performing initiatives that make communities safer. In addition to reducing prison populations, justice reinvestment encourages states to embrace a culture of greater collaboration, data-driven decision-making, and increased use of evidence-based practices.

States may also compete for direct funding through the Justice Reinvestment Initiative: Maximizing State Reforms program which is designed to cement or amplify the goals of states justice reinvestment reform efforts, deepening their investment in and commitment to and use of data-driven decision-making and evidence-based practices and programs. The objectives of the Maximizing State Reforms program are the following:

Increase corrections costs saved or avoided by reducing unnecessary confinement.

Increase reinvestment in evidence-based practices that reduce recidivism. Support justice reinvestment reform efforts by promoting and increasing collaboration among agencies and officials who work in criminal justice, including state and local policymakers, law enforcement, prosecution, defense, pretrial, courts, probation, treatment, corrections, reentry, and parole.

Enhance the translation of evidence into practice by supporting the use of data analysis results to inform policy decisions.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Engagement of stakeholders across branches of government, political parties, and key special interest groups such as victim advocates, prosecutors, etc. Analysis of data to identify criminal justice population and cost drivers. Development of policy framework that leads to enacted JRI legislation at the state level.

Implementation of JRI legislation through high-performing programs and strategies to reduce incarceration costs and increase public safety.

Measurement of implementation of JRI strategy and reinvestment. Other technical assistance to support evidence-based strategies to improve public safety consistent with JRI principles.

Applicant Eligibility:

Eligible applicants are units of state government and federally recognized Indian tribal governments (as determined by the Secretary of the Interior) that can demonstrate substantial completion of the Justice Reinvestment Initiative model.

Beneficiary Eligibility:

See the current fiscal years solicitation available at the Office of Justice Programs web site at <https://ojp.gov/funding/Explore/CurrentFundingOpportunities.htm>.

Credentials/Documentation:

The application must include: Application for Federal Assistance (Standard Form 424); Program Abstract; Program Narrative; Budget and Budget Narrative. 2 CFR 200, Subpart E - Cost Principles applies to this program.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

Applicants must submit completed applications via the Office of Justice Programs, Grants Management System or through grants.gov following established criteria. Award Procedure:

Upon approval by the Assistant Attorney General (for science offices, would be the Director of the applicable Office), successful applicants are notified via the Grants Management System. One copy of the grant award must be signed by the authorized official and returned to the Office of Justice Programs.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 90 to 120 days. See the current fiscal years solicitation available at the Office of Justice Programs web site <https://ojp.gov/funding/Explore/CurrentFundingOpportunities.htm>.

Appeals:

From 90 to 120 days. There are no appeal rights for rejection of a discretionary application. Please see 28 CFR Part 18.

Renewals:

From 90 to 120 days. Yes, a grant can be supplemented or granted a no-cost extension, subject to BJA policy and contingent upon available appropriation.

Formula and Matching Requirements:

This program has no statutory formula.

This program has no matching requirements. For direct grants to states, if a state has measured and reinvested savings (either projected or actual costs saved or avoided) into evidence-based strategies to reduce recidivism and make communities safer (see Selection Criteria outlined in the Solicitation for specifics), this solicitation does not require a match. If such a state proposes a voluntary match amount, however, and OJP approves the budget, the total match amount incorporated into the approved budget becomes mandatory and subject to audit.

If a state has not measured and reinvested savings (see Selection Criteria outlined in the Solicitation for specifics), a match is required, and the following requirements apply:

The amount of the match must equal the amount of federal funds being sought.

Match funds are subject to the same regulations and restrictions as the federal

funds for this program.

Applicants must identify the source of the non-federal funds and how they will use the funds. If a successful applicant's proposed match exceeds the required match amount, and OJP approves the budget, the total match amount incorporated into the approved budget becomes mandatory and subject to audit.

Applicants may satisfy this match requirement with cash, in-kind services, or a combination of the two.

Match funds must be used for one or more of the states reinvestment strategies identified in the justice reinvestment process. For example, match funding can be used to expand or improve community-based treatment only if the JRI legislation or task force identified community-based treatment as a reinvestment priority. As another example, match funding could be used for skills-based trainings for probation officers if the states reinvestment strategies included more effective community supervision.

Applicants must identify the target(s) of the reinvestment match with specificity, including, if applicable, names of agencies, service providers, or staff positions to be funded; a description of the kind of service to be provided or functions to be performed; what period of time will be covered; and amounts of funding. Applicants must document these commitments by including relevant attachments to the application. Example: For a federal award amount of \$1,750,000, the required reinvestment match is \$1,750,000. MOE requirements are not applicable to this program.
